

Energy Transfer Co-CEO Tom Long Named to Manufacturers Association Board of Directors

September 26, 2022

Washington, D.C. – The National Association of Manufacturers announced that Thomas Long, Co-CEO of Energy Transfer LP, has been named to the NAM Board of Directors. Long will join the NAM Board to bolster the association's leadership in policy advocacy, legal action, workforce solutions, operational excellence and news and insights. He will help the industry advance a manufacturing competitiveness agenda that promotes opportunity and prosperity for all Americans.

Founded in 1895, the NAM, guided by its Board of Directors, is the largest industrial trade association in the United States, with more than 14,000 members. The NAM is the nation's most influential manufacturing advocate, and its membership includes some of the world's most iconic brands and many of the small manufacturers that power the U.S. economy. Approximately 90% of the NAM's members are small and medium -sized businesses.

The NAM is a one-stop shop for manufacturers, telling the story of our industry and equipping manufacturers with invaluable resources through our news and insights channels and partnerships with the Manufacturing Leadership Council, The Manufacturing Institute and the Innovation Research Interchange.

The NAM and its members are at the forefront of every important policy debate, focusing on solutions to help the industry compete in the global economy and to help the country address challenges ranging from supply disruptions and inflation to the workforce crisis and energy security. Executives on the NAM Board, which comprises leaders representing companies of all sizes in every industrial sector, are the driving force behind the NAM's efforts.

"I am honored to be a member of the NAM Board," said Long. "As one of the largest transporters of petroleum products in the U.S., Energy Transfer is aligned closely with our country's critical manufacturing sector. Our business would not be possible without the manufacturers that provide the materials we need to construct and operate our assets. We must all work together to fight for policies that will ensure the continued success of our manufacturers. Our policies need to focus on strengthening our economy and creating more opportunities for working families."

Board members play a key role in the NAM and the MI's Creators Wanted campaign, a member-driven initiative to inspire, educate and empower more Americans to pursue careers in modern manufacturing—and to shift perceptions about careers in the industry. The campaign, which supports MI programs for students, women, veterans and other underrepresented communities and features a first-of-its-kind mobile experience and tour, seeks to cut the skills gap by 600,000 workers by 2025 and increase the number of students enrolling in technical schools, vocational schools and apprenticeships by 25%, as well as the number of parents who would encourage their children to pursue a career in modern manufacturing to 50% from 27%.

Tom is a recognized leader in our industry, and the NAM will be stronger thanks to his service on our Board of Directors," **said NAM President and CEO Jay Timmons.** "Tom will be a trusted adviser who guides our efforts to overcome current economic challenges and to lay the foundation for long-term growth, allowing the industry to innovate and improve the quality of life for everyone. We will work with lawmakers to strengthen supply chains, expand trading opportunities, grow the manufacturing workforce, reform our immigration system, advance energy security, defend tax reform, ensure a smart regulatory system and more. I look forward to working together to advocate for the men and women of our industry and advance the values that have made America exceptional and our industry strong—free enterprise, competitiveness, individual liberty and equal opportunity."

-Energy Transfer LP

Energy Transfer LP (NYSE: ET) owns and operates one of the largest and most diversified portfolios of energy assets in North America, with a strategic footprint in all of the major U.S. production basins. Energy Transfer is a publicly traded limited partnership with core operations that include complementary natural gas midstream, intrastate and interstate transportation and storage assets; crude oil, natural gas liquids (NGL) and refined product transportation and terminalling assets; and NGL fractionation.
