

UNITED STATES  
SECURITIES AND EXCHANGE COMMISSION  
Washington, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934  
For the fiscal year ended DECEMBER 31, 2025

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934  
Commission file number 1-32740

ENERGY TRANSFER LP

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of incorporation or organization)

30-0108820

(I.R.S. Employer Identification No.)

8111 Westchester Drive, Suite 600, Dallas, Texas 75225

(Address of principal executive offices) (zip code)

Registrant's telephone number, including area code: (214) 981-0700

Securities registered pursuant to Section 12(b) of the Act:

| Title of each class                                  | Trading Symbol(s) | Name of each exchange on which registered |
|--|-------------------|---|
| Common Units   | ET                | New York Stock Exchange                   |
| 9.250% Series I Fixed Rate Perpetual Preferred Units | ETprI             | New York Stock Exchange                   |

Securities registered pursuant to section 12(g) of the Act: **None**

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes  No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes  No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer  Accelerated filer  Non-accelerated filer  Smaller reporting company  Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report.

If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statements.

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrant's executive officers during the relevant recovery period pursuant to §240.10D-1(b).

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes  No

The aggregate market value as of June 30, 2025, of the registrant's Common Units held by non-affiliates of the registrant, based on the reported closing price of such Common Units on the New York Stock Exchange on such date, was \$55.98 billion.

As of February 13, 2026, the registrant had 3,440,314,575 Common Units outstanding.

## Definitions

The following is a list of certain acronyms and terms used throughout this document:

|                                 |   |
|---------------------------------|---|
| /d                              | per day   |
| Adjusted EBITDA                 | a non-GAAP measure defined as earnings before interest, taxes, depreciation, depletion, amortization and other non-cash items, as further described in “Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations – Results of Operations”  |
| AOCI                            | accumulated other comprehensive income  |
| AROs                            | asset retirement obligations  |
| BBtu                            | billion British thermal units   |
| Bcf                             | billion cubic feet  |
| Btu                             | British thermal unit, an energy measurement used by gas companies to convert the volume of gas used to its heat equivalent, and thus calculate the actual energy content  |
| Capacity                        | capacity of a pipeline, processing plant or storage facility refers to the maximum capacity under normal operating conditions and, with respect to pipeline transportation capacity, is subject to multiple factors (including natural gas injections and withdrawals at various delivery points along the pipeline and the utilization of compression) which may reduce the throughput capacity from specified capacity levels |
| Citrus                          | Citrus, LLC, a 50/50 joint venture which owns FGT   |
| Common Units                    | Common units representing limited partner interests in the Partnership  |
| Crestwood                       | Crestwood Equity Partners LP  |
| Dakota Access                   | Dakota Access, LLC, a non-wholly owned subsidiary of Energy Transfer  |
| DOE                             | United States Department of Energy  |
| DOJ                             | United States Department of Justice   |
| DOT                             | United States Department of Transportation  |
| Energy Transfer GC NGL          | Energy Transfer GC NGLs LLC, formerly Lone Star NGL LLC, a wholly owned subsidiary of Energy Transfer   |
| Energy Transfer Preferred Units | Collectively, the Series A Preferred Units, Series B Preferred Units, Series C Preferred Units, Series D Preferred Units, Series E Preferred Units, Series F Preferred Units, Series G Preferred Units, Series H Preferred Units and Series I Preferred Units   |
| Energy Transfer R&M             | Energy Transfer (R&M), LLC (formerly Sunoco (R&M), LLC)   |
| EPA                             | United States Environmental Protection Agency   |
| ETC Sunoco                      | ETC Sunoco Holdings LLC (formerly Sunoco, Inc.), a wholly owned subsidiary of Energy Transfer   |
| ET-S Permian                    | a joint venture between Energy Transfer and Sunoco LP, with Energy Transfer holding a 67.5% interest and Sunoco LP holding the remaining 32.5% interest   |
| ETO                             | Energy Transfer Operating, L.P., formerly a non-wholly owned subsidiary of Energy Transfer until its merger into the Partnership in April 2021  |
| ETP Holdco                      | ETP Holdco Corporation, a wholly owned subsidiary of Energy Transfer  |
| Exchange Act                    | Securities Exchange Act of 1934, as amended   |
| Explorer                        | Explorer Pipeline and/or Explorer Pipeline Company  |
| FEP                             | Fayetteville Express Pipeline LLC   |
| FERC                            | United States Federal Energy Regulatory Commission  |
| FGT                             | Florida Gas Transmission Pipeline and/or Florida Gas Transmission Company, LLC, a wholly owned subsidiary of Citrus   |
| GAAP                            | accounting principles generally accepted in the United States of America  |
| General Partner                 | LE GP, LLC, the general partner of Energy Transfer  |
| IDRs                            | incentive distribution rights   |
| IFERC                           | Inside FERC’s Gas Market Report   |
| IRS                             | United States Internal Revenue Service  |

### **Forward-Looking Statements**

Certain matters discussed in this annual report, excluding historical information, as well as some statements by Energy Transfer LP (the “Partnership” or “Energy Transfer”) in periodic press releases and some oral statements of the Partnership’s officials during presentations about the Partnership, include forward-looking statements. These forward-looking statements are identified as any statement that does not relate strictly to historical or current facts. Statements using words such as “anticipate,” “project,” “expect,” “plan,” “goal,” “forecast,” “estimate,” “intend,” “continue,” “could,” “believe,” “may,” “will” or similar expressions help identify forward-looking statements. Although the Partnership and its General Partner believe such forward-looking statements are based on reasonable assumptions and current expectations and projections about future events, no assurance can be given that such assumptions, expectations or projections will prove to be correct. Forward-looking statements are subject to a variety of risks, uncertainties and assumptions. If one or more of these risks or uncertainties materialize, or if underlying assumptions prove incorrect, the Partnership’s actual results may vary materially from those anticipated, estimated, projected, forecasted, expressed or expected in forward-looking statements since many of the factors that determine these results are subject to uncertainties and risks that are difficult to predict and beyond management’s control. For additional discussion of risks, uncertainties and assumptions, see “Item 1A. Risk Factors” included in this annual report.

## **PART I**

### **ITEM 1. BUSINESS**

#### **Overview**

Energy Transfer LP is a Delaware limited partnership with common units publicly traded on the NYSE under the ticker symbol “ET.”

Unless the context requires otherwise, references to “we,” “us,” “our,” the “Partnership” and “Energy Transfer” mean Energy Transfer LP and its consolidated subsidiaries, which include SunocoCorp, Sunoco LP and USAC.

The primary activities in which we are engaged, which are located in the United States, are as follows:

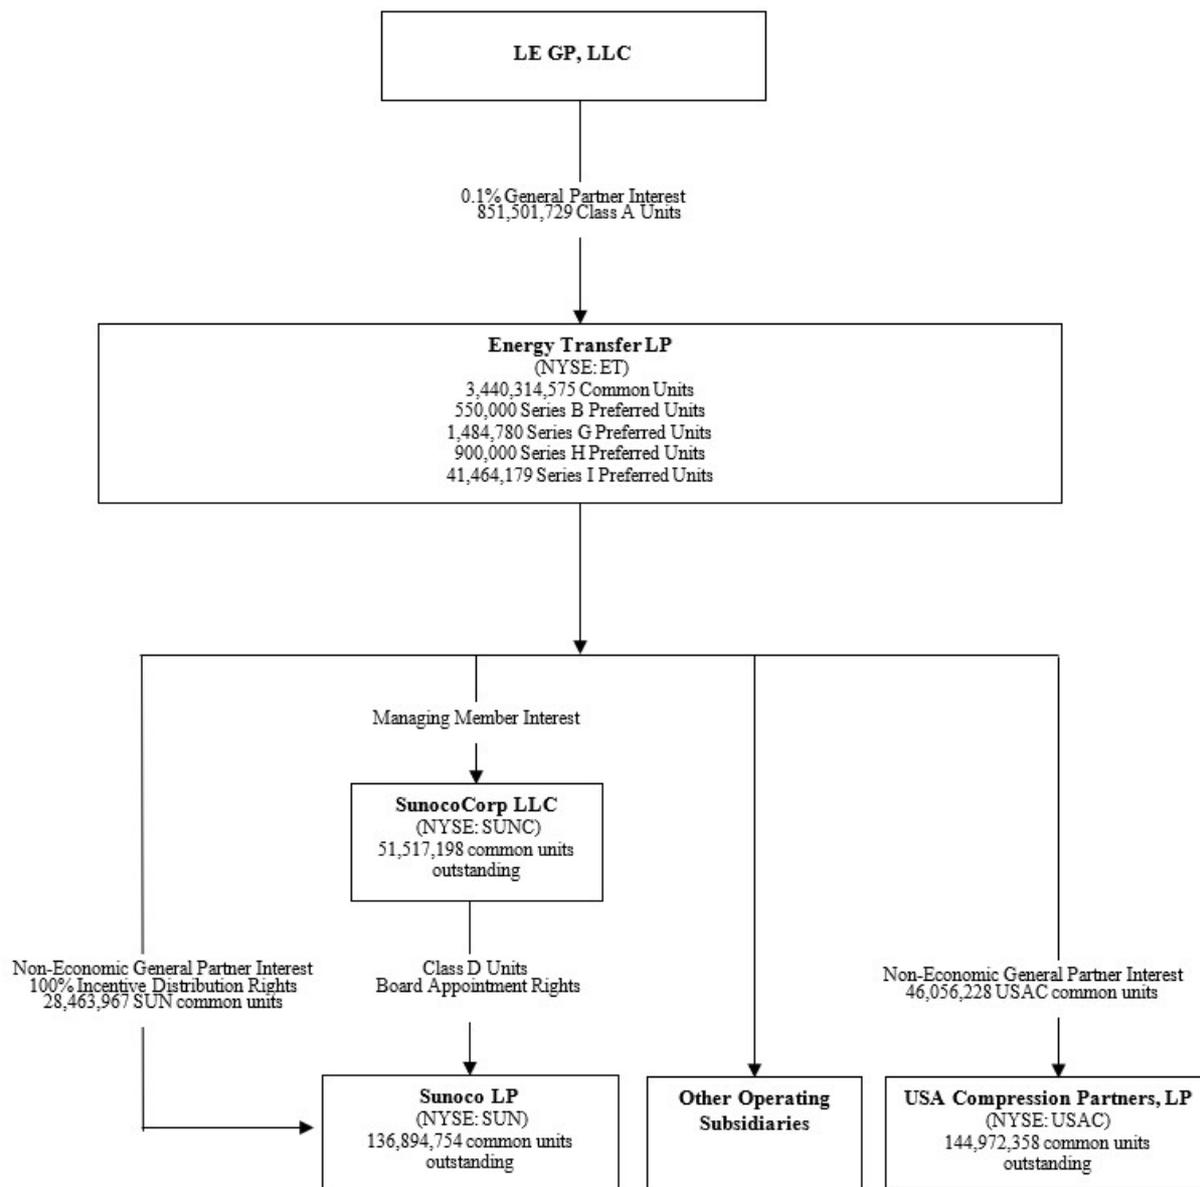

- natural gas operations, including the following:
  - natural gas midstream and intrastate transportation and storage;
  - interstate natural gas transportation and storage; and
- crude oil, NGL and refined products transportation, terminalling services and acquisition and marketing activities, as well as NGL storage and fractionation services and LNG regasification.

In addition, we own investments in other businesses, including Sunoco LP and USAC, both of which are master limited partnerships, and we own the managing member of SunocoCorp, a publicly traded limited liability company.

Energy Transfer derives cash flows from distributions related to its investment in its subsidiaries, including Sunoco LP and USAC. The amount of cash that our subsidiaries distribute to us is based on earnings from their respective business activities and the amount of available cash. Energy Transfer’s primary cash requirements are for distributions to its partners, capital expenditures, general and administrative expenses and debt service requirements. Energy Transfer distributes its available cash remaining after satisfaction of the aforementioned cash requirements to its Unitholders on a quarterly basis.

We expect our subsidiaries to utilize their resources, along with cash from their operations, to fund their announced growth capital expenditures and working capital needs; however, Energy Transfer may issue debt or equity securities from time to time as we deem prudent to provide liquidity for new capital projects of our subsidiaries or for other partnership purposes.

The following chart summarizes our organizational structure as of February 13, 2026. For simplicity, certain entities and ownership interests have not been depicted.

**Segment Overview**

See Note 16 to our consolidated financial statements included in “Item 8. Financial Statements and Supplementary Data” for additional financial information about our segments.

**Intrastate Transportation and Storage Segment**

Intrastate natural gas transportation pipelines receive natural gas from other mainline transportation pipelines, storage facilities and gathering systems, and deliver the natural gas to industrial end-users, storage facilities, utilities, power generators and other third-party pipelines. Through our intrastate transportation and storage segment, we own and operate (through wholly owned subsidiaries or through joint venture interests) approximately 12,200 miles of intrastate natural gas transportation pipelines with approximately 24 Bcf/d of transportation capacity, three natural gas storage facilities located in Texas and two natural gas storage facilities located in Oklahoma.

Energy Transfer operates one of the largest intrastate pipeline systems in the United States, which provides energy logistics to major trading hubs and industrial consumption areas throughout the country. In Texas, our intrastate transportation and storage segment provides transportation of natural gas to major markets from various prolific natural gas producing areas in Texas and Louisiana (Permian Basin and Barnett, Haynesville and Eagle Ford shales) through our Oasis Pipeline, Katy Pipeline, Lobo Pipeline, RIGS and Pelico Pipeline as well as our two natural gas pipeline and storage systems: ET Fuel and HPL. In Oklahoma, we operate Enable Oklahoma Intrastate Transmission, which delivers natural gas from various shale plays in the Anadarko and Arkoma basins, as further described in “Asset Overview.”

We also own a 70% interest in Red Bluff Express Pipeline, which owns a pipeline in the Delaware Basin, and 16% membership interests in Comanche Trail Pipeline and Trans-Pecos Pipeline, which own pipelines delivering natural gas from the Waha Hub to the United States/Mexico border.

Our intrastate transportation and storage segment’s results are determined primarily by the amount of capacity our customers reserve as well as the actual volume of natural gas that flows through the transportation pipelines. Under transportation contracts, our customers are charged (i) a demand fee, which is a fixed fee for the reservation of an agreed amount of capacity on the transportation pipeline for a specified period of time and which obligates the customer to pay a fee even if the customer does not transport natural gas on the respective pipeline, (ii) a transportation fee, which is based on the actual throughput of natural gas by the customer, (iii) fuel retention based on a percentage of gas transported on the pipeline or (iv) a combination of the three, generally payable monthly.

We also generate revenues and margin from the sale of natural gas to electric utilities, independent power plants, local distribution companies, industrial end-users and marketing companies. Generally, we purchase natural gas from either the market (including purchases from our marketing operations) or from producers at the wellhead. To the extent the natural gas comes from producers, it is primarily purchased at a discount to a specified market price and typically resold to customers based on an index price. In addition, our intrastate transportation and storage segment generates revenues from fees charged for storing customers’ working natural gas in our storage facilities and from managing natural gas for our own account.

### **Interstate Transportation and Storage Segment**

Interstate natural gas transportation pipelines receive natural gas from supply sources including other transportation pipelines, storage facilities and gathering systems, and deliver the natural gas to industrial end-users and other pipelines. Through our interstate transportation and storage segment, we directly own and operate approximately 20,090 miles of interstate natural gas pipelines with approximately 20.1 Bcf/d of transportation capacity and another approximately 7,080 miles and 12.7 Bcf/d of transportation capacity through joint venture interests.

Our vast interstate natural gas network spans the United States from Florida to California and Texas to Michigan, offering a comprehensive array of pipeline and storage services. Our pipelines have the capability to transport natural gas from nearly all Lower 48 onshore and offshore supply basins to customers in the Gulf Coast, Southeast, Southwest, Midwest and Northeast United States as well as Canada. Through numerous interconnections with other pipelines, our interstate systems can access virtually any supply or market in the country. As discussed further herein, our interstate transportation and storage segment’s operations are regulated by the FERC, which has broad regulatory authority over the business and operations of interstate natural gas pipelines.

Lake Charles LNG, our wholly owned subsidiary, owns an LNG import terminal and regasification facility located on Louisiana’s Gulf Coast near Lake Charles, Louisiana. The import terminal has approximately 9.0 Bcf of above ground storage capacity and the regasification facility has a send-out capacity of 1.8 Bcf/d. Lake Charles LNG derives all of its revenue from a series of long-term contracts with a wholly owned subsidiary of Royal Dutch Shell plc (“Shell”).

Lake Charles LNG Export, our wholly owned subsidiary, was previously developing a natural gas liquefaction project at the site of our Lake Charles LNG import terminal and regasification facility. The project was expected to utilize existing dock and storage facilities owned by Lake Charles LNG located on the Lake Charles site.

From 2022 through 2025, Lake Charles LNG Export executed several LNG offtake agreements, which allowed either party to terminate the agreement if Lake Charles LNG Export did not satisfy specified conditions by a specified date. One of those conditions related to Lake Charles LNG Export making a “final investment decision” to proceed with the construction of the liquefaction project.

We were previously in discussions with several other parties for potential long-term LNG offtake and potential equity investments in the project. In December 2025, we announced the suspension of development of the Lake Charles LNG project in order to focus on allocating capital to our significant backlog of natural gas pipeline infrastructure projects that we believe provides superior risk/return profiles. Our management has determined that continued development of the project by Energy

Transfer is not warranted but we remain open to discussions with third parties who may have an interest in developing the project. In the event that a third party assumes the development of the project, it is unlikely that Energy Transfer would commit capital to the project; however, Energy Transfer would be interested in providing natural gas pipeline transportation capacity to a third party under a long term agreement to facilitate natural gas supply to the project.

As a result of Energy Transfer's announcement, several LNG offtake agreements have been terminated based on the nonsatisfaction of the condition related to making a final investment decision by the date specified in the applicable LNG offtake agreement. Other LNG offtake agreements that have not been terminated could be assumed by a third party which continues the development of the project.

The results from our interstate transportation and storage segment are primarily derived from the fees we earn from natural gas transportation and storage services.

### **Midstream Segment**

The midstream industry consists of natural gas gathering, compression, treating, dehydration and processing, and is generally characterized by regional competition based on the proximity of gathering systems and processing plants to natural gas producing wells and the proximity of storage facilities to production areas and end-use markets. Gathering systems generally consist of a network of small diameter pipelines and, if necessary, compression systems, that collect natural gas from points near producing wells and transports it to larger pipelines for further transportation.

Treating plants remove carbon dioxide and hydrogen sulfide from natural gas that is higher in carbon dioxide, hydrogen sulfide or certain other contaminants, to ensure that it meets pipeline quality specifications. Natural gas processing involves the separation of natural gas into pipeline quality natural gas, or residue gas, and a mixed NGL stream. Some natural gas produced by a well does not meet the pipeline quality specifications established by downstream pipelines or is not suitable for commercial use and must be processed to remove the mixed NGL stream. In addition, some natural gas can be processed to take advantage of favorable margins for NGLs extracted from the gas stream.

Through our midstream segment, we own and operate (through wholly owned subsidiaries or joint venture interests) natural gas gathering pipelines, natural gas processing plants, natural gas treating facilities and natural gas conditioning facilities with an aggregate processing capacity of approximately 13.5 Bcf/d. Our midstream segment focuses on the gathering, compression, treating, blending and processing of natural gas, and our operations are currently concentrated in major producing basins and shales in Texas, New Mexico, West Virginia, Pennsylvania, Ohio, Oklahoma, Arkansas, Kansas, Louisiana, North Dakota and Wyoming. Many of our midstream assets are integrated with our intrastate transportation and storage assets as well as our NGL assets.

Our midstream segment's results are derived primarily from margins we earn from natural gas volumes that are gathered, transported, purchased and sold through our pipeline systems and the natural gas and NGL volumes processed at our processing and treating facilities.

### **NGL and Refined Products Transportation and Services Segment**

Our NGL and refined products operations transport, store and execute acquisition and marketing activities utilizing a complementary network of pipelines, storage and blending facilities as well as strategic offtake locations that provide access to multiple markets.

Our NGL and refined products transportation and services segment includes:

- approximately 5,750 miles of NGL pipelines;
- our Nederland Terminal and connecting pipelines which provide transportation of ethane, propane, butane, natural gasoline and ethylene from our Mont Belvieu NGL Complex to our Nederland Terminal, where these products can be exported;
- our Marcus Hook Terminal which includes fractionation, storage and exporting assets. This facility is connected to our Mariner East Pipeline System, which provides for the transportation of ethane and liquefied petroleum gas ("LPG") products from western Pennsylvania, West Virginia and eastern Ohio to our Marcus Hook Terminal where these component products can be exported, processed or locally distributed;
- NGL fractionation facilities at our Mont Belvieu NGL Complex with an aggregate capacity of 1.15 MMBbls/d;
- NGL storage facilities at our Mont Belvieu NGL Complex with a working storage capacity of approximately 63 MMBbls; and
- other NGL storage assets with an aggregate storage capacity of approximately 37 MMBbls.

Our NGL pipelines primarily transport NGLs from the Permian Basin, the Barnett and Eagle Ford shales to Mont Belvieu, Texas. In the Northeast, our NGL pipelines transport from the Marcellus and Utica shales to our Marcus Hook Terminal, to customer facilities in Marysville, Michigan and to delivery points on the Canadian border.

In addition to providing storage capacity, our NGL terminalling services also support our liquids blending activities, including the use of our patented butane blending technology. Refined products operations provide transportation and terminalling services through the use of approximately 3,760 miles of refined products pipelines and 35 active refined products marketing terminals. Our refined product marketing terminals are located primarily in the Northeast, Midwest and Southwest United States, with approximately 8 MMBbls of refined products storage capacity. Our refined products operations utilize our integrated pipeline and terminalling assets, as well as acquisition and marketing activities, to service refined products markets in several regions throughout the United States. The mix of products delivered through our refined products pipelines varies seasonally, with gasoline demand peaking during the summer months, and demand for heating oil and other distillate fuels peaking in the winter. The products transported in these pipelines include multiple grades of gasoline and middle distillates, such as heating oil, diesel and jet fuel. Rates for shipments on these product pipelines are regulated by the FERC and other state regulatory agencies, as applicable.

Revenues in this segment are principally generated from fees charged to customers under dedicated contracts or take-or-pay contracts. Under a dedicated contract, the customer agrees to deliver the total output from particular processing plants that are connected to the NGL pipeline. Take-or-pay contracts have minimum throughput commitments requiring the customer to pay regardless of whether a fixed volume is transported. Fees are market-based, negotiated with customers and competitive with regional regulated pipelines and fractionators. Storage revenues are derived from base storage and throughput fees. This segment also derives revenues from fee-based export activities, the marketing of NGLs as well as processing and fractionating refinery off-gas.

### **Crude Oil Transportation and Services Segment**

Our crude oil operations provide transportation (via pipeline and trucking), terminalling as well as acquisition and marketing services to crude oil markets throughout the Southwest, Midwest and Northeast United States. Through our crude oil transportation and services segment, we own and operate (through wholly owned subsidiaries or joint venture interests) more than 18,000 miles of crude oil trunk and gathering pipelines in the Southwest, Midcontinent and Midwest United States. This segment includes equity ownership interests in seven crude oil pipeline systems: the Bakken Pipeline, Bayou Bridge Pipeline, White Cliffs Pipeline, Maurepas Pipeline, the Permian Express pipelines, Enable South Central Pipeline and the Wink to Webster Pipeline. Our crude oil terminalling services operate with an aggregate storage capacity of approximately 73 MMBbls, including over 30 MMBbls at our Gulf Coast terminal in Nederland, Texas, approximately 18.2 MMBbls at our Gulf Coast terminal on the Houston Ship Channel and approximately 9.5 MMBbls at our Cushing Terminal in Cushing, Oklahoma, among others. Our crude oil acquisition and marketing activities utilize our pipeline and terminal assets, our proprietary fleet of crude oil tractor trailers and truck unloading facilities, as well as third-party assets to service crude oil markets principally in the Midcontinent United States.

This segment also includes the ET-S Permian joint venture, which owns more than 5,000 miles of crude oil and water gathering pipelines with crude oil storage capacity in excess of 11 MMBbls. Energy Transfer holds a 67.5% interest in the joint venture, with Sunoco LP holding the remaining 32.5%.

Revenues throughout our crude oil pipeline systems are generated from tariffs paid by shippers utilizing our transportation services. These tariffs are filed with the FERC and other state regulatory agencies, as applicable.

Our crude oil acquisition and marketing activities include the gathering, purchasing, marketing and selling of crude oil. Specifically, the crude oil acquisition and marketing activities include:

- purchasing crude oil at both the wellhead from producers and in bulk from aggregators at major pipeline interconnections and trading locations;
- storing inventory during contango market conditions (when the price of crude oil for future delivery is higher than current prices);
- buying and selling crude oil of different grades at different locations in order to maximize value;
- transporting crude oil using our pipelines, terminals and trucks or, when necessary or cost effective, pipelines, terminals or trucks owned and operated by third parties; and
- marketing crude oil to major integrated oil companies, independent refiners and resellers through various types of sale and exchange transactions.

## **Investment in Sunoco LP**

Sunoco LP is primarily engaged in energy infrastructure and distribution of motor fuels across 32 countries and territories in North America, the Greater Caribbean and Europe. Sunoco LP's midstream operations include an extensive network of over 14,000 miles of pipeline and over 160 terminals. Sunoco LP's fuel distribution operations distribute over 15 billion gallons annually to approximately 11,000 Sunoco and partner branded locations, as well as independent dealers and commercial customers.

On October 31, 2025, Sunoco LP acquired Parkland, a leading international fuel distributor, marketer and convenience retailer with operations in 26 countries across the Americas. Parkland's functional currency is the Canadian dollar, and its consolidated structure includes subsidiaries with multiple other functional currencies.

Sunoco LP's fuel distribution business distributes motor fuels and other petroleum products which we supply to third-party dealers and distributors, to independent operators of commission agent locations, other commercial consumers of motor fuel and to its retail locations. Sunoco LP is the exclusive wholesale supplier of the Sunoco and EcoMaxx-branded motor fuels, supplying an extensive distribution network of company and third-party operated locations throughout North America, Europe and the Greater Caribbean. In addition to distributing motor fuels, Sunoco LP also distributes other petroleum products, such as propane and lubricating oil, and receives lease income from real estate that it leases or subleases.

Sunoco LP's pipeline systems business includes an integrated pipeline and terminal network comprised of refined product pipeline, crude oil pipeline, ammonia pipeline and related terminals.

Through its terminals business, Sunoco LP operates transmix processing facilities and terminals. Transmix is the mixture of various off-specification refined products created in the supply chain (primarily in pipelines and terminals) when various products interface with each other. Transmix processing plants separate this mixture and return it to merchantable products of gasoline and distillates. Sunoco LP's terminals provide storage and distribution services to support its fuel distribution business and other third-party customers.

Subsequent to the Parkland Acquisition in 2025, Sunoco LP also owns the Burnaby Refinery and a 29% interest in SARA, which is a refinery based in Martinique with operations to sell refined crude oil in Guadeloupe, French Guiana and Martinique.

## **Investment in USAC**

USAC focuses its compression services in unconventional resource plays throughout the United States, including the Utica, Marcellus, Permian, Denver-Julesburg, Eagle Ford, Mississippi Lime, Granite Wash, Woodford, Barnett and Haynesville. USAC provides compression services to its customers primarily in connection with infrastructure applications, including both allowing for the processing and transportation of natural gas through the domestic pipeline system and enhancing crude oil production through artificial lift processes. As such, USAC's compression services play a critical role in the production, processing and transportation of both natural gas and crude oil. As of December 31, 2025, USAC had 3.9 million horsepower in its fleet.

USAC operates a fleet of compression units, with an average age of approximately 13 years and a useful life that could potentially extend decades when properly maintained. USAC's standard new-build compression units are generally configured for multiple compression stages allowing USAC to operate its units across a broad range of operating conditions. As part of USAC's services, it engineers, designs, operates, services and repairs its compression units and maintains related support inventory and equipment.

USAC provides compression services to its customers under fixed-fee contracts with initial contract terms typically between six months to five years, depending on the application and location of the compression unit. USAC typically continues to provide compression services at a specific location beyond the initial contract term, either through contract renewal or on a month-to-month or longer basis. USAC primarily enters into fixed-fee contracts whereby its customers are required to pay a monthly fee even during periods of limited or disrupted throughput, which enhances the stability and predictability of its cash flows. USAC bills most of its customers in advance of the service date and also typically utilizes annual inflation adjustments in its term contracts. USAC is not directly exposed to commodity price risk because it does not take title to the natural gas or crude oil involved in its services and because the natural gas used as fuel by its compression units is supplied by its customers without cost to USAC.

USAC's assets and operations are all located and conducted in the United States.

## All Other Segment

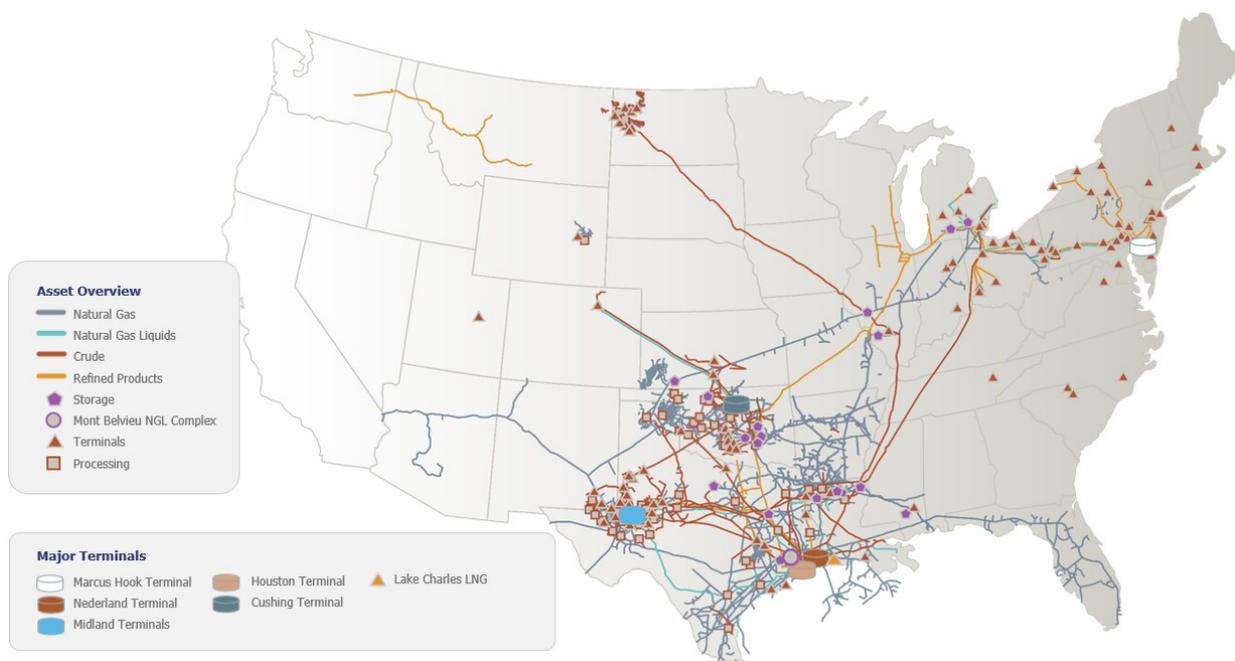

Our “All Other” segment includes:

- our gas marketing activities, which optimize basis pricing differentials by purchasing and transporting natural gas, primarily on company owned pipelines, and selling that gas primarily to industrial end-users or to other marketers;
- our commodity marketing company, which focuses primarily on wholesale power trading activities;
- our natural gas compression equipment business, which has operations in Arkansas, California, Colorado, Louisiana, New Mexico, Oklahoma, Pennsylvania and Texas;
- our wholly owned subsidiary, Dual Drive Technologies, Ltd., which provides compression services to customers engaged in the transportation of natural gas, including our other segments; and
- subsidiaries involved in the management of coal and natural resources properties and the related collection of royalties. We also earn revenues from other land management activities, such as selling standing timber, leasing coal-related infrastructure facilities, and collecting oil and gas royalties. These operations also include end-user coal handling facilities.

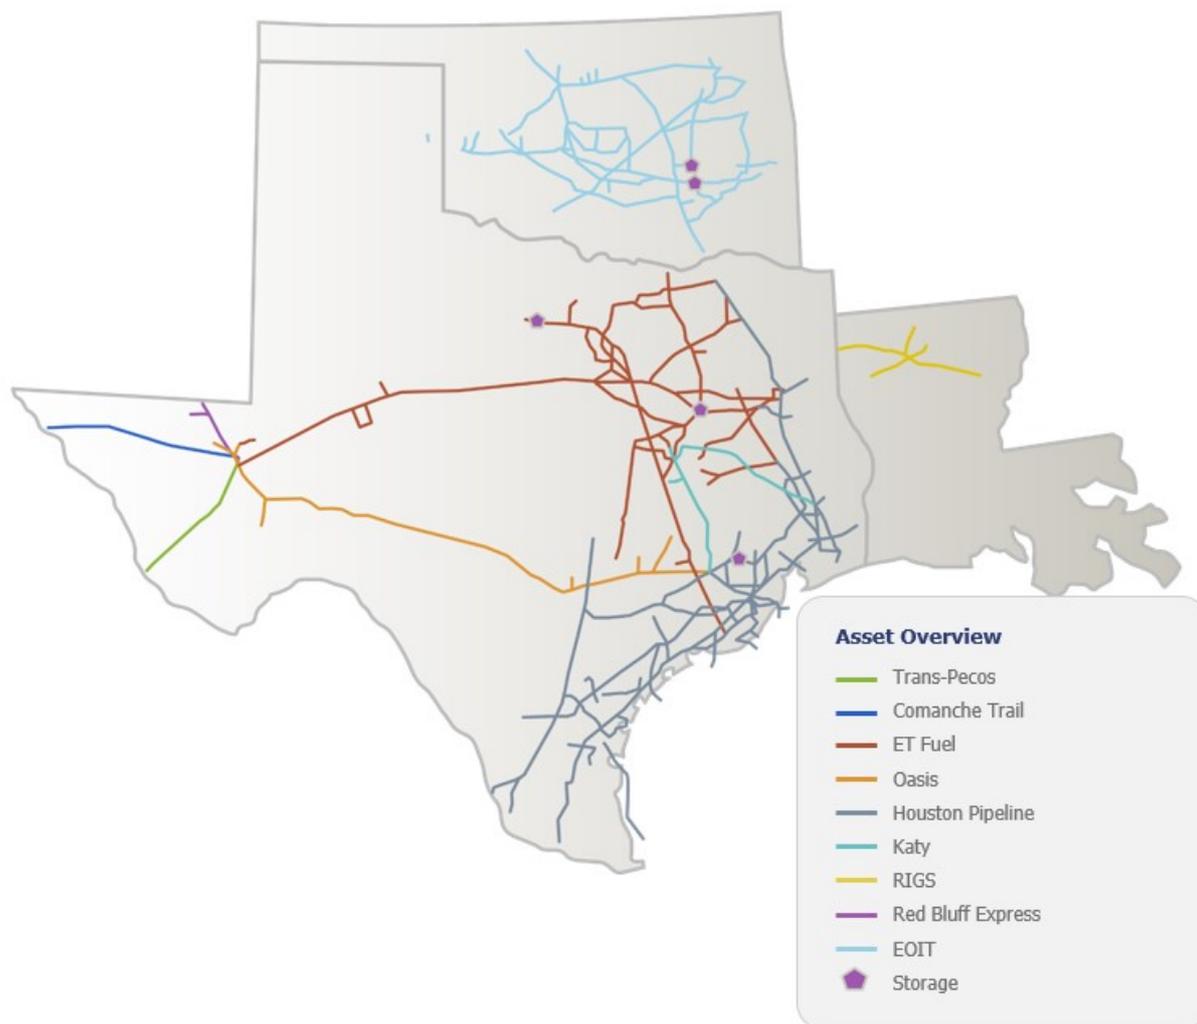

## Asset Overview

The following descriptions include summaries of significant assets within the Partnership’s reportable segments. Amounts, such as capacities, volumes and miles included in the following descriptions are approximate and are based on information currently available; such amounts are subject to change based on future events or additional information.

The map below depicts the major assets of our core businesses, excluding the assets of Sunoco LP, USAC and the businesses in our all other segment. The map below and the maps included within the segment asset descriptions include certain non-wholly owned joint ventures and exclude corporate and field offices and certain assets that are less significant to the Partnership on a consolidated basis.

**Intrastate Transportation and Storage**

The following details our pipelines and storage facilities in the intrastate transportation and storage segment:

| Description of Assets   | Ownership Interest | Miles of Natural Gas Pipeline | Pipeline Throughput Capacity (Bcf/d) | Working Storage Capacity (Bcf) |
|---|--------------------|-------------------------------|--------------------------------------|--------------------------------|
| ET Fuel System <sup>(1)</sup>                                   | 100 %              | 3,270                         | 5.2                                  | 11.2                           |
| Oasis Pipeline <sup>(1)</sup>                                   | 100 %              | 750                           | 2.0                                  | —                              |
| Houston Pipeline (“HPL”) System                                 | 100 %              | 3,920                         | 5.3                                  | 52.5                           |
| Katy Pipeline   | 100 %              | 460                           | 2.9                                  | —                              |
| Regency Intrastate Gas System (“RIGS”)                          | 100 %              | 450                           | 2.1                                  | —                              |
| Enable Oklahoma Intrastate Transmission (“EOIT”) <sup>(1)</sup> | 100 %              | 2,200                         | 2.4                                  | 24.0                           |
| Comanche Trail Pipeline   | 16 %               | 195                           | 1.1                                  | —                              |
| Trans-Pecos Pipeline  | 16 %               | 140                           | 1.4                                  | —                              |
| Red Bluff Express Pipeline                                      | 70 %               | 120                           | 2.0                                  | —                              |

<sup>(1)</sup> Includes bi-directional capabilities

The following information describes our principal intrastate transportation and storage assets:

- The ET Fuel System serves some of the most prolific production areas in the United States and is comprised of intrastate natural gas pipelines and related natural gas storage facilities. The ET Fuel System has bi-directional capabilities and has many interconnections with pipelines providing direct access to power plants and other intrastate and interstate pipelines. It is strategically located near high-growth production areas and provides access to the three major natural gas trading centers in Texas: the Waha Hub near Pecos, Texas, the Maypearl Hub in Central Texas and the Carthage Hub in East Texas.

The ET Fuel System also includes our Bethel natural gas storage facility, with a working capacity of 6.0 Bcf, an average withdrawal capacity of 300 MMcf/d and an injection capacity of 75 MMcf/d, and our Bryson natural gas storage facility, with a working capacity of 5.2 Bcf, an average withdrawal capacity of 120 MMcf/d and an average injection capacity of 96 MMcf/d.

In addition, the ET Fuel System is integrated with our Godley processing plant which gives us the ability to bypass the plant when processing margins are unfavorable by blending the untreated natural gas from our gas gathering system known as the North Texas System with natural gas on the ET Fuel System while continuing to meet pipeline quality specifications.

- The Oasis Pipeline is primarily a 36-inch natural gas pipeline. It has bi-directional capabilities with approximately 1.3 Bcf/d of throughput capacity moving west-to-east and greater than 750 MMcf/d of throughput capacity moving east-to-west. The Oasis Pipeline connects to the Waha and Katy market hubs and has many interconnections with other pipelines, power plants, processing facilities, municipalities and producers.

The Oasis Pipeline is integrated with our gathering system known as the Southeast Texas System and is an important component to maximizing our Southeast Texas System's profitability. The Oasis Pipeline enhances the Southeast Texas System by (i) providing access for natural gas gathered on the Southeast Texas System to third-party supply and market points and interconnecting pipelines and (ii) allowing us to bypass our processing plants and treating facilities on the Southeast Texas System when processing margins are unfavorable by blending untreated natural gas from the Southeast Texas System with gas on the Oasis pipeline while continuing to meet pipeline quality specifications.

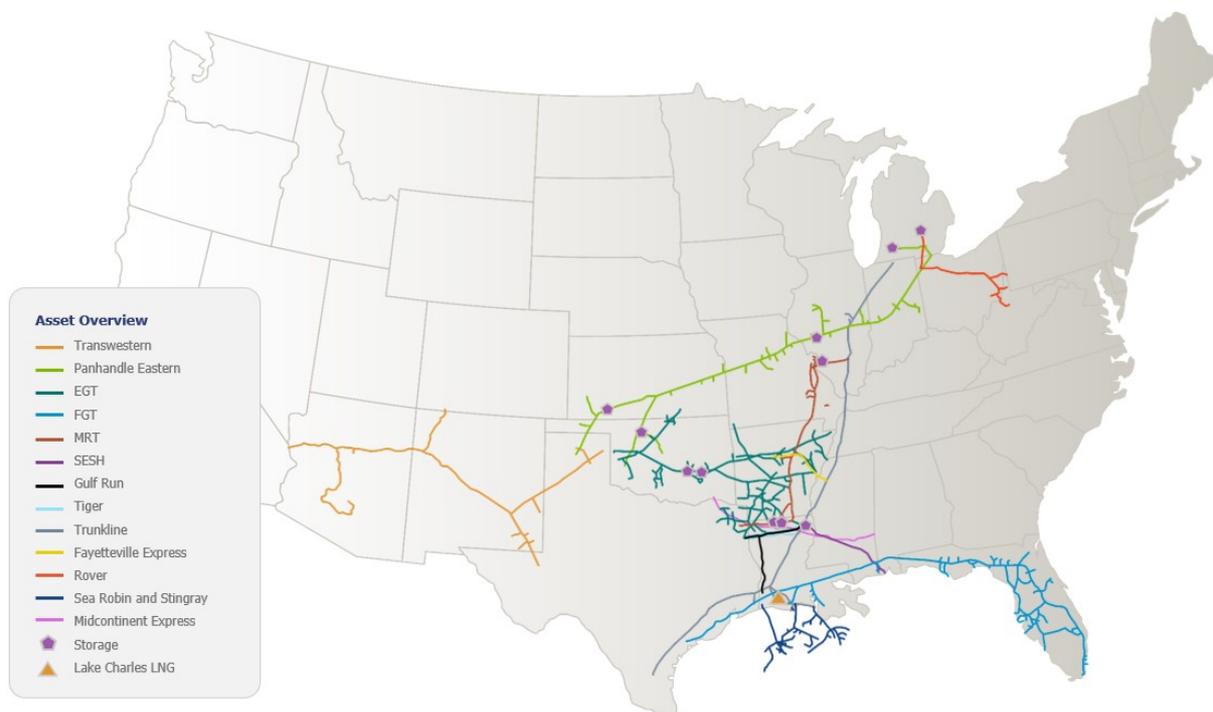

- The HPL System is an extensive network of intrastate natural gas pipelines, the underground Bammel storage reservoir and related transportation assets. The system has access to multiple sources of historically significant natural gas supply reserves from South Texas, the Gulf Coast of Texas, East Texas and the western Gulf of America, and is directly connected to major gas distribution, electric and industrial load centers in Houston, Corpus Christi, Texas City, Beaumont and other cities located along the Gulf Coast of Texas. The HPL System is well situated to gather and transport gas in many of the major gas producing areas in Texas including a strong presence in the key Houston Ship Channel and Katy Hub markets, allowing us to play an important role in the Texas natural gas markets. The HPL System also offers its shippers off-system opportunities due to its numerous interconnections with other pipeline systems, its direct access to multiple market hubs at Katy, the Houston Ship Channel, Carthage and Agua Dulce as well as our Bammel storage facility.

The Bammel storage facility has a total working gas capacity of approximately 52.5 Bcf, a peak withdrawal rate of 1.3 Bcf/d and a peak injection rate of 0.6 Bcf/d. The Bammel storage facility is located near the Houston Ship Channel market area and the Katy Hub, and is ideally suited to provide a physical backup for on-system and off-system customers. As of December 31, 2025, we had approximately 11.8 Bcf committed under fee-based arrangements with third parties and approximately 40.3 Bcf stored in the facility for our own account.

- The Katy Pipeline connects three treating facilities, one of which we own, with our gathering system known as Southeast Texas System. The Katy Pipeline serves producers in East and North Central Texas and provides access to the Katy Hub. The Katy Pipeline expansions include the 36-inch East Texas extension to connect our Reed compressor station in Freestone County to our Grimes County compressor station, the 36-inch Katy expansion connecting Grimes to the Katy Hub and the 42-inch Southeast Bossier pipeline connecting our Cleburne to Carthage pipeline to the HPL System.
- RIGS is a 450-mile intrastate pipeline that delivers natural gas from northwest Louisiana to downstream pipelines and markets.
- EOIT is a 2,200-mile pipeline system that provides natural gas transportation and storage services to customers in Oklahoma. EOIT is a web-like configuration with multidirectional flow capabilities between numerous receipt points and delivery points. EOIT delivers natural gas from the Anadarko and Arkoma basins, including the SCOOP, STACK, Cana Woodford, Granite Wash, Cleveland, Tonkawa and Mississippi Lime Shale plays in western Oklahoma to utilities and industrial end-users connected to EOIT and to interstate and intrastate pipelines interconnected with EOIT. EOIT also has two underground natural gas storage facilities in Oklahoma, which operate at a combined capacity of 24 Bcf with a peak withdrawal rate of 0.60 Bcf/d.

- Comanche Trail Pipeline is a 195-mile intrastate pipeline that delivers natural gas from the Waha Hub near Pecos, Texas to the United States/Mexico border near San Elizario, Texas. The Partnership owns a 16% membership interest in and operates Comanche Trail Pipeline.
- Trans-Pecos Pipeline is a 143-mile intrastate pipeline that delivers natural gas from the Waha Hub near Pecos, Texas to the United States/Mexico border near Presidio, Texas. The Partnership owns a 16% membership interest in and operates Trans-Pecos Pipeline.
- The Red Bluff Express Pipeline is an approximately 120-mile intrastate pipeline that runs through the heart of the Delaware Basin and connects certain of our plants as well as third-party plants to the Waha Oasis Header. The Partnership owns a 70% membership interest in and operates Red Bluff Express Pipeline.
- Other intrastate natural gas pipelines include our 630-mile Pelico Pipeline in northern Louisiana and our 167-mile Lobo Pipeline in South Texas.

### Interstate Transportation and Storage

The following details our pipelines in the interstate transportation and storage segment:

| Description of Assets                      | Ownership Interest | Miles of Natural Gas Pipeline | Pipeline Throughput Capacity (Bcf/d) | Working Storage Capacity (Bcf) |
|--|--------------------|-------------------------------|--------------------------------------|--------------------------------|
| Florida Gas Transmission (“FGT”)           | 50 %               | 5,375                         | 4.4                                  | —                              |
| Transwestern Pipeline                      | 100 %              | 2,590                         | 2.1                                  | —                              |
| Panhandle Eastern Pipe Line <sup>(1)</sup> | 100 %              | 6,300                         | 2.8                                  | 57.0                           |
| Trunkline                                  | 100 %              | 2,190                         | 0.9                                  | 13.0                           |
| Tiger                                      | 100 %              | 200                           | 2.4                                  | —                              |
| Fayetteville Express Pipeline              | 50 %               | 185                           | 2.0                                  | —                              |
| Sea Robin Pipeline                         | 100 %              | 765                           | 2.0                                  | —                              |
| Stingray Pipeline                          | 100 %              | 335                           | 0.4                                  | —                              |
| Rover Pipeline                             | 32.6 %             | 720                           | 3.4                                  | —                              |

|  |       |       |     |      |
|--|-------|-------|-----|------|
| Midcontinent Express Pipeline          | 50 %  | 510   | 1.8 | —    |

<sup>(1)</sup> Storage capacity figure includes storage leased by affiliate Southwest Gas Storage and third-party leased storage.

The following information describes our principal interstate transportation and storage assets:

- FGT extends from South Texas through the Gulf Coast region of the United States to South Florida. FGT is the principal transporter of natural gas to the Florida energy market, delivering approximately 60% of the natural gas consumed in the state. In addition, FGT’s numerous intrastate and interstate pipeline interconnections with major interstate and intrastate natural gas pipelines provide access to diverse natural gas supply sources. FGT’s customers include electric utilities, independent power producers, industrial end-users and local distribution companies. FGT is owned by Citrus, a 50/50 joint venture with Kinder Morgan, Inc.
- Transwestern Pipeline transports natural gas supply from the Permian Basin, the San Juan Basin and the Anadarko Basin. The system has bi-directional capabilities and can access Texas and Midcontinent natural gas market hubs as well as major western markets in Arizona, New Mexico, Nevada and California. Transwestern’s customers include local distribution companies, producers, marketers, electric power generators and industrial end-users. An expansion of the Transwestern Pipeline, including upsizing pipeline diameter to increase capacity, is expected to be in-service by the end of 2029.
- Panhandle Eastern Pipe Line’s transmission system consists of four large diameter mainline pipelines with bi-directional capabilities, extending approximately 1,300 miles from producing areas in the Anadarko Basin of Texas, Oklahoma and Kansas through Missouri, Illinois, Indiana, Ohio and into Michigan. Panhandle contracts for approximately 56 Bcf of natural gas storage.
- Trunkline’s transmission system consists of one large diameter mainline pipeline with bi-directional capabilities, extending approximately 1,400 miles from the Gulf Coast areas of Texas and Louisiana through Arkansas, Mississippi, Tennessee, Kentucky, Illinois, Indiana and Michigan. Trunkline has one natural gas storage field located in Louisiana.
- Tiger is a bi-directional system that extends through the heart of the Haynesville Shale and ends near Delhi, Louisiana, interconnecting with multiple interstate pipelines.
- Fayetteville Express Pipeline originates near Conway County, Arkansas and continues eastward to Panola County, Mississippi with multiple pipeline interconnections along the route. Fayetteville Express Pipeline is owned by a 50/50 joint venture with Kinder Morgan, Inc.
- Sea Robin Pipeline’s system consists of two offshore Louisiana natural gas supply pipelines extending 120 miles into the Gulf of America.
- Stingray Pipeline is an interstate natural gas pipeline system with assets located in the western Gulf of America and Johnson Bayou, Louisiana.
- Rover Pipeline is a large diameter pipeline which transports natural gas from processing plants in West Virginia, eastern Ohio and western Pennsylvania for delivery to other pipeline interconnects in Ohio and Michigan, where the gas is delivered for distribution to markets across the United States and to Ontario, Canada.
- Midcontinent Express Pipeline originates near Bennington, Oklahoma and traverses northern Louisiana and central Mississippi to an interconnect with the Transcontinental Gas Pipeline system in Butler, Alabama. The Midcontinent Express Pipeline is owned by a 50/50 joint venture with Kinder Morgan, Inc., the operator of the system.
- EGT provides natural gas transportation and storage services to customers in Oklahoma, Texas, Arkansas, Louisiana, Missouri and Kansas. EGT has two underground storage facilities in Oklahoma and one underground natural gas storage facility in Louisiana. Through numerous pipeline interconnections along the system and at the Perryville Hub, EGT customers have access to Midwest and Northeast markets as well as most of the major natural gas consuming markets east of the Mississippi River.
- MRT provides natural gas transportation and storage services in Texas, Arkansas, Louisiana, Missouri and Illinois. MRT has underground natural gas storage facilities in Louisiana and Illinois. MRT receives natural gas from a variety of interstate and intrastate pipelines through its interconnections and delivers natural gas primarily to the St. Louis market.

- SESH, a 50/50 joint venture with Enbridge Inc., provides transportation services in Louisiana, Mississippi and Alabama. SESH transports natural gas from the Perryville Hub in Louisiana to its endpoint in Mobile County, Alabama. SESH has interconnections with third-party natural gas pipelines and provides access to major Southeast and Northeast markets and transports directly to generating facilities in Mississippi and Alabama and to interconnecting pipelines that supply companies generating electricity for the Florida power market.
- Gulf Run Pipeline is a large diameter pipeline that runs from the heart of the Haynesville Shale in East Texas and northern Louisiana to the Carthage and Perryville natural gas hubs and other key markets along the Gulf Coast.

#### *Regasification Facility*

Lake Charles LNG, our wholly owned subsidiary, owns an LNG import terminal and regasification facility located on Louisiana's Gulf Coast near Lake Charles, Louisiana. The import terminal has approximately 9.0 Bcf of above ground LNG storage capacity and the regasification facility has a send out capacity of 1.8 Bcf/d. Lake Charles LNG derives all of its revenue from a series of long-term contracts with Shell.

#### *Liquefaction Project*

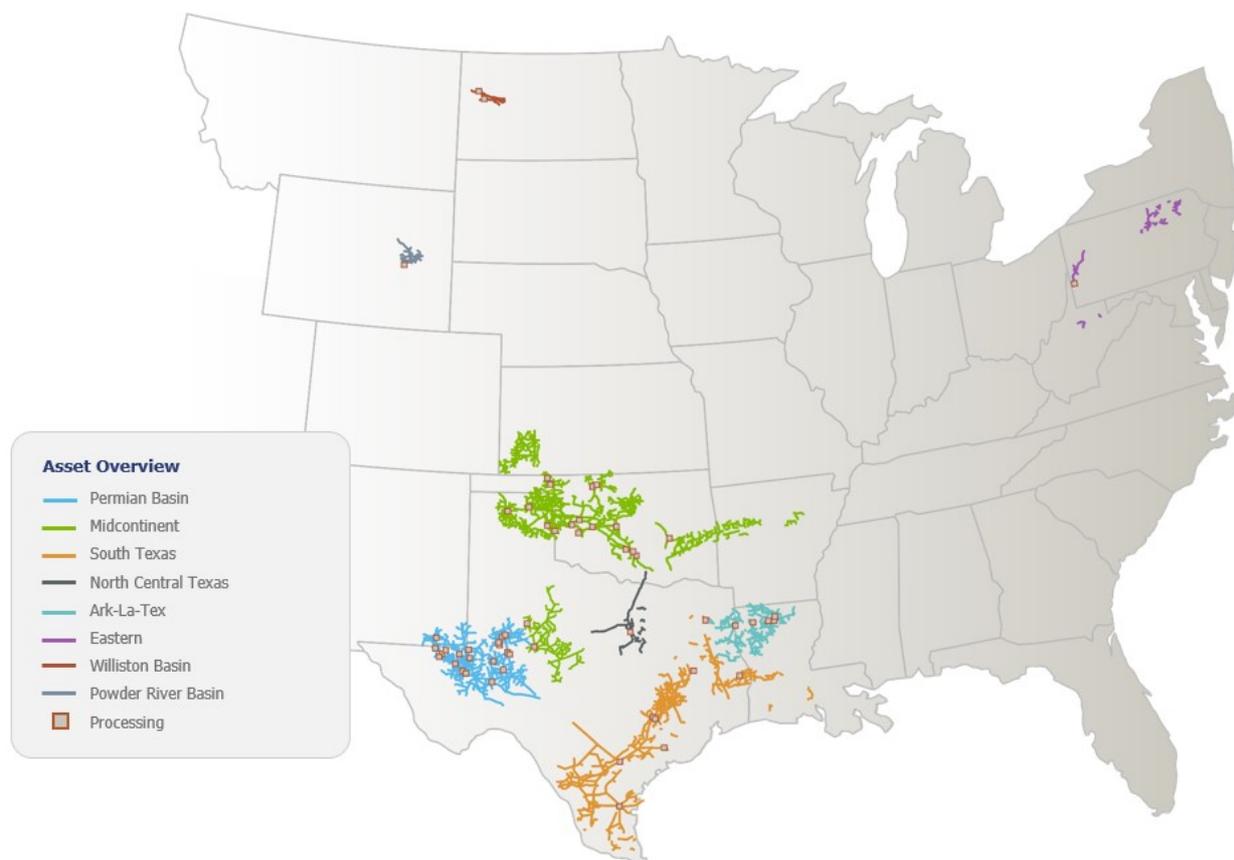

Lake Charles LNG Export, our wholly owned subsidiary, was previously developing a natural gas liquefaction project at the site of our Lake Charles LNG import terminal and regasification facility. The project was expected to utilize existing dock and storage facilities owned by Lake Charles LNG located on the Lake Charles site.

From 2022 through 2025, Lake Charles LNG Export executed several LNG offtake agreements, which allowed either party to terminate the agreement if Lake Charles LNG Export did not satisfy specified conditions by a specified date. One of those conditions related to Lake Charles LNG Export making a "final investment decision" to proceed with the construction of the liquefaction project.

We were previously in discussions with several other parties for potential long-term LNG offtake and potential equity investments in the project. In December 2025, we announced the suspension of development of the Lake Charles LNG project in order to focus on allocating capital to our significant backlog of natural gas pipeline infrastructure projects that we believe provides superior risk/return profiles. Our management has determined that continued development of the project by Energy Transfer is not warranted but we remain open to discussions with third parties who may have an interest in developing the project. In the event that a third party assumes the development of the project, it is unlikely that Energy Transfer would commit capital to the project; however, Energy Transfer would be interested in providing natural gas pipeline transportation capacity to a third party under a long term agreement to facilitate natural gas supply to the project.

As a result of Energy Transfer's announcement, several LNG offtake agreements have been terminated based on the nonsatisfaction of the condition related to making a final investment decision by the date specified in the applicable LNG offtake agreement. Other LNG offtake agreements that have not been terminated could be assumed by a third party which continues the development of the project.

**Midstream**

The following details our assets in the midstream segment:

| Description of Assets | Net Gas Processing Capacity (MMcf/d) |
|-----------------------|--------------------------------------|
| South Texas           | 2,530                                |
| Ark-La-Tex            | 922                                  |
| North Central Texas   | 700                                  |
| Permian Basin         | 5,495                                |
| Midcontinent          | 2,865                                |
| Williston Basin       | 400                                  |
| Powder River Basin    | 345                                  |
| Eastern               | 200                                  |

The following information describes our principal midstream assets:

*South Texas:*

- Our South Texas assets, which include the Southeast Texas System and the Eagle Ford System, are an integrated system that gathers, compresses, treats, processes, dehydrates and transports natural gas from the Austin Chalk trend and the Eagle Ford Shale.

The assets in our Southeast Texas System include a large natural gas gathering system that covers thirteen counties between Austin and Houston, Texas and connects to the Katy Hub through the Katy Pipeline and is also connected to the

Oasis Pipeline. This system also includes three natural gas processing plants (La Grange, Alamo and Brookeland) with an aggregate capacity of 510 MMcf/d. These plants process the rich gas that flows through our gathering system to produce residue gas and NGLs. Residue gas is delivered into our intrastate pipelines and NGLs are delivered into our NGL pipelines.

Our treating facilities remove carbon dioxide and hydrogen sulfide from natural gas gathered into our system before the natural gas is introduced to transportation pipelines to ensure that the gas meets pipeline quality specifications.

The assets in our Eagle Ford System consist of 30-inch and 42-inch natural gas gathering pipelines originating in Dimmitt County, Texas, and extending to both our King Ranch gas plant in Kleberg County, Texas and Jackson plant in Jackson County, Texas. These assets also include four processing plants (Chisholm, Kenedy, Jackson and King Ranch) with an aggregate capacity of 2.0 Bcf/d. Our Chisholm, Kenedy, Jackson and King Ranch processing plants are connected to our intrastate transportation pipeline systems for deliveries of residue gas and are also connected with our NGL pipelines.

#### *Ark-La-Tex:*

- Our Ark-La-Tex assets are comprised of several gathering systems in the Haynesville Shale with access to multiple markets through interconnects with several pipelines, including our Tiger and Gulf Run pipelines. Our northern Louisiana assets include the Bistineau, Creedence, Tristate, Logansport, Magnolia, Olympia, Amoruso, and Lumberjack systems, which collectively include 13 natural gas treating facilities, with aggregate capacity of 3.5 Bcf/d.

The Ark-La-Tex assets gather, compress, treat and dehydrate natural gas in several parishes in northwest Louisiana and several counties in East Texas. These assets also include cryogenic natural gas processing facilities, a refrigeration plant, a conditioning plant, amine treating plants, a residue gas pipeline that provides market access for natural gas from our processing plants, including connections with pipelines that provide access to the Perryville Hub and other markets in the Gulf Coast region, and an NGL pipeline that connects to a third-party that provides access to the Mont Belvieu market for NGLs produced from our processing plants. Collectively, the six natural gas processing facilities (Dubach, Lincoln, Rosewood, Mt. Olive, Sligo and Waskom) have an aggregate capacity of 0.9 Bcf/d.

Through the gathering and processing systems described above and their interconnections with our intrastate transportation pipelines, we offer producers wellhead-to-market services, including natural gas gathering, compression, processing, treating and transportation.

#### *North Central Texas:*

- The North Central Texas System is an integrated system located in North Central Texas and extends into southern Oklahoma which gathers, compresses, treats, processes and transports natural gas from the Barnett and Woodford shales. Our North Central Texas assets include our Godley plant, which processes rich gas produced from the Barnett Shale and STACK and SCOOP plays, with an aggregate capacity of 700 MMcf/d. The Godley plant is integrated with the ET Fuel System.

#### *Permian Basin:*

- The Permian Basin Gathering System offers wellhead-to-market services to producers in 11 counties in West Texas and two counties in New Mexico which surround the Waha Hub, one of Texas's developing NGL-rich natural gas market areas. As a result of the proximity of our system to the Waha Hub, the Waha Gathering System has a variety of market outlets for the natural gas that we gather and process, including several major interstate and intrastate pipelines serving California, the Midcontinent and Texas natural gas markets. The NGL market outlets includes our NGL pipeline system. The Permian Basin Gathering System includes 22 processing facilities (Waha, Red Bluff, Halley, Keystone, Tippet, Panther, Rebel, Grey Wolf, Bear, Arrowhead, Carlsbad, Orla I, Orla II, Martin County, Red Lake, Lenorah, Sale Ranch, Benedum, Sonora, St. Lawrence, Jameson and Badger) with an aggregate processing capacity of 5.5 Bcf/d and one natural gas conditioning facility with an aggregate capacity of 200 MMcf/d.
- In addition, we own a 50% membership interest in Mi Vida JV LLC, a joint venture which owns a 200 MMcf/d cryogenic processing plant in West Texas. We operate the plant and related facilities on behalf of the joint venture. We also own a 50% equity interest in Crestwood Permian Basin LLC, a joint venture which owns the Nautilus natural gas gathering system in West Texas. We operate the gathering system on behalf of the joint venture.

#### *Midcontinent:*

- The Midcontinent Systems are located in three large natural gas producing regions in the United States: the Hugoton Basin in southwest Kansas, the Anadarko Basin in the Texas Panhandle and Oklahoma, including the STACK and SCOOP plays, and the Arkoma Basin in eastern Oklahoma and Arkansas. These mature basins have continued to provide generally long-lived, predictable production volumes. Our Midcontinent assets are extensive systems that gather, compress and dehydrate

low-pressure gas. The Midcontinent Systems include 16 natural gas processing facilities (Mocane, Beaver, Wheeler I, Sunray, Spearman, Rose Valley, Hopeton, Bradley, McClure, Wheeler II, South Canadian, Clinton, Roger Mills, Canute, Cox City and Grady) with an aggregate capacity of approximately 2.9 Bcf/d.

- We operate our Midcontinent Systems primarily at low pressures to maximize the total throughput volumes from the connected wells. Wellhead pressures are therefore adequate to allow for flow of natural gas into the gathering lines without the cost of wellhead compression.
- We own the Hugoton Gathering System that has 1,900 miles of pipeline extending across parts of southwest Kansas and northwest Oklahoma. This system is operated by a third-party.
- We own a 50% membership interest in Atoka Midstream LLC, which owns a natural gas gathering system in Oklahoma.

*Williston Basin:*

- We own and operate the Arrow and Rough Rider systems which include natural gas gathering systems and processing facilities (Bear Den and Wild Basin). These processing facilities have an aggregate capacity of 400 MMcf/d. The Arrow and Rough Rider systems are in the core of the Bakken Shale primarily in McKenzie and Dunn Counties, North Dakota, with the Arrow system primarily located on the Fort Berthold Indian Reservation.

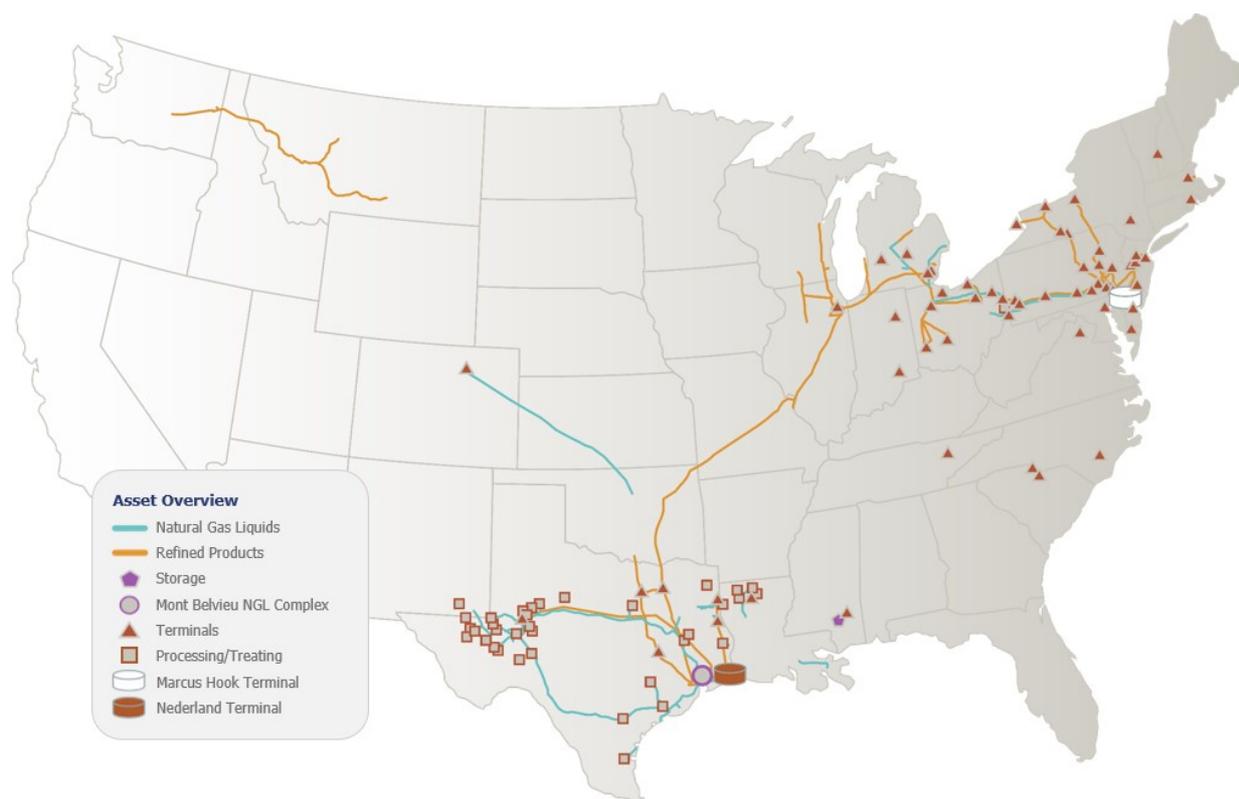

*Powder River Basin:*

- We own and operate the Jackalope rich natural gas gathering system, the Continental Express high-pressure pipeline and the Bucking Horse gas processing facility in Converse County, Wyoming. The Bucking Horse gas processing facility has an aggregate processing capacity of 345 MMcf/d.

*Eastern:*

- The Eastern region assets are located in eleven counties in Pennsylvania, four counties in Ohio and three counties in West Virginia, which gather natural gas from the Marcellus and Utica shales. Our Eastern region assets include more than 600 miles of natural gas gathering pipelines, natural gas trunklines and fresh-water pipelines, nine gathering and processing systems and the 200 MMcf/d Revolution processing plant, which feeds into our Mariner East and Rover pipeline systems.
- We own a 75% membership interest in ORS. On behalf of ORS, we operate its Ohio Utica River System, which consists of 47 miles of 36-inch, 13 miles of 30-inch and 3 miles of 24-inch gathering trunklines, and which delivers up to 3.6 Bcf/d to Rockies Express Pipeline, Texas Eastern Transmission, Leach Xpress, Rover and DEO TPL-18.

**NGL and Refined Products Transportation and Services**

The following details the assets in our NGL and refined products transportation and services segment:

| Description of Assets                                | Miles of Liquids Pipeline | NGL Fractionation / Processing Capacity (MBbls/d) | Working Storage Capacity (MBbls) |
|--|---------------------------|---|----------------------------------|
| <b>Liquids Pipelines:</b>                            |                           |   |                                  |
| Gulf Coast NGL Express                               | 900                       | —   | —                                |
| West Texas Gateway                                   | 510                       | —   | —                                |
| Other Permian Basin NGL                              | 1,600                     | —   | —                                |
| Mariner East   | 680                       | —   | —                                |
| Mariner West   | 450                       | —   | —                                |
| Mont Belvieu to Nederland                            | 320                       | —   | —                                |
| White Cliffs <sup>(1)</sup>                          | 540                       | —   | —                                |
| Other NGL  | 750                       | —   | —                                |
| <b>Liquids Fractionation and Storage Facilities:</b> |                           |   |                                  |
| Mont Belvieu NGL Complex                             | —                         | 1,150   | 63,000                           |
| Spindletop   | —                         | —   | 8,000                            |
| Crestwood assets                                     | —                         | —   | 12,000                           |
| ET Geismar Olefins <sup>(2)</sup>                    | —                         | 35  | —                                |
| Hattiesburg  | —                         | —   | 5,200                            |
| Cedar Bayou  | —                         | —   | 1,600                            |

NGL Terminals:

| J.C. Nolan Terminal   | — | — | 130   |

(1) The White Cliffs Pipeline consists of two parallel, 12-inch common carrier pipelines: one crude oil pipeline and one NGL pipeline.

(2) Additionally, the ET Geismar Olefins off-gas processing facility has inlet volume capacity of 54 MMcf/d.

The following information describes our principal NGL and refined products transportation and services assets:

- Gulf Coast NGL Express (formerly known as Lone Star Express) is an interstate NGL pipeline consisting of 24-inch and 30-inch long-haul transportation pipelines, with throughput capacity of approximately 900 MBbls/d, that delivers mixed NGLs from processing plants in the Permian Basin, the Barnett Shale and from East Texas to our Mont Belvieu NGL Complex.
- West Texas Gateway transports mixed NGLs produced in the Permian Basin and the Eagle Ford Shale to Mont Belvieu, Texas and has a throughput capacity of approximately 240 MBbls/d.
- The Mariner East Pipeline System, consisting of Mariner East 2 and Mariner East 2x, has an aggregate capacity of 380 MBbls/d and transports NGLs from the Marcellus and Utica shales in western Pennsylvania, West Virginia and eastern Ohio to destinations in Pennsylvania, including our Marcus Hook Terminal on the Delaware River, where they are processed, stored and distributed to local, domestic and waterborne markets.
- The Mariner West Pipeline provides transportation of ethane from the Marcellus Shale processing and fractionating areas in Houston, Pennsylvania to Marysville, Michigan and the Canadian border and has a throughput capacity of approximately 50 MBbls/d.
- The Mont Belvieu to Nederland Pipeline System consists of five pipelines, which deliver export-grade propane, butane, ethane and natural gasoline from our Mont Belvieu NGL Complex to our Nederland Terminal, having a total throughput capacity of approximately 1,140 MBbls/d. The ethane pipeline is part of the Orbit Gulf Coast NGL Exports joint venture, as described below.
- The White Cliffs NGL pipeline, in which we have 54.3% ownership interest, transports mixed NGLs produced in the DJ Basin to Cushing, Oklahoma where it interconnects with the Southern Hills Pipeline to move NGLs to Mont Belvieu, Texas and has a throughput capacity of approximately 90 MBbls/d.
- Other NGL pipelines include the 127-mile Justice pipeline, 63-mile Blue Ridge pipeline, the 45-mile Freedom pipeline, the 20-mile Spirit pipeline and a 50% interest in the 87 mile Liberty pipeline. We also own an undivided interest in 80 MBbls/d of capacity in a segment of the EPIC Y-Grade Pipeline, LP (EPIC) pipeline from Orla, Texas to Benedum, Texas.
- Our Mont Belvieu NGL Complex is an integrated liquids storage and fractionation facility. The storage facility has approximately 63 MMBbls of salt dome capacity providing 100% fee-based cash flows. The storage facility has access to multiple NGL and refined products pipelines, the Houston Ship Channel trading hub, numerous chemical plants, refineries and fractionators.

The fractionation facility includes eight fractionators, which process NGLs delivered from several sources, including our Gulf Coast NGL Express, West Texas Gateway and Justice pipelines.

- Our Spindletop storage facilities, located in Beaumont, Texas, have 8 MMBbbls of salt dome capacity.
- The Crestwood assets, acquired in 2023, include 11 LPG terminals which offer 12 MMBbbls of storage capacity located in Pennsylvania, South Carolina, Mississippi, Michigan, New York and Indiana, with receipts and deliveries that are supported by both rail cars and third-party pipelines.

Other Crestwood assets include a fleet of rail and rolling stock with approximately 1.6 MMBbbls/d of NGL pipeline, terminal and transportation capacity, which also includes rail-to-truck terminals located in Michigan, Indiana, Ohio, New Hampshire, Pennsylvania, New Jersey, New York, Rhode Island, North Carolina, South Carolina and Mississippi.

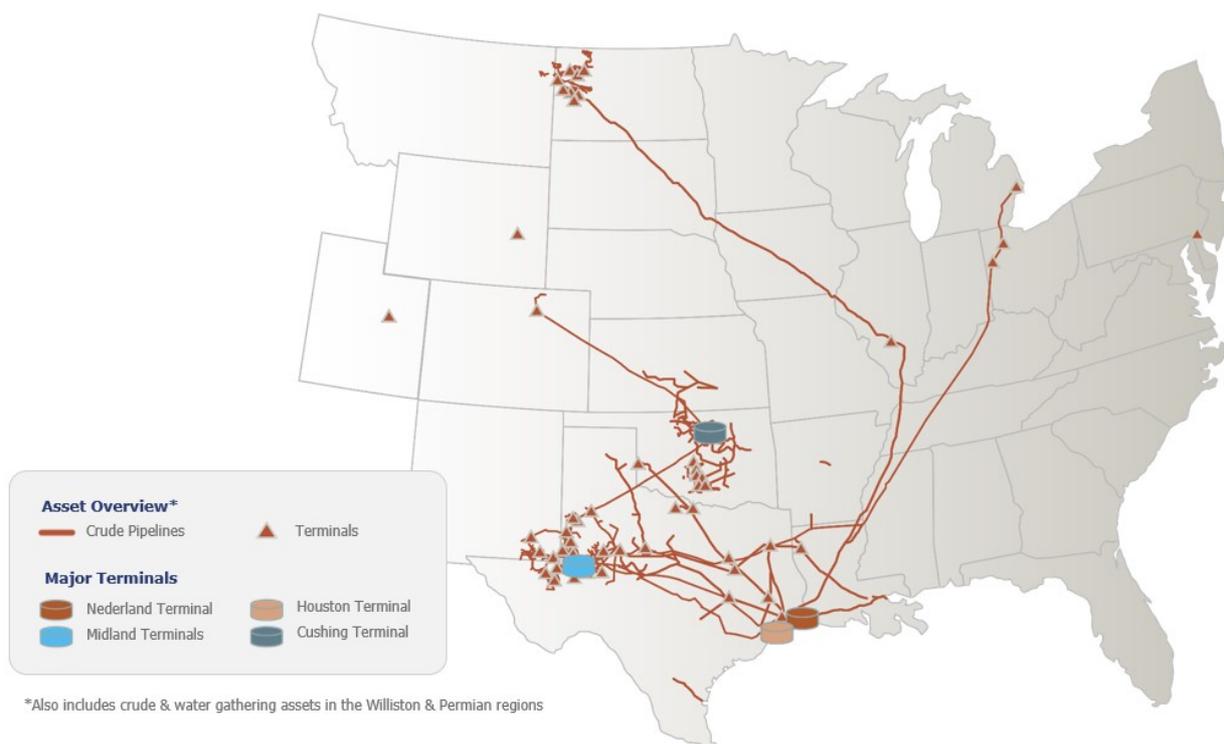

- ET Geismar Olefins consists of a refinery off-gas processing unit and an o-grade NGL fractionation / Refinery-Grade Propylene (“RGP”) splitting complex located along the Mississippi River refinery corridor in southern Louisiana. The off-gas processing unit cryogenically processes refinery off-gas, and the fractionation / RGP splitting complex fractionates the streams into higher value components. The o-grade fractionator and RGP splitting complex, located in Geismar, Louisiana, is connected by approximately 100 miles of pipeline to the Chalmette processing plant, which has a processing capacity of 54 MMcf/d.
- The Hattiesburg storage facility is an integrated liquids storage facility with approximately 5 MMBbbls of salt dome capacity, providing 100% fee-based cash flows.
- The Cedar Bayou storage facility is an integrated liquids storage facility with approximately 1.6 MMBbbls of tank storage, generating revenues from fixed fee storage contracts, throughput fees and revenue from blending butane into refined gasoline.
- The Nederland Terminal, in addition to crude oil activities, also provides approximately 3.1 MMBbbls of storage and distribution services for NGLs delivered from our Mont Belvieu NGL Complex via our Mont Belvieu to Nederland Pipeline System, where such products can be exported via ship. The ethane refrigeration facility is part of the Orbit Gulf Coast NGL Exports joint venture, as described below.
- The Orbit Gulf Coast NGL Exports joint venture consists of a 70-mile, 20-inch ethane pipeline with a throughput capacity of approximately 380 MBbbls/d which delivers from our Mont Belvieu NGL Complex to our Nederland Terminal. It also includes a 180 MBbbls/d ethane refrigeration facility and a 1.2 MMBbbls storage facility at our Nederland Terminal. Energy Transfer owns a 58.1% interest in the joint venture.
- The Marcus Hook Terminal includes fractionation, terminalling and storage assets with a capacity of approximately 2 MMBbbls of NGL storage capacity in underground caverns, 4 MMBbbls of above-ground NGL refrigerated storage and related commercial agreements. The terminal has a total active refined products storage capacity of approximately 1 MMBbbls. The facility can receive NGLs and refined products via marine vessel, pipeline, truck and rail, and can deliver via marine vessel, pipeline and truck. In addition to providing NGL storage and terminalling services to both affiliates and third-party customers, the Marcus Hook Terminal serves as an offtake outlet for our Mariner East Pipeline System.

The Marcus Hook Terminal also has a tank farm with total refined products storage capacity of approximately 2 MMBbbls. The terminal receives and delivers refined products via pipeline and primarily provides terminalling services to support movements on our refined products pipelines.

- The Inkster Terminal, located near Detroit, Michigan, consists of multiple salt caverns with a total storage capacity of approximately 860 MBbbls of NGLs. We use the Inkster Terminal’s storage in connection with the Toledo North pipeline system and for the storage of NGLs from local producers and a refinery in western Ohio. The terminal can receive and ship by pipeline in both directions and has a truck loading and unloading rack.
- The Eastern region refined products pipelines consist of 6-inch to 16-inch diameter refined product pipelines in eastern, central and north central Pennsylvania, 8-inch refined products pipeline in western New York and various diameter refined products pipelines in New Jersey (including 80 miles of the 16-inch diameter Harbor Pipeline).
- The Midcontinent region refined products pipelines primarily consist of 3-inch to 12-inch refined products pipelines in Ohio and 6-inch and 8-inch refined products pipeline in Michigan.
- The Southwest region refined products pipelines are located in East Texas and consist primarily of 8-inch and 12-inch diameter refined products pipeline.
- The Inland refined products pipeline consists of 12-, 10-, 8- and 6-inch diameter pipelines in the western, northwestern, and northeastern regions of Ohio.

- The J.C. Nolan Pipeline, a joint venture between a wholly owned subsidiary of the Partnership and a wholly owned subsidiary of Sunoco LP, transports diesel fuel from a tank farm in Hebert, Texas to Midland, Texas, and has a throughput capacity of approximately 36 MBbls/d.
- We have 37 refined products terminals with an aggregate storage capacity of approximately 8.6 MMBbls that facilitate the movement of refined products to or from storage or transportation systems, such as a pipeline, to other transportation systems, such as trucks or other pipelines. Each facility typically consists of multiple storage tanks and is equipped with automated truck loading equipment that is operational 24 hours a day.
- The Eagle Point Terminal can accommodate three marine vessels (ships or barges) to receive and deliver refined products to outbound ships and barges. The tank farm has a total active refined products storage capacity of approximately 7 MMBbls and provides customers with access to the facility via ship, barge, rail and pipeline. The terminal can deliver via ship, barge, rail, truck or pipeline, providing customers with access to various markets. The terminal generates revenue primarily by charging fees based on throughput, blending services and storage.
- The J.C. Nolan Terminal, a joint venture between a wholly owned subsidiary of the Partnership and a wholly owned subsidiary of Sunoco LP, provides diesel fuel storage in Midland, Texas.
- This segment also includes the following joint ventures: a 15% membership interest in Explorer, a 1,850-mile pipeline which originates from refining centers in Beaumont, Port Arthur and Houston, Texas and extends to Chicago, Illinois; a 31% membership interest in the Wolverine Pipe Line Company, a 1,055-mile pipeline that originates from Chicago, Illinois and extends to Detroit, Grand Haven, and Bay City, Michigan; a 17% membership interest in the West Shore Pipe Line Company, a 650-mile pipeline which originates in Chicago, Illinois and extends to Madison and Green Bay, Wisconsin; a 14% membership interest in the Yellowstone Pipe Line Company, a 710-mile pipeline which originates from Billings, Montana and extends to Moses Lake, Washington.

## Crude Oil Transportation and Services

The following details our pipelines and terminals in our crude oil transportation and services operations:

| Description of Assets                                   | Ownership Interest | Miles of Crude Pipeline | Working Storage Capacity (MBbls) |
|---|--------------------|-------------------------|----------------------------------|
| Dakota Access Pipeline                                  | 36.4 %             | 1,170                   | —                                |
| Energy Transfer Crude Oil Pipeline                      | 36.4 %             | 745                     | —                                |
| Bayou Bridge Pipeline                                   | 60 %               | 210                     | —                                |
| West Texas Gulf Pipeline                                | 100.0 %            | 584                     | —                                |
| Permian Express Pipelines                               | 87.7 %             | 1,030                   | —                                |

- (1) A joint venture between Energy Transfer and Sunoco LP formed in 2024. Energy transfer holds a 67.5% interest in ET-S Permian, with Sunoco LP holding the remaining 32.5% interest.
- (2) The White Cliffs Pipeline consists of two parallel, 12-inch common carrier pipelines: one crude oil pipeline and one NGL pipeline.

Our crude oil operations consist of an integrated set of pipeline, terminalling, trucking and acquisition and marketing assets that service the movement of crude oil from producers to end-user markets. The following details our assets in the crude oil transportation and services segment:

#### *Crude Oil Pipelines*

Our crude oil pipelines (through wholly owned subsidiaries or joint venture interests) consist of more than 18,000 miles of crude oil trunk pipelines as well as crude oil and produced water gathering pipelines throughout the Southwest, Midcontinent and Midwest United States. Our crude oil pipelines provide access to several trading hubs, including the largest trading hub for crude oil in the United States located in Cushing, Oklahoma, and other trading hubs located in Midland, Colorado City and Longview, Texas. Our crude oil pipelines also deliver to and connect with other pipelines that deliver crude oil to a number of refineries.

- *Bakken Pipeline.* The Dakota Access Pipeline and Energy Transfer Crude Oil Pipeline are collectively referred to as the “Bakken Pipeline.” The Bakken Pipeline is a 1,915-mile pipeline that transports domestically produced crude oil from the Bakken/Three Forks production areas in North Dakota to a storage and terminal hub outside of Patoka, Illinois, or to Gulf Coast connections including our crude terminal in Nederland, Texas. The Bakken Pipeline has a capacity of up to 750 MBbls/d. The pipeline transports light, sweet crude oil from North Dakota to major refining markets in the Midwest and Gulf Coast regions.

The Dakota Access Pipeline consists of approximately 1,170 miles of 12, 20, 24 and 30-inch diameter pipeline traversing North Dakota, South Dakota, Iowa and Illinois. Crude oil transported on the Dakota Access Pipeline originates at six terminal locations in the North Dakota counties of Mountrail, Williams and McKenzie. The pipeline delivers the crude oil to a hub outside of Patoka, Illinois where it can be delivered to the Energy Transfer Crude Oil Pipeline for delivery to the Gulf Coast or can be transported via other pipelines to refining markets throughout the Midwest.

The Energy Transfer Crude Oil Pipeline consists of approximately 745 miles of mostly 30-inch diameter pipeline from Patoka, Illinois to Nederland, Texas, where the crude oil can be refined or further transported to additional refining markets.

- *Bayou Bridge Pipeline.* The Bayou Bridge Pipeline is a joint venture between Energy Transfer and a subsidiary of Phillips 66, in which we have a 60% ownership interest and serve as the operator of the pipeline. The Bayou Bridge Pipeline consists of a 30-inch pipeline from Nederland, Texas to Lake Charles, Louisiana, and a 24-inch pipeline from Lake Charles, Louisiana to St. James, Louisiana. Bayou Bridge Pipeline has a capacity of approximately 480 MBbls/d of light and heavy crude oil from different sources to the St. James crude oil hub, which is home to important refineries located in the Gulf Coast region.
- *West Texas Gulf Pipeline.* West Texas Gulf Pipeline is a 26-inch and 20-inch pipeline system that transports barrels from Colorado City, Texas to Longview, Texas for delivery onto Mid Valley Pipeline and additional delivery points along the Gulf Coast via joint tariff.
- *Permian Express Pipelines.* The Permian Express pipelines are part of the PEP joint venture and include the Permian Express 1, Permian Express 2, Permian Express 3, Permian Express 4, Permian Longview and Louisiana Access, Longview to Louisiana and Nederland Access pipelines. These pipelines are comprised of crude oil trunk pipelines and crude oil gathering pipelines in Texas and Oklahoma and provide takeaway capacity from the Permian Basin, with origins in multiple locations in West Texas.
- *ET-S Permian.* ET-S Permian includes over 5,000 miles of crude oil and water gathering pipelines in the Permian Basin. It also has total crude oil storage capacity in excess of 11 million barrels in two terminals in Midland, Texas (described below), one terminal in Colorado City, Texas and several other storage facilities throughout the Permian Basin.
- *White Cliffs Pipeline.* White Cliffs Pipeline owns a 12-inch common carrier, crude oil pipeline, with a throughput capacity of 100 MBbls/d, that transports crude oil from Platteville, Colorado to Cushing, Oklahoma.

- *Maurepas Pipeline.* The Maurepas Pipeline consists of three pipelines, with an aggregate throughput capacity of 460 MBbls/d, which service refineries in the Gulf Coast region.
- *Mid Valley Pipeline.* The Mid Valley Pipeline originates in Longview, Texas and passes through Louisiana, Arkansas, Mississippi, Tennessee, Kentucky and Ohio and terminates in Samaria, Michigan. This pipeline provides crude oil to a number of refineries, primarily in the Midwest United States.
- *Cushing Pipeline.* The Cushing Pipeline consists of two 16-inch crude oil pipelines, providing service from the Permian Basin to Cushing, Oklahoma and to third-party systems in North Texas.
- *Wink to Webster Pipeline.* The Wink to Webster Pipeline is capable of transporting approximately 1,000 MBbl/d from origin points at Wink and Midland in the Permian Basin for delivery to multiple Houston area locations.
- *Crude Gathering and Water Gathering and Disposal.* We own integrated crude oil and water gathering systems across multiple basins in the United States.
  - *Permian Basin:* Our Permian Basin gathering assets in West Texas and eastern New Mexico encompass multiple systems in highly active areas of both the Delaware and Midland basins, with the ability to deliver virtually all gathered crude to major market hubs, including Midland, Wink and Crane, as well as our own long-haul pipelines that provide service to the Gulf Coast and Cushing. Our Permian Basin operations also consist of produced water gathering and disposal services in the Delaware Basin.
  - *Williston Basin:* Our Williston Basin gathering assets in North Dakota and eastern Montana include several systems built for gathering and transporting crude production from the wellhead to long-haul pipelines, including our Bakken Pipeline. Additionally, we have multiple water gathering systems in the Williston Basin that transport produced water to wholly owned and third-party disposal wells.
  - *Midcontinent:* Our Midcontinent gathering assets in Oklahoma and Kansas primarily transport wellhead and truck-delivered volumes to several local refineries as well as to Cushing, Oklahoma. A portion of these operations are conducted through Enable South Central Pipeline, a joint venture with a subsidiary of CVR Energy, Inc., which is operated by us and in which we own a 60% membership interest.

#### *Crude Oil Terminals*

- *Nederland, TX.* The Nederland Terminal, located on the Sabine-Neches waterway between Beaumont and Port Arthur, Texas, is a large marine terminal providing storage and distribution services for refiners and other large transporters of crude oil and NGLs. The terminal receives, stores and distributes crude oil, NGLs, feedstocks, petrochemicals and bunker oils (used for fueling ships and other marine vessels). The terminal currently has a total storage capacity of over 30 MMBbls in more than 80 above ground storage tanks with individual capacities of up to 660 MBbls.

The Nederland Terminal can receive crude oil at three of its seven ship docks and all three of its barge berths. The three ship docks are capable of receiving over 2 MMBbls/d of crude oil. In addition to our crude oil pipelines, the terminal can also receive crude oil through a number of other pipelines, including the DOE. The DOE pipelines connect the terminal to the United States Strategic Petroleum Reserve's West Hackberry caverns at Hackberry, Louisiana and Big Hill caverns near Winnie, Texas, which have an aggregate storage capacity of approximately 395 MMBbls. The terminal also has crude oil rail unloading facilities, including steam availability for heating heavy oils prior to loading.

The Nederland Terminal can deliver crude oil and other petroleum products via pipeline, barge and ship. The terminal has three ship docks and three barge berths that are capable of delivering crude oils for international transport. In total, the terminal is capable of delivering over 2 MMBbls/d of crude oil to our crude oil pipelines or a number of third-party pipelines including the DOE. The Nederland Terminal generates crude oil revenues primarily by providing term or spot storage services and throughput capabilities to a number of customers.
- *Midland, TX.* We have two terminals in Midland, Texas. Midland South includes approximately 1 MMBbls of crude oil storage and a combined 20 lanes of truck loading and unloading; the terminal provides access to the Permian Express pipelines. Midland North offers 2 MMBbls of crude oil storage capacity and additional supply and demand connectivity.
- *Marcus Hook, PA.* The Marcus Hook Terminal can receive crude oil via marine vessel and can deliver via marine vessel and pipeline. The terminal has a total active crude oil storage capacity of approximately 1 MMBbls.
- *Houston, TX.* The Houston Terminal consists of storage tanks located on the Houston Ship Channel with an aggregate storage capacity of 18.2 MMBbls used to store, blend and transport refinery products and refinery feedstocks via pipeline, barge, rail, truck and ship. This facility has five deep-water ship docks on the Houston Ship Channel capable of loading and unloading Suezmax cargo vessels, and seven barge docks that can accommodate 23 barges simultaneously, three inbound

crude oil pipelines, two outbound crude oil pipelines connecting to three refineries, and numerous rail and truck loading spots.

- *Cushing, OK.* The Cushing Terminal has approximately 9.5 MMBbls of crude oil storage. The storage terminal has inbound connections with the White Cliffs Pipeline from Platteville, Colorado, the Great Salt Plains Pipeline from Cherokee, Oklahoma, the Cimarron Pipeline from Boyer, Kansas and two-way connections with all of the other major storage terminals in Cushing. The Cushing Terminal also includes truck unloading facilities.
- *Patoka, IL.* The Patoka Terminal is a tank farm owned by the PEP joint venture and is located in Marion County, Illinois. The facility includes 234 acres of owned land and provides for approximately 1.9 MMBbls of crude oil storage.
- *Price River Terminal.* The Price River Terminal is a rail terminal joint venture in Carbon County, Utah, capable of transloading local waxy crude production as well as other bulk materials. The terminal has 200 MBbls of heated storage and more than 60 MBbls/d of rail loading capacity.
- *Colt Hub.* The Colt Hub is located in the heart of the Williston Basin in Williams County, North Dakota. The Colt Hub has approximately 1.2 MMBbls of crude oil storage capacity and 160 MBbls/d of rail loading capacity.

#### *Crude Oil Acquisition and Marketing*

Our crude oil acquisition and marketing operations are conducted using our assets, which include 367 crude oil transport trucks, 356 trailers and 242 crude oil truck unloading facilities as well as third-party truck, rail, pipeline and marine assets.

#### **Investment in Sunoco LP**

Sunoco LP purchases motor fuel primarily from independent refiners and major oil companies and distributes it across more than 40 U.S. states and territories, including Hawaii and Puerto Rico, as well as Canada, Mexico, the Greater Caribbean and Europe (32 countries and territories in North America, the Greater Caribbean and Europe) to:

- 206 company-operated retail stores;
- 1,638 independently operated commission agent locations where Sunoco LP sells motor fuel to customers under commission agent arrangements with such operators;
- 8,363 retail stores operated by independent operators, which are referred to as “dealers” or “distributors,” pursuant to long-term distribution agreements; and
- over 13,000 other commercial customers, including unbranded retail stores, other fuel distributors, school districts and municipalities and other industrial customers.

Sunoco LP’s fuel distributions operations also includes its retail operations in Hawaii and New Jersey, credit card services and franchise royalties.

Sunoco LP’s pipeline systems operations is comprised of approximately 6,000 miles of refined product pipeline (including the pipeline in the J.C. Nolan joint venture), approximately 6,000 miles of crude oil pipeline (including the pipeline in the ET-S Permian joint venture), approximately 2,000 miles of ammonia pipeline and 69 terminals (including the J.C. Nolan and ET-S Permian joint ventures).

Additionally, Sunoco LP’s terminals operations include four transmix processing facilities and 83 terminals (two in Europe, six in Hawaii and 53 in the continental United States). Transmix is the mixture of various refined products (primarily gasoline and diesel) created in the supply chain (primarily in pipelines and terminals) when various products interface with each other. Transmix processing plants separate this mixture and return it to salable products of gasoline and diesel. Sunoco LP’s refined product terminals provide storage and distribution services used to supply its own retail stations as well as third-party customers. In addition, Sunoco LP provides services at its terminals to various third-party throughput customers.

Following its acquisition of Parkland, Sunoco LP also operates the Burnaby Refinery in British Columbia, which has approximately 55,000 barrels per day of operational capacity. The refinery consumes primarily sweet conventional crude oil and sweet synthetic crude oil to produce gasoline, diesel and jet fuel among other products. The refinery meets federal and provincial regulations for lower carbon intensity transportation fuels through a combination of co-processing of bio feedstocks (i.e. canola oil, tallow, tall oil and others) and blending of low-carbon intensity fuels such as bio-diesel, renewable diesel, ethanol and others. Fuel from the refinery is sold primarily through Sunoco LP-owned retail network in British Columbia (“BC”), directly to Vancouver International Airport, and to commercial and cardlock customers.

## Investment in USAC

The following details the assets of USAC:

USAC's standardized compression unit fleet is powered primarily by the Caterpillar, Inc.'s 3400, 3500 and 3600 engine classes, which range from 400 to 5,000 horsepower per unit. These larger horsepower units, which USAC defines as 400 horsepower per unit or greater, represented 87.6% of its total fleet horsepower as of December 31, 2025. The remainder of its fleet consists of smaller horsepower units ranging from 40 horsepower to 399 horsepower that are primarily used in gas lift applications.

The following table provides a summary of USAC's compression units by horsepower as of December 31, 2025:

| Unit Horsepower         | Fleet Horsepower | Number of Units | Horsepower on Order | Number of Units on Order | Total Horsepower | Number of Units | Percent of Fleet Horsepower | Percent of Units |
|-------------------------|------------------|-----------------|---------------------|--------------------------|------------------|-----------------|-----------------------------|------------------|
| <b>Small horsepower</b> |                  |                 |                     |                          |                  |                 |                             |                  |
| <400                    | 488,813          | 2,878           | —                   | —                        | 488,813          | 2,878           | 12.4 %                      | 53.4 %           |
| <b>Large horsepower</b> |                  |                 |                     |                          |                  |                 |                             |                  |
| >400 and <1,000         | 422,920          | 722             | —                   | —                        | 422,920          | 722             | 10.6 %                      | 13.4 %           |
| >1,000                  | 2,982,599        | 1,764           | 63,250              | 28                       | 3,045,849        | 1,792           | 77.0 %                      | 33.2 %           |
| Total large horsepower  | 3,405,519        | 2,486           | 63,250              | 28                       | 3,468,769        | 2,514           | 87.6 %                      | 46.6 %           |
| Total horsepower        | 3,894,332        | 5,364           | 63,250              | 28                       | 3,957,582        | 5,392           | 100.0 %                     | 100.0 %          |

## All Other

The following details the significant assets in the "All Other" segment.

### Compression

We own Dual Drive Technologies, Ltd, which provides compression services to customers engaged in the transportation of natural gas, including our other segments.

### Natural Resources Operations

Our Natural Resources operations primarily involve the management and leasing of coal properties and the subsequent collection of royalties. We also earn revenues from other land management activities, such as selling standing timber, leasing fee-based coal-related infrastructure facilities to certain lessees and end-user industrial plants, collecting oil and gas royalties and from coal transportation, or wheelage fees. As of December 31, 2025, we owned or controlled approximately 725 million tons of proven and probable coal reserves in central and northern Appalachia, properties in eastern Kentucky, southwestern Virginia and southern West Virginia, and in the Illinois Basin, properties in southern Illinois, Indiana, and western Kentucky and as the operator of end-user coal handling facilities.

## Business Strategy

We believe we have engaged, and will continue to engage, in a well-balanced plan for growth through strategic acquisitions, internally generated expansion, measures aimed at increasing the profitability of our existing assets and executing cost control measures where appropriate to manage our operations.

We intend to continue to operate as a diversified, growth-oriented limited partnership. We believe that by pursuing independent operating and growth strategies we will be best positioned to achieve our objectives. We balance our desire for growth with our goal of preserving a strong balance sheet, ample liquidity and investment grade credit metrics.

Following is a summary of the business strategies of our core businesses:

**Growth through acquisitions.** We intend to continue to make strategic acquisitions that offer the opportunity for operational efficiencies and the potential for increased utilization and expansion of our existing assets while supporting our investment grade credit ratings.

***Engage in construction and expansion opportunities.*** We intend to leverage our existing infrastructure and customer relationships by constructing and expanding systems to meet new or increased demand for midstream and transportation services.

***Increase cash flow from fee-based businesses.*** We intend to increase the percentage of our business conducted with third parties under fee-based arrangements in order to provide for stable, consistent cash flows over long contract periods while reducing exposure to changes in commodity prices.

***Enhance profitability of existing assets.*** We intend to increase the profitability of our existing asset base by adding new volumes under long-term producer commitments, undertaking additional initiatives to enhance utilization and reducing costs by improving operations.

## **Competition**

### ***Natural Gas***

The business of providing natural gas gathering, compression, treating, transportation, storage and marketing services is highly competitive. Since pipelines are generally the only practical mode of transportation for natural gas over land, the most significant competitors of our transportation and storage segment are other pipelines. Pipelines typically compete with each other based on location, capacity, price and reliability.

We face competition with respect to retaining and obtaining significant natural gas supplies under terms favorable to us for the gathering, treating and marketing portions of our business. Our competitors include major integrated oil and gas companies, interstate and intrastate pipelines and other companies that gather, compress, treat, process, transport and market natural gas. Many of our competitors, such as major oil and gas and pipeline companies, have capital resources and control supplies of natural gas substantially greater than ours.

In marketing natural gas, we have numerous competitors, including marketing affiliates of interstate pipelines, major integrated oil and gas companies, and local and national natural gas gatherers, brokers and marketers of widely varying sizes, financial resources and experience. Local utilities and distributors of natural gas are, in some cases, engaged directly, and through affiliates, in marketing activities that compete with our marketing operations.

### ***NGL***

In markets served by our NGL pipelines, we face competition with other pipeline companies, including those affiliated with major oil, petrochemical and natural gas companies, and barge, rail and truck fleet operations. In general, our NGL pipelines compete with these entities in terms of transportation fees, reliability and quality of customer service. We face competition with other storage facilities based on fees charged and the ability to receive and distribute the customer's products. We compete with a number of NGL fractionators in Texas and Louisiana. Competition for such services is primarily based on the fractionation fee charged.

### ***Crude Oil and Refined Products***

In markets served by our crude oil and refined products pipelines, we face competition from other pipelines as well as rail and truck transportation. Generally, pipelines are the safest, lowest cost method for long-haul, overland movement of products and crude oil. Therefore, the most significant competitors for large volume shipments in the areas served by our pipelines are other pipelines. In addition, pipeline operations face competition from rail and trucks that deliver products in a number of areas that our pipeline operations serve. While their costs may not be competitive for longer hauls or large volume shipments, rail and trucks compete effectively for incremental and marginal volume in many areas served by our pipelines.

With respect to competition from other pipelines, the primary competitive factors consist of transportation charges, access to crude oil supply and market demand. Competitive factors in crude oil purchasing and marketing include price and contract flexibility, quantity and quality of services, and accessibility to end markets.

Our refined product terminals compete with other independent terminals with respect to price, versatility and services provided. The competition primarily comes from integrated petroleum companies, refining and marketing companies, independent terminal companies and distribution companies with marketing and trading operations.

### ***Wholesale Fuel Distribution and Retail Marketing***

In our wholesale fuel distribution business, we compete primarily with other independent motor fuel distributors. The markets for distribution of wholesale motor fuel and the large and growing convenience store industry are highly competitive and

fragmented, which results in narrow margins. We have numerous competitors, some of which may have significantly greater resources and name recognition than we do. Significant competitive factors include the availability of major brands, customer service, price, range of services offered and quality of service, among others. We rely on our ability to provide value-added and reliable service and to control our operating costs in order to maintain our margins and competitive position.

In our retail business, we face strong competition in the market for the sale of retail gasoline and merchandise. Our competitors include service stations of large integrated oil companies, independent gasoline service stations, convenience stores, fast food stores, supermarkets, drugstores, dollar stores, club stores and other similar retail outlets, some of which are well-recognized national or regional retail systems. The number of competitors varies depending on the geographical area. It also varies with gasoline and convenience store offerings. The principal competitive factors affecting our retail marketing operations include gasoline and diesel acquisition costs, site location, product price, selection and quality, site appearance and cleanliness, hours of operation, store safety, customer loyalty and brand recognition. We compete by pricing gasoline competitively, combining our retail gasoline business with convenience stores that provide a wide variety of products, and using advertising and promotional campaigns.

### ***Refinery***

Sunoco LP's Burnaby Refinery, acquired in the Parkland acquisition, competes with other refineries owned by major energy companies. The majority of the Burnaby Refinery's production remains in British Columbia, Canada but faces competition with Alberta, Canada-based refineries which consume crude from Alberta, Canada and sell to the British Columbia market with transportation through the Trans Mountain Pipeline and other means. Competition is based primarily on transportation charges, reliability of supply and proximity to end users.

### **Credit Risk and Customers**

Credit risk refers to the risk that a counterparty may default on its contractual obligations resulting in a loss to the Partnership. Credit policies have been approved and implemented to govern the Partnership's portfolio of counterparties with the objective of mitigating credit losses. These policies establish guidelines, controls and limits to manage credit risk within approved tolerances by mandating an appropriate evaluation of the financial condition of existing and potential counterparties, monitoring agency credit ratings and by implementing credit practices that limit exposure according to the risk profiles of the counterparties. Furthermore, the Partnership may, at times, require collateral under certain circumstances to mitigate credit risk as necessary. The Partnership also uses industry standard commercial agreements which allow for the netting of exposures associated with transactions executed under a single commercial agreement. Additionally, we utilize master netting agreements to offset credit exposure across multiple commercial agreements with a single counterparty or affiliated group of counterparties.

Our natural gas transportation and midstream revenues are derived significantly from companies that engage in exploration and production activities. In addition to oil and gas producers, the Partnership's counterparties consist of a diverse portfolio of customers across the energy industry, including petrochemical companies, commercial and industrial end-users, municipalities, gas and electric utilities, midstream companies and independent power generators. Our overall exposure may be affected positively or negatively by macroeconomic or regulatory changes that impact our counterparties to one extent or another. Currently, management does not anticipate a material adverse effect in our financial position or results of operations as a consequence of counterparty non-performance.

During the year ended December 31, 2025, none of our customers individually accounted for more than 10% of our consolidated revenues.

### **Regulation**

***Regulation of Interstate Natural Gas Pipelines.*** The FERC has broad regulatory authority over the business and operations of interstate natural gas pipelines. Under the NGA, the FERC generally regulates the transportation of natural gas in interstate commerce. For FERC regulatory purposes, "transportation" includes natural gas pipeline transmission (forwardhauls and backhauls), storage and other services. FGT, Transwestern, Panhandle, Trunkline, Tiger, Fayetteville Express, Rover, Sea Robin, Midcontinent Express, EGT, MRT, SESH, Stingray, Gulf Run and Southwest Gas transport natural gas in interstate commerce and thus each qualifies as a "natural-gas company" under the NGA subject to the FERC's regulatory jurisdiction. We also hold certain natural gas storage facilities that are subject to the FERC's regulatory oversight under the NGA.

The FERC's NGA authority includes the power to:

- approve the siting, construction and operation of new facilities;
- review and approve transportation rates;
- determine the types of services our regulated assets are permitted to perform;

- regulate the terms and conditions associated with these services;
- permit the extension or abandonment of services and facilities;
- require the maintenance of accounts and records; and
- authorize the acquisition and disposition of facilities.

Under the NGA, interstate natural gas companies must charge rates that are just and reasonable. In addition, the NGA prohibits natural gas companies from unduly preferring or unreasonably discriminating against any person with respect to pipeline rates or terms and conditions of service.

The maximum rates to be charged by NGA-jurisdictional natural gas companies and their terms and conditions for service are required to be on file with the FERC. Most natural gas companies are authorized to offer discounts from their FERC-approved maximum just and reasonable rates when competition warrants such discounts. Natural gas companies are also generally permitted to offer negotiated rates different from rates established in their tariff if, among other requirements, such companies' tariffs offer a cost-based recourse rate to a prospective shipper as an alternative to the negotiated rate. Natural gas companies must make offers of rate discounts and negotiated rates on a basis that is not unduly discriminatory. Existing tariff rates may be challenged by complaint or on the FERC's own motion, and if found unjust and unreasonable in a FERC order, may be altered on a prospective basis from no earlier than the date of such FERC order. The FERC must also approve all rate changes. We cannot guarantee that the FERC will allow us to charge rates that fully recover our costs or continue to pursue its approach of pro-competitive policies.

Pursuant to the FERC's rules promulgated under the Energy Policy Act of 2005 (the "EPAAct of 2005"), it is unlawful for any entity, directly or indirectly, in connection with the purchase or sale of electric energy or natural gas or the purchase or sale of transmission or transportation services subject to FERC jurisdiction: (i) to defraud using any device, scheme or artifice; (ii) to make any untrue statement of material fact or omit a material fact; or (iii) to engage in any act, practice or course of business that operates or would operate as a fraud or deceit. The Commodity Futures Trading Commission ("CFTC") also holds authority to monitor certain segments of the physical and futures energy commodities market pursuant to the Commodity Exchange Act ("CEA"). In addition, the Federal Trade Commission has the authority under the Federal Trade Commission Act of 1914 and the Energy Independence and Security Act of 2007 to regulate wholesale petroleum markets. With regard to our physical purchases and sales of natural gas, NGLs or other energy commodities; our transportation of these energy commodities; and any related hedging activities that we undertake, we are required to observe these anti-market manipulation laws and related regulations enforced by the FERC, the CFTC and/or the Federal Trade Commission. These agencies hold substantial enforcement authority, including the ability to assess or seek civil penalties of up to approximately \$1.5 million per day per violation, to order disgorgement of profits and to recommend criminal penalties. Should we violate the anti-market manipulation laws and regulations, we could also be subject to related third-party damage claims by, among others, sellers, royalty owners and taxing authorities.

Failure to comply with the NGA, the EPAAct of 2005, the CEA and the other federal laws and regulations governing our operations and business activities can result in the imposition of administrative, civil and criminal remedies.

**Regulation of Intrastate Natural Gas and NGL Pipelines.** Intrastate transportation of natural gas and NGLs is largely regulated by the state in which such transportation takes place. To the extent that our intrastate natural gas transportation systems transport natural gas in interstate commerce, the rates and terms and conditions of such services are subject to FERC jurisdiction under Section 311 of the NGPA. The NGPA regulates, among other things, the provision of transportation services by an intrastate natural gas pipeline on behalf of a local distribution company or an interstate natural gas pipeline. The rates and terms and conditions of some transportation and storage services provided on our pipeline systems of Enable Oklahoma Intrastate Transmission, LLC, Oasis Pipeline, LP, Houston Pipe Line Company LP, ETC Katy Pipeline, LLC, Energy Transfer Fuel, LP, Lobo Pipeline Company, LLC, Pelico Pipeline, LLC, Regency Intrastate Gas LP, Red Bluff Express Pipeline, LLC, Trans-Pecos Pipeline, LLC and Comanche Trail Pipeline, LLC are subject to FERC regulation pursuant to Section 311 of the NGPA. Under Section 311, rates charged for intrastate transportation must be fair and equitable, and amounts collected that are determined to be in excess of fair and equitable rates are subject to refund with interest. The terms and conditions of service set forth in the intrastate facility's statement of operating conditions are also subject to FERC review and approval. Should the FERC determine not to authorize rates equal to or greater than our currently approved Section 311 rates, our business may be adversely affected. Failure to observe the service limitations applicable to transportation and storage services under Section 311, failure to comply with the rates approved by the FERC for Section 311 service, and failure to comply with the terms and conditions of service established in the pipeline's FERC-approved statement of operating conditions could result in an alteration of jurisdictional status, and/or the imposition of administrative, civil and criminal remedies.

Our intrastate natural gas operations are also subject to regulation by various agencies in Texas, principally the TRRC. Our intrastate pipeline and storage operations in Texas are also subject to the Texas Utilities Code, as implemented by the TRRC.

Generally, the TRRC is vested with authority to ensure that rates, operations and services of gas utilities, including intrastate pipelines, are just and reasonable and not discriminatory. The rates we charge for transportation services are deemed just and reasonable under Texas law unless challenged in a customer or TRRC complaint. We cannot predict whether such a complaint will be filed against us or whether the TRRC will change its regulation of these rates. Failure to comply with the Texas Utilities Code can result in the imposition of administrative, civil and criminal remedies.

Our NGL pipelines and operations are subject to state statutes and regulations which could impose additional environmental, safety and operational requirements relating to the design, siting, installation, testing, construction, operation, replacement and management of NGL transportation systems. In some jurisdictions, state public utility commission oversight may include the possibility of fines, penalties and delays in construction related to these regulations. In addition, the rates, terms and conditions of service for shipments of NGLs on our pipelines are subject to regulation by the FERC under the Interstate Commerce Act (“ICA”) and the Energy Policy Act of 1992 (the “EPAAct of 1992”) if the NGLs are transported in interstate or foreign commerce whether by our pipelines or other means of transportation. Since we do not control the entire transportation path of all NGLs shipped on our pipelines, FERC regulation could be triggered by our customers’ transportation decisions.

**Regulation of Sales of Natural Gas and NGLs.** The price at which we buy and sell natural gas currently is not subject to federal regulation and, for the most part, is not subject to state regulation. The price at which we sell NGLs is not subject to federal or state regulation.

To the extent that we enter into transportation contracts with natural gas pipelines that are subject to FERC regulation, we are subject to FERC requirements related to the use of such capacity. Any failure on our part to comply with the FERC’s regulations and policies, or with an interstate pipeline’s tariff, could result in the imposition of civil and criminal penalties.

Our sales of natural gas are affected by the availability, terms and cost of pipeline transportation. As noted above, the price and terms of access to pipeline transportation are subject to extensive federal and state regulation. The FERC frequently proposes and implements new rules and regulations affecting those segments of the natural gas industry. These initiatives also may affect the intrastate transportation of natural gas under certain circumstances. The stated purpose of many of these regulatory changes is to promote competition among the various sectors of the natural gas industry and these initiatives generally reflect more light-handed regulation. We cannot predict the ultimate impact of these regulatory changes to our natural gas marketing operations, and we note that some of the FERC’s regulatory changes may adversely affect the availability and reliability of interruptible transportation service on interstate pipelines. We do not believe that we will be affected by any such FERC action in a manner that is materially different from other natural gas marketers with whom we compete.

**Regulation of Gathering Pipelines.** Section 1(b) of the NGA exempts natural gas gathering facilities from the jurisdiction of the FERC under the NGA. We own a number of natural gas pipelines that we believe meet the traditional tests the FERC uses to establish a pipeline’s status as a gathering pipeline not subject to FERC jurisdiction. However, the distinction between FERC-regulated transmission services and federally unregulated gathering services has been the subject of substantial litigation and varying interpretations, so the classification and regulation of our gathering facilities could be subject to change based on future determinations by the FERC, the courts and Congress. State regulation of gathering facilities generally includes various safety, environmental and, in some circumstances, nondiscriminatory take requirements and complaint-based rate regulation.

In Texas, our gathering facilities are subject to regulation by the TRRC under the Texas Utilities Code in the same manner as described above for our intrastate pipeline facilities. Louisiana’s Pipeline Operations Section of the Department of Natural Resources’ Office of Conservation is generally responsible for regulating intrastate pipelines and gathering facilities in Louisiana and has authority to review and authorize natural gas transportation transactions and the construction, acquisition, abandonment and interconnection of physical facilities.

Historically, apart from pipeline safety, Louisiana has not acted to exercise this jurisdiction respecting gathering facilities. In Louisiana, our Chalkley System is regulated as an intrastate transporter, and the Louisiana Office of Conservation has determined that our Whiskey Bay System is a gathering system.

We are subject to state ratable take and common purchaser statutes in all of the states in which we operate. The ratable take statutes generally require gatherers to take, without undue discrimination, natural gas production that may be tendered to the gatherer for handling. Similarly, common purchaser statutes generally require gatherers to purchase without undue discrimination as to source of supply or producer. These statutes are designed to prohibit discrimination in favor of one producer over another producer or one source of supply over another source of supply. These statutes have the effect of restricting the right of an owner of gathering facilities to decide with whom it contracts to purchase or transport natural gas.

Natural gas gathering may receive greater regulatory scrutiny at both the state and federal levels. For example, the TRRC has approved changes to its regulations governing transportation and gathering services performed by intrastate pipelines and gatherers, which prohibit such entities from unduly discriminating in favor of their affiliates. Many of the producing states have

adopted some form of complaint-based regulation that generally allows natural gas producers and shippers to file complaints with state regulators in an effort to resolve grievances relating to natural gas gathering access and rate discrimination allegations. Our gathering operations could be adversely affected should they be subject in the future to the application of additional or different state or federal regulation of rates and services. Our gathering operations also may be or become subject to safety and operational regulations relating to the design, installation, testing, construction, operation, replacement and management of gathering facilities. Additional rules and legislation pertaining to these matters are considered or adopted from time to time. We cannot predict what effect, if any, such changes might have on our operations, but the industry could be required to incur additional capital expenditures and increased costs depending on future legislative and regulatory changes.

**Regulation of Interstate Crude Oil, NGL and Products Pipelines.** Interstate common carrier pipeline operations are subject to rate regulation by the FERC under the ICA, the EPAct of 1992, and related rules and orders. The ICA requires that tariff rates for petroleum pipelines be “just and reasonable” and not unduly discriminatory and that such rates and terms and conditions of service be filed with the FERC. This statute also permits interested persons to challenge proposed new or changed rates. The FERC is authorized to suspend the effectiveness of such rates for up to seven months, though rates are typically not suspended for the maximum allowable period. If the FERC finds that the new or changed rate is unlawful, it may require the carrier to pay refunds for the period that the rate was in effect. The FERC also may investigate, upon complaint or on its own motion, rates that are already in effect and may order a carrier to change its rates prospectively. Upon an appropriate showing, a shipper may obtain reparations for damages sustained for a period of up to two years prior to the filing of a complaint.

The FERC generally has not investigated interstate rates on its own initiative when those rates, like those we charge, have not been the subject of a protest or a complaint by a shipper. However, the FERC could investigate our rates at the urging of a third-party if the third-party is either a current shipper or has a substantial economic interest in the tariff rate level. Although no assurance can be given that the tariff rates charged by us ultimately will be upheld if challenged, management believes that the tariff rates now in effect for our pipelines are within the maximum rates allowed under current FERC policies and precedents.

For many locations served by our product and crude pipelines, we are able to establish negotiated rates. Otherwise, we are permitted to charge cost-based rates, or in many cases, grandfathered rates based on historical charges or settlements with our customers. To the extent we rely on cost-of-service ratemaking to establish or support our rates, the issue of the proper allowance for federal and state income taxes could arise. In July 2016, the United States Court of Appeals for the District of Columbia Circuit issued an opinion in *United Airlines, Inc., et al. v. FERC*, finding that the FERC had failed to demonstrate that permitting an interstate petroleum products pipeline organized as a master limited partnership, or MLP, to include an income tax allowance in the cost of service underlying its rates, in addition to the discounted cash flow return on equity, would not result in the pipeline partnership owners double recovering their income taxes. The court vacated the FERC’s order and remanded to the FERC to consider mechanisms for demonstrating that there is no double recovery as a result of the income tax allowance.

In March 2018, the FERC issued a Revised Policy Statement on Treatment of Income Taxes in which the FERC found that an impermissible double recovery results from granting an MLP pipeline both an income tax allowance and a return on equity pursuant to the FERC’s discounted cash flow methodology. The FERC revised its previous policy, stating that it would no longer permit an MLP pipeline to recover an income tax allowance in its cost of service. The FERC stated it will address the application of the *United Airlines* decision to non-MLP partnership forms as those issues arise in subsequent proceedings. In July 2018, the FERC dismissed requests for rehearing and clarification of the March 2018 Revised Policy Statement, but provided further guidance, clarifying that a pass-through entity will not be precluded in a future proceeding from arguing and providing evidentiary support that it is entitled to an income tax allowance and demonstrating that its recovery of an income tax allowance does not result in a double recovery of investors’ income tax costs. On July 31, 2020, the United States Court of Appeals for the District of Columbia Circuit issued an opinion upholding FERC’s March 2018 Revised Policy Statement, as clarified and revised on rehearing. In light of the rehearing order’s clarification regarding individual entities’ ability to argue in support of recovery of an income tax allowance and the court’s subsequent opinion upholding denial of an income tax allowance to a master limited partnership, the impacts the FERC’s policy on the treatment of income taxes may have on the rates an interstate pipeline held in a tax-pass-through entity can charge for the FERC regulated transportation services are unknown at this time. Please see “Item 1A. Risk Factors - Regulatory Matters.”

Effective January 2018, the 2017 Tax Cuts and Jobs Act changed several provisions of the federal tax code, including a reduction in the maximum corporate tax rate. With the lower tax rate, and as discussed immediately above, the maximum tariff rates allowed by the FERC under its rate base methodology may be impacted by a lower income tax allowance component. Many of our interstate pipelines, such as Tiger, Midcontinent Express and Fayetteville Express, have negotiated market rates that were agreed to by customers in connection with long-term contracts entered into to support the construction of the pipelines, and the rate base methodology does not apply directly to these contracts. Other systems, such as FGT, Transwestern and Panhandle, have a mix of tariff rate, discount rate, and negotiated rate agreements. In addition, several of these pipelines are

covered by approved settlements, pursuant to which rate filings will be made in the future. As such, the timing and impact to these systems of any tax-related policy change is unknown at this time and varies based on the circumstances of each pipeline.

The EPAct of 1992 required the FERC to establish a simplified and generally applicable methodology to adjust tariff rates for inflation for interstate petroleum pipelines. As a result, the FERC adopted an indexing rate methodology which, as currently in effect, allows common carriers to change their rates within prescribed ceiling levels that are tied to changes in the Producer Price Index for Finished Goods, or PPI-FG. The FERC's indexing methodology is subject to review every five years.

In December 2020, FERC issued an order setting the indexed rate at PPI-FG plus 0.78% during the five-year period commencing July 1, 2021 and ending June 30, 2026. The FERC received requests for rehearing of its December 17, 2020 order and on January 20, 2022, granted rehearing and modified the oil index. Specifically, for the five-year period commencing July 1, 2021 and ending June 30, 2026, FERC-regulated liquids pipelines charging indexed rates are permitted to adjust their indexed ceilings annually by PPI-FG minus 0.21%. FERC directed liquids pipelines to recompute their ceiling levels for July 1, 2021 through June 30, 2022, as well as the ceiling levels for the period July 1, 2022 through June 30, 2023, based on the new index level. Where an oil pipeline's filed rates exceed its ceiling levels, FERC ordered such oil pipelines to reduce the rate to bring it into compliance with the recomputed ceiling level to be effective March 1, 2022. Some parties sought rehearing of the January 20 order with FERC, which was denied by FERC on May 6, 2022. Certain parties appealed the January 20 and May 6 orders. On July 26, 2024, the D.C. Circuit ruled in *LEPA v. FERC* that FERC violated the Administrative Procedure Act because the January 20 order modified the index without following notice and comment. As a result, the D.C. Circuit vacated the January 20 order and on September 17, 2024, the FERC reinstated the index level established by its original December 17 order, directed pipelines to file an informational filing to show their recomputed ceiling levels reflecting the reinstated index level and stated that pipelines may file to prospectively increase their indexed rates to their recomputed levels.

On October 17, 2024, the FERC issued a Supplemental Notice of Proposed Rulemaking ("Supplemental NOPR") that proposed a reduction to the then-currently effective index by one percent. On November 20, 2025, the FERC withdrew the Supplemental NOPR and confirmed that the PPI-FG-0.78% index established in December 2020 will remain in place through June 30, 2026. On the same day, the FERC approved limited relief for pipelines. Oil pipelines with index-based rates may recover applicable rate differences from March 1, 2022 to September 17, 2024, but only if such pipelines charged the maximum rate allowed under the applicable index ceiling during the relevant time period. Parties have since filed requests for clarification or rehearing, as well as court appeals, to determine whether pipelines may recover rate differences in other scenarios. Also on November 20, 2025, the FERC issued a Notice of Proposed Rulemaking for the Five-Year Review of the Oil Pipeline Index proposing an index level of Producer Price Index for Finished Goods (PPI-FG) minus 1.42% for the period from July 1, 2026 to June 30, 2031. The indexing methodology is applicable to existing rates, including grandfathered rates, with the exclusion of market-based rates. A pipeline is not required to raise its rates up to the index ceiling, but it is permitted to do so and rate increases made under the index are presumed to be just and reasonable unless a protesting party can demonstrate that the portion of the rate increase resulting from application of the index is substantially in excess of the pipeline's increase in costs. Under the indexing rate methodology, in any year in which the index is negative, pipelines must file to lower their rates if those rates would otherwise be above the rate ceiling.

In addition to terminating the Supplemental NOPR proceeding, on November 20, 2025, FERC issued an Order Denying Rehearing of the Reinstatement Order and Granting Remedial Relief ("Remedial Relief Order"), which granted remedial relief to liquids pipelines for the locked-in period of March 1, 2022 to September 17, 2024, when the lower index was effective under the order vacated by the D.C. Circuit in *LEPA v. FERC*. On December 22, 2025 Energy Transfer filed a request for clarification of the Remedial Relief Order, asking FERC to clarify that pipelines are also entitled to recover interest on the amounts owed by shippers. Such request for clarification remains pending before the FERC.

On December 18, 2025, the FERC issued an Order Denying Petition for Emergency Relief ("Emergency Relief Order Denial"), which denied a petition requesting emergency relief from invoices issued by a liquid pipeline company to recover amounts of indexed rates for the period from March 1, 2022, to September 17, 2024 ("Locked-In Period") and explains that, consistent with the Remedial Relief Order, pipelines that charged the maximum rates permitted under the FERC's now-vacated January 2022 rehearing order during the Locked-In Period may invoice shippers to recover the amounts that would have been chargeable under the December 2020 order.

On November 20, 2025, the FERC issued a Notice of Proposed Rulemaking ("NOPR") on the 2026 Five-Year Oil Pipeline Index, proposing to use the Producer Price Index for Finished Goods minus 1.42% as the index level beginning July 1, 2026. The NOPR is currently in the standard notice and comment period.

In January 2026, multiple shippers have filed petitions for review at the D.C. Circuit of the (i) Remedial Relief Order, (ii) Order Terminating Supplemental NOPR, and (iii) Emergency Relief Order Denial. These appeals are pending.

On December 15, 2022, the FERC issued a Proposed Policy Statement on Oil Pipeline Affiliate Committed Service, which addresses whether a contract for committed transportation service complies with the Interstate Commerce Act where the only shipper to obtain the committed service is an affiliate of the regulated entity. If adopted, the proposed policy statement would create a rebuttable presumption that affiliate contracts are unduly discriminatory and not just and reasonable in certain circumstances and require a pipeline to produce additional evidentiary support for affiliate contracts rates and terms. This follows a trend of increased scrutiny by FERC on affiliated contracts across all industries regulated by the FERC. Initial comments on the proposed policy statement were due on February 13, 2023. The FERC has taken no further action on the proposed policy statement since that time.

**Regulation of Intrastate Crude Oil, NGL and Products Pipelines.** Some of our crude oil, NGL and products pipelines are subject to regulation by the TRRC, the Pennsylvania Public Utility Commission and the Oklahoma Corporation Commission. The operations of our joint venture interests are also subject to regulation in the states in which they operate. The applicable state statutes require that pipeline rates be nondiscriminatory and provide no more than a fair return on the aggregate value of the pipeline property used to render services. State commissions generally have not initiated an investigation of rates or practices of petroleum pipelines in the absence of shipper complaints. Complaints to state agencies have been infrequent and are usually resolved informally. Although management cannot be certain that our intrastate rates ultimately would be upheld if challenged, we believe that, given this history, the tariffs now in effect are not likely to be challenged or, if challenged, are not likely to be ordered to be reduced.

In addition, as noted above, the rates, terms and conditions for shipments of crude oil, NGLs or products on our pipelines could be subject to regulation by the FERC under the ICA and the EAct of 1992 if the crude oil, NGLs or products are transported in interstate or foreign commerce whether by our pipelines or other means of transportation. Since we do not control the entire transportation path of all crude oil, NGLs or products shipped on our pipelines, FERC regulation could be triggered by our customers' transportation decisions.

**Regulation of LNG Liquefaction Facilities.** The design, construction, operation, maintenance and expansion of our liquefaction facilities and the import or export of LNG are highly regulated activities subject to the jurisdiction of the FERC pursuant to the NGA. In contrast to pipeline regulation, the FERC does not require LNG terminal owners to provide open-access services at cost-based or regulated rates.

In order to site, construct and operate our LNG terminal, we received and are required to maintain authorizations from the FERC under Section 3 of the NGA as well as other material governmental and regulatory approvals and permits. The EAct of 2005 amended Section 3 of the NGA to establish or clarify the FERC's exclusive authority to approve or deny an application for the siting, construction, expansion or operation of LNG terminals, unless specifically provided otherwise in the EAct of 2005 amendments to the NGA. For example, nothing in the EAct amendments to the NGA were intended to affect otherwise applicable law related to any other federal agency's authorities or responsibilities related to LNG terminals or those of a state acting under federal law.

Several other material governmental and regulatory approvals and permits are required throughout the life of our LNG terminal. Our FERC authorizations require us to comply with certain ongoing conditions and reporting obligations and to maintain other regulatory agency approvals throughout the life of our facilities. For example, throughout the life of our LNG terminal, we are subject to regular reporting requirements to the FERC, PHMSA, and applicable federal and state regulatory agencies regarding the operation and maintenance of our facilities. To date, we have been able to obtain and maintain required approvals as needed, and the need for these approvals and reporting obligations have not materially affected our construction or operations.

**Regulation of Pipeline Safety.** Our pipeline operations are subject to regulation by the DOT, through PHMSA, pursuant to the Natural Gas Pipeline Safety Act of 1968, as amended ("NGPSA"), with respect to natural gas and the Hazardous Liquids Pipeline Safety Act of 1979, as amended ("HLPSA"), with respect to crude oil, NGLs and condensates. The NGPSA and HLPSA, as amended, govern the design, installation, testing, construction, operation, replacement and management of natural gas as well as crude oil, NGL and condensate pipeline facilities. Pursuant to these acts, PHMSA has promulgated regulations governing pipeline wall thickness, design pressures, maximum operating pressures, pipeline patrols and leak surveys, minimum depth requirements, and emergency procedures, as well as other matters intended to ensure adequate protection for the public and to prevent accidents and failures. Additionally, PHMSA has established a series of rules requiring pipeline operators to develop and implement integrity management programs for certain gas and hazardous liquid pipelines that, in the event of a pipeline leak or rupture, could affect high consequence areas, which are areas where a release could have the most significant adverse consequences, including high population areas, certain drinking water sources and unusually sensitive ecological areas. Failure to comply with the pipeline safety laws and regulations may result in the assessment of sanctions, including administrative, civil or criminal penalties, the imposition of investigatory, remedial or corrective action obligations, the occurrence of delays in permitting or the performance of projects, or the issuance of injunctions limiting or prohibiting some or all of our operations in the affected area.

The HLPESA and NGPSA have been amended by the Pipeline Safety, Regulatory Certainty, and Job Creation Act of 2011 (“2011 Pipeline Safety Act”) and the Protecting Our Infrastructure of Pipelines and Enhancing Safety Act of 2016. The 2011 Pipeline Safety Act increased the penalties for safety violations, established additional safety requirements for newly constructed pipelines and required studies of safety issues that could result in the adoption of new regulatory requirements by PHMSA for existing pipelines. The 2011 Pipeline Safety Act doubled the maximum administrative fines for safety violations from \$0.1 million to \$0.2 million for a single violation and from \$1 million to \$2 million for a related series of violations, but provided that these maximum penalty caps do not apply to certain civil enforcement actions. In May 2021, PHMSA issued a final rule increasing those maximum civil penalties to approximately \$0.2 million per day, with a maximum of approximately \$2 million for a series of violations, to account for inflation. Upon reauthorization of PHMSA, Congress often directs the agency to complete certain rulemakings. For example, in the Consolidated Appropriations Bill for Fiscal Year 2021, Congress reauthorized PHMSA through fiscal year 2023 and directed the agency to move forward with several regulatory actions, including the “Pipeline Safety: Class Location Change Requirements” and the “Pipeline Safety: Safety of Gas Transmission and Gathering Pipelines” proposed rulemaking. To that end, in November 2021, PHMSA issued a final rule significantly expanding reporting and safety requirements of operators of gas gathering pipelines. The rule imposes safety regulations on approximately 400,000 miles of previously unregulated onshore gas gathering lines that, among other things, will impose criteria for inspection and repair of fugitive emissions, extend reporting requirements to all gas gathering operators and apply a set of minimum safety requirements to certain gas gathering pipelines with large diameters and high operating pressures. In May 2023, PHMSA published a proposed rule that would enhance requirements for detecting and repairing leaks on new and existing natural gas distribution, gas transmission and gas gathering pipelines and, separately, in September 2023, published a proposed rule that would enhance the safety requirements for gas distribution pipelines and would require updates to distribution integrity management programs, emergency response plans, operations and maintenance manuals, and other safety practices. PHMSA finalized the May 2023 rule in January 2025; however, it is not certain at this time if this May 2023 rule, or the September 2023 rule, will not be repealed, revoked or modified as a result of the change in U.S. presidential administrations.

In addition, states have adopted regulations, similar to existing PHMSA regulations, for intrastate gathering and transmission lines. The states in which we conduct operations typically have developed regulatory programs that parallel the federal regulatory scheme and are applicable to intrastate pipelines. Under such state regulatory programs, states have the authority to conduct pipeline inspections, to investigate accidents and to oversee compliance and enforcement, safety programs and record maintenance and reporting. Congress, PHMSA and individual states may pass or implement additional safety requirements that could result in increased compliance costs for us and other companies in our industry. For example, federal construction, maintenance and inspection standards under the NGPSA that apply to pipelines in relatively populated areas may not apply to gathering lines running through rural regions. However, in October 2019, PHMSA published two further final rules, in addition to the November 2021 rule discussed above, that create or expand reporting, inspection, maintenance, and other pipeline safety obligations, including, among other things, extending pipeline integrity assessments to pipelines in certain locations, including newly-defined “Moderate Consequence Areas” (“MCAs”). Specifically, PHMSA issued a final rule imposing numerous requirements on onshore gas transmission pipelines relating to maximum allowable operating pressure (“MAOP”), reconfirmation and exceedance reporting, the integrity assessment of additional pipeline mileage found in MCAs, non-High Consequence Area (“HCAs”), and Class 3 and Class 4 areas by 2023, and the consideration of seismicity as a risk factor in integrity management. Establishing MAOP through reliance on historical pipeline design, construction, inspection, testing, and other records requires that such records be traceable, verifiable, and complete. Locating such records and, in the absence of any such records, verifying maximum pressures through physical testing (including hydrotesting) or modifying or replacing facilities to meet the demands of such pressures, could significantly increase our costs. Failure to locate such records or verify maximum pressures could result in reductions of allowable operating pressures, which would reduce available capacity on our pipelines. PHMSA’s second final rule, published in October 2019, applicable to hazardous liquid transmission and gathering pipelines, significantly extended and expanded the reach of certain integrity management requirements, use of in-line inspection tools by 2039 (unless the pipeline cannot be modified to permit such use), increased annual, accident, and safety-related conditional reporting requirements, and expanded use of leak detection systems beyond HCAs. The integrity-related requirements and other provisions of the 2011 Pipeline Safety Act, the 2016 Pipeline Safety Act, and the PIPES Act of 2020, as well as any implementation of PHMSA rules thereunder, could require us to pursue additional capital projects or conduct integrity or maintenance programs on an accelerated basis and incur increased operating costs that could have a material adverse effect on our results of operations and financial condition.

In another example of how future legal requirements could result in increased compliance costs, notwithstanding the applicability of the federal OSHA’s Process Safety Management (“PSM”) regulations and the EPA’s Risk Management Planning (“RMP”) requirements at regulated facilities, PHMSA and one or more state regulators, including the TRRC, have in recent years, expanded the scope of their regulatory inspections to include certain in-plant equipment and pipelines found within NGL fractionation facilities and associated storage facilities, in order to assess compliance of such equipment and pipelines with hazardous liquid pipeline safety requirements. To the extent that these actions are pursued by PHMSA,

midstream operators of NGL fractionation facilities and associated storage facilities subject to such inspection may be required to make operational changes or modifications at their facilities to meet standards beyond current PSM and RMP requirements, which changes or modifications may result in additional capital costs, possible operational delays and increased costs of operation that, in some instances, may be significant.

### **Regulation of Interstate Ammonia Pipelines**

Sunoco LP's ammonia pipeline is subject to regulation by the Surface Transportation Board (the "STB") pursuant to the ICA applicable to such pipelines (which differs from the ICA applicable to interstate liquids pipelines). Under that regulation, the ammonia pipeline's rates, classifications, rules and practices related to the interstate transportation of anhydrous ammonia must be reasonable and, in providing interstate transportation, the ammonia pipeline may not subject a person, place, port or type of traffic to unreasonable discrimination. Similar to the crude and refined products pipelines, the rates for transportation services on the ammonia pipeline are required to be in a tariff which is posted publicly on our website, however, that tariff is not required to be on file with the STB. The STB does not prescribe an indexing approach similar to the EPAAct but rates under the STB must be reasonable and the pipeline may not subject a person, place, port or type of traffic to unreasonable discrimination.

### **Environmental Matters**

*General.* Our operation of processing plants, pipelines and associated facilities, including compression, in connection with the gathering, processing, storage and transmission of natural gas and the storage and transportation of NGLs, crude oil and refined products is subject to stringent U.S. federal, tribal, state and local laws and regulations, including those governing, among other things, air emissions, wastewater discharges, the generation, use, management and disposal of hazardous and nonhazardous materials and wastes, and the cleanup of contamination. Similar or more stringent laws also exist in Canada. Noncompliance with such laws and regulations, or incidents resulting in environmental releases, could cause us to incur substantial costs, penalties, fines and criminal sanctions, third-party claims for personal injury or property damage, capital expenditures to retrofit or upgrade our facilities and programs, or curtailment or cancellation of permits on operations. As with the industry generally, compliance with existing and anticipated environmental laws and regulations increases our overall cost of doing business, including our cost of planning, permitting, constructing and operating our plants, pipelines and other facilities. As a result of these laws and regulations, our construction and operation costs include capital, operating and maintenance cost items necessary to maintain or upgrade our equipment and facilities.

We have implemented procedures designed to ensure that governmental environmental approvals for both existing operations and those under construction are updated as circumstances require. Historically, our environmental compliance costs have not had a material adverse effect on our business, results of operations or financial condition; however, there can be no assurance that such costs will not be material in the future. For example, we cannot be certain that identification of presently unidentified conditions, more rigorous enforcement by regulatory agencies, enactment of more stringent environmental laws and regulations or unanticipated events will not arise in the future and give rise to environmental liabilities that could have a material adverse effect on our business, financial condition or results of operations.

*Hazardous Substances and Waste Materials.* To a large extent, the environmental laws and regulations affecting our operations relate to the release of hazardous substances and waste materials into soils, groundwater and surface water and include measures to prevent, minimize or remediate contamination of the environment. These laws and regulations generally regulate the generation, storage, treatment, transportation and disposal of hazardous substances and waste materials and may require investigatory and remedial actions at sites where such material has been released or disposed. For example, the Comprehensive Environmental Response, Compensation and Liability Act, as amended, ("CERCLA"), also known as the "Superfund" law, and comparable state laws, impose liability without regard to fault or the legality of the original conduct on certain classes of persons that contributed to a release of a "hazardous substance" into the environment. These persons include the owner and operator of the site where a release occurred and companies that disposed or arranged for the disposal of the hazardous substance that has been released into the environment. Under CERCLA, these persons may be subject to strict, joint and several liability, without regard to fault, for, among other things, the costs of investigating and remediating the hazardous substances that have been released into the environment, for damages to natural resources and for the costs of certain health studies. CERCLA and comparable state law also authorize the federal EPA, its state counterparts, and, in some instances, third parties to take actions in response to threats to the public health or the environment and to seek to recover from the responsible classes of persons the costs they incur. It is not uncommon for neighboring landowners and other third parties to file claims for personal injury and property damage allegedly caused by hazardous substances or other pollutants released into the environment. Although "petroleum" as well as natural gas and NGLs are excluded from CERCLA's definition of a "hazardous substance," in the course of our ordinary operations we generate wastes that may fall within that definition or that may be subject to other waste disposal laws and regulations. We may be responsible under CERCLA or state laws for all or part of the costs required to clean up sites at which such substances or wastes have been disposed.

We also generate both hazardous and nonhazardous wastes that are subject to requirements of the federal Resource Conservation and Recovery Act, as amended, (“RCRA”) and comparable state statutes. We are not currently required to comply with a substantial portion of the RCRA hazardous waste requirements at many of our facilities because the minimal quantities of hazardous wastes generated there make us subject to less stringent non-hazardous management standards. From time to time, the EPA has considered or third parties have petitioned the agency on the adoption of stricter handling, storage and disposal standards for nonhazardous wastes, including certain wastes associated with the exploration, development and production of crude oil and natural gas, though to date no actions to repeal or revise the exemption have been proposed. Changes in applicable regulations may result in a material increase in our capital expenditures or plant operating and maintenance expense and, in the case of our oil and natural gas exploration and production customers, could result in increased operating costs for those customers and a corresponding decrease in demand for our processing, transportation and storage services.

We currently own or lease sites that have been used over the years by prior owners and lessees and by us for various activities related to gathering, processing, storage and transmission of natural gas, NGLs, crude oil and refined products. Waste disposal practices within the oil and gas industry have improved over the years with the passage and implementation of various environmental laws and regulations. Nevertheless, some hydrocarbons and wastes have been disposed of or otherwise released on or under various sites during the operating history of those facilities that are now owned or leased by us. Notwithstanding the possibility that these releases may have occurred during the ownership or operation of these assets by others, these sites may be subject to CERCLA, RCRA and comparable state laws. Under these laws, we could be required to remove or remediate previously disposed wastes (including wastes disposed of or released by prior owners or operators) or contamination (including soil and groundwater contamination) or to prevent the migration of contamination.

As of December 31, 2025 and 2024, accruals of \$416 million and \$278 million, respectively, were recorded in our consolidated balance sheets as accrued and other current liabilities and other non-current liabilities for estimated environmental liabilities. The increase in accruals during 2025 included the impact of \$140 million recorded by Sunoco LP in connection with its acquisition of Parkland.

The Partnership is subject to extensive and frequently changing federal, tribal, state and local laws and regulations, including those relating to the discharge of materials into the environment or that otherwise relate to the protection of the environment, waste management and the characteristics and composition of fuels. These laws and regulations require environmental assessment and remediation efforts at many of ETC Sunoco’s facilities and at formerly owned or third-party sites. Accruals for these environmental remediation activities amounted to \$186 million and \$197 million at December 31, 2025 and 2024, respectively, which is included in the total accruals above. These legacy sites that are subject to environmental assessments include formerly owned terminals and other logistics assets, retail sites that are no longer operated by ETC Sunoco, closed and/or sold refineries and other formerly owned sites. We have established a wholly owned captive insurance company for these legacy sites that are no longer operating. The premiums paid to the captive insurance company include estimates for environmental claims that have been incurred but not reported, based on an actuarially determined fully developed claims expense estimate. In such cases, we accrue losses attributable to unasserted claims based on the discounted estimates that are used to develop the premiums paid to the captive insurance company. As of December 31, 2025, the captive insurance company held \$103 million of cash and investments.

The Partnership’s accrual for environmental remediation activities reflects anticipated work at identified sites where an assessment has indicated that cleanup costs are probable and reasonably estimable. The accrual for known claims is undiscounted and is based on currently available information, estimated timing of remedial actions and related inflation assumptions, existing technology and presently enacted laws and regulations. It is often extremely difficult to develop reasonable estimates of future site remediation costs due to changing regulations, changing technologies and their associated costs, and changes in the economic environment. Engineering studies, historical experience and other factors are used to identify and evaluate remediation alternatives and their related costs in determining the estimated accruals for environmental remediation activities.

Under various environmental laws, including the RCRA, the Partnership has initiated corrective remedial action at certain of its facilities, formerly owned facilities and at certain third-party sites. At the Partnership’s major manufacturing facilities, we have typically assumed continued industrial use and a containment/remediation strategy focused on eliminating unacceptable risks to human health or the environment. The remediation accruals for these sites reflect that strategy. Accruals include amounts designed to prevent or mitigate off-site migration and to contain the impact on the facility property, as well as to address known, discrete areas requiring remediation within the plants. Remedial activities include, for example, closure of RCRA waste management units, recovery of hydrocarbons, handling of impacted soil, mitigation of surface water impacts and prevention or mitigation of off-site migration. A change in this approach as a result of changing the intended use of a property or a sale to a third-party could result in a comparatively higher cost remediation strategy in the future.

In general, a remediation site or issue is typically evaluated on an individual basis based upon information available for the site or issue and no pooling or statistical analysis is used to evaluate an aggregate risk for a group of similar items (for example, service station sites) in determining the amount of probable loss accrual to be recorded. The estimates of environmental remediation costs also frequently involve evaluation of a range of estimates. In many cases, it is difficult to determine that one point in the range of loss estimates is more likely than any other. In these situations, existing accounting guidance allows us the minimum amount of the range to accrue. Accordingly, the low end of the range often represents the amount of loss which has been recorded.

In summary, total future costs for environmental remediation activities will depend upon, among other things, the identification of any additional sites, the determination of the extent of the contamination at each site, the timing and nature of required remedial actions, the nature of operations at each site, the technology available and needed to meet the various existing legal requirements, the nature and terms of cost-sharing arrangements with other potentially responsible parties, the availability of insurance coverage, the nature and extent of future environmental laws and regulations, inflation rates, terms of consent agreements or remediation permits with regulatory agencies and the determination of the Partnership's liability at the sites, if any, in light of the number, participation level and financial viability of the other parties. The recognition of additional losses, if and when they were to occur, would likely extend over many years, but management can provide no assurance that it would be over many years. If changes in environmental laws or regulations occur or the assumptions used to estimate losses at multiple sites are adjusted, such changes could materially and adversely impact multiple facilities, formerly owned facilities and third-party sites at the same time. As a result, from time to time, significant charges against income for environmental remediation may occur. And while management does not believe that any such charges would have a material adverse impact on the Partnership's consolidated financial position, it can provide no assurance.

Transwestern conducts soil and groundwater remediation at a number of its facilities. Some of the cleanup activities include remediation of several compressor sites on the Transwestern system for contamination by PCBs, and the costs of this work are not eligible for recovery in rates. The total accrued future estimated cost of remediation activities expected to continue through 2026 is \$2.4 million, which is included in the total environmental accruals mentioned above. Transwestern received FERC approval for rate recovery of projected soil and groundwater remediation costs not related to PCBs effective April 1, 2007. Transwestern, as part of ongoing arrangements with customers, continues to incur costs associated with containing and removing potential PCB contamination. Future costs cannot be reasonably estimated because remediation activities are undertaken as potential claims are made by customers and former customers. Such future costs are not expected to have a material impact on our financial position, results of operations or cash flows, but management can provide no assurance.

*Air Emissions.* Our operations are subject to the federal Clean Air Act, as amended, and comparable state laws and regulations. These laws and regulations regulate emissions of air pollutants from various industrial sources, including our processing plants, and also impose various monitoring and reporting requirements. Such laws and regulations may require that we obtain pre-approval for the construction or modification of certain projects or facilities, such as our processing plants and compression facilities, expected to produce air emissions or to result in the increase of existing air emissions, that we obtain and strictly comply with air permits containing various emissions and operational limitations, or that we utilize specific emission control technologies to limit emissions. We will incur capital expenditures in the future for air pollution control equipment in connection with obtaining and maintaining operating permits and approvals for air emissions. In addition, our processing plants, pipelines and compression facilities are subject to increasingly stringent regulations, including regulations that require the installation of control technology or the implementation of work practices to control hazardous air pollutants. Moreover, the Clean Air Act requires an operating permit for major sources of emissions and this requirement applies to some of our facilities. Historically, our costs for compliance with existing Clean Air Act and comparable state law requirements have not had a material adverse effect on our results of operations; however, there can be no assurance that such costs will not be material in the future. The EPA and state agencies are often considering, proposing or finalizing new regulations that could impact our existing operations and the costs and timing of new infrastructure development. For example, in October 2015, the EPA published a final rule under the Clean Air Act, lowering the National Ambient Air Quality Standard ("NAAQS") for ground-level ozone to 70 parts per billion for the 8-hour primary and secondary ozone standards. The EPA completed attainment/non-attainment designations in 2018, and states with moderate or high non-attainment areas must submit state implementation plans to the EPA by October 2021. By law, the EPA must review each NAAQS every five years. In December 2020, the EPA announced that it was retaining without revision the 2015 NAAQS for ozone. However, several groups filed litigation over the December 2020 decision, and the Biden Administration subsequently announced plans to reconsider the December 2020 final action. In August 2023, the EPA announced a new review of the ozone NAAQS to reflect updated ozone science in combination with the reconsideration of the December 2020 decision. The review remains ongoing; however, the EPA must also review the NAAQS on a five-year cycle, and this review began in December 2025. At this time, it is not clear what actions the Trump Administration may take with respect to the review. However, compliance with this or other new regulations could, among other things, require installation of new emission controls on some of our equipment, result in longer permitting timelines, and significantly increase our capital expenditures and operating costs, which could adversely impact our business.

*Clean Water Act.* The Federal Water Pollution Control Act of 1972, as amended, (“Clean Water Act”) and comparable state laws impose restrictions and strict controls regarding the discharge of pollutants, including hydrocarbon-bearing wastes, into state waters and waters of the United States. Pursuant to the Clean Water Act and similar state laws, a National Pollutant Discharge Elimination System, or state permit, or both, must be obtained to discharge pollutants into federal and state waters. In addition, the Clean Water Act and comparable state laws require that individual permits or coverage under general permits be obtained by subject facilities for discharges of storm water runoff. The Clean Water Act also prohibits the discharge of dredge and fill material in regulated waters, including wetlands, unless authorized by permit. In June 2015, the EPA and the USACE published a final rule attempting to clarify the federal jurisdictional reach over “waters of the United States” (“WOTUS”), but legal challenges to this rule followed. In January 2023, the EPA and the USACE published a final rule that would restore water protections that were in place prior to 2015. However, the January 2023 rule was challenged and is currently enjoined in 27 states. Separately, in May 2023, the U.S. Supreme Court released its opinion in *Sackett v. EPA*, which used the “continuous surface connection” test to determine whether wetlands qualify as WOTUS. The *Sackett* decision invalidated certain parts of the January 2023 rule and significantly narrowed its scope, resulting in a revised rule being issued in September 2023; however, the September 2023 rule did not define the term “continuous surface connection.” Due to the injunction, implementation of the rule currently varies by state, and it remains unclear how broadly the agencies will interpret the term “continuous surface connection.” However, in November 2025, the EPA and the USACE issued a proposed rule to further update and narrow the definition of WOTUS. To the extent any future rule expands the scope of the Clean Water Act’s jurisdiction, our operations as well as our exploration and production customers’ drilling programs could incur increased costs and delays with respect to obtaining permits for dredge and fill activities in wetland areas.

Additionally, for over 35 years, the USACE has authorized construction, maintenance, and repair of pipelines under a streamlined Nationwide Permit (“NWP”) program. From time to time, environmental groups have challenged the NWP program, and, in April 2020, the U.S. District Court for the District of Montana determined that NWP 12 failed to comply with consultation requirements under the federal Endangered Species Act. The district court vacated NWP 12 and enjoined the issuance of new authorizations for oil and gas pipeline projects under the permit. In January 2021, the EPA and USACE issued a final rule reissuing and restricting NWP 12 to oil and gas pipelines and creating a new nationwide permit to authorize certain dredge and fill activities associated with utility lines conveying other substances such as brine, potable water, wastewater, and other substances excluding oil, natural gas, products derived from oil or natural gas, and electricity. The Biden Administration was asked to examine the final rule. In January 2026, the USACE issued a final rule reissuing 56 NWPs, including NWP 12 in substantially the same form as the January 2021 version. Additionally, an October 2021 decision by the District Court for the Northern District of California resulted in the vacatur of a 2020 rule revising the Clean Water Act Section 401 certification process, following which, in November 2021, USACE announced that it has temporarily suspended finalization of certain permitting decisions, including under NWP 12, that rely on a Section 401 certification or waiver under the 2020 rule. This vacatur was subsequently stayed by the U.S. Supreme Court in April 2022, and the EPA published a final rule to update and replace the relevant regulations in September 2023. In January 2026, the EPA released a proposed rule to revise the Section 401 certification process following a May 2025 memorandum concerning the September 2023 rule. The January 2026 proposed rule seeks to limit the scope of Section 401 review and clarify the regulations to ensure such reviews are completed within the one-year statutory deadline, though we cannot predict whether or not these efforts will be successful. We could face significant delays and financial costs if we must obtain individual permit coverage from USACE or if states impose additional restrictions on or delay issuance of any Section 401 water quality certification for our projects.

*Spills.* Our operations can result in the discharge of regulated substances, including NGLs, crude oil or other products. The Clean Water Act, as amended by the federal Oil Pollution Act of 1990, as amended, (“OPA”), and comparable state laws impose restrictions and strict controls regarding the discharge of regulated substances into state waters or waters of the United States. The Clean Water Act and comparable state laws can impose substantial administrative, civil and criminal penalties for non-compliance including spills and other non-authorized discharges. The OPA subjects owners of covered facilities to strict joint and potentially unlimited liability for removal costs and other consequences of a release of oil, where the release is into navigable waters, along shorelines or in the exclusive economic zone of the United States. Spill prevention control and countermeasure requirements of the Clean Water Act and some state laws require that containment dikes and similar structures be installed to help prevent the impact on navigable waters in the event of a release of oil. PHMSA, the EPA, or various state regulatory agencies, has approved our oil spill emergency response plans that are to be used in the event of a spill incident.

In addition, some states maintain groundwater protection programs that require permits for discharges or operations that may impact groundwater conditions. Our management believes that compliance with existing permits and compliance with foreseeable new permit requirements will not have a material adverse effect on our results of operations, financial position or expected cash flows.

*Endangered Species.* The Endangered Species Act, as amended, restricts activities that may affect endangered or threatened species or their habitat. Similar protections are offered to migratory birds under the Migratory Bird Treaty Act. We may operate in areas that are currently designated as a habitat for endangered or threatened species or where the discovery of previously

unidentified endangered species, or the designation of additional species as endangered or threatened may occur in which event such one or more developments could cause us to incur additional costs, to develop habitat conservation plans, to become subject to expansion or operating restrictions, or bans in the affected areas. Moreover, such designation of previously unprotected species as threatened or endangered in areas where our oil and natural gas exploration and production customers operate could cause our customers to incur increased costs arising from species protection measures and could result in delays or limitations in our customers' performance of operations, which could reduce demand for our services.

*Climate Change.* Climate change continues to attract considerable public, governmental and scientific attention. As a result, numerous proposals have been made and are likely to continue to be made at the international, national, regional and state levels of government to monitor and limit emissions of greenhouse gases ("GHGs"). These efforts have included consideration of cap-and-trade programs, carbon taxes and GHG reporting and tracking programs, and regulations that directly limit GHG emissions from certain sources. In the United States, no comprehensive climate change legislation has been implemented at the federal level to date. However, Canada has implemented a federal carbon pricing regime. Notwithstanding the EPA's recent proposal to revoke the "Endangerment Finding" that underlies that majority of its GHG-related regulations, the EPA under previous administrations has adopted rules under authority of the Clean Air Act that, among other things, establish Potential for Significant Deterioration ("PSD") construction and Title V operating permit reviews for GHG emissions from certain large stationary sources that are also potential major sources of certain principal, or criteria, pollutant emissions, which reviews could require securing PSD permits at covered facilities emitting GHGs and meeting "best available control technology" standards for those GHG emissions. In addition, the EPA has adopted rules requiring the monitoring and annual reporting of GHG emissions from certain petroleum and natural gas system sources in the United States, including, among others, onshore processing, transmission, storage and distribution facilities. In October 2015, the EPA amended and expanded the GHG reporting requirements to all segments of the oil and natural gas industry, including gathering and boosting facilities and blowdowns of natural gas transmission pipelines.

Federal agencies also have begun directly regulating GHG emissions, such as methane, from oil and natural gas operations. In June 2016, the EPA published New Source Performance Standards ("NSPS"), known as Subpart OOOOa, that require certain new, modified or reconstructed facilities in the oil and natural gas sector to reduce these methane gas and volatile organic compound ("VOC") emissions. These Subpart OOOOa standards expand previously issued NSPS published by the EPA in 2012 and known as Subpart OOOO, by using certain equipment-specific emissions control practices, requiring additional controls for pneumatic controllers and pumps as well as compressors, and imposing leak detection and repair requirements for natural gas compressor and booster stations. Additionally, in December 2023, the EPA issued a final rule that established OOOOb new source and OOOOc first-time existing source standards of performance for GHG and VOC emissions for the crude oil and natural gas well sites, natural gas gathering and boosting compressor stations, natural gas processing plants, and transmission and storage facilities. Owners or operators of affected emission units or processes will have to comply with specific standards of performance that include leak detection using optical gas imaging and subsequent repair requirements, reduction of emissions by 95% through capture and control systems, zero-emission requirements, operations and maintenance requirements, and so-called "green well" completion requirements. The December 2023 rule also establishes a "super-emitter" response program that would allow third parties to make reports to the EPA of large methane emission events, triggering certain investigation and repair requirements. Fines and penalties for violations of these rules could be substantial. However, the EPA's final rule is currently being challenged by 23 states and a coalition of industry groups in the U.S. Circuit Court of Appeals for the D.C. Circuit, and we cannot predict the ultimate outcome. Further, in March 2025, the EPA announced plans to reconsider Subparts OOOOb and OOOOc and, in November 2025, the EPA finalized an interim final rule extending certain compliance deadlines for certain provisions provided in the rules. To the extent not timely repealed or modified by the Trump Administration, GHG emission standards, including methane emissions imposed on the oil and gas sector, could result in increased costs to our operations as well as result in delays or curtailment in such operations, which costs, delays or curtailment could adversely affect our business. Several states have also adopted, or are considering adopting, regulations related to GHG emissions, some of which are more stringent than those implemented by the federal government.

At the international level, in December 2015, the United States joined the international community at the 21st Conference of the Parties of the United Nations Framework Convention on Climate Change in Paris, France in signing the "Paris Agreement," a treaty that requires member countries to submit individually-determined, non-binding emission reduction goals every five years beginning in 2020. However, in January 2025, President Trump signed an executive order withdrawing the United States from the Paris Agreement and from any other commitments made under the United Nations Framework Convention on Climate Change. Additionally, President Trump revoked any purported financial commitments made by the United States pursuant to the same. The full impact of these recent developments is uncertain at this time.

The adoption and implementation of any international, federal or state legislation or regulations that require reporting of GHGs or otherwise restrict emissions of GHGs could result in increased compliance costs or additional operating restrictions, and could have a material adverse effect on our business, financial condition, demand for our services, results of operations, and cash flows. Litigation risks are also increasing, as several oil and gas companies have been sued for allegedly causing climate-

related damages due to their production and sale of fossil fuel products or for allegedly being aware of the impacts of climate change for some time but failing to adequately disclose such risks to their investors or customers. Various investors are becoming increasingly concerned about the potential effects of climate change and may elect in the future to shift some or all of their investments into other sectors. Institutional lenders who provide financing for fossil fuel energy companies also have become more attentive to sustainable lending practices that favor “clean” power sources such as wind and solar photovoltaic, making those sources more attractive for investment, and some of them may elect not to provide funding for fossil fuel energy companies. Such efforts could make it more difficult to secure funding for exploration and production or midstream activities and could also increase the cost of obtaining financings and/or negatively affect terms of financings.

Finally, climatic events in the areas in which we operate, whether from climate change or otherwise, can cause disruptions and, in some cases, delays in, or suspension of, our services. These events, including but not limited to drought, winter storms, wildfire, extreme temperatures or flooding, may become more intense or more frequent as a result of climate change and could have an adverse effect on our continued operations. If such effects were to occur, our operations could be adversely affected in various ways, including damages to our facilities or our customers’ facilities from powerful winds or rising waters, or increased costs for, or difficulty obtaining, insurance. Another possible consequence of climate change is increased volatility in seasonal temperatures. The market for our NGLs and natural gas is generally improved by periods of colder weather and impaired by periods of warmer weather, so any changes in climate could affect the market for the fuels that we transport, and thus demand for our services. Despite the use of the term “global warming” as a shorthand for climate change, some studies indicate that climate change could cause some areas to experience temperatures substantially colder than their historical averages. As a result, it is difficult to predict how the market for our products could be affected by increased temperature volatility, although if there is an overall trend of warmer temperatures, it would be expected to have an adverse effect on our business.

We recognize the need to decrease emissions and integrate alternative energy sources into our operations, and we actively pursue economically beneficial opportunities to reduce our environmental footprint throughout our operations. Protecting public health and the environment is the primary initiative of our environmental management teams, both in the construction and operation of our assets. These teams have worked to reduce our emissions and minimize our environmental impact. Some examples of our teams’ efforts include:

- in our natural gas compression business, the use of our proprietary dual-drive technology, which offers the ability to switch compression drivers between an electric motor and a natural gas engine, allowed us to reduce our emissions of nitrogen oxide, carbon monoxide, CO<sub>2</sub> and VOCs;
- the installation of approximately 12,000 low-emission pneumatic devices throughout our pipeline systems has allowed us to safely and efficiently adjust and control our operations and reduce methane emissions;
- the voluntary installation of thermal oxidizers, which destroy VOCs and convert methane to CO<sub>2</sub> (a less carbon-intense GHG), thereby reducing VOC and methane emissions by 98% or more at many of our more than 50 natural gas processing and sweetening plants;
- the implementation of an innovative liquids management process throughout much of our natural gas gathering pipeline system has allowed us to minimize flash emissions and methane emissions;
- the use of optical gas imaging cameras at our more than 2,200 gas gathering and processing facilities as part of our leak detection and repair program allow us to reduce emissions, improve safety, reduce costs, prevent product loss, and maintain equipment integrity;
- the use of in-line inspection tools, or smart pigs, allow us to detect corrosion, cracks or other defects along our pipeline systems thereby protecting the environment and the safety of our communities, employees and landowners; and
- the use of other methods, including pipeline blowdown direct injection, liquids pipeline system optimization, crude oil truck unloading and direct injection, all of which help to reduce emissions and the release of methane into the atmosphere across our operations.

Powering our assets through renewable energy sources is an established part of our operations where it is economically viable to do so. We have reduced our carbon footprint by using a diversified mix of energy sources, including solar and wind power to generate electrical power. The percentage of electrical energy we purchase on a given day originating from solar and wind sources is approaching 20%. Since 2019, we have entered into dedicated solar contracts to purchase 108 megawatts of solar power to support the operations of our assets. We also operate approximately 36,720 solar panel-powered metering stations across the United States.

In February 2021, we announced the formation of our alternative energy group. This group is tasked with increasing our efforts to support renewable energy projects such as solar and/or wind farms, either as a power purchaser, or in a partnership with third-party developers, when they make economic sense. This group is also focused on developing alternative energy projects

aimed at reducing the environmental footprint throughout our operations, including a variety of projects related to carbon capture, utilization and sequestration of CO<sub>2</sub>.

While our environmental management initiatives have not materially impacted our capital expenditures or results of operations, we recognize that the non-financial impacts of these initiatives are of interest to our investors and other stakeholders. We voluntarily publish additional information on those initiatives; however, much of that separately published information is excluded from this annual report on Form 10-K if it is not material in the context of the consolidated Partnership and/or if it is not required by the instructions to Form 10-K. For additional information on our environmental management initiatives, including our efforts to curb GHG emissions and to integrate alternative energy sources, please see our Corporate Responsibility Report available on our website at <http://www.energytransfer.com/corporate-responsibility>. Information contained on our website is not part of this report.

*Employee Health and Safety.* We are subject to the requirements of the federal OSHA and comparable state laws that regulate the protection of the health and safety of workers. In addition, the Occupational Safety and Health Administration's hazard communication standard requires that information be maintained about hazardous materials used or produced in operations and that this information be provided to employees, state and local government authorities and citizens. Historically, our costs for OSHA required activities, including general industry standards, recordkeeping requirements, and monitoring of occupational exposure to regulated substances, have not had a material adverse effect on our results of operations but there is no assurance that such costs will not be material in the future.

*Natural Resource Reviews.* The National Environmental Policy Act ("NEPA") provides for an environmental impact assessment process in connection with certain projects that involve federal lands or require approvals by federal agencies. The NEPA process implicates a number of other environmental laws and regulations, including the Endangered Species Act, Migratory Bird Treaty Act, Rivers and Harbors Act, Clean Water Act, Bald and Golden Eagle Protection Act, Fish and Wildlife Coordination Act, Marine Mammal Protection Act and National Historic Preservation Act, often requiring coordination with numerous governmental authorities. The NEPA review process can be lengthy and subjective, resulting in delays in obtaining federal approvals for projects. Our projects that are subject to the NEPA can include pipeline construction and pipeline integrity projects that involve federal lands or require approvals by federal agencies. In July 2020, the Council on Environmental Quality ("CEQ") issued final revisions to NEPA regulations that seek to conform the scope of direct, indirect, and cumulative impact analyses for proposed projects subject to NEPA with existing case law. And, in May 2024, the CEQ published a final rule revising the implementing regulations of the procedural provisions of NEPA and implementing amendments to NEPA included in the Fiscal Responsibility Act. The final rule was challenged by various states and the litigation remains ongoing. In November 2024, the U.S. Court of Appeals for the D.C. Circuit held that the CEQ lacks authority to issue NEPA regulations. In February 2025, the CEQ issued an interim final rule rescinding its regulations implementing NEPA and adopted as final the interim final rule in January 2026. In June 2025, several federal agencies issued their own regulations or procedures for implementing NEPA. Further, in May 2025, the Supreme Court held in *Seven County Infrastructure Coalition v. Eagle County, Colorado* that agency determinations under NEPA are owed substantial judicial deference and that agencies are not obligated to consider environmental impacts associated with separate projects. As a result, there is currently significant uncertainty with respect to the scope of environmental analysis required under NEPA, and NEPA procedures currently vary by agency.

*Indigenous Protections.* Part of our operations cross land that has historically been apportioned to various Native American/First Nations tribes ("Indigenous Peoples"), who may exercise significant jurisdiction and sovereignty over their lands. Indigenous Peoples may also have certain treaty rights and rights to consultation on projects that may affect such lands. Our operations may be impacted to the extent these tribal governments are found to have and choose to act upon such jurisdiction over lands where we operate. For example, in 2020, the U.S. Supreme Court ruled in *McGirt v. Oklahoma* that the Muscogee (Creek) Nation reservation in Eastern Oklahoma has not been disestablished. Although the court's ruling indicates that it is limited to criminal law, as applied within the Muscogee (Creek) Nation reservation, the ruling may have significant potential implications for civil law, both in the Muscogee (Creek) Nation reservation and other reservations that may similarly be found to not have been disestablished. State courts in Oklahoma have applied the analysis in *McGirt* in ruling that the Cherokee, Chickasaw, Seminole, and Choctaw reservations likewise had not been disestablished.

On October 1, 2020, the EPA granted approval to the State of Oklahoma under Section 10211(a) of the Safe, Accountable, Flexible, Efficient Transportation Equity Act of 2005 (the "SAFETE Act") to administer all of the State's existing EPA-approved regulatory programs to Indian Country within the state except: Indian allotments to which Indians titles have not been extinguished; lands that are held in trust by the United States on behalf of any Indian or Tribe; lands that are owned in fee by any Tribe where title was acquired through a treaty with the United States to which such tribe is a party and that have never been allotted to any citizen or member of such Tribe. The approval extends the State's authority for existing EPA-approved regulatory programs to all lands within the State to which the State applied such programs prior to the U.S. Supreme Court's ruling in *McGirt*. However, several Tribes expressed dissatisfaction with the consultation process performed in relation to this approval, and, in December 2021, the EPA proposed to withdraw and reconsider the October 2020 decision. Additionally, the

SAFETE Act provides that any Tribe in Oklahoma may seek “Treatment as a State” by the EPA, and it is possible that one or more of the Tribes in Oklahoma may seek such an approval from the EPA. At this time, we cannot predict how these jurisdictional issues may ultimately be resolved.

### **Human Capital Management**

As of December 31, 2025, Energy Transfer and its consolidated subsidiaries employed an aggregate of 22,311 employees, 1,362 of which are represented by labor unions. We believe that our relations with our employees are good.

Our employees are our greatest asset, and we seek to attract and retain top talent by fostering a culture that is guided by our core values and that respects all people and cultures, promotes safety, and focuses on the protection of public health and being a good steward of the environment.

*Ethics and Values.* We are committed to operating our business in a manner that honors and respects all people and the communities in which we do business. We recognize that people are our most valued resource, and we are committed to hiring and investing in employees who strive for excellence and live by our core values: working safely, corporate stewardship, ethics and integrity, entrepreneurial mindset, our people, excellence and results, and social responsibility. We value our employees for what they bring to our organization by embracing those from all backgrounds, cultures, and experiences. We also believe that the keys to our successes have been the cultivation of an atmosphere of belonging and respect within our family of partnerships and sustaining organizations that promote equal employment opportunity in the workplace and support all communities in which we do business. These are the principles upon which we build and strengthen relationships among our people, our stakeholders, and those within the communities in which we do business.

*Respecting All People and All Cultures.* We believe strict adherence to our Code of Business Conduct and Ethics is not only right, but is in the best interest of the Partnership, its Unitholders, its customers, and the industry in general. In all applicable instances, the policies of the Partnership require that the business of the Partnership be conducted in a lawful and ethical manner. Every employee acting on behalf of the Partnership must adhere to these policies. Please refer to “Item 10. Directors, Executive Officers and Corporate Governance” for additional information on our Code of Business Conduct and Ethics.

*Commitment to Public Health, Safety and the Environment.* Protecting public health and being a good steward of the environment is an important initiative for our environmental management teams, both in the construction and operation of our assets. These teams consist of environmental engineers, scientists and geologists who seek to responsibly and efficiently reduce emissions associated with our operations, be a good steward of the land, water and air in the areas where we operate, and remain in compliance with all applicable regulations. Our environmental, health and safety department’s more than 200 environmental and safety professionals provide environmental and safety training to our field representatives. This group also assists others throughout the organization by identifying continuous training for personnel, including training that is required by applicable laws, regulations, standards, and permit conditions. It is our policy to communicate our safety standards and expectations to all employees and contractors with the expectation that each individual has the obligation to make safety the highest priority. Our safety culture aims to promote an open environment for discovering, resolving, and sharing safety challenges. We strive to eliminate unwanted safety events through a comprehensive process that promotes leadership, employee involvement, communication, personal responsibility to comply with standard operating procedures and regulatory requirements, effective risk reduction processes, maintaining clean facilities, contractor safety, and personal wellness. Energy Transfer’s goal is operational excellence, which means an injury- and incident-free workplace. To achieve this, we strive to hire and maintain the most qualified and dedicated workforce in the industry and make safety and safety accountability part of our daily operations. We believe that the OSHA Total Reportable Incident Rate (“TRIR”) is a key performance indicator that we use to evaluate our safety programs. TRIR can provide companies with a look at their safety record performance for the year by calculating the number of recordable injury and illness incidents per 200,000 hours worked. Our TRIR was 0.64 for 2025, out of approximately 22.2 million hours worked during the year, compared to a TRIR of 0.70 for 2024. We believe the Partnership’s low TRIR speaks to the Partnership’s investment in and focus on safety and environmental compliance as well as the reliability of our assets.

Please note that the preceding internet address is for information purposes only and is not intended to be a hyperlink. Accordingly, no information found and/or provided at such internet address or contained on our website in general is intended or deemed to be incorporated by reference in this report.

### **SEC Reporting**

We file or furnish annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and any related amendments and supplements thereto with the SEC. From time to time, we may also file registration statements and related documents pertaining to equity or debt offerings. The SEC maintains an internet website at <http://www.sec.gov> that contains reports, proxy and information statements and other information regarding issuers that file electronically with the SEC.

We provide electronic access, free of charge, to our periodic and current reports, and amendments to these reports, on our internet website located at <http://www.energytransfer.com>. These reports are available on our website as soon as reasonably practicable after we electronically file such materials with the SEC. Information contained on our website is not part of this report.

## ITEM 1A. RISK FACTORS

The following is a summary of important risk factors that are specific to our business, industry and partnership structure that could materially impact our future performance and results of operations. These risk factors should be reviewed when considering an investment in our securities. These are not all the risks we face. Other factors that we face in the ordinary course of business that are currently considered immaterial or that are currently unknown to us may impact our future operations.

### Risk Factor Summary

#### Risks Related to the Partnership's Business

*Results of Operations and Financial Condition.* Our results of operations and financial condition could be impacted by many risks that are beyond our control, including the following:

- fluctuations in the demand for and price of natural gas, NGLs, crude oil and refined products;
- general economic, financial and political conditions, including the impact of tariffs;
- the imposition or increase of tariffs on steel or other raw materials, or changes in trade agreements or trade relations;
- an impairment of goodwill and intangible assets;
- an interruption of supply of crude oil to our facilities;
- the loss of any key producers or customers;
- failure to retain or replace existing customers or volumes due to declining demand or increased competition;
- unfavorable changes in natural gas price spreads between two or more physical locations;
- production declines over time, which we may not be able to replace with production from newly drilled wells;
- competition for water resources or limitations on water usage for hydraulic fracturing;
- our customers' ability to use our pipelines and third-party pipelines over which we have no control;
- the inability to access or continue to access lands owned by third parties;
- the overall forward market for crude oil and other products we store;
- a natural disaster, catastrophe, terrorist attack or other similar event;
- extreme weather events that may be more severe or frequent than historically experienced and that may be attributable to changes in climate due to the adverse effects of an industrialized economy;
- union disputes and strikes or work stoppages by unionized employees;
- cybersecurity breaches and other disruptions or failures of our information systems;
- failure to establish or maintain adequate corporate governance;
- product liability claims and litigation, or increased insurance costs including as a result of increased risks due to the potential adverse effects of changes in climate;
- actions taken by certain of our joint ventures that we do not control;
- increasing levels of congestion in the Houston Ship Channel;
- the costs of providing pension and other postretirement health care benefits and related funding requirements;
- mergers among customers and competitors;
- fraudulent activity or misuse of proprietary data involving our outsourcing partners; and
- losses resulting from the use of derivative financial instruments.

*Indebtedness.* Our business, results of operations, cash flows and financial condition, as well as our ability to make distributions, could be impacted by the following:

- our debt level and debt agreements, or increases in interest rates;
- the credit and risk profile of our general partner and its owners; and
- a downgrade of our credit ratings.

*Capital Projects and Future Growth.* Our business, results of operations, cash flows, financial condition, and future growth could be impacted by the following:

- failure to make acquisitions on economically acceptable terms, or to successfully integrate acquired assets;
- failure to secure debt and equity financing for capital projects on acceptable terms, including as a result of recent increases in cost of capital resulting from changes in monetary policy by the Federal Reserve and/or changes in financial institutions' policies or practices concerning businesses linked to fossil fuels;
- any increased costs or reduced demand for crude oil and natural gas as a result of policy changes or otherwise;
- failure to construct new pipelines or to do so efficiently;
- failure to execute our growth strategy due to increased competition within any of our core businesses; and
- failure to attract and retain qualified employees.

*Regulatory Matters.* Our business, results of operations, cash flows, financial condition, and future growth could be impacted by the following:

- increased regulation of hydraulic fracturing or produced water disposal;
- legal or regulatory actions related to the Dakota Access Pipeline;

- laws, regulations and policies governing the rates, terms and conditions of our services;
- failure to recover the full amount of increases in the costs of our pipeline or refinery operations;
- imposition of regulation on assets not previously subject to regulation;
- costs and liabilities resulting from performance of pipeline integrity programs and related repairs;
- new or more stringent pipeline safety controls or enforcement of legal requirements;
- costs and liabilities associated with environmental and worker health and safety laws and regulations;
- climate change legislation or regulations restricting emissions of GHGs, limiting oil and gas leases on federal lands, discouraging oil and gas development or otherwise increasing our or our customers' costs;
- increased attention to environmental, social, and governance ("ESG") matters and conservation measures;
- regulatory provisions of the Dodd-Frank Act and the rules adopted thereunder;
- deepwater drilling laws and regulations, delays in the processing and approval of drilling permits and exploration, development, oil spill-response and decommissioning plans, and related developments; and
- laws and regulations governing the specifications of products that we store and transport.

#### Risks Relating to Our Partnership Structure

*Cash Distributions to Unitholders.* Our cash distributions could be impacted by the following:

- our general partner's absolute discretion in issuing an unlimited number of limited partner interests or other classes of equity without the consent of our Unitholders;
- cash distributions are not guaranteed and may fluctuate with our performance and other external factors;
- limitations on available cash that are imposed by our distribution policy;
- our general partner's absolute discretion in determining the level of cash reserves; and
- unitholders' potential liability to repay distributions.

*Our General Partner.* Our stakeholders could be impacted by risks related to our general partner, including:

- transfer of control of our general partner to a third-party without unitholder consent;
- the rights of the majority owner of our general partner that protect him against dilution; and
- substantial cost reimbursements due to our general partner.

*Our Subsidiaries.* Risks that are unique to our subsidiaries and/or our relationship to our subsidiaries could reduce our subsidiaries' cash available for distributions to us, including:

- the potential issuance of additional common units by Sunoco LP or USAC;
- a significant decrease in demand for or the price of motor fuel in the areas Sunoco LP serves;
- the failure of Sunoco LP to integrate the acquired assets and businesses of Parkland, which significantly increased Sunoco LP's size and diversified the business lines and the geographic areas in which it operates;
- the exposure of Sunoco LP to different legal and regulatory requirements due to it operating outside of the United States;
- disruptions in Sunoco LP's operations due to dangers inherent in motor fuel transportation;
- seasonal industry trends, which may cause Sunoco LP's operating costs to fluctuate;
- increased costs to retain necessary land use, which could disrupt Sunoco LP's operations; and
- federal, state and local laws and regulations that govern the industries in which our subsidiaries operate.

Risks Related to Conflicts of Interest. Our stakeholders could be impacted by conflicts of interest, including:

- our general partner may favor its own interests to the detriment of our Unitholders;
- fiduciary duties owed to SunocoCorp, Sunoco LP, USAC and their respective unitholders by their managing member or general partners, as applicable; and
- potential conflicts of interest faced by directors and officers in managing our business.

Tax Risks. Our stakeholders could be impacted by tax risks, including:

- our tax treatment depends on our status as a partnership for federal income tax purposes, and not being subject to a material amount of entity-level taxation;
- our cash available for distribution to Unitholders may be substantially reduced if we become subject to entity-level taxation as a result of the IRS treating us as a corporation or legislative, judicial or administrative changes, and may also be reduced by any audit adjustments if imposed directly on the partnership;
- even if Unitholders do not receive any cash distributions from us, Unitholders will be required to pay taxes on their share of our taxable income;
- a Unitholder's share of our taxable income may be increased as a result of the IRS successfully contesting any of the federal income tax positions we take;
- tax-exempt entities and non-U.S. Unitholders face unique tax issues from owning our units that may result in adverse tax consequences to them; and
- the treatment of Energy Transfer Preferred Units is uncertain and distributions on Energy Transfer Preferred Units (other than Series I Preferred Units) may not be eligible for the 20% deduction for qualified publicly traded partnership income.

## **Risk Factor Discussion**

The following discussion provides additional information regarding each of our risk factors listed above. In addition, SunocoCorp, Sunoco LP and USAC file Annual Reports on Form 10-K that include risk factors that can be reviewed for further information.

### **Risk Relating to the Partnership's Business**

#### ***Results of Operations and Financial Condition***

*Our cash flow depends primarily on the cash distributions we receive from our subsidiaries, as well as our partnership interests in Sunoco LP and USAC, including the IDRs in Sunoco LP and, therefore, our cash flow is dependent upon the ability of our subsidiaries, Sunoco LP and USAC to make distributions in respect of those partnership interests.*

We do not have any significant assets other than our interests in our subsidiaries. As a result, our cash flow depends on the performance of our subsidiaries, including Sunoco LP and USAC, and their ability to make cash distributions, which is dependent on the results of operations, cash flows and financial condition of our subsidiaries, including Sunoco LP and USAC.

The amount of cash that our subsidiaries distribute to us each quarter depends upon the amount of cash generated from our subsidiaries' operations, which will fluctuate from quarter to quarter and will depend upon, among other things:

- the amount of natural gas, NGLs, crude oil and refined products transported through our subsidiaries' pipelines;
- the level of throughput in processing and treating operations;
- the fees charged and the margins realized by our subsidiaries, including Sunoco LP and USAC, for their services;
- the price of natural gas, NGLs, crude oil, feedstock at Sunoco LP's refining operations and refined products;
- the relationship between natural gas, NGL and crude oil prices;
- the weather in their respective operating areas;
- the level of competition from other midstream, transportation and storage and retail marketing companies, refinery operators and other energy providers;
- the level of their respective operating costs and maintenance and integrity capital expenditures;
- the tax profile on any blocker entities treated as corporations for federal income tax purposes that are owned by any of our subsidiaries;
- prevailing economic conditions; and
- the level and results of their respective derivative activities.

In addition, the actual amount of cash that our subsidiaries, including Sunoco LP and USAC, will have available for distribution will also depend on other factors, such as:

- the level of capital expenditures they make;
- the level of costs related to litigation and regulatory compliance matters;
- the cost of acquisitions, if any;
- the levels of any margin calls that result from changes in commodity prices;
- debt service requirements, distributions and other liabilities;
- fluctuations in working capital needs;
- their ability to borrow under their respective revolving credit facilities;
- their ability to access capital markets;
- restrictions on distributions contained in their respective debt agreements; and
- the amount, if any, of cash reserves established by the board of directors and their respective general partners in their discretion for the proper conduct of their respective businesses.

Energy Transfer does not have any control over many of these factors, including the level of cash reserves established by the board of directors. Accordingly, we cannot guarantee that our subsidiaries, including Sunoco LP and USAC, will have sufficient available cash to pay a specific level of cash distributions to their respective partners.

Furthermore, Unitholders should be aware that the amount of cash that our subsidiaries have available for distribution depends primarily upon cash flow and is not solely a function of profitability, which is affected by non-cash items. As a result, our subsidiaries may declare and/or pay cash distributions during periods when they record net losses.

*Income from our midstream, transportation, terminalling and storage operations is exposed to risks due to fluctuations in the demand for and price of natural gas, NGLs, crude oil and refined products that are beyond our control.*

The prices for natural gas, NGLs, crude oil and refined products reflect market demand that fluctuates with changes in global and United States economic conditions and other factors, including:

- the level of domestic natural gas, NGLs, refined products and oil production;
- the level of natural gas, NGLs, refined products and oil imports and exports, including liquefied natural gas;
- actions taken by natural gas and oil producing nations;
- instability or other events affecting natural gas and oil producing nations;
- the impact of weather, geopolitical events such as the conflicts in Ukraine and Venezuela, political instability in the Middle East, including Iran, public health crises, and other events of nature on the demand for natural gas, NGLs, refined products and oil;
- the availability of storage, terminal and transportation systems, and refining, processing and treating facilities;
- the price, availability and marketing of competitive fuels;
- supply chain disruptions and inflation;
- the demand for electricity;
- activities by non-governmental organizations to limit certain sources of funding for the energy sector or restrict the exploration, development and production of oil and natural gas and related products;
- rising interest rates and slowing economic growth;
- the cost of capital needed to maintain or increase production levels and to construct and expand facilities;
- the impact of energy conservation and fuel efficiency efforts; and
- the extent of governmental regulations, taxation, fees and duties.

In the past, the prices of natural gas, NGLs, refined products and oil have been extremely volatile, and we expect this volatility to continue.

Any loss of business from existing customers or our inability to attract new customers due to a decline in demand for natural gas, NGLs, refined products or oil could have a material adverse effect on our revenues and results of operations. In addition, significant price fluctuations for natural gas, NGL, refined products and oil commodities could materially affect our profitability.

*Our operations (including Sunoco LP's) are subject to federal, state, provincial and local laws and regulations in North America, the Greater Caribbean and Europe, relating to the environment, health, safety and security that require it to make substantial expenditures.*

Our operations are subject to increasingly stringent international, federal, state and local environmental, health, safety and security laws and regulations, including those relating to: terminals and underground storage tanks; refinery operations; the release or discharge of regulated materials into the air, water and soil; the generation, storage, handling, use, transportation and disposal of hazardous materials; the exposure of persons to regulated materials; and the health and safety of our employees. A violation of, liability under, or noncompliance with these laws and regulations, or any future environmental law or regulation, could have a material adverse effect on our business, financial condition, results of operations and cash available for distribution to our unitholders.

In the United States, regulations under the Clean Water Act, the OPA 90 and state laws impose regulatory burdens on terminal operations. Spill prevention control and countermeasure requirements of federal and state laws require containment to mitigate or prevent contamination of waters in the event of a refined product overflow, rupture, or leak from above-ground pipelines and

storage tanks. The Clean Water Act also requires us to maintain spill prevention control and countermeasure plans at our terminal facilities with above-ground storage tanks and pipelines. In addition, OPA requires that most fuel transport and storage companies maintain and update various oil spill prevention and oil spill contingency plans. Certain oil handling facilities that are adjacent to water require the engagement of Federally Certified Oil Spill Response Organizations to be available to respond to a spill on water from above-ground storage tanks or pipelines.

Transportation and storage of refined products over and adjacent to water involves risk and potentially subjects us to strict, joint and potentially unlimited liability for removal costs and other consequences of an oil spill where the spill is into navigable waters, along shorelines or in the exclusive economic zone of the United States. In the event of an oil spill into navigable waters, substantial liabilities could be imposed upon us. The Clean Water Act imposes restrictions and strict controls regarding the discharge of pollutants into navigable waters, with the potential of substantial liability for the violation of permits or permitting requirements.

Terminal operations and associated facilities are subject to the Clean Air Act as well as comparable state and local statutes. Under these laws, permits may be required before construction can commence on a new source of potentially significant air emissions, and operating permits may be required for sources that are already constructed. If regulations become more stringent, additional emission control technologies may be required at our facilities. Any such future obligation could require us to incur significant additional capital or operating costs. Additionally, permits or licenses may be difficult to obtain and may include public comment and other public involvement periods, which could affect agency considerations or the decisions reached.

Terminal operations are subject to additional programs and regulations under OSHA, such as the Process Safety Management rule. Liability under, or a violation of compliance with, these laws and regulations, or any future laws or regulations, could have a material adverse effect on our business, financial condition, results of operations and cash available for distribution to our unitholders.

Pipeline operations are also subject to a number of environmental and safety programs and regulations. Should our operations fail to comply with applicable DOT or comparable state regulations regarding pipeline safety, we could be subject to substantial fines and penalties. In addition, the adoption of recently proposed or new laws or regulations that apply more comprehensive or stringent safety standards could require us to install new or modified safety controls, pursue new capital projects, or conduct maintenance programs on an accelerated basis, all of which could require us to incur increased operational costs that could be significant.

Certain environmental laws, including CERCLA, impose strict, and under certain circumstances, joint and several, liability on the current and former owners and operators of properties for the costs of investigation and removal or remediation of contamination and also impose liability for any related damages to natural resources without regard to fault. Under CERCLA and similar state laws, as persons who arrange for the transportation, treatment and disposal of hazardous substances, we may also be subject to liability at sites where such hazardous substances are released. We may be subject to third-party claims alleging property damage and/or personal injury in connection with releases of or exposure to hazardous substances at, from or in the vicinity of our current or former properties or off-site waste disposal sites. Costs associated with the investigation and remediation of contamination, as well as associated third-party claims, could be substantial, and could have a material adverse effect on our business, financial condition, results of operations and our ability to service our outstanding indebtedness. In addition, the presence of, or failure to remediate, identified or unidentified contamination at our properties could materially and adversely affect our ability to sell or rent such property or to borrow money using such property as collateral.

We are required to make financial expenditures to comply with regulations governing underground storage tanks as adopted by federal, state and local regulatory agencies. Compliance with existing and future environmental laws regulating underground storage tank systems of the kind we use may require significant capital expenditures. For example, the EPA has previously published rules that amend existing federal underground storage tank rules, requiring certain upgrades to underground storage tanks and related piping to further ensure the detection, prevention, investigation and remediation of leaks and spills.

We are required to comply with federal and state financial responsibility requirements to demonstrate that we have the ability to pay for cleanups or to compensate third parties for damages incurred as a result of a release of regulated materials from our underground storage tank systems. We seek to comply with these requirements by maintaining insurance that we purchase from private insurers and in certain circumstances, rely on applicable state trust funds, which are funded by underground storage tank registration fees and taxes on wholesale purchases of motor fuels. Coverage afforded by each fund varies and is dependent upon the continued maintenance and solvency of each fund.

Our comprehensive environmental, health and safety program may not have identified all environmental liabilities at all of our current and former locations; material environmental or pipeline safety conditions not known to us may exist; existing and future laws, ordinances or regulations may impose material environmental or pipeline safety liability or compliance costs on us;

or we may be required to make material expenditures for the remediation of contamination or pipeline integrity and safety matters.

Further, as discussed above, with Sunoco LP's acquisition of the Burnaby Refinery located in British Columbia, we are subject to a number of additional regulatory and environmental requirements in Canada, which may increase our costs of compliance and, in turn, have a material adverse impact on our results of operations.

The occurrence of any of the events described above could have a material adverse effect on our business, financial condition, results of operations and cash available for distribution to our unitholders.

As noted above, with the acquisition of the Burnaby Terminal located in British Columbia, Canada, a number of additional regulatory and environmental requirements may be triggered.

*General economic, financial, and political conditions, including the impact of tariffs, may materially adversely affect our results of operations and financial condition.*

General economic, financial, and political conditions may have a material adverse effect on our results of operations and financial condition. For example, on March 12, 2025, the U.S. government imposed a 25% tariff on steel imports, which was increased to 50% on June 4, 2025, and on April 2, 2025, the U.S. government announced a 10% tariff on product imports from almost all foreign countries and individualized higher tariffs on certain other countries. Several tariff announcements have been followed by announcements of limited exemptions and temporary pauses. These actions have caused uncertainty and volatility in financial markets and may result in retaliatory measures on U.S. goods. It is possible that our operations may be affected by the resulting volatility in pricing and demand. Similarly, declines in consumer confidence and/or consumer spending, changes in unemployment, significant inflationary or deflationary changes or disruptive regulatory or geopolitical events could contribute to increased volatility and diminished expectations for the economy and our markets, including the market for our goods and services, and lead to demand or cost pressures that could negatively and adversely impact our business. These conditions could affect each of our business segments.

Examples of such conditions could include:

- a general or prolonged decline in, or shocks to, regional or broader macro-economies;
- regulatory changes that could impact the markets in which we operate, such as immigration, tariffs or trade reform laws, which could reduce demand for or supply of our goods and services or lead to pricing, currency, or other pressures; and
- deflationary economic pressures, which could hinder our ability to operate profitably in view of the challenges inherent in making corresponding deflationary adjustments to our cost structure.

In addition, volatility in the capital markets resulting from tariff announcements could also limit our ability to access capital on favorable terms, which could have an adverse impact on our ability to finance new projects and/or acquisitions.

The nature of these types of risks, which are often unpredictable, makes them difficult to plan for, or otherwise mitigate, and they are generally uninsurable—which compounds their potential impact on our business.

*Changes in U.S. administrative policy, including the imposition of or increases in tariffs on steel and/or other raw materials, changes to existing trade agreements and any resulting changes in international trade relations, may have an adverse effect on us.*

We own and operate pipelines and terminals and, like others in our industry, we use significant amounts of steel in our projects and rely on our ability to obtain that steel in an affordable way to maintain our operating margins. Any imposition of or increase in tariffs on steel and/or other raw materials could increase our growth project costs, which may impact the profitability of new projects, and our maintenance capital expenditures, potentially in excess of budgeted amounts.

On March 12, 2025 the U.S government imposed a 25% tariff on steel imports, which was increased to 50% on June 4, 2025, and on April 2, 2025, the U.S government announced a 10% tariff on product imports from almost all countries and individualized higher tariffs on certain other countries. Several tariff announcements have been followed by announcements of limited exemptions and temporary pauses. These actions have caused uncertainty and volatility in financial markets and may result in retaliatory measures on U.S goods. The ultimate impact of these tariffs is unknown at this time. Additionally, ongoing changes in U.S. and foreign government trade policies, including potential modifications to existing trade agreements and further restrictions on free trade, could introduce additional uncertainty. Any escalation of trade tensions, additional tariffs, retaliatory measures by foreign governments or shifts in U.S. or international trade policies could adversely impact our supply chain and increase costs, particularly on our expansion projects. A trade war or other significant changes in trade regulations could have an adverse effect on our business and results of operations.

*Our business could be negatively impacted by inflationary pressures which may decrease our operating margins and increase working capital investments required to operate our business.*

The U.S. inflation rate remained relatively stable through 2024 and 2025, after an extended period of rising rates, which began in 2022. A sustained increase in inflation may continue to increase our costs for labor, services and materials, which, in turn, could cause our operating costs and capital expenditures to increase. Further, our customers face inflationary pressures and resulting impacts, such as the tight labor market and supply chain disruptions. The rate and scope of these various inflationary factors may increase our operating costs and capital expenditures materially, which may not be readily recoverable in the prices of our services and may have an adverse effect on our costs, operating margins, results of operations and financial condition.

Additionally, the Federal Reserve and other central banks have implemented policies in an effort to curb inflationary pressure on the costs of goods and services across the U.S., including the significant increases in prevailing interest rates that occurred during 2022 and 2023 as a result of the 525 aggregate basis point increase in the federal funds rate, and the associated macroeconomic impact on slowdown in economic growth could negatively impact our business. While the Federal Reserve reduced benchmark interest rates by 100 basis points in late 2024, and 75 basis points in late 2025, the prospect of additional interest rate cuts remains uncertain and the continuation of rates at the current level could have the effects of raising the cost of capital and depressing economic growth, either of which—or the combination thereof—could hurt the financial and operating results of our business.

*An impairment of goodwill and intangible assets could reduce our earnings.*

As of December 31, 2025, our consolidated balance sheet reflected \$5.45 billion of goodwill and \$7.44 billion of intangible assets. Goodwill is recorded when the purchase price of a business exceeds the fair value of the tangible and separately measurable intangible net assets. Accounting principles generally accepted in the United States require us to test goodwill for impairment on an annual basis or when events or circumstances occur, indicating that goodwill might be impaired. Long-lived assets such as intangible assets with finite useful lives are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. If we determine that any of our goodwill or intangible assets were impaired, we would be required to take an immediate charge to earnings with a correlative effect on partners' capital and balance sheet leverage as measured by debt to total capitalization.

*We depend on certain key producers for our supply of natural gas and the loss of any of these key producers could adversely affect our financial results.*

Certain producers who are connected to our systems represent a material source of our supply of natural gas. We are not the only option available to these producers for disposition of the natural gas they produce. To the extent that these and other producers may reduce the volumes of natural gas that they supply us, we would be adversely affected unless we were able to acquire comparable supplies of natural gas from other producers.

*Our intrastate transportation and storage and interstate transportation and storage operations depend on key customers to transport natural gas through our pipelines and the pipelines of our joint ventures.*

During 2025, two customers accounted for approximately 29% of our intrastate transportation and storage revenues. During 2025, four customers collectively accounted for 27% of our interstate transportation and storage revenues.

Certain of our joint ventures also depend on key customers. Citrus has long-term agreements with its top two customers which accounted for 57% of its 2025 revenue. For the Trans-Pecos and Comanche Trail pipelines, a single customer is the primary shipper.

The failure of the major shippers on our and our joint ventures' intrastate and interstate transportation and storage pipelines to fulfill their contractual obligations could have a material adverse effect on our cash flow and results of operations if we or our joint ventures were unable to replace these customers under arrangements that provide similar economic benefits as these existing contracts.

*We may be unable to retain or replace existing midstream, transportation, terminalling and storage customers or volumes due to declining demand or increased competition in crude oil, refined products, natural gas and NGL markets, which would reduce our revenues and limit our future profitability.*

The retention or replacement of existing customers and the volume of services that we provide at rates sufficient to maintain or increase current revenues and cash flows depends on a number of factors beyond our control, including the price of and demand for crude oil, refined products, natural gas and NGLs in the markets we serve and competition from other service providers.

A significant portion of our sales of natural gas are to industrial customers and utilities. As a consequence of the volatility of natural gas prices and increased competition in the industry and other factors, industrial customers, utilities and other gas customers are increasingly reluctant to enter into long-term purchase contracts. Many customers purchase natural gas from more than one supplier and have the ability to change suppliers at any time. Some of these customers also have the ability to switch between gas and alternate fuels in response to relative price fluctuations in the market. Because there are many companies of greatly varying size and financial capacity that compete with us in the marketing of natural gas, we often compete in natural gas sales markets primarily on the basis of price.

We also receive a substantial portion of our revenues by providing natural gas gathering, processing, treating, transportation and storage services. While a substantial portion of our services are sold under long-term contracts for reserved service, we also provide service on an unreserved or short-term basis. Demand for our services may be substantially reduced due to changing market prices. Declining prices may result in lower rates of natural gas production resulting in less use of services, while rising prices may diminish consumer demand and also limit the use of services. In addition, our competitors may attract our customers' business. If demand declines or competition increases, we may not be able to sustain existing levels of unreserved service or renew or extend long-term contracts as they expire or we may reduce our rates to meet competitive pressures.

Revenue from our NGL transportation systems and refined products storage is also exposed to risks due to fluctuations in demand for transportation and storage service as a result of unfavorable commodity prices, competition from nearby pipelines, and other factors. We receive substantially all of our transportation revenues through dedicated contracts under which the customer agrees to deliver the total output from particular processing plants that are connected only to our transportation system. Reduction in demand for natural gas or NGLs due to unfavorable prices or other factors, however, may result in lower rates of production under dedicated contracts and lower demand for our services. In addition, our refined products storage revenues are primarily derived from fixed capacity arrangements between us and our customers, a portion of our revenue is derived from fungible storage and throughput arrangements, under which our revenue is more dependent upon demand for storage from our customers.

The volume of crude oil and refined products transported through our crude oil and refined products pipelines and terminal facilities depends on the availability of attractively priced crude oil and refined products in the areas serviced by our assets. A period of sustained price reductions for crude oil or refined products could lead to a decline in drilling activity, production and refining of crude oil or import levels in these areas. A period of sustained increases in the price of crude oil or refined products supplied from or delivered to any of these areas could materially reduce demand for crude oil or refined products in these areas. In either case, the volumes of crude oil or refined products transported in our crude oil and refined products pipelines and terminal facilities could decline.

The loss of existing customers by our midstream, transportation, terminalling and storage facilities or a reduction in the volume of the services our customers purchase from us, or our inability to attract new customers and service volumes would negatively affect our revenues, be detrimental to our growth, and adversely affect our results of operations.

*We and our subsidiaries, including Sunoco LP and USAC, are exposed to the credit risk of our customers and derivative counterparties, and an increase in the nonpayment and nonperformance by our customers or derivative counterparties could reduce our ability to make distributions to our Unitholders.*

We, Sunoco LP and USAC are subject to risks of loss resulting from nonpayment or nonperformance by our, Sunoco LP's and USAC's customers. Commodity price volatility and/or the tightening of credit in the financial markets may make it more difficult for customers to obtain financing and, depending on the degree to which this occurs, there may be a material increase in the nonpayment and nonperformance by our customers. In addition, our risk management activities are subject to the risks that a counterparty may not perform its obligation under the applicable derivative instrument, the terms of the derivative instruments are imperfect, and our risk management policies and procedures are not properly followed. Any material nonpayment or nonperformance by our customers or our derivative counterparties could reduce our ability to make distributions to our Unitholders. Any substantial increase in the nonpayment and nonperformance by our customers could have a material effect on our, Sunoco LP's and USAC's results of operations and operating cash flows.

Severe market disruptions could cause some of our counterparties to file for bankruptcy protection, in which case our existing contracts with those counterparties may be rejected by the bankruptcy court. Following the request of one of our FERC-regulated natural gas pipelines, the FERC commenced a proceeding to determine whether the public interest requires abrogation or modification of a firm transportation agreement with one of our shippers. By order dated November 9, 2020, FERC held that the record did not support a finding that the public interest presently required abrogation or modification of the subject firm transportation agreement. The shipper subsequently filed for bankruptcy. Thereafter, on July 19, 2022, the Fifth Circuit Court of Appeals rejected FERC's jurisdictional basis for its earlier public interest decision, vacated the November 9, 2020 order and a settlement has been reached regarding the agreement in the underlying bankruptcy proceeding. We will attempt to remarket the

subject capacity and, depending on the availability of alternatives to our services, any resulting contracts may have terms that are less favorable to us than the former shipper's contract.

*The profitability of certain activities in our natural gas gathering, processing, transportation and storage operations are largely dependent upon natural gas commodity prices, price spreads between two or more physical locations and market demand for natural gas and NGLs.*

For a portion of the natural gas gathered on our systems, we purchase natural gas from producers at the wellhead and then gather and deliver the natural gas to pipelines where we typically resell the natural gas under various arrangements, including sales at index prices. Generally, the gross margins we realize under these arrangements decrease in periods of low natural gas prices.

We also enter into percent-of-proceeds arrangements, keep-whole arrangements, and processing fee agreements pursuant to which we agree to gather and process natural gas received from the producers.

Under percent-of-proceeds arrangements, we generally sell the residue gas and NGLs at market prices and remit to the producers an agreed upon percentage of the proceeds based on an index price. In other cases, instead of remitting cash payments to the producer, we deliver an agreed upon percentage of the residue gas and NGL volumes to the producer and sell the volumes we keep to third parties at market prices. Under these arrangements, our revenues and gross margins decline when natural gas prices and NGL prices decrease. Accordingly, a decrease in the price of natural gas or NGLs could have an adverse effect on our revenues and results of operations.

Under keep-whole arrangements, we generally sell the NGLs produced from our gathering and processing operations at market prices. Because the extraction of the NGLs from the natural gas during processing reduces the Btu content of the natural gas, we must either purchase natural gas at market prices for return to producers or make a cash payment to producers equal to the value of this natural gas. Under these arrangements, our gross margins generally decrease when the price of natural gas increases relative to the price of NGLs.

When we process the gas for a fee under processing fee agreements, we may guarantee recoveries to the producer. If recoveries are less than those guaranteed to the producer, we may suffer a loss by having to supply liquids or its cash equivalent to keep the producer whole.

We also receive fees and retain gas in kind from our natural gas transportation and storage customers. Our fuel retention fees and the value of gas that we retain in kind are directly affected by changes in natural gas prices. Decreases in natural gas prices tend to decrease our fuel retention fees and the value of retained gas.

In addition, we receive revenue from our off-gas processing and fractionating system in south Louisiana primarily through customer agreements that are a combination of keep-whole and percent-of-proceeds arrangements, as well as from transportation and fractionation fees. Consequently, a large portion of our off-gas processing and fractionation revenue is exposed to risks due to fluctuations in commodity prices. In addition, a decline in NGL prices could cause a decrease in demand for our off-gas processing and fractionation services and could have an adverse effect on our results of operations.

*Our midstream facilities and transportation pipelines provide services related to natural gas wells that experience production declines over time, which we may not be able to replace with natural gas production from newly drilled wells in the same natural gas basins or in other new natural gas producing areas.*

In order to maintain or increase throughput levels on our gathering systems and transportation pipeline systems and asset utilization rates at our treating and processing plants, we must continually contract for new natural gas supplies and natural gas transportation services.

A substantial portion of our assets, including our gathering systems and our processing and treating plants, are connected to natural gas reserves and wells that experience declining production over time. Our gas transportation pipelines are also dependent upon natural gas production in areas served by our gathering systems or in areas served by other gathering systems or transportation pipelines that connect with our transportation pipelines. We may not be able to obtain additional contracts for natural gas supplies for our natural gas gathering systems, and we may be unable to maintain or increase the levels of natural gas throughput on our transportation pipelines. The primary factors affecting our ability to connect new supplies of natural gas to our gathering systems include our success in contracting for existing natural gas supplies that are not committed to other systems and the level of drilling activity and production of natural gas near our gathering systems or in areas that provide access to our transportation pipelines or markets to which our systems connect. We have no control over the level of drilling activity in our areas of operation, the amount of reserves underlying the wells and the rate at which production from a well will decline. In addition, we have no control over producers or their production and contracting decisions.

While a substantial portion of our services are provided under long-term contracts for reserved service, we also provide service on an unreserved basis. The reserves available through the supply basins connected to our gathering, processing, treating, transportation and storage facilities may decline and may not be replaced by other sources of supply. A decrease in development or production activity could cause a decrease in the volume of unreserved services we provide and a decrease in the number and volume of our contracts for reserved transportation service over the long run, which in each case would adversely affect our revenues and results of operations.

If we are unable to replace any significant volume declines with additional volumes from other sources, our results of operations and cash flows could be materially and adversely affected.

*Our revenues depend on our customers' ability to use our pipelines and third-party pipelines over which we have no control.*

Our natural gas transportation, storage and NGL businesses depend, in part, on our customers' ability to obtain access to pipelines to deliver gas to us and receive gas from us. Many of these pipelines are owned by parties not affiliated with us. Any interruption of service on our pipelines or third-party pipelines due to testing, line repair, reduced operating pressures, or other causes or adverse change in terms and conditions of service could have a material adverse effect on our ability, and the ability of our customers, to transport natural gas to and from our pipelines and facilities and a corresponding material adverse effect on our transportation and storage revenues. In addition, the rates charged by interconnected pipelines for transportation to and from our facilities affect the utilization and value of our storage services. Significant changes in the rates charged by those pipelines or the rates charged by other pipelines with which the interconnected pipelines compete could also have a material adverse effect on our storage revenues.

Shippers using our oil pipelines and terminals are also dependent upon our pipelines and connections to third-party pipelines to receive and deliver crude oil and products. Any interruptions or reduction in the capabilities of these pipelines due to testing, line repair, reduced operating pressures, or other causes could result in reduced volumes transported in our pipelines or through our terminals. Similarly, if additional shippers begin transporting volume over interconnecting oil pipelines, the allocations of pipeline capacity to our existing shippers on these interconnecting pipelines could be reduced, which also could reduce volumes transported in its pipelines or through our terminals. Allocation reductions of this nature are not infrequent and are beyond our control. Any such interruptions or allocation reductions that, individually or in the aggregate, are material or continue for a sustained period of time could have a material adverse effect on our results of operations, financial position, or cash flows.

*The inability to continue to access lands owned by third parties could adversely affect our ability to operate and our financial results.*

Our ability to operate our pipeline systems on certain lands owned by third parties will depend on our success in maintaining existing rights-of-way and obtaining new rights-of-way on those lands. We are parties to rights-of-way agreements, permits and licenses authorizing land use with numerous parties, including, private land owners, governmental entities, Native American tribes, rail carriers, public utilities and others. For more information, see our regulatory disclosure titled "Indigenous Protections." Our ability to secure extensions of existing agreements, permits and licenses is essential to our continuing business operations, and securing additional rights-of-way will be critical to our ability to pursue expansion projects. We cannot provide any assurance that we will be able to maintain access to existing rights-of-way upon the expiration of the current grants, that all of the rights-of-way will be obtained in a timely fashion or that we will acquire new rights-of-way as needed.

Further, whether we have the power of eminent domain for our pipelines varies from state to state, depending upon the type of pipeline and the laws of the particular state and the ownership of the land to which we seek access. When we exercise eminent domain rights or negotiate private agreements cases, we must compensate landowners for the use of their property and, in eminent domain actions, such compensation may be determined by a court. The inability to exercise the power of eminent domain could negatively affect our business if we were to lose the right to use or occupy the property on which our pipelines are located. For example, following a decision issued in May 2017 by the federal Tenth Circuit Court of Appeals, tribal ownership of even a very small fractional interest in an allotted land, that is, tribal land owned or at one time owned by an individual Indian landowner, bars condemnation of any interest in the allotment. Consequently, the inability to condemn such allotted lands under circumstances where existing pipeline rights-of-way may soon lapse or terminate serves as an additional impediment for pipeline operators. Any loss of rights with respect to our real property, through our inability to renew right-of-way contracts or otherwise, could have a material adverse effect on our business, results of operations, financial condition and ability to make cash distributions to Unitholders.

*Our storage operations are influenced by the overall forward market for crude oil and other products we store, and certain market conditions may adversely affect our financial and operating results.*

Our storage operations are influenced by the overall forward market for crude oil and other products we store. A contango market (meaning that the price of crude oil or other products for future delivery is higher than the current price) is associated

with greater demand for storage capacity, because a party can simultaneously purchase crude oil or other products at current prices for storage and sell at higher prices for future delivery. A backwardated market (meaning that the price of crude oil or other products for future delivery is lower than the current price) is associated with lower demand for storage capacity because a party can capture a premium for prompt delivery of crude oil or other products rather than storing it for future sale. A prolonged backwardated market, or other adverse market conditions, could have an adverse impact on its ability to negotiate favorable prices under new or renewing storage contracts, which could have an adverse impact on our storage revenues. As a result, the overall forward market for crude oil or other products may have an adverse effect on our financial condition or results of operations.

*Competition for water resources or limitations on water usage for hydraulic fracturing could disrupt crude oil and natural gas production from shale formations.*

Hydraulic fracturing is the process of creating or expanding cracks by pumping water, sand and chemicals under high pressure into an underground formation in order to increase the productivity of crude oil and natural gas wells. Water used in the process is generally fresh water, recycled produced water or salt water. There is competition for fresh water from municipalities, farmers, ranchers and industrial users. In addition, the available supply of fresh water can also be reduced directly by drought. Prolonged drought conditions increase the intensity of competition for fresh water. Limitations on oil and gas producers' access to fresh water may restrict their ability to use hydraulic fracturing and could reduce new production. Such disruptions could potentially have a material adverse impact on our financial condition or results of operations.

*A natural disaster, catastrophe or other event could result in severe personal injury, property damage and environmental damage, which could curtail our operations and otherwise materially adversely affect our cash flow.*

Some of our operations involve risks of personal injury, property damage and environmental damage, which could curtail our operations and otherwise materially adversely affect our cash flow. For example, natural gas pipeline and other facilities operate at high pressures. Virtually all of our operations are exposed to potential natural disasters, including hurricanes, tornadoes, storms, floods and/or earthquakes.

If one or more facilities that are owned by us, or that deliver natural gas or other products to us, are damaged by severe weather or any other disaster, accident, catastrophe or event, our operations could be significantly interrupted. Similar interruptions could result from damage to production or other facilities that supply our facilities or other stoppages arising from factors beyond our control. These interruptions might involve significant damage to people, property or the environment, and repairs might take from a week or less for a minor incident to six months or more for a major interruption. Any event that interrupts the revenues generated by our operations, or which causes us to make significant expenditures not covered by insurance, could reduce our cash available for paying distributions to Unitholders.

As a result of market conditions, premiums and deductibles for certain insurance policies can increase substantially, and in some instances, certain insurance may become unavailable or available only for reduced amounts of coverage. As a result, we may not be able to renew existing insurance policies or procure other desirable insurance on commercially reasonable terms, if at all. If we were to incur a significant liability for which we were not fully insured, it could have a material adverse effect on our financial position and results of operations. In addition, the proceeds of any such insurance may not be paid in a timely manner and may be insufficient if such an event were to occur.

*Terrorist attacks aimed at our facilities could adversely affect our business, results of operations, cash flows and financial condition.*

The United States government has issued warnings that energy assets, including our nation's pipeline infrastructure, may be the future target of terrorist organizations. Some of our facilities are subject to standards and procedures required by the Chemical Facility Anti-Terrorism Standards. We believe we are in compliance with all material requirements; however, such compliance may not prevent a terrorist attack from causing material damage to our facilities or pipelines. Any such terrorist attack on our facilities or pipelines, those of our customers, or in some cases, those of other pipelines could have a material adverse effect on our business, financial condition and results of operations.

*Our business could be affected adversely by union disputes and strikes or work stoppages by unionized employees.*

As of December 31, 2025, approximately 6% of our workforce is covered by a number of collective bargaining agreements with various terms and dates of expiration. There can be no assurances that we will not experience a work stoppage in the future as a result of labor disagreements. Any work stoppage could, depending on the affected operations and the length of the work stoppage, have a material adverse effect on our business, financial position, results of operations or cash flows.

*Cybersecurity attacks, data breaches and other disruptions affecting us, or our service providers, could materially and adversely affect our business, operations, reputation, and financial results.*

The security and integrity of our information and operational technology infrastructure and physical assets are critical to our business and our ability to perform day-to-day operations and deliver services. In addition, in the ordinary course of our business, we collect, process, transmit and store sensitive data, including intellectual property, our proprietary business information and that of our customers, suppliers and business partners, as well as personally identifiable information, in our data centers and on our networks. We also engage third parties, such as service providers and vendors, who provide a broad array of software, technologies, tools, and other products, services and functions (e.g., human resources, finance, data transmission, communications, risk, compliance, among others) that enable us to conduct, monitor and/or protect our business, operations, systems and data assets. If these third parties fail to adequately safeguard our data or their systems, or if they experience security breaches, our operations and reputation may be adversely affected.

Our information and operational technology and infrastructure, physical assets and data, may be vulnerable to unauthorized access, computer viruses, malicious attacks and other events (e.g., distributed denial of service attacks, ransomware attacks) that are beyond our control. These events can result from malfeasance by external parties, such as hackers, or due to human error or malfeasance by our or our service providers' employees and contractors (e.g., due to social engineering or phishing attacks). In addition, work-from-home arrangements may present additional operational and cybersecurity risks to our information technology infrastructure and physical assets.

We and certain of our service providers have, from time to time, been subject to cyber attacks and security incidents. The frequency and magnitude of cyber attacks globally is increasing and attackers are becoming more sophisticated. Cyber attacks, including, but not limited to, malicious software, surveillance, credential stuffing, spear phishing, social engineering, use of deepfakes (i.e., highly realistic synthetic media generated by artificial intelligence), attempts to gain unauthorized access to data, and other electronic security breaches that could lead to disruptions in critical systems, unauthorized release of confidential or otherwise protected information and corruption of data, are evolving. Although we have implemented and maintain commercially reasonable security measures, including detection and prevention systems, regular cybersecurity assessments, employee training programs, and an incident response plan, there is no guarantee that these measures will successfully prevent security threats, detect them in a timely manner, or mitigate their impact. We may be unable to anticipate, detect or prevent future attacks, particularly as the methodologies used by attackers change frequently or are not recognized until launched, and we may be unable to investigate or remediate incidents because attackers are increasingly using techniques and tools designed to circumvent controls, to avoid detection, and to remove or obfuscate forensic evidence.

Breaches of our information and operational technology infrastructure or physical assets, or other disruptions, could result in damage to our assets, safety incidents, damage to the environment, potential liability or the loss of contracts, data loss or corruption, misdirected wire transfers, an inability to maintain our books and records or an inability to prevent environmental damage, any or all of which could, in turn, have a material adverse effect on our operations, financial position and results of operations. A successful cyber attack or other security incident could compromise our networks and the information stored there could be accessed, publicly disclosed, lost or stolen. Any such access, disclosure or loss could result in legal claims or proceedings, significant litigation costs, regulatory investigations and enforcement, penalties and fines, increased costs for system remediation and compliance requirements, disruption of our operations, damage to our reputation, or loss of confidence in our products and services, any or all of which could have a material adverse effect on our business and results. We may be required to invest significant additional resources to comply with evolving cybersecurity and data privacy laws and regulations and to modify and enhance our information and operational security and controls, and to investigate and remediate any security vulnerabilities. Any losses, costs or liabilities may not be covered by, or may exceed the coverage limits of, any or all of our applicable insurance policies.

*Our operations could be disrupted if our information systems fail, causing increased expenses and loss of sales.*

Our business is highly dependent on financial, accounting and other data processing systems and other communications and information systems, including our enterprise resource planning tools. We process a large number of transactions on a daily basis and rely upon the proper functioning of computer systems. If a key system was to fail or experience unscheduled downtime for any reason, even if only for a short period, our operations and financial results could be affected adversely. Our systems could be damaged or interrupted by a security breach, fire, flood, power loss, telecommunications failure or similar event. We have a formal disaster recovery plan in place, but this plan may not entirely prevent delays or other complications that could arise from an information systems failure. Our insurance may not compensate us adequately for losses that may occur. Prolonged outages or disruptions in our information technology infrastructure could impair our ability to deliver services, meet customer expectations or comply with regulatory requirements.

*Product liability claims and litigation could adversely affect our business and results of operations.*

Product liability is a significant commercial risk. Substantial damage awards have been made in certain jurisdictions against manufacturers and resellers based upon claims for injuries caused by the use of or exposure to various products. There can be no assurance that product liability claims against us would not have a material adverse effect on our business or results of operations.

Along with other refiners, manufacturers and sellers of gasoline, ETC Sunoco is a defendant in numerous lawsuits that allege MTBE contamination in groundwater. Plaintiffs, who include water purveyors and municipalities responsible for supplying drinking water and private well owners, are seeking compensatory damages (and in some cases injunctive relief, punitive damages and attorneys' fees) for claims relating to the alleged manufacture and distribution of a defective product (MTBE-containing gasoline) that contaminates groundwater, and general allegations of product liability, nuisance, trespass, negligence, violation of environmental laws and deceptive business practices. There has been insufficient information developed about the plaintiffs' legal theories or the facts that would be relevant to an analysis of the ultimate liability to ETC Sunoco. An adverse determination of liability related to these allegations or other product liability claims against ETC Sunoco could have a material adverse effect on our business or results of operations.

*We do not control, and therefore may not be able to cause or prevent certain actions by, certain of our joint ventures.*

Certain of our operations are conducted through joint ventures, some of which have their own governing boards. With respect to our joint ventures, we share ownership and management responsibilities with partners that may not share our goals and objectives. Consequently, it may be difficult or impossible for us to cause the joint venture entity to take actions that we believe would be in their or the joint venture's best interests. Likewise, we may be unable to prevent actions of the joint venture. Differences in views among joint venture partners may result in delayed decisions or failures to agree on major matters, such as large expenditures or contractual commitments, the construction or acquisition of assets or borrowing money, among others. Delay or failure to agree may prevent action with respect to such matters, even though such action may serve our best interest or that of the joint venture. Accordingly, delayed decisions and disagreements could adversely affect the business and operations of the joint ventures and, in turn, our business and operations.

*The use of derivative financial instruments could result in material financial losses by us.*

From time to time, we and/or our subsidiaries have sought to reduce our exposure to fluctuations in commodity prices and interest rates by using derivative financial instruments and other risk management mechanisms and by our trading, marketing and/or system optimization activities. To the extent that we hedge our commodity price and interest rate exposures, we forgo the benefits we would otherwise experience if commodity prices or interest rates were to change in our favor.

The accounting standards regarding hedge accounting are very complex, and even when we engage in hedging transactions that are effective economically (whether to mitigate our exposure to fluctuations in commodity prices, or to balance our exposure to fixed and variable interest rates), these transactions may not be considered effective for accounting purposes. Accordingly, our consolidated financial statements may reflect some volatility due to these hedges, even when there is no underlying economic impact at that point. It is also not always possible for us to engage in a hedging transaction that completely mitigates our exposure to commodity prices. Our consolidated financial statements may reflect a gain or loss arising from an exposure to commodity prices for which we are unable to enter into a completely effective hedge.

In addition, our derivatives activities can result in losses. Such losses could occur under various circumstances, including if a counterparty does not perform its obligations under the derivative arrangement, the hedge is imperfect, commodity prices move unfavorably related to our physical or financial positions or hedging policies and procedures are not followed.

*Increasing levels of congestion in the Houston Ship Channel could result in a diversion of business to less busy ports.*

Our Gulf Coast facilities are strategically situated on prime real estate located in the Houston Ship Channel, which is in close proximity to both supply sources and demand sources. In recent years, the success of the Port of Houston has led to an increase in vessel traffic driven in part by the growing overseas demand for U.S. crude, gasoline, liquefied natural gas and petrochemicals and in part by the Port of Houston's expansions to accept large container vessels, which can restrict the flow of other cargo. Increasing congestion in the Port of Houston, which is currently the busiest port in the U.S. by waterborne tonnage and which has increased volumes in the last few years, could cause our customers or potential customers to divert their business to smaller ports in the Gulf of America, which could result in lower utilization of our facilities.

*The costs of providing pension and other postretirement health care benefits and related funding requirements are subject to changes in pension fund values, changing demographics and fluctuating actuarial assumptions and may have a material adverse effect on our financial results.*

Certain of our subsidiaries provide pension plan and other postretirement healthcare benefits to certain of their employees. The costs of providing pension and other postretirement health care benefits and related funding requirements are subject to changes in pension and other postretirement fund values, changing demographics and fluctuating actuarial assumptions that may have a material adverse effect on the Partnership's future consolidated financial results. While certain of the costs incurred in providing such pension and other postretirement healthcare benefits are recovered through the rates charged by the Partnership's regulated businesses, the Partnership's subsidiaries may not recover all of the costs and those rates are generally not immediately responsive to current market conditions or funding requirements. Additionally, if the current cost recovery mechanisms are changed or eliminated, the impact of these benefits on operating results could significantly increase.

*Mergers among customers and competitors could result in lower volumes being shipped on our pipelines or products stored in or distributed through our terminals, or reduced crude oil marketing margins or volumes.*

Mergers between existing customers could provide strong economic incentives for the combined entities to utilize their existing systems instead of our systems in those markets where the systems compete. As a result, we could lose some or all of the volumes and associated revenues from these customers and could experience difficulty in replacing those lost volumes and revenues, which could materially and adversely affect our results of operations, financial position or cash flows.

*Fraudulent activity or misuse of proprietary data involving our outsourcing partners could expose us to additional liability.*

We utilize both affiliated entities and third parties in the processing of our information and data. Breaches of security measures or the accidental loss, inadvertent disclosure or unapproved dissemination of proprietary information, or sensitive or confidential data about us or our customers, including the potential loss or disclosure of such information or data as a result of fraud or other forms of deception, could expose us to a risk of loss, or misuse of this information, result in litigation and potential liability, lead to reputational damage, increase our compliance costs, or otherwise harm our business.

*Our trucking fleet operations are subject to the Federal Motor Carrier Safety Regulations which are enacted, reviewed and amended by the Federal Motor Carrier Safety Administration ("FMCSA"). Our fleet currently has a "satisfactory" safety rating; however, if our safety rating were downgraded to "unsatisfactory," our business and results of operations could be adversely affected.*

All federally regulated carriers' safety ratings are measured through a program implemented by the FMCSA known as the Compliance Safety Accountability ("CSA") program. The CSA program measures a carrier's safety performance based on violations observed during roadside inspections as opposed to compliance audits performed by the FMCSA. The quantity and severity of any violations are compared to a peer group of companies of comparable size and annual mileage. If a company rises above a threshold established by the FMCSA, it is subject to action from the FMCSA. There is a progressive intervention strategy that begins with a company providing the FMCSA with an acceptable plan of corrective action that the company will implement. If the issues are not corrected, the intervention escalates to on-site compliance audits and ultimately an "unsatisfactory" rating and the revocation of its operating authority by the FMCSA could have an adverse effect on our business, results of operations and financial condition.

### **Indebtedness**

*Our debt level and debt agreements may limit our ability to make distributions to Unitholders and may limit our future financial and operating flexibility.*

As of December 31, 2025, we had approximately \$68.33 billion of consolidated debt, excluding the debt of our unconsolidated joint ventures. Our level of indebtedness affects our operations in several ways, including, among other things:

- a significant portion of our and our subsidiaries' cash flow from operations will be dedicated to the payment of principal and interest on outstanding debt and will not be available for other purposes, including payment of distributions;
- covenants contained in our and our subsidiaries' existing debt agreements require us and them, as applicable, to meet financial tests that may adversely affect our flexibility in planning for and reacting to changes in our business;
- our and our subsidiaries' ability to obtain additional financing for working capital, capital expenditures, acquisitions and general partnership, corporate or limited liability company purposes, as applicable, may be limited;
- we may be at a competitive disadvantage relative to similar companies that have less debt;
- we may be more vulnerable to adverse economic and industry conditions as a result of our significant debt level; and

- failure by us or our subsidiaries to comply with the various restrictive covenants of our respective debt agreements could negatively impact our ability to incur additional debt, including our ability to utilize the available capacity under our revolving credit facility, and our ability to pay our distributions.

*The debt level and debt agreements of our subsidiaries, including Sunoco LP and USAC, may limit the distributions we receive from these subsidiaries, as well as our future financial and operating flexibility.*

Our subsidiaries' levels of indebtedness affect their operations in several ways, including, among other things:

- a significant portion of our subsidiaries' cash flows from operations will be dedicated to the payment of principal and interest on outstanding debt and will not be available for other purposes, including payment of distributions to us;
- covenants contained in our subsidiaries' existing debt agreements require the respective subsidiaries, as applicable, to meet financial tests that may adversely affect their flexibility in planning for and reacting to changes in their respective businesses;
- our subsidiaries' ability to obtain additional financing for working capital, capital expenditures, acquisitions and general partnership, corporate or limited liability company purposes, as applicable, may be limited;
- our subsidiaries may be at a competitive disadvantage relative to similar companies that have less debt;
- our subsidiaries may be more vulnerable to adverse economic and industry conditions as a result of their debt levels;
- failure by our subsidiaries to comply with the various restrictive covenants of the respective debt agreements could negatively impact the respective subsidiaries' ability to incur additional debt, including their ability to utilize the available capacity under their revolving credit facilities, and to pay distributions to us and their unitholders.

*We do not have the same flexibility as other types of organizations to accumulate cash, which may limit cash available to service our debt or to repay debt at maturity.*

Unlike a corporation, our Partnership Agreement requires us to distribute, on a quarterly basis, 100% of our Available Cash (as defined in our Partnership Agreement) to our Unitholders of record and our general partner. Available Cash is generally all of our cash on hand as of the end of a quarter, adjusted for cash distributions and net changes to reserves. Our general partner will determine the amount and timing of such distributions and has broad discretion to establish and make additions to our reserves or the reserves of our operating subsidiaries in amounts it determines in its reasonable discretion to be necessary or appropriate:

- to provide for the proper conduct of our business and the businesses of our operating subsidiaries (including reserves for future capital expenditures and for our anticipated future credit needs);
- to provide funds for distributions to our Unitholders and our general partner for any one or more of the next four calendar quarters; or
- to comply with applicable law or any of our loan or other agreements.

*Increases in interest rates could materially adversely affect our business, results of operations, cash flows and financial condition.*

In addition to our exposure to commodity prices, we have significant exposure to changes in interest rates, including the significant increases in prevailing interest rates as a result of changes in federal monetary and fiscal policy. Approximately \$4.25 billion of our consolidated debt as of December 31, 2025 bears interest at variable interest rates and the remainder bears interest at fixed rates. To the extent that we have debt with floating interest rates, our results of operations, cash flows and financial condition could be materially adversely affected by increases in interest rates.

*An increase in interest rates could impact demand for our storage capacity.*

There is a financing cost for a storage capacity user to own crude oil while it is stored. That financing cost is impacted by the cost of capital or interest rate incurred by the storage user, in addition to the commodity cost of the crude oil in inventory. Absent other factors, a higher financing cost adversely impacts the economics of storing crude oil for future sale. As a result, a significant increase in interest rates could adversely affect the demand for our storage capacity independent of other market factors.

An increase in interest rates may also cause a corresponding decline in demand for equity investments, in general, and in particular for yield-based equity investments such as our Common Units. Any such reduction in demand for our Common Units resulting from other more attractive investment opportunities may cause the trading price of our Common Units to decline.

*A downgrade of our credit ratings could impact our and our subsidiaries' liquidity, access to capital and costs of doing business, and maintaining credit ratings is under the control of independent third parties.*

A downgrade of our credit ratings may increase our and our subsidiaries' cost of borrowing and could require us to post collateral with third parties, negatively impacting our available liquidity. Our and our subsidiaries' ability to access capital markets could also be limited by a downgrade of our credit ratings and other disruptions. Such disruptions could include:

- economic downturns;
- deteriorating capital market conditions;
- declining market prices for crude oil, natural gas, NGLs and other commodities;
- terrorist attacks or threatened attacks on our facilities or those of other energy companies; and
- the overall health of the energy industry, including the bankruptcy or insolvency of other companies.

Credit rating agencies perform independent analysis when assigning credit ratings. The analysis includes a number of criteria including, but not limited to, business composition, market and operational risks, as well as various financial tests. Credit rating agencies continue to review the criteria for industry sectors and various debt ratings and may make changes to those criteria from time to time. Credit ratings are not recommendations to buy, sell or hold investments in the rated entity. Ratings are subject to revision or withdrawal at any time by the rating agencies, and we cannot assure you that we will maintain our current credit ratings.

### ***Capital Projects and Future Growth***

*If we and our subsidiaries do not make acquisitions on economically acceptable terms, our future growth could be limited.*

Our results of operations and our ability to grow and to make distributions to Unitholders will depend in part on our ability to make acquisitions that are accretive to our distributable cash flow per unit.

We may be unable to make accretive acquisitions for any of the following reasons, among others:

- because we are unable to identify attractive acquisition candidates or negotiate acceptable purchase contracts with them;
- because we are unable to raise financing for such acquisitions on economically acceptable terms;
- because of recent heightened antitrust focus in the energy industry creating potential risk, expense and delays in connection with prospective acquisitions and consolidations; or
- because we are outbid by competitors, particularly as a trend of consolidation within the energy industry continues, some of which are substantially larger than us and have greater financial resources and lower costs of capital than we do.

Furthermore, even if we consummate acquisitions that we believe will be accretive, those acquisitions may in fact adversely affect our results of operations or result in a decrease in distributable cash flow per unit. Any acquisition involves potential risks, including the risk that we may:

- fail to realize anticipated benefits, such as new customer relationships, cost-savings or cash flow enhancements;
- decrease our liquidity by using a significant portion of our available cash or borrowing capacity to finance acquisitions;
- significantly increase our interest expense or financial leverage if we incur additional debt to finance acquisitions;
- encounter difficulties operating in new geographic areas or new lines of business;
- incur or assume unanticipated liabilities, losses or costs associated with the business or assets acquired for which we are not indemnified or for which the indemnity is inadequate;
- be unable to hire, train or retrain qualified personnel to manage and operate our growing business and assets;
- less effectively manage our historical assets, due to the diversion of management's attention from other business concerns; or
- incur other significant charges, such as impairment of goodwill or other intangible assets, asset devaluation or restructuring charges.

If we consummate future acquisitions, our capitalization and results of operations may change significantly. As we determine the application of our funds and other resources, Unitholders will not have an opportunity to evaluate the economic, financial and other relevant information that we will consider.

*Capital projects may require significant amounts of debt and equity financing, which may not be available to us on acceptable terms, or at all.*

We may fund our growth capital expenditures, including any new pipeline construction projects and improvements or repairs to existing facilities that we may undertake, with proceeds from sales of our debt and equity securities and borrowings under our revolving credit facility; however, we cannot be certain that we will be able to issue our debt and equity securities on terms satisfactory to us, or at all. If we are required to seek alternative financing, the terms of which may not be attractive to us, or to revise or cancel our expansion plans.

A significant increase in our indebtedness that is proportionately greater than our issuance of equity could negatively impact our and our subsidiaries' credit ratings or our ability to remain in compliance with the financial covenants under our revolving credit agreement, which could have a material adverse effect on our financial condition, results of operations and cash flows.

*The Inflation Reduction Act of 2022 could decrease demand for crude oil and natural gas and could impose new costs on our operations.*

In August 2022, President Biden signed the Inflation Reduction Act of 2022 ("IRA 2022"), which contains hundreds of billions in incentives for the development of renewable energy, clean hydrogen, clean fuels, electric vehicles and supporting infrastructure and carbon capture and sequestration, amongst other provisions. In addition, the IRA 2022 amended the Clean Air Act to impose a fee on the emission of methane from sources required to report their GHG emissions to the EPA, including those sources in the onshore petroleum and natural gas production categories. However, the One Big Beautiful Bill Act ("OBBBA") amended the Clean Air Act to postpone the implementation of the fee until 2034. Although the OBBBA made various changes to the incentives created under the IRA 2022, including elimination of electric vehicle credits, if the incentives offered for various clean energy industries referenced above are pursued in the future, it could further accelerate the transition of the economy away from the use of fossil fuels and decrease demand for gasoline and diesel, increase our compliance and operating costs and consequently adversely affect our business.

*If we do not continue to construct new pipelines, our future growth could be limited.*

Our results of operations and ability to grow and to increase distributable cash flow per unit will depend, in part, on our ability to construct pipelines that are accretive to our distributable cash flow. We may be unable to construct pipelines that are accretive to distributable cash flow for any of the following reasons, among others:

- we are unable to identify pipeline construction opportunities with favorable projected financial returns;
- we are unable to obtain necessary governmental approvals and contracts with qualified contractors and vendors on acceptable terms;
- we are unable to raise financing for our identified pipeline construction opportunities; or
- we are unable to secure sufficient transportation commitments from potential customers due to competition from other pipeline construction projects or for other reasons.

Furthermore, even if we construct a pipeline that we believe will be accretive, the pipeline may in fact adversely affect our results of operations or results from those projected prior to commencement of construction and other factors.

*Expanding our business by constructing new pipelines and related facilities subjects us to risks.*

One of the ways that we have grown our business is through the construction of additions to our existing gathering, compression, treating, processing and transportation systems. The construction of new pipelines and related facilities (or the improvement and repair of existing facilities) involves numerous regulatory, environmental, political and legal uncertainties beyond our control and requires the expenditure of significant amounts of capital that we will be required to finance through borrowings, the issuance of additional equity or from operating cash flow. If we undertake these projects, they may not be completed on schedule, at all, or at the budgeted cost. A variety of factors outside our control, such as weather, natural disasters and difficulties in obtaining permits and rights-of-way or other regulatory approvals, as well as the performance by third-party contractors, may result in increased costs or delays in construction. For example, in recent years, pipeline projects by many companies have been subject to several challenges by environmental groups, such as challenges to agency reviews under the NEPA and to the USACE NWP program. Any changes to the USACE NWP program that exclude our projects from coverage could require us to reroute pipeline projects, or seek individual permits that involve longer permitting timelines, leading to construction delays. For more information on the NWP program, see our regulatory disclosure titled "Clean Water Act." Separately, cost overruns or delays in completing a project could have a material adverse effect on our results of operations and cash flows. Moreover, our revenues may not increase immediately following the completion of a particular project. For instance, if we build a new pipeline, the construction will occur over an extended period of time, but we may not materially

increase our revenues until long after the project's completion. In addition, the success of a pipeline construction project will likely depend upon the level of oil and natural gas exploration and development drilling activity and the demand for pipeline transportation in the areas proposed to be serviced by the project as well as our ability to obtain commitments from producers in the area to utilize the newly constructed pipelines. In this regard, we may construct facilities to capture anticipated future growth in oil or natural gas production in a region in which such growth does not materialize. As a result, new facilities may be unable to attract enough throughput or contracted capacity reservation commitments to achieve our expected investment return, which could adversely affect our results of operations and financial condition.

*Integration of assets acquired in past acquisitions or future acquisitions with our existing business will be a complex and time-consuming process. A failure to successfully integrate the acquired assets with our existing business in a timely manner may have a material adverse effect on our business, financial condition, results of operations or cash available for distribution to Unitholders.*

The difficulties of integrating past and future acquisitions with our business include, among other things:

- operating a larger combined organization in new geographic areas and new lines of business;
- hiring, training or retaining qualified personnel to manage and operate our growing business and assets;
- integrating management teams and employees into existing operations and establishing effective communication and information exchange with such management teams and employees;
- diversion of management's attention from our existing business;
- assimilation of acquired assets and operations, including additional regulatory programs;
- loss of customers or key employees;
- maintaining an effective system of internal controls in compliance with the Sarbanes-Oxley Act of 2002 as well as other regulatory compliance and corporate governance matters; and
- integrating new technology systems for financial reporting.

If any of these risks or other unanticipated liabilities or costs were to materialize, then desired benefits from past acquisitions and future acquisitions resulting in a negative impact to our future results of operations. In addition, acquired assets may perform at levels below the forecasts used to evaluate their acquisition, due to factors beyond our control. If the acquired assets perform at levels below the forecasts, then our future results of operations could be negatively impacted.

Also, our reviews of proposed business or asset acquisitions are inherently imperfect because it is generally not feasible to perform an in-depth review of each such proposal given time constraints imposed by sellers. Even if performed, a detailed review of assets and businesses may not reveal existing or potential problems and may not provide sufficient familiarity with such business or assets to fully assess their deficiencies and potential. Inspections may not be performed on every asset, and environmental problems, may not be observable even when an inspection is undertaken.

*We are affected by competition from other midstream, transportation, terminalling and storage companies.*

We experience competition in all of our business segments. With respect to our midstream operations, we compete for both natural gas supplies and customers for our services. Our competitors include major integrated oil companies, interstate and intrastate pipelines and companies that gather, compress, treat, process, transport, store and market natural gas.

Our natural gas and NGL transportation pipelines and storage facilities compete with other interstate and intrastate pipeline companies and storage providers in the transportation and storage of natural gas and NGLs. The principal elements of competition among pipelines are rates, terms of service, access to sources of supply and the flexibility and reliability of service. Natural gas and NGLs also compete with other forms of energy, including electricity, coal, fuel oils and renewable or alternative energy. Competition among fuels and energy supplies is primarily based on price; however, non-price factors, including governmental regulation, environmental impacts, efficiency, ease of use and handling, and the availability of subsidies and tax benefits also affects competitive outcomes.

In markets served by our NGL pipelines, we compete with other pipeline companies and barge, rail and truck fleet operations. We also face competition with other storage and fractionation facilities based on fees charged and the ability to receive, distribute and/or fractionate the customer's products.

Our crude oil and refined petroleum products pipelines face significant competition from other pipelines for large volume shipments. These operations also face competition from trucks for incremental and marginal volumes in the areas we serve.

Further, our crude and refined product terminals compete with terminals owned by integrated petroleum companies, refining and marketing companies, independent terminal companies and distribution companies with marketing and trading operations.

*We, Sunoco LP and USAC may not be able to fully execute our growth strategy if we encounter increased competition for qualified assets.*

Our strategy contemplates growth through the development and acquisition of a wide range of midstream, transportation, storage and other energy infrastructure assets while maintaining a strong balance sheet. This strategy includes constructing and acquiring additional assets and businesses to enhance our ability to compete effectively and diversify our asset portfolio, thereby providing more stable cash flow. We regularly consider and enter into discussions regarding the acquisition of additional assets and businesses, stand-alone development projects or other transactions that we believe will present opportunities to realize synergies and increase our cash flow.

Consistent with our strategy, we may, from time to time, engage in discussions with potential sellers regarding the possible acquisition of additional assets or businesses. Such acquisition efforts may involve our participation in processes that involve a number of potential buyers, commonly referred to as “auction” processes, as well as situations in which we believe we are the only party or one of a very limited number of potential buyers in negotiations with the potential seller. We cannot give assurance that our acquisition efforts will be successful or that any acquisition will be completed on terms considered favorable to us.

In addition, we may experience increased competition for the assets we purchase or contemplate purchasing. Increased competition for a limited pool of assets could result in us losing to other bidders more often or acquiring assets at higher prices, both of which would limit our ability to fully execute our growth strategy. Inability to execute our growth strategy may materially adversely impact our results of operations.

*We compete with other businesses in our market with respect to attracting and retaining qualified employees.*

Our continued success depends on our ability to attract and retain qualified personnel in all areas of our business. We compete with other businesses in our market with respect to attracting and retaining qualified employees. A tight labor market, increased overtime and a higher full-time employee ratio may cause labor costs to increase. A shortage of qualified employees may require us to enhance wage and benefits packages in order to compete effectively in the hiring and retention of such employees or to hire more expensive temporary employees. No assurance can be given that our labor costs will not increase, or that such increases can be recovered through increased prices charged to customers. We are especially vulnerable to labor shortages in oil and gas drilling areas when energy prices drive higher exploration and production activity.

### **Regulatory Matters**

*Increased regulation of hydraulic fracturing or produced water disposal could result in reductions or delays in crude oil and natural gas production in our areas of operation, which could adversely impact our business and results of operations.*

The hydraulic fracturing process has come under considerable scrutiny from sections of the public as well as environmental and other groups asserting that chemicals used in the hydraulic fracturing process could adversely affect drinking water supplies and may have other detrimental impacts on public health, safety, welfare and the environment. In addition, the water disposal process has come under scrutiny from sections of the public as well as environmental and other groups asserting that the operation of certain water disposal wells has caused increased seismic activity. Additionally, several candidates for political office in both state and federal government have announced intentions to impose greater restrictions on hydraulic fracturing or produced water disposal. For example, on January 27, 2021, the Biden Administration issued an executive order temporarily suspending the issuance of new authorizations, and suspending the issuance of new leases pending completion of a review of current practices, for oil and gas development on federal lands and waters (but not tribal lands that the federal government merely holds in trust). The suspension of these federal leasing activities prompted legal action by several states against the Biden Administration, resulting in issuance of a nationwide preliminary injunction by a federal district judge in Louisiana in June 2021, followed by a permanent injunction in August 2022, effectively halting implementation of the leasing suspension. On January 20, 2025, President Trump issued an executive order rescinding the suspension; however, litigation challenging the rescission in the U.S. District Court for the District of Alaska is ongoing.

Relatedly, the Department of the Interior (“DOI”) released its report on federal gas leasing and permitting practices in November 2021, referencing a number of recommendations and an overarching intent to modernize the federal oil and gas leasing program, including by adjusting royalty and bonding rates, prioritizing leasing in areas with known resource potential, and avoiding leasing that conflicts with recreation, wildlife habitat, conservation, and historical and cultural resources. In 2022, the recommendations in this report resulted in a reduction in the volume of onshore land held for lease and an increased royalty rate, and in 2024, the DOI finalized a rule to modernize the fiscal terms of the leasing program. Implementation of many of the

recommendations in the DOI report will require Congressional action and we cannot predict the extent to which the recommendations may be implemented now or in the future, but restrictions on federal oil and gas activities have the potential to result in increased costs on us and our customers, decrease demand for our services on federal lands, and adversely impact our business. Separately, in March 2024, the Bureau of Land Management (“BLM”) finalized a rule that requires operators to limit flaring from well sites on federal lands, as well as allow the delay or denial of permits if the BLM finds that an operator’s methane waste minimization plan is insufficient. The rule was challenged by various states in the District Court for the District of North Dakota and, in September 2024, the court ordered that the rule cannot be enforced against the plaintiff states pending the outcome of the litigation, and the BLM announced in December 2025 that it would delay enforcement of certain compliance deadlines under the rule through December 2026. Although the rule is currently being implemented against leases not covered by the order, the future of the rule is uncertain. Additionally, on January 28, 2026, the U.S. Department of Agriculture issued a final rule clarifying and streamlining the process for identifying and permitting federal lands managed by the U.S. Forest Service available for oil and gas leasing. In addition, the Colorado Energy and Carbon Management Commission (“CECMC”) (formerly the Colorado Oil and Gas Conservation Commission) adopted new rules to cover a variety of matters related to public health, safety, welfare, wildlife, and environmental resources, and has issued new rules regarding the cumulative impacts of oil and gas projects; most significantly, these rule changes establish more stringent setbacks (2,000-foot, instead of the prior 500-foot) on new oil and gas development and eliminate routine flaring and venting of natural gas at new or existing wells across the state, each subject to only limited exceptions. CECMC also adopted regulations in March 2025 requiring companies to reduce the amount of fresh water used for oil and gas operations and increase the use of recycled produced water. Some local communities have adopted, or are considering adopting, additional restrictions for oil and gas activities, such as requiring even greater setbacks. While the final impacts of these developments cannot be predicted, the adoption of new laws or regulations imposing additional permitting, disclosures, restrictions or costs related to hydraulic fracturing or produced water disposal or prohibiting hydraulic fracturing in proximity to areas considered to be environmentally sensitive could make drilling certain wells impossible or less economically attractive. As a result, the volume of crude oil and natural gas we gather, transport and store for our customers could be substantially reduced which could have an adverse effect on our financial condition or results of operations.

*Legal or regulatory actions related to the Dakota Access Pipeline could cause an interruption to current or future operations, which could have an adverse effect on our business and results of operations.*

On July 27, 2016, the Standing Rock Sioux Tribe and other Native American tribes (the “Tribes”) filed a lawsuit in the United States District Court for the District of Columbia (“District Court”) challenging permits issued by the USACE permitting Dakota Access to cross the Missouri River at Lake Oahe in North Dakota. The case was subsequently amended to challenge an easement issued by the USACE allowing the pipeline to cross land owned by the USACE adjacent to the Missouri River. As a result of this litigation, the District Court vacated the easement, ordered USACE to prepare an Environmental Impact Statement (“EIS”), and order the pipeline shutdown and drained of oil. Dakota Access and USACE appealed this decision and moved for a stay of the District Court’s orders. On August 5, 2020, the Court of Appeals granted a stay of the portion of the District Court order that required Dakota Access to shut the pipeline down and empty it of oil, but the Court of Appeals denied a stay of the easement vacatur. The August 5, 2020 order also stated that the Court of Appeals expected the USACE to clarify its position with respect to whether USACE intends to allow the continued operation of the pipeline notwithstanding the vacatur of the easement and that the District Court may consider additional relief, if necessary. Following this order, the Tribes filed a motion with the District Court seeking an injunction to prevent the continued operation of the pipeline. On January 26, 2021, the Court of Appeals affirmed the District Court’s order requiring an EIS and its order vacating the easement. In the same January 26 order, the Court of Appeals also overturned the District Court’s July 6, 2020 order that the pipeline be shut down and emptied of oil because of the lack of findings sufficient to satisfy the legal requirements for injunctive relief, including a finding of irreparable harm to the Tribes in the absence of an injunction. Dakota Access filed for rehearing en banc on April 12, 2021, which the Court of Appeals denied. On September 20, 2021, Dakota Access filed a petition with the U.S. Supreme Court to hear the case. Oppositions were filed by the Solicitor General and plaintiffs, and Dakota Access has filed its reply.

The District Court scheduled a status conference for February 10, 2021 to discuss the impact of the Court of Appeals’ ruling on the pending motion for injunctive relief, as well as USACE’s expectations as to how it will proceed in light of the Court of Appeals’ recent vacatur ruling. USACE filed a motion for a continuance of the status conference until April 9, 2021, and this motion was approved by the District Court on February 9, 2021. Dakota Access and the Tribes filed their supplemental declarations on April 19, 2021 and April 26, 2021, respectively. On April 26, 2021, the District Court requested that USACE advise it by May 3, 2021 as to USACE’s current position, if it has one, with respect to the motion. On May 3, 2021, USACE advised the District Court that it had not changed its position with respect to its opposition to the Tribes’ motion for injunction. The USACE also advised the District Court that it expected that the EIS will be completed by March 2022. On May 21, 2021 the District Court denied the plaintiffs’ request for an injunction. The District Court further directed the parties to file a joint status report by June 11, 2021 concerning potential next steps in the litigation. On June 22, 2021, the District Court terminated the consolidated lawsuits and dismissed all remaining outstanding counts without prejudice. On January 20, 2022, the Standing

Rock Sioux Tribe withdrew as a cooperating agency on the draft EIS, prompting the USACE to temporarily pause on the draft EIS. On September 8, 2023, the USACE published the Draft EIS. In December 2025, the USACE issued a Final EIS concluding that the USACE's preferred alternative is that the USACE reissue its easement to DAPL subject to additional easement conditions. The USACE has not yet issued a Record of Decision with DAPL's easement, but it is expected to issue in early 2026. For further information, see Note 11 to our consolidated financial statements included in "Item 8. Financial Statements and Supplementary Data" in this annual report.

*Our interstate natural gas pipelines are subject to laws, regulations and policies governing the rates they are allowed to charge for their services, which may prevent us from fully recovering our costs.*

Laws, regulations and policies governing interstate natural gas pipeline rates could affect the ability of our interstate pipelines to establish rates, to charge rates that would cover future increases in its costs, or to continue to collect rates that cover current costs.

We are required to file with the FERC tariff rates (also known as recourse rates) that shippers may pay for interstate natural gas transportation services. We may also agree to discount these rates on a not unduly discriminatory basis or negotiate rates with shippers who elect not to pay the recourse rates. The FERC must approve or accept all rate filings for us to be allowed to charge such tariff rates.

The FERC may review existing tariff rates on its own initiative or upon receipt of a complaint filed by a third-party. The FERC may, on a prospective basis, order refunds of amounts collected if it finds the rates to have been shown not to be just and reasonable or to have been unduly discriminatory. The FERC has recently exercised this authority with respect to several pipeline companies, including Panhandle. If the FERC were to initiate additional proceedings against us and find that our rates were not just and reasonable or were unduly discriminatory, the maximum rates we are permitted to charge may be reduced and the reduction could have an adverse effect on our revenues and results of operations.

The costs of our interstate pipeline operations may increase, and we may not be able to recover all of those costs due to FERC regulation of our rates. If we propose to change our tariff rates, our proposed rates may be challenged by the FERC or third parties, and the FERC may deny, modify or limit our proposed changes if we are unable to persuade the FERC that changes would result in just and reasonable rates that are not unduly discriminatory. We also may be limited by the terms of rate case settlement agreements or negotiated rate agreements with individual customers from seeking future rate increases, or we may be constrained by competitive factors from charging our tariff rates.

To the extent our costs increase in an amount greater than our revenues increase, or there is a lag between our cost increases and our ability to file for and obtain rate increases, our operating results would be negatively affected. Even if a rate increase is permitted by the FERC to become effective, the rate increase may not be adequate. We cannot guarantee that our interstate pipelines will be able to recover all of our costs through existing or future rates.

The ability of interstate pipelines held in tax-pass-through entities, like us, to include an allowance for income taxes as a cost-of-service element in their regulated rates has been subject to extensive litigation before the FERC and the courts for a number of years. Effective January 2018, the 2017 Tax Cuts and Jobs Act (the "Tax Act") changed several provisions of the federal tax code, including a reduction in the maximum corporate tax rate. On March 15, 2018, in a set of related proposals, the FERC addressed treatment of federal income tax allowances in regulated entity rates. The FERC issued a Revised Policy Statement on Treatment of Income Taxes ("Revised Policy Statement") stating that it will no longer permit master limited partnerships to recover an income tax allowance in their cost-of-service rates. The FERC issued the Revised Policy Statement in response to a remand from the United States Court of Appeals for the District of Columbia Circuit in *United Airlines v. FERC*, in which the court determined that the FERC had not justified its conclusion that a pipeline organized as a master limited partnership would not "double recover" its taxes under the current policy by both including an income-tax allowance in its cost of service and earning a return on equity ("ROE") calculated using the discounted cash flow methodology. On July 18, 2018, the FERC clarified that a pipeline organized as a master limited partnership will not be precluded in a future proceeding from arguing and providing evidentiary support that it is entitled to an income tax allowance and demonstrating that its recovery of an income tax allowance does not result in a double-recovery of investors' income tax costs. On July 31, 2020, the United States Court of Appeals for the District of Columbia Circuit issued an opinion upholding FERC's decision denying a separate master limited partnership recovery of an income tax allowance and its decision not to require the master limited partnership to refund accumulated deferred income tax balances. In light of the rehearing order's clarification regarding individual entities' ability to argue in support of recovery of an income tax allowance and the court's subsequent opinion upholding denial of an income tax allowance to a master limited partnership, the impacts that FERC's policy on the treatment of income taxes may have on the rates an interstate pipeline held in a tax-pass-through entity can charge for the FERC regulated transportation services are unknown at this time.

Even without application of FERC's recent rate making-related policy statements and rulemakings, under the NGA, FERC or our shippers may challenge the cost-of-service rates we charge. The FERC's establishment of a just and reasonable rate is based on many components, including ROE and tax-related components, but also other pipeline costs that will continue to affect FERC's determination of just and reasonable cost of service rate. Moreover, we receive revenues from our pipelines based on a variety of rate structures, including cost-of-service rates, negotiated rates, discounted rates and market-based rates. Many of our interstate pipelines, such as Tiger, Midcontinent Express and Fayetteville Express, have negotiated market rates that were agreed to by customers in connection with long-term contracts entered into to support the construction of the pipelines. Other systems, such as FGT, Transwestern and Panhandle, have a mix of tariff rate, discount rate, and negotiated rate agreements. The revenues we receive from natural gas transportation services we provide pursuant to cost-of-service based rates may decrease in the future as a result of changes to FERC policies, combined with the reduced corporate federal income tax rate established in the Tax Act. The extent of any revenue reduction related to our cost-of-service rates, if any, will depend on a detailed review of all of a pipeline's cost-of-service components and the outcomes of any challenges to our rates by the FERC or our shippers.

By an order issued on January 16, 2019, the FERC initiated a review of Panhandle's then-existing rates pursuant to Section 5 of the NGA to determine whether the rates charged by Panhandle are just and reasonable and set the matter for hearing. On August 30, 2019, Panhandle filed a general rate proceeding under Section 4 of the NGA. The NGA Section 5 and Section 4 proceedings were consolidated by order of the Chief Judge on October 1, 2019. The initial decision by the administrative law judge was issued on March 26, 2021, and on December 16, 2022, the FERC issued its order on the initial decision. On January 17, 2023, Panhandle and the Michigan Public Service Commission each filed a request for rehearing of FERC's order on the initial decision, which were denied by operation of law as of February 17, 2023. On March 23, 2023, Panhandle appealed these orders to the D.C. Circuit, and the Michigan Public Service Commission also subsequently appealed these orders. On April 25, 2023, the D.C. Circuit consolidated Panhandle's and Michigan Public Service Commission's appeals and stayed the consolidated appeal proceeding while the FERC further considered the requests for rehearing of its December 16, 2022 order. On September 25, 2023, the FERC issued its order addressing arguments raised on rehearing and compliance, which denied our requests for rehearing. Panhandle filed its Petition for Review with the D.C. Circuit regarding the September 25, 2023 order. On October 25, 2023, Panhandle filed a limited request for rehearing of the September 25 order addressing arguments raised on rehearing and compliance, which was subsequently denied by operation of law on November 27, 2023. On November 17, 2023, Panhandle provided refunds to shippers and on November 30, 2023, Panhandle submitted a refund report regarding the consolidated rate proceedings, which was protested by several parties. On January 5, 2024, the FERC issued a second order addressing arguments raised on rehearing in which it modified certain discussion from its September 25, 2023 order and sustained its prior conclusions. Panhandle has timely filed its Petition for Review with the D.C. Circuit regarding the January 5, 2024 order. On May 28, 2024, the FERC issued an order rejecting Panhandle's refund report. On June 27, 2024, Panhandle filed a revised refund report in compliance with the FERC's May 28, 2024 order rejecting Panhandle's refund report and a request for rehearing of the FERC's May 28, 2024 order rejecting Panhandle's refund report, and provided revised refunds to shippers, or in the case of shippers whose revised refunds are less than the original amounts refunded, notices of upcoming debits. One party protested Panhandle's revised refund report, and Panhandle submitted a response to the protest on July 24, 2024. By notice issued July 29, 2024, Panhandle's rehearing request was deemed denied. In an order issued September 9, 2024, FERC addressed arguments raised on rehearing, modified the discussion in the May 28, 2024 order and continued to reach the same result. On September 18, 2024, Panhandle petitioned the D.C. Circuit for review of the September 9, 2024, July 29, 2024, and May 28, 2024 orders. On December 5, 2024, the FERC issued an order rejecting Panhandle's June 27, 2024, refund report, ordering a corrected refund report and directing the issuance of additional refunds. On January 3, 2025, Panhandle submitted an adjusted refund report as well as a request for rehearing of the FERC's December 5, 2024 order. The FERC approved the adjusted refund report by letter order dated January 23, 2025. On February 3, 2025, the FERC issued a Notice of Denial of Rehearing by Operation of Law and Providing for Further Consideration. On March 24, 2025, Panhandle petitioned the D.C. Circuit for review of the December 5, 2024 and February 3, 2025 orders. On April 4, 2025, the FERC issued an Order on Rehearing and Clarification. On May 16, 2025, Panhandle petitioned the D.C. Circuit for review of the April 4, 2025 order. On May 19, 2025, the D.C. Circuit consolidated all cases before it and placed the consolidated cases in abeyance pending further order of the D.C. Circuit. On August 12, 2025, the D.C. Circuit issued an order returning all cases to the court's active docket and issued a briefing schedule. Panhandle filed its initial brief on November 10, 2025, and FERC's brief is due on February 9, 2026.

On July 1, 2022, Transwestern filed a rate case pursuant to Section 4 of the NGA. By order dated September 9, 2022, a procedural schedule was adopted in this proceeding, setting the commencement of the hearing for June 22, 2023 with an initial decision anticipated by November 15, 2023. By a subsequent order dated February 14, 2023, the procedural schedule was suspended based on representations that the participants have reached an agreement in principle to resolve all issues in this proceeding and a settlement is being prepared for filing at FERC. A settlement was filed with the FERC on April 5, 2023, and approved by order dated June 30, 2023.

*Our interstate natural gas pipelines are subject to laws, regulations and policies governing terms and conditions of service, which could adversely affect our business and results of operations.*

In addition to rate oversight, the FERC's regulatory authority extends to many other aspects of the business and operations of our interstate natural gas pipelines, including:

- terms and conditions of service;
- the types of services interstate pipelines may or must offer their customers;
- siting and construction of new facilities;
- acquisition, extension or abandonment of services or facilities;
- reporting and information posting requirements;
- accounts and records; and
- relationships with affiliated companies involved in all aspects of the natural gas and energy businesses.

Compliance with these requirements can be costly and burdensome. In addition, we cannot guarantee that the FERC will authorize tariff changes and other activities we might propose and to undertake in a timely manner and free from potentially burdensome conditions. Future changes to laws, regulations, policies and interpretations thereof may impair our access to capital markets or may impair the ability of our interstate pipelines to compete for business, may impair their ability to recover costs or may increase the cost and burden of operation.

The FERC issued a Notice of Inquiry ("NOI") on April 19, 2018 initiating a review of its policies on certification of natural gas pipelines, including an examination of its long-standing Policy Statement on Certification of New Interstate Natural Gas Pipeline Facilities ("1999 Policy Statement"), issued in 1999, that is used to determine whether to grant certificates for new pipeline projects. On February 18, 2021, the FERC issued another NOI ("2021 NOI"), reopening its review of the 1999 Policy Statement. Comments on the 2021 NOI were due on May 26, 2021. In September 2021, FERC issued a Notice of Technical Conference on Greenhouse Gas Mitigation related to natural gas infrastructure projects authorized under Sections 3 and 7 of the NGA. A technical conference was held on November 19, 2021, and post-technical conference comments were submitted to the FERC on January 7, 2022. On February 18, 2022, the FERC issued two new policy statements: (1) an Updated Policy Statement on the Certificate of New Interstate Natural Gas Facilities ("2022 Certificate Policy Statement") and (2) a Policy Statement on the Consideration of Greenhouse Gas Emissions in Natural Gas Infrastructure Project Reviews ("GHG Policy Statement"), to be effective that same day. On March 24, 2022, the FERC issued an order designating the 2022 Certificate Policy Statement and the GHG Policy Statement as draft policy statements, and requested further comments. The FERC stated that it will not apply the now draft policy statements to pending applications or applications to be filed at FERC until it issues any final guidance on these topics. Comments on the 2022 Certificate Policy Statement and the GHG Policy Statement were due on April 25, 2022, and reply comments were due on May 25, 2022. On January 24, 2025, the FERC issued an order withdrawing the draft GHG Policy Statement and terminating the proceeding. On September 12, 2025, the FERC issued an order withdrawing the draft 2022 Certificate Policy Statement and terminating the proceeding.

*Rate regulation or market conditions may not allow us to recover the full amount of increases in the costs of our crude oil, NGL and refined products pipeline operations.*

Transportation provided on our common carrier interstate crude oil, NGL and refined products pipelines is subject to rate regulation by the FERC, which requires that tariff rates for transportation on these oil pipelines be just and reasonable and not unduly discriminatory. If we propose new or changed rates, the FERC or interested persons may challenge those rates and the FERC is authorized to suspend the effectiveness of such rates for up to seven months and to investigate such rates. If, upon completion of an investigation, the FERC finds that the proposed rate is unjust or unreasonable, it is authorized to require the carrier to refund revenues in excess of the prior tariff during the term of the investigation. The FERC also may investigate, upon complaint or on its own motion, rates that are already in effect and may order a carrier to change its rates prospectively. Upon an appropriate showing, a shipper may obtain reparations for damages sustained for a period of up to two years prior to the filing of a complaint.

The primary ratemaking methodology used by the FERC to authorize increases in the tariff rates of petroleum pipelines is price indexing. The FERC's ratemaking methodologies may limit our ability to set rates based on our costs or may delay the use of rates that reflect increased costs. On March 25, 2020, the FERC issued a Notice of Inquiry seeking comment on a proposal to change the preliminary screen for complaints against oil pipeline index rate increases to a "Percentage Comparison Test" consistent with the preliminary screen used by the FERC for protests against oil pipeline index rate increases. The FERC also requested comment on whether the appropriate threshold for the screen is a 10% or more differential between a proposed index

rate increase and the annual percentage change in cost of service reported by the pipeline. Initial comments were due June 16, 2020, and reply comments were due July 16, 2020.

On October 20, 2022, the FERC issued a policy statement on the Standard Applied to Complaints Against Oil Pipeline Index Rate Changes to establish guidelines regarding how the FERC will evaluate shipper complaints against oil pipeline index rate increases. Specifically, the policy statement adopted the proposal in the FERC's earlier Notice of Inquiry issued on March 25, 2020 to eliminate the "Substantially Exacerbate Test" as the preliminary screen applied to complaints against index rate increases and instead adopt the proposal to apply the "Percentage Comparison Test" as the preliminary screen for both protests and complaints against index rate increases. At this time, we cannot determine the effect of a change in the FERC's preliminary screen for complaints against index rates changes, however, a revised screen would result in a threshold aligned with the existing threshold for protests against index rate increases. Any complaint or protest raised by a shipper could materially and adversely affect our financial condition, results of operations or cash flows.

On June 18, 2020, FERC issued a NOI requesting comments on a proposed oil pipeline index for the five-year period commencing July 1, 2021 and ending June 30, 2026, and requested comments on whether and how the index should reflect the Revised Policy Statement and FERC's treatment of accumulated deferred income taxes as well as FERC's revised ROE methodology.

On December 17, 2020, FERC issued an order establishing a new index of PPI-FG plus 0.78%. The FERC received requests for rehearing of its December 17, 2020 order and on January 20, 2022, granted rehearing and modified the oil index. Specifically, for the five-year period commencing July 1, 2021 and ending June 30, 2026, FERC-regulated liquids pipelines charging indexed rates are permitted to adjust their indexed ceilings annually by PPI-FG minus 0.21%. FERC directed liquids pipelines to recompute their ceiling levels for July 1, 2021 through June 30, 2022, as well as the ceiling levels for the period July 1, 2022 to June 30, 2023, based on the new index level. Where an oil pipeline's filed rates exceed its ceiling levels, FERC ordered such oil pipelines to reduce the rate to bring it into compliance with the recomputed ceiling level to be effective March 1, 2022. Some parties sought rehearing of the January 20 order with FERC, which was denied by FERC on May 6, 2022. Certain parties have appealed the January 20 and May 6 orders. On July 26, 2024, the D.C. Circuit ruled in *LEPA v. FERC* that FERC violated the Administrative Procedure Act because the January 20 order modified the index without following notice and comment. As a result, the D.C. Circuit vacated the January 20 order and on September 17, 2024, the Commission reinstated the index level established by its original December 17 order, directed pipelines to file an informational filing to show their recomputed ceiling levels reflecting the reinstated index level and stated that pipelines may file to prospectively increase their indexed rates to their recomputed levels. On October 17, 2024, FERC issued a Supplemental NOPR that proposed a reduction to the currently effective index by one percent. On November 20, 2025, FERC withdrew the Supplemental NOPR and confirmed that the PPI-FG-0.78% index established in December 2020 will remain in place through June 30, 2026. On the same day, FERC approved limited relief for pipelines. Oil pipelines with index-based rates may recover applicable rate differences from March 1, 2022 to September 17, 2024 but only if such pipelines charged the maximum rate allowed under the applicable index ceiling during the relevant time period. Parties have since filed requests for clarification or rehearing, as well as court appeals, to determine whether pipelines may recover rate differences in other scenarios. Also on November 20, 2025, FERC issued a Notice of Proposed Rulemaking for the Five-Year Review of the Oil Pipeline Index proposing an index level of Producer Price Index for Finished Goods (PPI-FG) minus 1.42% for the period from July 1, 2026 to June 30, 2031.

Under the EPCRA of 1992, certain interstate pipeline rates were deemed just and reasonable or "grandfathered." Revenues are derived from such grandfathered rates on most of our FERC-regulated pipelines. A person challenging a grandfathered rate must, as a threshold matter, establish a substantial change since the date of enactment of the EPCRA of 1992, in either the economic circumstances or the nature of the service that formed the basis for the rate. If the FERC were to find a substantial change in circumstances, then the existing rates could be subject to detailed review and there is a risk that some rates could be found to be in excess of levels justified by the pipeline's costs. In such event, the FERC could order us to reduce pipeline rates prospectively and to pay refunds to shippers.

If the FERC's petroleum pipeline ratemaking methodologies procedures changes, the new methodology or procedures could adversely affect our business and results of operations.

*State regulatory measures could adversely affect the business and operations of our midstream and intrastate pipeline and storage assets.*

Our midstream and intrastate transportation and storage operations are generally exempt from FERC regulation under the NGA, but FERC regulation still significantly affects our business and the market for our products. The rates, terms and conditions of service for the interstate services we provide in our intrastate gas pipelines and gas storage are subject to FERC regulation under Section 311 of the NGPA. Our pipeline systems of Enable Oklahoma Intrastate Transmission, LLC, Oasis Pipeline, LP, Houston Pipe Line Company LP, ETC Katy Pipeline, LLC, Energy Transfer Fuel, LP, Lobo Pipeline Company, LLC, Pelico

Pipeline, LLC, Regency Intrastate Gas LP, Red Bluff Express Pipeline, LLC, Trans-Pecos Pipeline, LLC and Comanche Trail Pipeline, LLC provide such services. Under Section 311, rates charged for transportation and storage must be fair and equitable. Amounts collected that are determined to be in excess of fair and equitable rates are subject to refund with interest, and the terms and conditions of service, set forth in the pipeline's statement of operating conditions, are subject to FERC review and approval. Should the FERC determine not to authorize rates equal to or greater than our costs of service, our cash flow would be negatively affected.

Our midstream and intrastate gas and oil transportation pipelines and our intrastate gas storage operations are subject to state regulation. All of the states in which we operate midstream assets, intrastate pipelines or intrastate storage facilities have adopted some form of complaint-based regulation, which allow producers and shippers to file complaints with state regulators in an effort to resolve grievances relating to the fairness of rates and terms of access. The states in which we operate have ratable take statutes, which generally require gathering pipelines to take, without undue discrimination, production that may be tendered to the gatherer for handling. Similarly, common purchaser statutes generally require gatherers to purchase without undue discrimination as to source of supply or producer. These statutes have the effect of restricting our right as an owner of gathering facilities to decide with whom we contract to purchase or transport natural gas. Should a complaint be filed in any of these states or should regulation become more active, our business may be adversely affected.

Our intrastate transportation operations located in Texas are also subject to regulation as gas utilities by the TRRC. Texas gas utilities must publish the rates they charge for transportation and storage services in tariffs filed with the TRRC, although such rates are deemed just and reasonable under Texas law unless challenged in a complaint.

We are subject to other forms of state regulation, including requirements to obtain operating permits, reporting requirements, and safety rules (see description of federal and state pipeline safety regulation below). Violations of state laws, regulations, orders and permit conditions can result in the modification, cancellation or suspension of a permit, civil penalties and other relief.

*Certain of our assets may become subject to regulation.*

The distinction between federally unregulated gathering facilities and FERC-regulated transmission pipelines under the NGA has been the subject of extensive litigation and may be determined by the FERC on a case-by-case basis, although the FERC has made no determinations as to the status of our facilities. Consequently, the classification and regulation of our gathering facilities could change based on future determinations by the FERC, the courts or Congress. If our gas gathering operations become subject to FERC jurisdiction, the result may adversely affect the rates we are able to charge and the services we currently provide, and may include the potential for a termination of our gathering agreements with our customers.

Intrastate transportation of NGLs is largely regulated by the state in which such transportation takes place. Energy Transfer GC NGL's pipeline transports NGLs within the state of Texas and is subject to regulation by the TRRC. This NGLs transportation system offers services pursuant to an intrastate transportation tariff on file with the TRRC. In 2013, Energy Transfer GC NGL's pipeline also commenced the interstate transportation of NGLs, which is subject to the FERC's jurisdiction under ICA and the EPCA of 1992. Both intrastate and interstate NGL transportation services must be provided in a manner that is just, reasonable, and non-discriminatory. The tariff rates established for interstate services were based on a negotiated agreement; however, if the FERC's ratemaking methodologies were imposed, they may, among other things, delay the use of rates that reflect increased costs and subject us to potentially burdensome and expensive operational, reporting and other requirements. In addition, the rates, terms and conditions for shipments of crude oil, petroleum products and NGLs on our pipelines are subject to regulation by the FERC if the NGLs are transported in interstate or foreign commerce, whether by our pipelines or other means of transportation. Since we do not control the entire transportation path of all crude oil, petroleum products and NGLs on our pipelines, FERC regulation could be triggered by our customers' transportation decisions.

In addition, if any of our pipelines were found to have provided services or otherwise operated in violation of the NGA, NGPA, or ICA, this could result in the imposition of administrative and criminal remedies and civil penalties, as well as a requirement to disgorge charges collected for such services in excess of the rate established by the FERC. Any of the foregoing could adversely affect revenues and cash flow related to these assets.

*We may incur significant costs and liabilities resulting from performance of pipeline integrity programs and related repairs.*

Pursuant to authority under the NGPSA and HLPSA, PHMSA has established a series of rules requiring pipeline operators to develop and implement integrity management programs for natural gas transmission and hazardous liquid pipelines that, in the event of a pipeline leak or rupture, could affect high consequence areas ("HCAs") which are areas where a release could have

the most significant adverse consequences, including high population areas, certain drinking water sources, and unusually sensitive ecological areas. These regulations require operators of covered pipelines to:

- perform ongoing assessments of pipeline integrity;
- identify and characterize applicable threats to pipeline segments that could impact a high consequence area;
- improve data collection, integration and analysis;
- repair and remediate the pipeline as necessary; and
- implement preventive and mitigating actions.

In addition, states have adopted regulations similar to existing PHMSA regulations for intrastate gathering and transmission lines. At this time, we cannot predict the ultimate cost of compliance with applicable pipeline integrity management regulations, as the cost will vary significantly depending on the number and extent of any repairs found to be necessary as a result of the pipeline integrity testing. We will continue our pipeline integrity testing programs to assess and maintain the integrity of our pipelines. The results of these tests could cause us to incur significant and unanticipated capital and operating expenditures for repairs or upgrades deemed necessary to ensure the continued safe and reliable operation of our pipelines. Any changes to pipeline safety laws by Congress and regulations by PHMSA that result in more stringent or costly safety standards could have a significant adverse effect on us and similarly situated midstream operators. For example, in October 2019, PHMSA published the first of three regulations relating to new or more stringent requirements for certain natural gas lines and gathering lines, that had originally been proposed in 2016 as part of PHMSA's "Gas Megarule." The rulemaking imposed numerous requirements on onshore gas transmission pipelines relating to MAOP, reconfirmation and exceedance reporting, the integrity assessment of additional pipeline mileage found in MCAs, non-HCAs, Class 3 and Class 4 areas by 2023, and the consideration of seismicity as a risk factor in integrity management. PHMSA's second final rule, applicable to hazardous liquid transmission and gathering pipelines, significantly extended and expanded the reach of certain integrity management requirements, use of in-line inspection tools by 2039 (unless the pipeline cannot be modified to permit such use), increased annual, accident, and safety-related conditional reporting requirements, and expanded use of leak detection systems beyond HCAs. The third final rule was published in August 2022, which adjusted the repair criteria for pipelines in HCAs, created new criteria for pipelines in non-HCAs, and strengthened integrity management assessment requirements, among other items. The changes adopted by these rulemakings could have a material adverse effect on our results of operations and costs of transportation services.

*Federal and state legislative and regulatory initiatives relating to pipeline safety that require the use of new or more stringent safety controls or result in more stringent enforcement of applicable legal requirements could subject us to increased capital costs, operational delays and costs of operation.*

The NGPSA and HLPESA were amended by the Pipeline Safety, Regulatory Certainty, and Job Creation Act of 2011 ("2011 Pipeline Safety Act"). Among other things, the 2011 Pipeline Safety Act increased the penalties for safety violations and directed the Secretary of Transportation to promulgate rules or standards relating to expanded integrity management requirements, automatic or remote-controlled valve use, excess flow valve use, leak detection system installation, testing to confirm that the material strength of certain pipelines are above 30% of specified minimum yield strength, and operator verification of records confirming the MAOP of certain interstate natural gas transmission pipelines. PHMSA is required to adjust the maximum penalties it may impose for violations for inflation; these maximum civil penalties were most recently increased in December 2024 to \$272,926 per violation per day, with a maximum of \$2,729,245 for a related series of violations. Upon reauthorization of PHMSA, Congress directed the agency to move forward with several regulatory actions, including the "Pipeline Safety: Class Location Change Requirements" and the "Pipeline Safety: Safety of Gas Transmission and Gathering Pipelines" proposed rulemaking. To that end, PHMSA issued the three final rules discussed above, significantly expanding reporting and safety requirements of operators of gas gathering pipelines, imposing safety regulations on approximately 400,000 miles of previously unregulated onshore gas gathering lines that, among other things, will impose criteria for inspection and repair of fugitive emissions, extend reporting requirements to all gas gathering operators, and apply a set of minimum safety requirements to certain gas gathering pipelines with large diameters and high operating pressures. In October 2025, members of Congress introduced the Pipeline Safety Act of 2025, which would reauthorize appropriations for PHMSA and modernize pipeline safety regulations.

Additionally, in January 2025, PHMSA issued a final rule to minimize methane leaks from pipelines and a Notice of Proposed Rulemaking that would impose new safety measures for pipelines transporting carbon dioxide, but both efforts were subsequently withdrawn by the Trump administration, and PHMSA has not announced any intention to re-propose these or any similar rules. However, we cannot predict whether any similar regulations may be enacted in the future. Separately, on July 1, 2025 and August 21, 2025, PHMSA issued final rules amending its pipeline safety regulations to incorporate updated industry standards. However, in September 2025, industry groups requested a stay of enforcement of the July 2025 final rule, and PHMSA stated that it would use its enforcement discretion to allow regulated entities to operate under the outdated industry

standards through January 1, 2027. The safety enhancement requirements and other provisions of Congressional mandates or laws regarding PHMSA, as well as any implementation of PHMSA rules thereunder or any issuance or reinterpretation of guidance by PHMSA or any state agencies with respect thereto, could require us to install new or modified safety controls, pursue additional capital projects, or conduct maintenance programs on an accelerated basis, any or all of which tasks could result in our incurring increased operating costs that could be significant and have a material adverse effect on our results of operations or financial condition.

*Our business involves the generation, handling and disposal of hazardous substances, hydrocarbons and wastes which activities are subject to environmental and worker health and safety laws and regulations that may cause us to incur significant costs and liabilities.*

Our business is subject to stringent federal, tribal, state, and local laws and regulations governing the discharge of materials into the environment, worker health and safety and protection of the environment. These laws and regulations may require the acquisition of permits for the construction and operation of our pipelines, plants and facilities, result in capital expenditures to manage, limit or prevent emissions, discharges or releases of various materials from our pipelines, plants and facilities, impose specific health and safety standards addressing worker protection, and impose substantial liabilities for pollution resulting from our construction and operations activities. Several governmental authorities, such as the EPA and analogous state agencies have the power to enforce compliance with these laws and regulations and the permits issued under them and frequently mandate difficult and costly remediation measures and other actions. Failure to comply with these laws, regulations and permits may result in the assessment of significant administrative, civil and criminal penalties, the imposition of investigatory remedial and corrective action obligations, suspension and debarment from federal contracting opportunities, the occurrence of delays in permitting and completion of projects, and the issuance of injunctive relief. For example, following a state grand jury investigation and the filing of charges alleging criminal misconduct involving the construction and related activities of the Mariner East 2 pipeline (“Mariner 2”), in August 2022 we entered into a plea of no contest with the Pennsylvania Attorney General’s Office that requires us to pay fines to the Commonwealth, pay for independent evaluations of potential water quality impacts to residential water supplies and compensate any affected homeowners, and to also pay \$10 million to support water quality improvement projects.

Certain environmental laws impose strict, joint and several liability for costs required to clean up and restore sites where hazardous substances, hydrocarbons or wastes have been disposed or released, even under circumstances where the substances, hydrocarbons or wastes have been released by a predecessor operator. Moreover, it is not uncommon for neighboring landowners and other third parties to file claims for personal injury and property and natural resource damage allegedly caused by noise, odor or the release of hazardous substances, hydrocarbons or wastes into the environment.

We may incur substantial environmental costs and liabilities because of the underlying risk arising out of our operations. Although we have established financial reserves for our estimated environmental remediation liabilities, additional contamination or conditions may be discovered, resulting in increased remediation costs, liabilities or natural resource damages that could substantially increase our costs for site remediation projects. Accordingly, we cannot assure you that our current reserves are adequate to cover all future liabilities, even for currently known contamination.

Changes in environmental laws and regulations occur frequently, and any such changes that result in more stringent and costly waste handling, emission standards, or storage, transport, disposal or remediation requirements could have a material adverse effect on our operations or financial position. For example, in October 2015, the EPA published a final rule under the Clean Air Act, lowering the National Ambient Air Quality Standard (“NAAQS”) for ground-level ozone to 70 parts per billion for the 8-hour primary and secondary ozone standards, and the EPA finalized its attainment/non-attainment designations in 2018, though these are subject to change. In December 2020, the EPA announced that it was retaining without revision the 2015 NAAQS for ozone. However, several groups filed litigation over the December 2020 decision, and the Biden Administration announced plans to formally review this decision. In August 2023, the EPA announced a new review of the ozone NAAQS to reflect updated ozone science in combination with the reconsideration of the December 2020 decision. However, the review remains ongoing and is not expected to be completed before the EPA’s five-year cycle for NAAQS review in December 2025. At this time, it is not clear what actions the Trump Administration may take with respect to the review. However, reclassification of areas or imposition of more stringent standards may make it more difficult to construct new or modified sources of air pollution in newly designated non-attainment areas. Also, states are expected to implement more stringent requirements as a result of this new final rule, which could apply to our customers’ operations. Compliance with this final rule or any other new regulations could, among other things, require installation of new emission controls on some of our equipment, result in longer permitting timelines or new restrictions or prohibitions with respect to permits or projects, and significantly increase our capital expenditures and operating costs, which could adversely impact our business. Historically, we have been able to satisfy the more stringent nitrogen oxide emission reduction requirements that affect our compressor units in ozone non-attainment areas at reasonable cost, but there is no assurance that we will not incur material costs in the future to meet the new, more stringent ozone standard.

Regulations under the Clean Water Act, the OPA, and state laws impose regulatory burdens on terminal operations. Spill prevention control and countermeasure requirements of federal and state laws require containment to mitigate or prevent contamination of waters in the event of a refined product overflow, rupture, or leak from above-ground pipelines and storage tanks. The Clean Water Act also requires us to maintain spill prevention control and countermeasure plans at our terminal facilities with above-ground storage tanks and pipelines. In addition, OPA requires that most fuel transport and storage companies maintain and update various oil spill prevention and oil spill contingency plans. Facilities that are adjacent to water require the engagement of Federally Certified Oil Spill Response Organizations to be available to respond to a spill on water from above-ground storage tanks or pipelines.

Transportation and storage of refined products over and adjacent to water involves risk and potentially subjects us to strict, joint, and potentially unlimited liability for removal costs and other consequences of an oil spill where the spill is into navigable waters, along shorelines or in the exclusive economic zone of the United States.

In the event of an oil spill into navigable waters, substantial liabilities could be imposed upon us. The Clean Water Act imposes restrictions and strict controls regarding the discharge of pollutants into navigable waters, with the potential of substantial liability for the violation of permits or permitting requirements.

Terminal operations and associated facilities are subject to the Clean Air Act as well as comparable state and local statutes. Under these laws, permits may be required before construction can commence on a new source of potentially significant air emissions, and operating permits may be required for sources that are already constructed. If regulations become more stringent, additional emission control technologies.

*Climate change legislation or regulations restricting emissions of GHGs could result in increased operating costs and reduced demand for the services we provide.*

Climate change continues to attract considerable public, governmental and scientific attention. As a result, numerous proposals have been made at the international, national, regional and state levels of government to monitor and limit emissions of GHGs. These efforts have included consideration of cap-and-trade programs, carbon taxes and GHG reporting and tracking programs, and regulations that directly limit GHG emissions from certain sources. In the United States, no comprehensive climate change legislation has been implemented at the federal level to date. However, Canada has implemented a federal carbon pricing regime. Congress previously passed the IRA 2022 in August 2022, which, in addition to significant incentives for renewable energy and low carbon projects, also imposed a fee on methane emissions from certain sources in the oil and gas sector. In November 2024, the EPA finalized the methane emissions charge rule, although the rule was repealed in March 2025 by a Joint Resolution of Disapproval under the Congressional Review Act, and the EPA subsequently issued a final rule removing it from the Code of Federal Regulations. Additionally, OBBBA, passed by Congress in July 2025, delays implementation of the charge until 2034. We cannot predict if Congress may take further actions to repeal or revise the IRA 2022, including with respect to the methane emissions charge. Notwithstanding the EPA's recent proposal to revoke the "Endangerment Finding" that underlies that majority of its GHG-related regulations, the EPA under previous administrations has adopted rules under authority of the Clean Air Act that, among other things, establish PSD construction and Title V operating permit reviews for GHG emissions from certain large stationary sources that are also potential major sources of certain principal, or criteria, pollutant emissions, which reviews could require securing PSD permits at covered facilities emitting GHGs and meeting "best available control technology" standards for those GHG emissions. In addition, the EPA has adopted rules requiring the monitoring and annual reporting of GHG emissions from certain petroleum and natural gas system sources in the United States, including, among others, onshore processing, transmission, storage and distribution facilities. We cannot predict whether the current Administration's deregulatory actions will ultimately be successful or if future administrations may seek to re-impose similar requirements.

Recent climate change regulations have focused on methane emissions from oil and gas operations. In June 2016, the EPA published NSPS, known as Subpart OOOOa, that require certain new, modified or reconstructed facilities in the oil and natural gas sector to reduce these methane gas and VOC emissions, building on previous requirements for certain equipment-specific emissions control practices, requiring additional controls for pneumatic controllers and pumps as well as compressors, and imposing leak detection and repair requirements for natural gas compressor and booster stations. Additionally, in December 2023, the EPA issued a final rule that established OOOOb new source and OOOOc first-time existing source standards of performance for GHG and VOC emissions for crude oil and natural gas well sites, natural gas gathering and boosting compressor stations, natural gas processing plants, and transmission and storage facilities, owners or operators of affected emission units or processes will have to comply with specific standards of performance that may include leak detection using optical gas imaging and subsequent repair requirements, reduction of emissions by 95% through capture and control systems, zero-emission requirements, operations and maintenance requirements, and so-called "green well" completion requirements. The December 2023 rule also revises requirements for fugitive emissions monitoring and repair as well as equipment leaks and the frequency of monitoring surveys, establishes a "super-emitter" response program to timely mitigate emissions events,

triggering certain response and repair requirements, and provides additional options for the use of advanced monitoring to encourage the deployment of innovative technologies to detect and reduce methane emissions. Fines and penalties for violations of these rules can be substantial. However, the EPA's final rule is currently being challenged by 23 states and a coalition of industry groups in the U.S. Circuit Court of Appeals for the D.C. Circuit, and we cannot predict the ultimate outcome. Further, in March 2025, the EPA announced plans to reconsider Subparts OOOOb and OOOOc and, in November 2025, the EPA finalized an interim final rule extending certain compliance deadlines for certain provisions provided in the rules. Several states have also adopted, or are considering, adopting, regulations related to GHG emissions, some of which are more stringent than those implemented by the federal government. Methane emission standards imposed on the oil and gas sector could result in increased costs to our operations or those of our customers as well as result in delays or curtailment in such operations, which costs, delays or curtailment could adversely affect our business.

At the international level, in December 2015, the United States joined the international community at the 21st Conference of the Parties of the United Nations Framework Convention on Climate Change in Paris, France in signing the "Paris Agreement," a treaty that requires member countries to submit individually-determined, non-binding GHG emission reduction goals every five years beginning in 2020. However, in January 2025, President Trump signed an executive order withdrawing the United States from the Paris Agreement and from any other commitments made under the United Nations Framework Convention on Climate Change. Additionally, President Trump revoked any purported financial commitments made by the United States pursuant to the same. The full impact of these developments is uncertain at this time.

The adoption, strengthening and implementation of any international, federal or state legislation or regulations that require reporting of GHGs or otherwise restrict emissions of GHGs could result in increased compliance costs or additional operating restrictions, and could have a material adverse effect on our business, financial condition, demand for our services, results of operations, and cash flows. Litigation risks are also increasing, as several oil and gas companies have been sued for allegedly causing climate-related damages due to their production and sale of fossil fuel products or for allegedly being aware of the impacts of climate change for some time but failing to adequately disclose such risks to their investors or customers.

There are also increasing financing risks for fossil fuel energy companies, as various investors become increasingly concerned about the potential effects of climate change and may elect in the future to shift some or all of their investments into other sectors. Institutional lenders who provide financing for fossil fuel energy companies also have become more attentive to sustainable lending practices that favor "clean" power sources such as wind and solar photovoltaic, making those sources more attractive for investment, and some of them may elect not to provide funding for fossil fuel energy companies. Such efforts could make it more difficult for exploration and production companies and midstream companies, like us, to secure funding as well as negatively affect the cost of, and terms for, financings to fund growth projects or other aspects of our business. Additionally, in March 2024 the SEC released a final rule requiring climate disclosures. However, the future of the rule is uncertain at this time given that its implementation has been stayed pending the outcome of legal challenges, with such litigation held in abeyance until the SEC reconsiders, repeals, or otherwise modifies the rule. In March 2025, the SEC voted to end its defense of the rule, though no further action has been taken at this time to repeal the rule. Meanwhile, several states have also either adopted or are considering similar rules; however legal challenges have been brought related to such rules and a final decision remains pending at this time.

Climatic events in the areas in which we operate, whether from climate change or otherwise, can cause disruptions, and in some cases, delays in, or suspension of, our services. These event, including but not limited to drought, winter storms, wildfire, extreme temperatures or flooding, may become more intense or more frequent as a result of climate change and could have an adverse effect on our continued operations. If such effects were to occur, our operations could be adversely affected in various ways, including damages to our facilities or our customers' facilities from powerful winds or rising waters. We may experience increased insurance costs, or difficulty obtaining adequate insurance coverage, for our assets in areas subject to more frequent severe weather. We may not be able to recoup these increased costs through the rates we charge our customers. Extreme weather events could cause damage to property or facilities that could exceed our insurance coverage and our business, financial condition and results of operations could be adversely affected.

Another possible consequence of climate change is increased volatility in seasonal temperatures. The market for our NGLs and natural gas is generally improved by periods of colder weather and impaired by periods of warmer weather, so any changes in climate could affect the market for the fuels that we transport, and thus demand for our services. Despite the use of the term "global warming" as a shorthand for climate change, some studies indicate that climate change could cause some areas to experience temperatures substantially colder than their historical averages. As a result, it is difficult to predict how the market for our products could be affected by increased temperature volatility, although if there is an overall trend of warmer temperatures, it would be expected to have an adverse effect on our business.

*A climate-related decrease in demand for crude oil, natural gas and other hydrocarbon products could negatively affect our business.*

Supply and demand for crude oil, natural gas and other hydrocarbon products we handle is dependent upon a variety of factors, many of which are beyond our control. These factors include, among others, the potential adoption of new government regulations, including those related to fuel conservation measures and climate change regulations, technological advances in fuel economy and energy generation devices. For example, legislative, regulatory or executive actions intended to reduce emissions of GHGs could increase the cost of consuming crude oil, natural gas and other hydrocarbon products, thereby potentially causing a reduction in the demand for such products. A broader transition to alternative fuels or energy sources, whether resulting from potential new government regulation, carbon taxes, governmental incentives and funding or consumer preferences could result in decreased demand for hydrocarbon products like crude oil, natural gas and NGLs that we handle. Any decrease in demand for these products could consequently reduce demand for our services and could have a negative effect on our business.

*Increased attention to ESG matters and conservation measures may adversely impact our business.*

Increased attention from investors, customers, employees, regulatory bodies and other stakeholders to, and societal expectations on companies to address climate change and other environmental and social impacts, investor and societal expectations regarding voluntary ESG disclosures, and consumer demand for alternative forms of energy may result in increased costs, reduced demand for fossil fuels and consequently demand for our midstream services, reduced profits, increased risk of investigations and litigation, heightened scrutiny of our statements and initiatives, and negative impacts on the value of our assets and access to capital. While we may participate in various voluntary frameworks and certification programs to improve the ESG profile of our operations and products, we cannot guarantee that such participation or certification will have the intended results on our ESG profile. Moreover, while we are pursuing various low-carbon opportunities such as renewable power generation, renewable fuels, and carbon capture and storage projects through our alternative energy initiatives to address potential energy transition related risks, we cannot guarantee that we will be able to execute these projects in a timely manner because of permitting, technology, or other risks or that such opportunities will ultimately be successful.

Moreover, while we create and publish voluntary disclosures regarding ESG matters from time to time, many of the statements in those voluntary disclosures will be based on expectations, assumptions and hypothetical scenarios. Such expectations, assumptions and hypothetical scenarios are necessarily uncertain and may be prone to error or subject to misinterpretation given the long timelines involved and the lack of an established single approach to identifying, measuring, and reporting on many ESG matters. Additionally, while we may have or may announce various voluntary ESG targets in the future, such targets are often aspirational. We may not be able to meet or progress against such targets in the manner or on such a timeline as initially contemplated, including, but not limited to as a result of unforeseen costs or technical difficulties associated with achieving such results. To the extent we meet such targets, it may be achieved through various contractual arrangements, including the purchase of various credits or offsets that may be deemed to mitigate our environmental impact instead of actual changes in our business operations. Some of these arrangements may receive scrutiny from certain constituencies.

Certain regulators, such as various state agencies, as well as nongovernmental organizations and other private actors have filed lawsuits under various securities and consumer protection laws alleging that certain ESG statements, goals or standards were misleading, false or otherwise deceptive, including for alleged “greenwashing” (i.e., the process of conveying misleading information or making false claims that overstate potential ESG benefits). Certain employment practices and social initiatives are the subject of scrutiny by both those calling for the continued advancement of such policies, as well as those who believe they should be curbed, including government actors, and the complex regulatory and legal frameworks applicable to such initiatives continue to evolve. More recent political developments could mean that the Partnership faces increasing criticism or litigation risks from certain “anti-ESG” parties, including various governmental agencies. Such sentiment may focus on the Partnership’s environmental commitments (such as reducing GHG emissions) or its pursuit of certain employment practices or social initiatives that are alleged to be political or polarizing in nature or are alleged to violate laws based, in part, on changing priorities of, or interpretations by, federal agencies or state governments. Consideration of ESG-related factors in the Partnership’s decision-making could be subject to increasing scrutiny and objection from such anti-ESG parties. We cannot be certain of the impact of such regulatory, legal and other developments on our business. As a result, the Partnership may be subject to pressure in the media or through other means, such as governmental investigations, enforcement actions, or other proceedings, all of which could adversely affect our reputation, business, financial performance, market access and growth. Accordingly, there may be increased costs related to reviewing, implementing and managing such policies, as well as compliance and litigation risks based both on positions we do or do not take, or work we do or do not perform.

ESG activism directed at shifting funding away from companies with energy-related assets could lead to increased negative investor sentiment toward us and our industry and to the diversion of investment to other industries, which could have a

negative impact on our access to and costs of capital. Additionally, to the extent ESG matters negatively impact our reputation, we may not be able to compete as effectively to recruit or retain employees, which may adversely affect our operations.

Such ESG-related matters may also impact our customers or suppliers, which may adversely impact our business, financial condition, or results of operations.

*The swaps regulatory provisions of the Dodd-Frank Act and the rules adopted thereunder could have an adverse effect on our ability to use derivative instruments to mitigate the risks of changes in commodity prices and interest rates and other risks associated with our business.*

The Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”) requires that certain classes of swaps be cleared on a derivatives clearing organization and traded on a designated contract markets or other regulated exchange, unless exempt from such clearing and trading requirements, which could result in the application of certain margin requirements imposed by derivatives clearing organizations and their members. The CFTC and prudential regulators have also adopted mandatory margin requirements for uncleared swaps entered into between swap dealers and certain other counterparties. We currently qualify for and rely upon an end-user exception from such clearing and margin requirements for the swaps we enter into to hedge our commercial risks. However, the application of the mandatory clearing and trade execution requirements and the uncleared swaps margin requirements to other market participants, such as swap dealers, may adversely affect the cost and availability of the swaps that we use for hedging.

In addition to the Dodd-Frank Act, the European Union and other foreign regulators have adopted and are implementing local reforms generally comparable with the reforms under the Dodd-Frank Act. Implementation and enforcement of these regulatory provisions may reduce our ability to hedge our market risks with non-U.S. counterparties and may make transactions involving cross-border swaps more expensive and burdensome. Additionally, the lack of regulatory equivalency across jurisdictions may increase compliance costs and make it more difficult to satisfy our regulatory obligations.

*Additional deepwater drilling laws and regulations, delays in the processing and approval of drilling permits and exploration, development, oil spill-response and decommissioning plans, and other related developments may have a material adverse effect on our business, financial condition, or results of operations.*

The Federal Bureau of Ocean Energy Management (“BOEM”) and the federal Bureau of Safety and Environmental Enforcement (“BSEE”), each agencies of the DOI, have imposed more stringent permitting procedures and regulatory safety and performance requirements for new wells to be drilled in federal waters. Compliance with these more stringent regulatory requirements and with existing environmental and oil spill regulations, together with any uncertainties or inconsistencies in decisions and rulings by governmental agencies, delays in the processing and approval of drilling permits or exploration, development, oil spill-response and decommissioning plans, and possible additional regulatory initiatives could result in difficult and more costly actions and adversely affect or delay new drilling and ongoing development efforts.

In addition, new regulatory initiatives may be adopted or enforced by the BOEM or the BSEE in the future that could result in additional costs, delays, restrictions, or obligations with respect to oil and natural gas exploration and production operations conducted offshore by certain of our customers. Separately, in April 2024, BOEM issued a final rule which significantly increases the amount of new supplemental financial assurance required for offshore oil and gas lessees and other operators. The final rule, which became effective in June 2024, adopts a three-year phased compliance period for full payment of a supplemental financial assurance demand. BOEM anticipates it will take up to 24 months to complete the processing of financial assurance demands for execution. The final rule was challenged in court. While the U.S. District Court for the Western District of Louisiana declined to enjoin the rule, the litigation is stayed while BOEM pursues efforts to suspend, revise, or rescind the rule. In May 2025, the DOI announced its intent to revise and develop a new rule that is consistent with the Trump administration’s prior proposed rule on financial assurance, though the specific substance and timing of a revised rule cannot be predicted at this time. Rules such as this, as well as any new rules, regulations, or legal initiatives, could delay or disrupt our customers’ operations, increase the risk of expired leases due to the time required to develop new technology, result in increased supplemental bonding and costs, limit activities in certain areas, or cause our customers’ to incur penalties, or shut-in production or lease cancellation. Also, if material spill events were to occur in the future, the United States or other countries could elect to issue directives to temporarily cease drilling activities offshore and, in any event, may from time to time issue further safety and environmental laws and regulations regarding offshore oil and gas exploration and development. The overall costs imposed on our customers to implement and complete any such spill response activities or any decommissioning obligations could exceed estimated accruals, insurance limits, or supplemental bonding amounts, which could result in the incurrence of additional costs to complete. Separately, in January 2021, the Biden Administration issued orders temporarily suspending the issuance of new authorizations and suspending the issuance of new leases pending completion of a review of current practices, for oil and gas development on federal lands and waters. The suspension of these federal leasing activities prompted legal action by several states against the Biden Administration, resulting in issuance of a nationwide preliminary

injunction by a federal district judge in Louisiana in June 2021 and permanent injunction in August 2022, effectively halting implementation of the leasing suspension. On January 20, 2025, President Trump issued an executive order rescinding the suspension; however, litigation challenging the rescission in the U.S. District Court for the District of Alaska is ongoing. In September 2023, the DOI published a proposed final offshore leasing program for 2024 – 2029, which was then approved by the Secretary of the Interior and authorized three Gulf of America leasing sales. Relatedly, the DOI released its report on federal gas leasing and permitting practices in November 2021, referencing a number of recommendations and an overarching intent to modernize the federal oil and gas leasing program, including by adjusting royalty and bonding rates, prioritizing leasing in areas with known resource potential, and avoiding leasing that conflicts with recreation, wildlife habitat, conservation, and historical and cultural resources. Implementation of many of the recommendations in the DOI report will require Congressional action and we cannot predict the extent to which the recommendations may be implemented now or in the future, but restrictions on federal oil and gas activities have the potential to result in increased costs on us and our customers, decrease demand for our services on federal lands, and adversely impact our business and adversely impact our business. For example, in 2024, the DOI finalized a rule to modernize the fiscal terms of the leasing program, increase costs associated with such leases and add new criteria for the DOI to consider when deciding whether to lease nominated lands. The OBBBA further mandates BOEM conduct at least two offshore lease sales annually and reduces the royalty rate for Gulf of America leases acquired at these sales. We cannot predict with any certainty the full impact of any new laws or regulations on our customers' drilling operations or on the cost or availability of insurance to cover some or all of the risks associated with such operations. The occurrence of any one or more of these developments could result in decreased demand for our services, which could have a material adverse effect on our business as well as our financial position, results of operation and liquidity.

*Our business is subject to federal, state and local laws and regulations that govern the product quality specifications of the petroleum products that we store and transport.*

The petroleum products that we store and transport are sold by our customers for consumption into the public market. Various federal, state and local agencies have the authority to prescribe specific product quality specifications to commodities sold into the public market. Changes in product quality specifications could reduce our throughput volume, require us to incur additional handling costs or require the expenditure of significant capital. In addition, different product specifications for different markets impact the fungibility of products transported and stored in our pipeline systems and terminal facilities and could require the construction of additional storage to segregate products with different specifications. We may be unable to recover these costs through increased revenues.

In addition, our patented butane blending services are reliant upon gasoline vapor pressure specifications. Significant changes in such specifications could reduce butane blending opportunities, which would affect our ability to market our butane blending service licenses and which would ultimately affect our ability to recover the costs incurred to acquire and integrate our butane blending assets.

### **Risks Relating to Our Partnership Structure**

#### ***Issuance of Common Units or Other Classes of Equity***

*We may issue an unlimited number of limited partner interests or other classes of equity without the consent of our Unitholders, which will dilute Unitholders' ownership interest in us and may increase the risk that we will not have sufficient available cash to maintain or increase our per unit distribution level.*

Our Partnership Agreement allows us to issue an unlimited number of additional limited partner interests, including securities senior to the Common Units, without the approval of our Unitholders. The issuance of additional Common Units or other equity securities by us will have the following effects:

- our Unitholders' current proportionate ownership interest in us will decrease;
- the amount of cash available for distribution on each Common Unit or partnership security may decrease;
- the ratio of taxable income to distributions may increase;
- the relative voting strength of each previously outstanding Common Unit and/or Preferred Unit may be diminished; and
- the market price of our Common Units and/or Preferred Units may decline.

### ***Cash Distributions to Unitholders and Governance***

*Cash distributions are not guaranteed and may fluctuate with our performance and other external factors.*

The amount of cash we can distribute to our Unitholders depends upon the amount of cash we generate from our operations and from our subsidiaries, Sunoco LP and USAC. The amount of cash we generate from our operations will fluctuate from quarter to quarter and will depend upon, among other things:

- the amount of natural gas, NGLs, crude oil and refined products transported in our pipelines;
- the level of throughput in our processing and treating operations;
- the fees we charge and the margins we realize for our services;
- the price of natural gas, NGLs, crude oil and refined products;
- the relationship between natural gas, NGL and crude oil prices;
- the weather in our operating areas;
- the level of competition from other midstream, transportation and storage and other energy providers;
- the level of our operating costs;
- prevailing economic conditions; and
- the level and results of our derivative activities.

In addition, the actual amount of cash we and our subsidiaries, including Sunoco LP and USAC, will have available for distribution will also depend on other factors, such as:

- the level of capital expenditures we and our subsidiaries make;
- the level of costs related to litigation and regulatory compliance matters;
- the cost of acquisitions, if any;
- the levels of any margin calls that result from changes in commodity prices;
- our and our subsidiaries' debt service requirements;
- fluctuations in our and our subsidiaries' working capital needs;
- our and our subsidiaries' ability to borrow under our revolving credit facility;
- our and our subsidiaries' ability to access capital markets;
- restrictions on distributions contained in our and our subsidiaries' debt agreements; and
- the amount of cash reserves established by our general partner in its discretion for the proper conduct of our business.

Because of all these factors, we cannot guarantee that in the future we will be able to pay distributions or that any distributions we do make will be at or above our current quarterly distribution. The actual amount of cash that is available for distribution to our Unitholders will depend on numerous factors, many of which are beyond our control or the control of our general partner.

Furthermore, our Unitholders should be aware that the amount of cash we have available for distribution depends primarily upon our cash flow and is not solely a function of profitability, which is affected by non-cash items. As a result, we may declare and/or pay cash distributions during periods when we record net losses.

*Our general partner's absolute discretion in determining the level of cash reserves may adversely affect our ability to make cash distributions to Unitholders.*

Our Partnership Agreement requires our general partner to deduct from operating surplus cash reserves that in its reasonable discretion are necessary to fund our future operating expenditures. In addition, our Partnership Agreement permits our general partner to reduce available cash by establishing cash reserves for the proper conduct of our business, to comply with applicable law or agreements to which we are a party or to provide funds for future distributions to partners. These cash reserves will affect the amount of cash available for distribution to Unitholders.

*Unitholders may have liability to repay distributions.*

Under certain circumstances, Unitholders may have to repay us amounts wrongfully distributed to them. Under Delaware law, we may not make a distribution to Unitholders if the distribution causes our liabilities to exceed the fair value of our assets. Liabilities to partners on account of their partnership interests and non-recourse liabilities are not counted for purposes of determining whether a distribution is permitted. Delaware law provides that a limited partner who receives such a distribution and knew at the time of the distribution that the distribution violated Delaware law, will be liable to the limited partnership for the distribution amount for three years from the distribution date.

*The NYSE does not require a publicly traded partnership like us to comply with certain corporate governance requirements.*

Our Common Units and Series I Preferred Units are listed on the NYSE. Because we are a publicly traded partnership, the NYSE does not require us to have a majority of independent directors on our general partner's board of directors or to establish a compensation committee or a nominating and corporate governance committee. Accordingly, our Unitholders do not have the same protections afforded to stockholders of corporations that are subject to all of the corporate governance requirements of the applicable stock exchange.

#### **Our General Partner**

*The control of our general partner may be transferred to a third-party without Unitholder consent.*

Our general partner may transfer its general partner interest to a third-party without the consent of the Unitholders. Any new owner of the general partner would be in a position to replace the officers and directors of the general partner with its own designees and thereby exert significant influence over the decisions made by such officers and directors.

*The majority owner of our general partner has rights that protect him against dilution.*

Through his controlling interest in our general partner, Kelcy Warren owns all of the outstanding Energy Transfer Class A Units, which represents an approximately 20% voting interest in the Partnership. Under the terms of the Energy Transfer Class A Units, upon the issuance by the Partnership of additional Common Units or any securities that have voting rights that are pari passu with the Partnership Common Units, the Partnership will issue to the general partner additional Energy Transfer Class A Units such that Mr. Warren maintains a voting interest in the Partnership that is equivalent to his voting interest in the Partnership with respect to such Energy Transfer Class A Units (approximately 20%) prior to such issuance of common units. As a result, Mr. Warren is partially protected against the dilutive effect of additional common unit issuances by the Partnership with respect to voting. As of December 31, 2025, the Partnership had outstanding 851,420,597 Energy Transfer Class A Units.

*Cost reimbursements due to our general partner may be substantial and may reduce our ability to pay the distributions to Unitholders.*

Prior to making any distributions to our Unitholders, we will reimburse our general partner for all expenses it has incurred on our behalf. In addition, our general partner and its affiliates may provide us with services for which we will be charged reasonable fees as determined by the general partner. The reimbursement of these expenses and the payment of these fees could adversely affect our ability to make distributions to the Unitholders. Our general partner has sole discretion to determine the amount of these expenses and fees.

*Holders of our Common Units have limited voting rights and are not entitled to elect our general partner or its directors.*

Unlike the holders of common stock in a corporation, our common Unitholders have only limited voting rights on matters affecting our business and, therefore, limited ability to influence management's decisions regarding our business. Our Unitholders have no right to elect our general partner or the board of directors of our general partner. Our general partner has the right to appoint and replace the members of the board, including all of its independent directors. Mr. Warren owns an 81.2% membership interest in our general partner and controls our general partner and therefore has the ability to direct our general partner with respect to the exercise of these governance rights.

If our Unitholders are dissatisfied with the general partner's performance, they have limited ability to remove the general partner. The vote of the holders of at least 66 2/3% of all outstanding common units is required to remove the general partner; however, Mr. Warren owns a significant number of common units and, through his controlling interest in the general partner, owns all of the outstanding Energy Transfer Class A Units, which vote together with the common units and entitle the holders of the Energy Transfer Class A Units to maintain the voting percentage in Energy Transfer represented by such Energy Transfer Class A Units as of the date the initial Energy Transfer Class A Units were issued (approximately 20%) any time new common units are issued. As of February 13, 2026, Mr. Warren's combined common unit and Energy Transfer Class A Unit ownership

results in a voting interest in the Partnership of 27%. As a result of this and other limitations, it may be more difficult to remove the general partner.

Furthermore, our Partnership Agreement contains provisions limiting the ability of common unitholders to call meetings or to obtain information about our operations, as well as other provisions limiting our common Unitholders' ability to influence the manner or direction of management. Common unitholders' voting rights are further restricted by a provision of our Partnership Agreement providing that any units held by a person or group that owns 20% or more of such class of units then outstanding, other than, with respect to our Common Units, the general partner, its affiliates, their direct transferees and their indirect transferees approved by our general partner (which approval may be granted in its sole discretion) and persons who acquired such common units with the prior approval of the general partner, cannot vote on any matter.

*Kelcy Warren owns a majority interest in, and controls, our general partner, and our general partner has sole responsibility for conducting our business and managing our operations. The general partner may have conflicts of interest with us and limited fiduciary duties, and it may favor its own interests to the detriment of us and our Unitholders.*

Mr. Warren owns an 81.2% membership interest in, and therefore controls, the general partner and accordingly has the right to appoint and replace all of the officers and directors of the general partner. Although our general partner has a fiduciary duty to manage us in a manner that is beneficial to us and our Unitholders, the directors and officers of the general partner also have a fiduciary duty to manage the general partner in a manner that is beneficial to its majority owner, Mr. Warren. Conflicts of interest will arise between the general partner and its owner, on the one hand, and us and our Unitholders, on the other hand. In resolving these conflicts of interest, the general partner may favor its own interests and the interests of its owner over our interests and the interests of our Unitholders.

*Unitholders may not have limited liability if a court finds that limited partner actions constitute control of our business.*

Under Delaware law, unitholders could be held liable for our obligations to the same extent as a general partner if a court determined that the right of limited partners to remove our general partner or to take other action under the Partnership Agreement constituted participation in the "control" of our business. Additionally, under Delaware law, our general partner has unlimited liability for the obligations of Energy Transfer, such as our debts and environmental liabilities, except for those contractual obligations of Energy Transfer that are expressly made without recourse to the general partner.

The limitations on the liability of holders of limited partner interests for the obligations of a limited partnership have not been clearly established in some of the states in which we do business. Unitholders could have unlimited liability for obligations of the Partnership if a court or government agency determined that (i) we were conducting business in a state, but had not complied with that particular state's partnership statute; or (ii) a Unitholder's right to act with other Unitholders to remove or replace our general partner, to approve some amendments to our Partnership Agreement or to take other actions under the Partnership Agreement constituted "control" of our business.

*Our general partner has a limited call right that may require Unitholders to sell their units at an undesirable time or price.*

If at any time our general partner and its affiliates own more than 90% of our outstanding units, our general partner will have the right, but not the obligation, which it may assign to any of its affiliates or to us, to acquire all, but not less than all, of the units held by unaffiliated persons at a price not less than their then-current market price. As a result, Unitholders may be required to sell their units at an undesirable time or price and may not receive any return on their investment. Unitholders may also incur a tax liability upon a sale of their units. As of February 13, 2026, the directors and executive officers of our general partner owned approximately 10% of our Common Units.

### **Our Subsidiaries**

*We have a holding company structure in which our subsidiaries conduct our operations and own our operating assets.*

We are a holding company, and our subsidiaries conduct all of our operations and own all of our operating assets. We do not have significant assets other than the partnership interests and the equity in our subsidiaries. As a result, our ability to pay distributions to our Unitholders and to service our debt depends on the performance of our subsidiaries and their ability to distribute funds to us. The ability of our subsidiaries to make distributions to us may be restricted by, among other things, credit facilities and applicable state partnership laws and other laws and regulations. In particular, our Five-Year Credit Facility, limits our and certain of our subsidiaries' ability to make distributions. If we are unable to obtain funds from our subsidiaries, we may not be able to pay distributions to our Unitholders or to pay interest or principal on our debt when due.

*The interruption of distributions to us from our operating subsidiaries and equity investees may affect our ability to satisfy our obligations and to make distributions to our partners.*

We are a holding company with no business operations other than that of our operating subsidiaries. Our only significant assets are the equity interests we own in our operating subsidiaries and equity investees. As a result, we depend upon the earnings and cash flow of our operating subsidiaries and equity investees and any interruption of distributions to us may affect our ability to meet our obligations, including any obligations under our debt agreements, and to make distributions to our partners.

*Our subsidiaries are not prohibited from competing with us.*

Neither our Partnership Agreement nor the partnership agreements of our subsidiaries, including Sunoco LP and USAC, prohibit our subsidiaries from owning assets or engaging in businesses that compete directly or indirectly with us. In addition, our subsidiaries may acquire, construct or dispose of any assets in the future without any obligation to offer us the opportunity to purchase or construct any of those assets.

*Sunoco LP and USAC may issue additional common units, which may increase the risk that each Partnership will not have sufficient available cash to maintain or increase its per unit distribution level.*

The partnership agreements of Sunoco LP and USAC allow each partnership to issue an unlimited number of additional limited partner interests. The issuance of additional common units or other equity securities by each respective partnership will have the following effects:

- unitholders' current proportionate ownership interest in each partnership will decrease;
- the amount of cash available for distribution on each common unit or partnership security may decrease;
- the ratio of taxable income to distributions may increase;
- the relative voting strength of each previously outstanding common unit may be diminished; and
- the market price of each partnership's common units may decline.

The payment of distributions on any additional units issued by Sunoco LP and USAC may increase the risk that either partnership may not have sufficient cash available to maintain or increase its per unit distribution level, which in turn may impact the available cash that we have to meet our obligations.

*A reduction in Sunoco LP's distributions will disproportionately affect the amount of cash distributions to which Energy Transfer is entitled.*

Energy Transfer indirectly owns all of the IDRs of Sunoco LP. These IDRs entitle the holder to receive increasing percentages of total cash distributions made by Sunoco LP as such entity reaches established target cash distribution levels as specified in its partnership agreement. Energy Transfer currently receives its pro rata share of cash distributions from Sunoco LP based on the highest sharing level of 50% in respect of the Sunoco LP IDRs.

A decrease in the amount of distributions by Sunoco LP to less than \$0.65625 per unit per quarter would reduce Energy Transfer's percentage of the incremental cash distributions from Sunoco LP above \$0.546875 per unit per quarter from 50% to 25%. As a result, any such reduction in quarterly cash distributions from Sunoco LP would have the effect of disproportionately reducing the amount of all distributions that Energy Transfer receives, based on its ownership interest in the IDRs as compared to cash distributions received from its Sunoco LP common units.

*A significant decrease in demand for motor fuel, crude oil, refinery feedstock or refined products, including increased consumer preference for alternative motor fuels, improvements in fuel efficiency or a material shift toward electric or other alternative-power vehicles, in the areas Sunoco LP serves would reduce their ability to make distributions to its unitholders.*

For the year ended December 31, 2025, sales of refined motor fuels accounted for approximately 92% of Sunoco LP's total revenues. A significant decrease in demand for motor fuel in the areas Sunoco LP serves could significantly reduce revenues and Sunoco LP's ability to make distributions to its unitholders, including Energy Transfer. Sunoco LP revenues are dependent on various trends, such as trends in commercial truck traffic, travel and tourism in their areas of operation, and these trends can change. Regulatory action, including government imposed fuel efficiency standards, may also affect demand for motor fuel. Because certain of Sunoco LP's operating costs and expenses are fixed and do not vary with the volumes of motor fuel distributed, their costs and expenses might not decrease ratably or at all should they experience such a reduction. As a result, Sunoco LP may experience declines in their profit margin if fuel distribution volumes decrease.

Any technological advancements, regulatory changes or changes in consumer preferences causing a significant shift toward alternative motor fuels could reduce demand for the conventional petroleum based motor fuels Sunoco LP currently sells. Additionally, a shift toward electric, hydrogen, natural gas or other alternative-power vehicles could fundamentally change customers' shopping habits or lead to new forms of fueling destinations or new competitive pressures.

New technologies have been developed and from time to time governmental mandates have been implemented to improve fuel efficiency, which may ultimately result in decreased demand for petroleum-based fuel. For example, the EPA previously finalized new criteria pollutant and GHG emissions standards for light and medium-duty vehicles, including passenger cars, vans, pickups, sedans and sport utility vehicles for model years 2027 through 2032 and beyond. However, following the change in U.S. presidential administrations, the EPA finalized rules rescinding these standards and the GHG "Endangerment Finding," which underpins the majority of EPA's GHG regulations and GHG emissions standards for new motor vehicles and engines. Additionally, the Trump Administration has taken steps to reduce or eliminate incentives for zero-emission vehicles, and the OBBBA, passed by Congress in July 2025, eliminates electric vehicle credits previously available for new and used electric vehicles and commercial fleets. However, we cannot predict whether or not these regulatory repeals will ultimately be successful or if future administrations may seek to restore incentives and further promote or mandate the adoption of electric vehicles. Any of these or similar actions could result in fewer visits to Sunoco LP's convenience stores or independently operated commission agents and dealer locations, a reduction in demand from Sunoco LP's wholesale customers, decreases in both fuel and merchandise sales revenue, or reduced profit margins, any of which could have a material adverse effect on our business, financial condition, results of operations and cash available for distribution to our unitholders.

Similarly, any sustained decrease in demand for crude oil, refined products, refinery feedstock, renewable fuels or anhydrous ammonia in the markets Sunoco LP's pipelines and terminals serve that extends beyond the expiration of Sunoco LP's existing throughput and deficiency agreements could result in a significant reduction in throughputs in Sunoco LP's pipelines and storage in Sunoco LP's terminals, which would reduce Sunoco LP's cash flows and impair Sunoco LP's ability to make distributions to Sunoco LP's unitholders. Factors that tend to decrease market demand include:

- a recession, high interest rates, inflation or other adverse economic conditions that result in lower spending by consumers on gasoline, diesel and travel;
- events that negatively impact global economic activity, travel and demand generally;
- higher fuel taxes or other governmental or regulatory actions that increase, directly or indirectly, the cost of gasoline;
- an increase in aggregate automotive engine fuel economy;
- new government and regulatory actions or court decisions requiring the phase out or reduced use of gasoline-fueled vehicles;
- the increased use of and public demand for use of alternative fuel sources or electric vehicles;
- an increase in the market price of crude oil that increases refined product prices, which may reduce demand for refined products and increase demand for alternative products; and
- adverse weather events resulting in decreased corn acres planted, which may reduce demand for anhydrous ammonia.

*Sunoco LP's financial condition and results of operations are influenced by changes in the prices of motor fuel, which may adversely impact margins, customers' financial condition and the availability of trade credit.*

Sunoco LP's operating results are influenced by prices for motor fuel, refinery feedstock and refined petroleum products. General economic and political conditions, acts of war or terrorism and instability in oil producing regions, particularly in the Middle East, South America, Russia and Africa, could significantly impact crude oil supplies, refinery feedstock and petroleum costs. Significant increases or high volatility in petroleum costs could impact consumer demand for motor fuel and convenience merchandise. Such volatility makes it difficult to predict the impact that future petroleum costs fluctuations may have on Sunoco LP's operating results and financial condition. Sunoco LP is subject to dealer tank wagon pricing structures at certain locations further contributing to margin volatility. A significant change in any of these factors could materially impact both wholesale and retail fuel margins, the volume of motor fuel distributed or sold at retail, and overall customer traffic, each of which in turn could have a material adverse effect on Sunoco LP's business, financial condition, results of operations and cash available for distribution to its unitholders.

Significant increases in wholesale motor fuel prices could impact Sunoco LP as some of their customers may have insufficient credit to purchase motor fuel from us at their historical volumes. Higher prices for motor fuel may also reduce access to trade credit support or cause it to become more expensive.

*The industries in which Sunoco LP operates are subject to seasonal trends, which may cause its operating costs to fluctuate, affecting its cash flow.*

Sunoco LP relies in part on customer travel and spending patterns and may experience more demand for gasoline in the late spring and summer months than during the fall and winter. Travel, recreation and construction are typically higher in these months in the geographic areas in which Sunoco LP or its commission agents and dealers operate, increasing the demand for motor fuel that they sell and distribute. Therefore, Sunoco LP's revenues and cash flows are typically higher in the second and third quarters of our fiscal year. As a result, Sunoco LP's results from operations may vary widely from period to period, affecting Sunoco LP's cash flow.

*The dangers inherent in the storage and transportation of motor fuel, crude oil, refinery feedstock, refined petroleum products and anhydrous ammonia could cause disruptions in Sunoco LP's operations and could expose them to potentially significant losses, costs or liabilities.*

Sunoco LP's operations are subject to significant hazards and risks inherent in transporting and storing motor fuel, crude oil, refinery feedstock, refined petroleum products and anhydrous ammonia. These hazards and risks include, but are not limited to, traffic accidents, fires, explosions, spills, discharges, and other releases, any of which could result in distribution difficulties and disruptions, environmental pollution, governmentally-imposed fines or clean-up obligations, personal injury or wrongful death claims, and other damage to its properties and the properties of others. Any such event not covered by Sunoco LP's insurance could have a material adverse effect on its business, financial condition, results of operations and cash available for distribution to its unitholders. Additionally, Sunoco LP's pipelines, terminals, storage assets and refinery operations are generally long-lived assets, and some have been in service for many years. The age and condition of Sunoco LP's assets could result in increased maintenance or repair expenditures in the future. If any of Sunoco LP's facilities, or those of its customers or suppliers, suffer significant damage or are forced to shut down for a significant period of time, it may have a material adverse effect on Sunoco LP's results of operations and financial condition as a whole.

*Sunoco LP's pipelines, fuel storage terminals and refinery operations are subject to operational and business risks which may adversely affect its financial condition, results of operations, cash flows and ability to make distributions to its unitholders.*

Sunoco LP's pipelines, fuel storage terminals and refinery are subject to operational and business risks, the most significant of which include the following:

- the inability to renew a ground lease for certain of its pipelines, fuel storage terminals or at the Burnaby Refinery on similar terms or at all;
- the dependence on third parties to supply its fuel storage terminals and refinery feedstock;
- outages at its pipelines, fuel storage terminals or Burnaby Refinery, or interrupted operations due to weather-related or other natural causes;
- the threat that the nation's terminal infrastructure and the Burnaby Refinery may be a future target of terrorist organizations;
- the volatility in the prices of the products transported on its pipelines, stored at its fuel storage terminals or its refinery feedstock and the resulting fluctuations in demand for storage services;
- the effects of a sustained recession or other adverse economic conditions;
- the possibility of federal and/or state regulations that may discourage its customers from transporting or storing gasoline, diesel fuel, ethanol and jet fuel at its fuel storage terminals or reduce the demand by consumers for petroleum products, and the possibility of federal, state or provincial regulation in Canada, particularly with respect to the Burnaby Refinery;
- competition from other pipelines and fuel storage terminals that are able to provide its customers with comparable transportation service or storage capacity at lower prices or from other refineries servicing the Lower Mainland in Canada; and
- climate change legislation or regulations that restrict emissions of GHGs could result in increased operating and capital costs and reduced demand for its transportation and storage services.

The occurrence of any of the above situations, amongst others, may affect operations at Sunoco LP's fuel storage terminals or the Burnaby Refinery and may adversely affect Sunoco LP's business, financial condition, results of operations, cash flows and ability to make distributions to its unitholders.

*Negative events or developments associated with Sunoco LP's branded suppliers could have an adverse impact on its revenues.*

Sunoco LP believes that the success of its operations is dependent, in part, on the continuing favorable reputation, market value, and name recognition associated with the motor fuel brands sold at Sunoco LP's convenience stores and at stores operated by its independent, branded dealers and commission agents. Erosion of the value of those brands could have an adverse impact on the volumes of motor fuel Sunoco LP distributes, which in turn could have a material adverse effect on its business, financial condition, results of operations and ability to make distributions to its unitholders.

*The wholesale motor fuel distribution industry and convenience store industry are characterized by intense competition and fragmentation and impacted by new entrants. Failure to effectively compete could result in lower margins.*

The market for distribution of wholesale motor fuel is highly competitive and fragmented, which results in narrow margins. Sunoco LP has numerous competitors, some of which may have significantly greater resources and name recognition than it does. Sunoco LP relies on its ability to provide value-added, reliable services and to control its operating costs in order to maintain our margins and competitive position. If Sunoco LP fails to maintain the quality of its services, certain of its customers could choose alternative distribution sources and margins could decrease. While major integrated oil companies have generally continued to divest retail sites and the corresponding wholesale distribution to such sites, such major oil companies could shift from this strategy and decide to distribute their own products in direct competition with Sunoco LP, or large customers could attempt to buy directly from the major oil companies. The occurrence of any of these events could have a material adverse effect on Sunoco LP's business, financial condition, results of operations and cash available for distribution to its unitholders.

The geographic areas in which Sunoco LP operates and supplies independently operated commission agent and dealer locations are highly competitive and marked by ease of entry and constant change in the number and type of retailers offering products and services of the type we and our independently operated commission agents and dealers sell in stores. Sunoco LP competes with other convenience store chains, independently owned convenience stores, motor fuel stations, supermarkets, drugstores, discount stores, dollar stores, club stores, mass merchants and local restaurants. Over the past two decades, several non-traditional retailers, such as supermarkets, hypermarkets, club stores and mass merchants, have impacted the convenience store industry, particularly in the geographic areas in which Sunoco LP operates, by entering the motor fuel retail business. These non-traditional motor fuel retailers have captured a significant share of the motor fuels market, and Sunoco LP expects their market share will continue to grow.

In some of Sunoco LP's markets, its competitors have been in existence longer and have greater financial, marketing, and other resources than they or their independently operated commission agents and dealers do. As a result, Sunoco LP's competitors may be able to better respond to changes in the economy and new opportunities within the industry. To remain competitive, Sunoco LP must constantly analyze consumer preferences and competitors' offerings and prices to ensure that they offer a selection of convenience products and services at competitive prices to meet consumer demand. Sunoco LP must also maintain and upgrade our customer service levels, facilities and locations to remain competitive and attract customer traffic to our stores. Sunoco LP may not be able to compete successfully against current and future competitors, and competitive pressures faced by Sunoco LP could have a material adverse effect on its business, results of operations and cash available for distribution to its unitholders.

*Sunoco LP competes with other midstream service providers, including certain major energy and chemical companies, that possess, or have greater financial resources to acquire, assets better suited to meet customer demand, which could undermine Sunoco LP's ability to obtain and retain customers or reduce utilization of its assets, which could adversely affect its revenues and cash flows, thereby reducing Sunoco LP's ability to make its quarterly distributions to unitholders.*

Sunoco LP faces competition in all aspects of its business and can give no assurances that it will be able to compete effectively against its competitors. Sunoco LP's competitors include major energy and chemical companies, some of which have greater financial resources, more pipelines or storage terminals, greater capacity pipelines or storage terminals and greater access to supply than does Sunoco LP. Certain of Sunoco LP's competitors also have advantages in competing for acquisitions or other new business opportunities because of their financial resources and synergies in operations. As a consequence of increased competition in the industry or market conditions, some customers are and others may be in the future reluctant to renew or enter into long-term contracts or contracts that provide for minimum throughput amounts. Sunoco LP's inability to renew or replace a significant portion of its current contracts as they expire, to enter into contracts for newly acquired, constructed or expanded assets and to respond appropriately to changing market conditions would have a negative effect on Sunoco LP's revenue, cash flows and ability to make quarterly distributions to its unitholders.

*Sunoco LP does not own all of the land on which its retail service stations are located, and Sunoco LP leases certain facilities and equipment, and Sunoco LP is subject to the possibility of increased costs to retain necessary land use which could disrupt its operations.*

Sunoco LP does not own all of the land on which its retail service stations are located. Sunoco LP has rental agreements for approximately 61% of Sunoco LP, commission agent or dealer operated retail service stations where Sunoco LP currently controls the real estate. Sunoco LP also has rental agreements for certain logistics facilities. As such, Sunoco LP is subject to the possibility of increased costs under rental agreements with landowners, primarily through rental increases and renewals of expired agreements. Sunoco LP is also subject to the risk that such agreements may not be renewed. Additionally, certain facilities and equipment (or parts thereof) used by Sunoco LP are leased from third parties for specific periods. Sunoco LP's inability to renew leases or otherwise maintain the right to utilize such facilities and equipment on acceptable terms, or the increased costs to maintain such rights, could have a material adverse effect on its financial condition, results of operations and cash flows.

Like other pipeline and storage logistics services providers, certain of Sunoco LP's pipelines, storage terminals and other facilities are located on land owned by third parties and governmental agencies that Sunoco LP has obtained the right to utilize for these purposes through contract (rather than through outright purchase). Many of Sunoco LP's rights-of-way or other property rights are perpetual in duration, but others are for a specific period of time. In addition, some of Sunoco LP's facilities are located on leased premises. A potential loss of property rights through Sunoco LP's inability to renew right-of-way contracts or leases or otherwise retain property rights on acceptable terms or the increased costs to renew such rights could adversely affect its financial condition, results of operations and cash flows available for distribution to its unitholders.

*Sunoco LP is subject to federal laws related to the Renewable Fuel Standard.*

New laws, new interpretations of existing laws, increased governmental enforcement of existing laws or other developments could require us to make additional capital expenditures or incur additional liabilities. For example, certain independent refiners have initiated discussions with the EPA to change the way the Renewable Fuel Standard ("RFS") is administered in an attempt to shift the burden of compliance from refiners and importers to blenders and distributors. Under the RFS, which requires an annually increasing amount of biofuels to be blended into the fuels used by U.S. drivers, refiners/importers are obligated to obtain renewable identification numbers ("RINs") either by blending biofuel into gasoline or through purchase in the open market. If the obligation was shifted from the importer/refiner to the blender/distributor, the Partnership would potentially have to utilize the RINs it obtains through its blending activities to satisfy a new obligation and would be unable to sell RINs to other obligated parties, which may cause an impact on the fuel margins associated with Sunoco LP's sale of gasoline. In addition, the RFS regulations are highly complex and evolving, and the RINs market is subject to significant price volatility as a result. In June 2025, the EPA proposed volume requirements for 2026 and 2027 that continue to build on the increasing volume requirements established in July 2023, though the substance of any final rule is uncertain.

The occurrence of any of the events described above could have a material adverse effect on Sunoco LP's business, financial condition, results of operations and cash available for distribution to its unitholders.

*Sunoco LP is subject to federal, state and local laws and regulations that govern the product quality specifications of refined petroleum products it purchases, stores, transports, and sells to its distribution customers.*

Various federal, state, and local government agencies have the authority to prescribe specific product quality specifications for certain commodities, including commodities that Sunoco LP distributes. Changes in product quality specifications, such as reduced sulfur content in refined petroleum products, or other more stringent requirements for fuels, could reduce Sunoco LP's ability to procure product, require it to incur additional handling costs and/or require the expenditure of capital. If Sunoco LP is unable to procure product or recover these costs through increased selling price, it may not be able to meet its financial obligations. Failure to comply with these regulations could result in substantial penalties for Sunoco LP.

*If third-party pipelines and other facilities interconnected to Sunoco LP's fuel storage terminals and transmix processing facilities become partially or fully unavailable to transport refined products, Sunoco LP's revenues could be adversely affected.*

Sunoco LP depends upon third-party pipelines and other facilities that provide delivery options to and from its fuel storage terminals and transmix processing facilities. Since Sunoco LP does not own or operate these pipelines or other facilities, their continuing operation in their current manner is not within Sunoco LP's control. If any of these third-party facilities become partially or fully unavailable, or if the quality specifications for their facilities change so as to restrict our ability to utilize them, Sunoco LP's financial condition and results of operations could be adversely affected.

*The third parties on whom Sunoco LP relies for transportation services to its fuel storage terminals and transmix processing facilities are subject to complex federal, state, and other laws that could adversely affect Sunoco LP's financial condition and results of operations.*

The operations of the third parties on whom Sunoco LP relies for transportation services are subject to complex and stringent laws and regulations that require obtaining and maintaining numerous permits, approvals and certifications from various federal, state and local government authorities. These third parties may incur substantial costs in order to comply with existing laws and regulations. If existing laws and regulations governing such third-party services are revised or reinterpreted, or if new laws and regulations become applicable to their operations, these changes may affect the costs that Sunoco LP pays for services. Similarly, a failure to comply with such laws and regulations by the third parties could have a material adverse effect on Sunoco LP's financial condition and results of operations.

*Integration of assets and businesses acquired by Sunoco LP in past acquisitions or future acquisitions with its existing business will be a complex, time-consuming and costly process, particularly given that assets acquired to date significantly increased Sunoco LP's size and diversified the geographic areas in which it operates. A failure to successfully integrate the acquired assets or businesses, such as Parkland, with Sunoco LP's existing business in a timely manner may have a material adverse effect on its business, financial condition, results of operations or cash available for distribution to its unitholders.*

The difficulties of integrating past and future acquisitions with Sunoco LP's business includes, among other things:

- operating a larger combined organization in new geographic areas and new lines of business;
- hiring, training or retaining qualified personnel to manage and operate Sunoco LP's growing business and assets;
- integrating management teams and employees into existing operations and establishing effective communication and information exchange with such management teams and employees;
- diversion of management's attention from Sunoco LP's existing business;
- assimilation of acquired assets and operations, including additional regulatory programs, operational philosophies and complex systems;
- loss of customers, suppliers or key employees;
- maintaining an effective system of internal controls in compliance with the Sarbanes-Oxley Act of 2002 as well as other regulatory compliance and corporate governance matters;
- integrating new technology systems for financial reporting; and
- assuming contractual obligations of acquired businesses, potential unknown liabilities and unforeseeable increased expenses as a result of such acquisitions.

If any of these risks or other unanticipated liabilities or costs were to materialize, then desired benefits from past acquisitions and future acquisitions could result in a negative impact to Sunoco LP's future results of operations. In addition, acquired assets may perform at levels below the forecasts used to evaluate them, due to factors beyond Sunoco LP's control. If the acquired assets perform at levels below the forecasts, then Sunoco LP's future results of operations could be negatively impacted.

Sunoco LP acquired Parkland, a Canadian corporation, indirectly through Sunoco Retail LLC, a wholly owned corporate subsidiary of Sunoco LP. The acquisition involved the creation of SunocoCorp, within our ownership structure, and resulted in Sunoco LP's expansion into jurisdictions where it did not previously have an operating footprint, which may expose Sunoco LP to additional regulatory, operational and geopolitical risks. See “—Risks Relating to Our Partnership Structure—Our Subsidiaries—Sunoco LP operates assets outside of the United States, which exposes Sunoco LP to different legal and regulatory requirements and additional risk” for more information.

Sunoco LP's acquisition of Parkland involved the combination of a U.S. master limited partnership with a Canadian corporation and involved the creation of a separate public company, SunocoCorp, within our ownership structure, and resulted in its expansion into jurisdictions where it did not previously have an operating footprint, which may expose Sunoco LP to additional regulatory, operational and geopolitical risks. See “—Regulatory Matters—Sunoco LP operates assets outside of the United States, which exposes Sunoco LP to different legal and regulatory requirements and additional risk” for more information.

The combination of two independent businesses is complex, costly and time consuming, and Sunoco LP will be required to continue to devote significant management attention and resources to integrating the business practices and operations of Parkland into Sunoco LP to achieve, among other things, the targeted cost synergies associated with the acquisition. To the extent Sunoco LP is unable to successfully integrate the business and operations of Parkland into its operations, and to the

extent Sunoco LP is unable to successfully manage the creation and associated expenses of SunocoCorp, Sunoco LP's business, results of operations and its ability to achieve the anticipated benefits of the acquisition may be adversely affected.

*Sunoco LP could be subject to liabilities from its assets that predate the acquisition of those assets, but that are not covered by indemnification rights Sunoco LP has against the sellers of the assets.*

Sunoco LP has acquired assets and businesses and it is not always indemnified by the seller for liabilities that precede its ownership. In addition, in some cases, Sunoco LP has indemnified the previous owners and operators of acquired assets or businesses. Some of Sunoco LP's assets have been used for many years to transport and store crude oil and refined products, and past releases could require costly future remediation. If a significant release or event occurred in the past, the liability for which was not retained by the seller, or for which indemnification by the seller is not available, it could adversely affect Sunoco LP's financial position and results of operations. Conversely, if liabilities arise from assets Sunoco LP has sold, it could incur costs related to those liabilities if the buyer possesses valid indemnification rights against Sunoco LP with respect to those assets.

*Sunoco LP operates assets outside of the United States, which exposes it to different legal and regulatory requirements and additional risk.*

A portion of Sunoco LP's revenues are generated from its assets located in northern Mexico and Europe. Sunoco LP's operations are subject to various risks that could have a material adverse effect on its business, results of operations and financial condition, including political and economic instability from civil unrest; labor strikes; war and other armed conflict; inflation; currency fluctuations, devaluation and conversion restrictions or other factors. Any deterioration of social, political, labor or economic conditions, including the increasing threat of terrorist organizations and drug cartels in Mexico, or affecting a customer with whom Sunoco LP does business, as well as difficulties in staffing, obtaining necessary equipment and supplies and managing foreign operations, may adversely affect Sunoco LP's operations or financial results. Sunoco LP is also exposed to the risk of foreign and domestic governmental actions that may: impose additional costs on Sunoco LP; delay permits or otherwise impede Sunoco LP's operations; limit or disrupt markets for Sunoco LP's operations, restrict payments or limit the movement of funds; impose sanctions on or otherwise restrict Sunoco LP's ability to conduct business with certain customers or persons or in certain countries; or result in the deprivation of contract rights. Sunoco LP's operations outside the United States may also be affected by changes in trade protection laws, policies and measures, and other regulatory requirements affecting trade and investment, including the Foreign Corrupt Practices Act and foreign laws prohibiting corrupt payments, as well as travel restrictions and import and export regulations.

*Sunoco LP's investment in the Burnaby Refinery is subject to operational risks, including commodity price and pricing pressure and environment, health and safety hazards. If any of the operational risks materialize, our financial condition or results of operations could be materially and adversely affected.*

Following the Parkland acquisition, Sunoco LP owns and operates a refinery located in Burnaby, British Columbia (the "Burnaby Refinery"), which produces and supplies fuel within the Lower Mainland in British Columbia, Canada. The Burnaby Refinery has two crude units, including a 25,000 barrel per day crude unit and a 30,000 barrel per day splitter, that are designed to process Canadian light and medium sweet crudes.

Key operational risks at the Burnaby Refinery include: supply disruptions of crude oil and bio-feedstocks, product offtake contract issues or interruptions, operational availability, labor and material shortages, compliance with regulatory requirements, includes GHG emission and low-carbon fuel intensity production requirements, and local community opposition. Major accidents could cause significant damage and may result in operational interruptions, loss of licenses, fines, reputational damage, injuries or fatalities. Large amounts of power, heat by way of natural gas and large volumes of water are used to refine crude oil, the supply of which is not in our control, and even a temporary interruption of power, natural gas or water could adversely affect continuous operations. Unanticipated costs and delays during maintenance may negatively impact Sunoco LP's operational results. Scheduled and unscheduled maintenance and repairs at the Burnaby Refinery may reduce revenue and increase Sunoco LP's operating costs, impacting our financial and operational results.

Additionally, Sunoco LP contracts with third parties for the supply of crude oil and other feedstock to the Burnaby Refinery. Crude oil sourced by the Burnaby Refinery is delivered from Alberta by the Trans Mountain Pipeline ("TMPL").

Interruptions or apportionment on the TMPL's pipeline system can result in Sunoco LP temporarily ceasing or decreasing processing operations at the Burnaby Refinery and may materially affect our business, financial condition and results of operations. The Burnaby Refinery could see variability in its crude deliveries as the capacity on the pipeline fluctuates from time to time, which can impact committed as well as uncommitted linespace, based on operating conditions and planned and/or unplanned maintenance. In addition to the TMPL line capacity, extreme or unexpected weather events may affect the operation of the TMPL. Significant operational delays, changes in tariffs and unanticipated costs could adversely impact the refinery.

Refining gross margins are primarily driven by commodity prices and are a function of the difference between the costs of feedstock (primarily crude oil) and the market prices for the marketing of finished products (such as gasoline, diesel, jet fuel, lubricants, fuel oil and fuel and lubricant additives). Prices for commodities are determined by global and regional marketplaces and are influenced by many factors, including supply and demand balances, inventory levels, industry refinery operations, import and export balances, currency fluctuations, seasonal demand, political climate, disruptions at the refinery resulting from unplanned outages due to severe weather, fires or other operational events and plant capacity utilization. Sustained low refining margins may have an adverse effect on our revenue, profitability and ability to service debt and pay distributions.

The Burnaby Refinery faces hazards related to hydrocarbon supply and processing, including, but not limited to, fires, explosions, railcar or marine vessel incidents, oil spills, migration of harmful substances, corrosion, vandalism, terrorism and other accidents that may occur at or during transport to or from sites. The consequences of an accidental spill or release at or near any marine terminal used in connection with Sunoco LP's operations could be significant, given the complexities of addressing releases occurring in marine environments or along populated coastlines. Such incidents could result in significant disruptions to offshore shipping activities and impede Sunoco LP's ability to operate in any affected areas.

These hazards may interrupt operations, cause injuries or fatalities, cause loss of or damage to equipment, property, information technology or control systems, and data, or result in environmental damage that may include pollution of water, land or air. The consequences could expose Sunoco LP to business interruptions, potential liabilities, modifications to or revocation of existing regulatory approvals, fines and other environmental damages, or reputational impacts.

*Sunoco LP faces a variety of risks related to its entry into the refinery business following the completion of the Parkland acquisition.*

Entry into a new line of business in a new jurisdiction may also subject Sunoco LP to new laws and regulations with which it is not familiar and may lead to increased litigation and regulatory risk. In addition, there is some risk as it relates to indigenous groups asserting aboriginal or treaty rights in various regions of western Canada, particularly in British Columbia. Such claims may affect many businesses operating in western Canada as the claims are litigated or settled with the federal and provincial governments. The federal and provincial governments have a duty to consult with indigenous people on actions and decisions that may affect their aboriginal or treaty rights and, in certain cases, accommodate their concerns. The government's duty to consult may be triggered if Sunoco LP applies to obtain or renew significant permits, leases, licenses or other approvals for its operations in the traditional territories of indigenous groups. Sunoco LP's management team has not engaged in the refinery operations business in recent years and continues to familiarize itself with the Canadian regulatory landscape, which imposes more stringent requirements than those in the other jurisdictions in which it operates. If Sunoco LP is unable to successfully implement the acquired business of Parkland, in particular, the Burnaby Refinery, Sunoco LP's revenue and profitability may not grow as expected, its competitiveness may be materially and adversely affected, and its reputation and business may be harmed.

*USAC's customers may choose to vertically integrate their operations by purchasing and operating their own compression fleet, increasing the number of compression units they currently own or using alternative technologies for enhancing crude oil production.*

USAC's customers that are significant producers, processors, gatherers and transporters of natural gas and crude oil may choose to vertically integrate their operations by purchasing and operating their own compression fleets in lieu of using USAC's compression services. The historical availability of attractive financing terms from financial institutions and equipment manufacturers facilitates this possibility by making the purchase of individual compression units more affordable to USAC's customers. In addition, there are many technologies available for the artificial enhancement of crude oil production, and USAC's customers may elect to use these alternative technologies instead of the gas lift compression services USAC provides. Such vertical integration, increases in vertical integration or use of alternative technologies could result in decreased demand for USAC's compression services, which may have a material adverse effect on its business, results of operations, financial condition and reduce its cash available for distribution.

*A significant portion of USAC's services are provided to customers on a month-to-month basis, and USAC cannot be sure that such customers will continue to utilize its services.*

USAC's contracts typically have initial terms between six months to five years, depending on the application and location of the compression unit. After the expiration of the initial term, the contract continues on a month-to-month or longer basis until terminated by USAC or USAC's customers upon notice as provided for in the applicable contract. For the year ended December 31, 2025, approximately 19% of USAC's compression services on a revenue basis were provided on a month-to-month basis to customers who continue to utilize its services following expiration of the primary term of their contracts. These customers can generally terminate their month-to-month compression services contracts on 30-days' written notice. If a significant number of these customers were to terminate their month-to-month services, or attempt to renegotiate their month-

to-month contracts at substantially lower rates, it could have a material adverse effect on USAC's business, results of operations, financial condition and cash available for distribution.

### **Risks Related to Conflicts of Interest**

*The fiduciary duties of our general partner's officers and directors may conflict with those of SunocoCorp's, Sunoco LP's or USAC's respective managing member or general partners, as applicable.*

Conflicts of interest may arise because of the relationships among SunocoCorp, its managing member, Sunoco LP, USAC, their general partners and us. Our General Partner's directors and officers have fiduciary duties to manage our business in a manner beneficial to us and our Unitholders. Some of our general partner's directors or officers are also directors and/or officers of Sunoco LP's general partner, USAC's general partner or SunocoCorp's managing member, and have fiduciary duties to manage the respective businesses of Sunoco LP, USAC and SunocoCorp in a manner beneficial to Sunoco LP, USAC, SunocoCorp and their respective unitholders. The resolution of these conflicts may not always be in our best interest or that of our Unitholders.

*Although we control SunocoCorp, Sunoco LP and USAC through our ownership of SunocoCorp's managing member and Sunoco LP's and USAC's general partners, SunocoCorp's managing member and Sunoco LP's and USAC's general partners owe duties to SunocoCorp and SunocoCorp's unitholders, Sunoco LP and Sunoco LP's unitholders and USAC and USAC's unitholders, respectively, which may conflict with our interests.*

Conflicts of interest exist and may arise in the future as a result of the relationships between us and our affiliates, on the one hand, and SunocoCorp and its respective members and Sunoco LP and USAC and their respective limited partners, on the other hand. The directors and officers of Sunoco LP's and USAC's general partners and SunocoCorp's managing member have duties to manage Sunoco LP, USAC, and SunocoCorp, respectively, in a manner beneficial to us. At the same time, the general partners and the managing member have fiduciary duties to manage Sunoco LP and USAC and SunocoCorp in a manner beneficial to Sunoco LP and USAC and their respective limited partners and to SunocoCorp and its members. Sunoco LP's and USAC's general partner and SunocoCorp's managing member will resolve any such conflict and have broad latitude to consider the interests of all parties to the conflict. The resolution of these conflicts may not always be in our best interest.

For example, conflicts of interest with SunocoCorp, Sunoco LP and USAC may arise in the following situations:

- the allocation of shared overhead expenses to SunocoCorp, Sunoco LP, USAC and us;
- the management of the ET-S Permian joint venture;
- the interpretation and enforcement of contractual obligations between us and our affiliates, on the one hand, and SunocoCorp, Sunoco LP and USAC, on the other hand;
- the determination of the amount of cash to be distributed to Sunoco LP's and USAC's partners and the amount of cash to be reserved for the future conduct of Sunoco LP's and USAC's businesses;
- the determination whether to make borrowings under Sunoco LP's and USAC's revolving credit facilities to pay distributions to their respective partners;
- the determination of whether a business opportunity (such as a commercial development opportunity or an acquisition) that we may become aware of independently of Sunoco LP and USAC is made available for Sunoco LP and USAC to pursue; and
- any decision we make in the future to engage in business activities independent of SunocoCorp, Sunoco LP and USAC.

*Potential conflicts of interest may arise among our general partner, its affiliates and us. Our general partner and its affiliates have limited fiduciary duties to us, which may permit them to favor their own interests to the detriment of us.*

Conflicts of interest may arise among our general partner and its affiliates, on the one hand, and us, on the other hand. As a result of these conflicts, our general partner may favor its own interests and the interests of its affiliates over our interests. These conflicts include, among others, the following:

- our general partner is allowed to take into account the interests of parties other than us, including SunocoCorp, Sunoco LP and USAC, and their respective affiliates and any general partners and limited partnerships acquired in the future, in resolving conflicts of interest, which has the effect of limiting its fiduciary duties to us.
- our general partner has limited its liability and reduced its fiduciary duties under the terms of our Partnership Agreement, while also restricting the remedies available for actions that, without these limitations, might constitute breaches of fiduciary duty. As a result of purchasing our units, Unitholders consent to various actions and conflicts of interest that might otherwise constitute a breach of fiduciary or other duties under applicable state law.

- our general partner determines the amount and timing of our investment transactions, borrowings, issuances of additional partnership securities and reserves, each of which can affect the amount of cash that is available for distribution.
- our general partner determines which costs it and its affiliates have incurred are reimbursable by us.
- our Partnership Agreement does not restrict our general partner from causing us to pay it or its affiliates for any services rendered, or from entering into additional contractual arrangements with any of these entities on our behalf, so long as the terms of any such payments or additional contractual arrangements are fair and reasonable to us.
- our general partner controls the enforcement of obligations owed to us by it and its affiliates.
- our general partner decides whether to retain separate counsel, accountants or others to perform services for us.

*Our Partnership Agreement limits our general partner's fiduciary duties to us and restricts the remedies available for actions taken by our general partner that might otherwise constitute breaches of fiduciary duty.*

Our Partnership Agreement contains provisions that reduce the standards to which our general partner would otherwise be held by state fiduciary duty law. For example, our Partnership Agreement:

- permits our general partner to make a number of decisions in its individual capacity, as opposed to in its capacity as our general partner. This entitles our general partner to consider only the interests and factors that it desires, and it has no duty or obligation to give any consideration to any interest of, or factors affecting, us, our affiliates or any limited partner;
- provides that our general partner is entitled to make other decisions in "good faith" if it reasonably believes that the decisions are in our best interests;
- generally provides that affiliated transactions and resolutions of conflicts of interest not approved by a conflicts committee of the board of directors of our general partner and not involving a vote of Unitholders must be on terms no less favorable to us than those generally being provided to or available from unrelated third parties or be "fair and reasonable" to us and that, in determining whether a transaction or resolution is "fair and reasonable," our general partner may consider the totality of the relationships among the parties involved, including other transactions that may be particularly favorable or advantageous to us;
- provides that unless our general partner has acted in bad faith, the action taken by our general partner shall not constitute a breach of its fiduciary duty;
- provides that our general partner may resolve any conflicts of interest involving us and our general partner and its affiliates, and any resolution of a conflict of interest by our general partner that is "fair and reasonable" to us will be deemed approved by all partners, including the Unitholders, and will not constitute a breach of the Partnership Agreement;
- provides that our general partner may, but is not required, in connection with its resolution of a conflict of interest, to seek "special approval" of such resolution by appointing a conflicts committee of the general partner's board of directors composed of two or more independent directors to consider such conflicts of interest and to recommend action to the board of directors, and any resolution of the conflict of interest by the conflicts committee shall be conclusively deemed "fair and reasonable" to us; and
- provides that our general partner and its officers and directors will not be liable for monetary damages to us, our limited partners or assignees for any acts or omissions unless there has been a final and non-appealable judgment entered by a court of competent jurisdiction determining that the general partner or those other persons acted in bad faith or engaged in fraud, willful misconduct or gross negligence.

*Our general partner's absolute discretion in determining the level of cash reserves may adversely affect our ability to make cash distributions to our Unitholders.*

Our Partnership Agreement requires our general partner to deduct from operating surplus cash reserves that in its reasonable discretion are necessary to fund our future operating expenditures. In addition, our Partnership Agreement permits our general partner to reduce available cash by establishing cash reserves for the proper conduct of our business, to comply with applicable law or agreements to which we are a party or to provide funds for future distributions to partners. These cash reserves will affect the amount of cash available for distribution to Unitholders.

*Affiliates of our general partner may compete with us.*

Except as provided in our Partnership Agreement, affiliates and related parties of our general partner are not prohibited from engaging in other businesses or activities, including those that might be in direct competition with us.

## **Tax Risks to Unitholders**

*Our tax treatment depends on our continuing status as a partnership for federal income tax purposes, as well as our not being subject to a material amount of entity-level taxation. If the IRS were to treat us and our subsidiaries, including Sunoco LP and USAC as a corporation for federal income tax purposes or if we, Sunoco LP or USAC become subject to a material amount of entity-level taxation for state tax purposes, then our cash available for distribution would be substantially reduced.*

The anticipated after-tax economic benefit of an investment in our units depends largely on our being treated as a partnership for federal income tax purposes. We have not requested, and do not plan to request, a ruling from the IRS on this matter. The value of our investments in Sunoco LP and USAC, depend largely on Sunoco LP and USAC being treated as partnerships for federal income tax purposes. Despite the fact that we, Sunoco LP and USAC are each a limited partnership under Delaware law, we would each be treated as a corporation for federal income tax purposes unless we satisfy a “qualifying income” requirement. Based upon our current operations and current Treasury Regulations, we believe we, Sunoco LP and USAC satisfy the qualifying income requirement. Failing to meet the qualifying income requirement or a change in current law could cause us, Sunoco LP or USAC to be treated as a corporation for federal income tax purposes or otherwise subject us to taxation as an entity.

If we, Sunoco LP or USAC were treated as a corporation for federal income tax purposes, we would pay federal income tax at the corporate tax rate and we would likely pay additional state income taxes at varying rates. Distributions to Unitholders would generally be taxed again as corporate distributions, and none of our income, gains, losses or deductions would flow through to Unitholders. Because a tax would be imposed upon us as a corporation, our cash available for distribution to Unitholders would be substantially reduced. Therefore, treatment of us as a corporation would result in a material reduction in the anticipated cash flow and after-tax return to the Unitholders, likely causing a substantial reduction in the value of our units.

At the state level, several states have been evaluating ways to subject partnerships to entity-level taxation through the imposition of state income, franchise, or other forms of taxation. We currently own property or conduct business in many states that impose a margin or franchise tax. In the future, we may expand our operations. Imposition of a similar tax on us in the jurisdictions in which we operate or in other jurisdictions to which we may expand could substantially reduce our cash available for distribution to our Unitholders. Our Partnership Agreement provides that if a law is enacted or existing law is modified or interpreted in a manner that subjects us to taxation as a corporation or otherwise subjects us to entity-level taxation for U.S. federal, state, local or foreign income tax purposes, the target distribution amounts may be adjusted to reflect the impact of that law or interpretation on us.

*The tax treatment of publicly traded partnerships or an investment in our units could be subject to potential legislative, judicial or administrative changes or differing interpretations, possibly applied on a retroactive basis.*

The present United States federal income tax treatment of publicly traded partnerships, including us, or an investment in our units may be modified by administrative, legislative or judicial changes or differing interpretations at any time. Members of Congress have frequently proposed and considered substantive changes to the existing United States federal income tax laws that affect publicly traded partnerships, including proposals that would eliminate our ability to qualify for partnership tax treatment. Recent proposals have provided for the expansion of the qualifying income exception for publicly traded partnerships in certain circumstances and other proposals have provided for the total elimination of the qualifying income exception upon which we rely for our partnership tax treatment.

In addition, the U.S. Department of the Treasury has issued, and in the future may issue, regulations interpreting those laws that affect publicly traded partnerships. There can be no assurance that there will not be further changes to United States federal income tax laws or the U.S. Department of the Treasury’s interpretation of the qualifying income rules in a manner that could impact our ability to qualify as a partnership in the future.

Any modification to the United States federal income tax laws and interpretations thereof may or may not be retroactively applied and could make it more difficult or impossible for us to meet the exception for certain publicly traded partnerships to be treated as partnerships for United States federal income tax purposes. We are unable to predict whether any changes or other proposals will ultimately be enacted. Any future legislative changes could negatively impact the value of an investment in our units. You are urged to consult with your own tax advisor with respect to the status of regulatory or administrative developments and proposals and their potential effect on your investment in our units.

*If the IRS contests the federal income tax positions we take, the market for our units may be adversely affected and the costs of any such contest will reduce cash available to pay our debt securities and for distributions to our Unitholders.*

We have not requested a ruling from the IRS with respect to our treatment as a partnership for federal income tax purposes. The IRS may adopt positions that differ from the positions we take. It may be necessary to resort to administrative or court

proceedings to sustain some or all of the positions we take. A court may not agree with some or all of the positions we take. Any contest with the IRS may materially and adversely impact the market for our units, and the prices at which they trade. In addition, the costs of any contest between us and the IRS will result in a reduction in our cash available to pay our debt securities and for distribution to our Unitholders and thus will be borne indirectly by our Unitholders.

*If the IRS makes audit adjustments to our income tax returns, it (and some states) may assess and collect any taxes (including any applicable penalties and interest) resulting from such audit adjustments directly from us, in which case our cash available to pay our debt securities and for distribution to our Unitholders might be substantially reduced.*

If the IRS makes audit adjustments to our income tax returns, it (and some states) may assess and collect any taxes (including any applicable penalties and interest) resulting from such audit adjustment directly from us. To the extent possible, our general partner may elect to either pay the taxes (including any applicable penalties and interest) directly to the IRS or, if we are eligible, issue an information statement to each Unitholder and former Unitholder with respect to an audited and adjusted return. Although our general partner may elect to have our Unitholders and former Unitholders take such audit adjustment into account and pay any resulting taxes (including applicable penalties or interest) in accordance with their interests in us during the tax year under audit, there can be no assurance that such election will be practical, permissible or effective in all circumstances. As a result, our current Unitholders may bear some or all of the tax liability resulting from such audit adjustment, even if such Unitholders did not own units in us during the tax year under audit. If, as a result of any such audit adjustment, we are required to make payments of taxes, penalties and interest, our cash available for distribution to our Unitholders might be substantially reduced.

*Unitholders are required to pay taxes on their share of our income even if they do not receive any cash distributions from us.*

Our Unitholders are required to pay any federal income taxes and, in some cases, state and local income taxes on their share of our taxable income whether or not they receive cash distributions from us. Our Unitholders may not receive cash distributions from us equal to their share of our taxable income or even equal to the actual tax liability that results from that income.

*Tax gain or loss on disposition of our units could be more or less than expected.*

If a Unitholder sells their units, the Unitholder will recognize a gain or loss equal to the difference between the amount realized and that Unitholder's tax basis in those units. Because distributions in excess of a Unitholder's allocable share of our net taxable income decrease such Unitholder's tax basis in their units, the amount, if any, of such prior excess distributions with respect to the units a Unitholder sells will, in effect, become taxable income to a Unitholder if such units are sold at a price greater than their tax basis in those units, even if the price such Unitholder receives is less than their original costs. In addition, because the amount realized includes a Unitholder's share of our nonrecourse liabilities, if a Unitholder sells their units, a Unitholder may incur a tax liability in excess of the amount of cash received from the sale.

A substantial portion of the amount realized from a Unitholder's sale of their units, whether or not representing gain, may be taxed as ordinary income to such Unitholder due to potential recapture items, including depreciation recapture. Thus, a Unitholder may recognize both ordinary income and capital loss from the sale of Common Units if the amount realized on a sale of such units is less than such Unitholder's adjusted basis in the units. Net capital loss may only offset capital gains and, in the case of individuals, up to \$3,000 of ordinary income per year. In the taxable period in which a Unitholder sells their units, such Unitholder may recognize ordinary income from our allocations of income and gain to such Unitholder prior to the sale and from recapture items that generally cannot be offset by any capital loss recognized upon the sale of units.

*Tax-exempt entities face unique tax issues from owning our units that may result in adverse tax consequences to them.*

Investment in our units by tax-exempt entities, such as employee benefit plans and individual retirement accounts (known as IRAs) raises issues unique to them. For example, virtually all of our income allocated to organizations that are exempt from United States federal income tax, including IRAs and other retirement plans, will be unrelated business taxable income and will be taxable to them. Additionally, all or part of any gain recognized by such tax-exempt organization upon a sale or other disposition of our units may be unrelated business taxable income and may be taxable to them. Tax-exempt entities should consult a tax advisor before investing in our units.

*Non-United States Unitholders will be subject to United States taxes and withholding with respect to their income and gain from owning our units.*

Non-United States Unitholders are generally taxed and subject to income tax filing requirements by the United States on income effectively connected with a United States trade or business ("effectively connected income"). Income allocated to our Unitholders and any gain from the sale of our units will generally be considered to be "effectively connected" with a United States trade or business. As a result, distributions to a non-United States Unitholder will be subject to withholding at the highest

applicable effective tax rate and a non-United States Unitholder who sells or otherwise disposes of a unit will also be subject to United States federal income tax on the gain realized from the sale or disposition of that unit. In addition to the withholding tax imposed on distributions of effectively connected income, distributions to a non-U.S. unitholder will also be subject to a 10% withholding tax on the amount of any distribution in excess of our cumulative net income. We intend to treat all of our distributions as being in excess of our cumulative net income for such purposes and subject to such 10% withholding tax. Accordingly, distributions to a non-U.S. unitholder will be subject to a combined withholding tax rate equal to the sum of the highest applicable effective tax rate and 10%.

Moreover, the transferee of an interest in a partnership that is engaged in a United States trade or business is generally required to withhold 10% of the “amount realized” by the transferor unless the transferor certifies that it is not a foreign person. While the determination of a partner’s “amount realized” generally includes any decrease of a partner’s share of the partnership’s liabilities, the Treasury regulations provide that the “amount realized” on a transfer of an interest in a publicly traded partnership, such as our units, will generally be the amount of gross proceeds paid to the broker effecting the applicable transfer on behalf of the transferor, and thus will be determined without regard to any decrease in that partner’s share of a publicly traded partnership’s liabilities. For a transfer of interests in a publicly traded partnership that is effected through a broker, the obligation to withhold is imposed on the transferor’s broker. Current and prospective non-U.S. unitholders should consult their tax advisors regarding the impact of these rules on an investment in our units.

*We have subsidiaries that will be treated as corporations for federal income tax purposes and subject to corporate-level income taxes.*

Even though we (as a partnership for United States federal income tax purposes) are not subject to United States federal income tax, some of our operations are conducted through subsidiaries that are organized as corporations for United States federal income tax purposes. The taxable income, if any, of subsidiaries that are treated as corporations for United States federal income tax purposes, is subject to corporate-level United States federal income taxes, which may reduce the cash available for distribution to us and, in turn, to our Unitholders. If the IRS or other state or local jurisdictions were to successfully assert that these corporations have more tax liability than we anticipate or legislation was enacted that increased the corporate tax rate, the cash available for distribution could be further reduced. The income tax return filings positions taken by these corporate subsidiaries require significant judgment, use of estimates, and the interpretation and application of complex tax laws. Significant judgment is also required in assessing the timing and amounts of deductible and taxable items. Despite our belief that the income tax return positions taken by these subsidiaries are fully supportable, certain positions may be successfully challenged by the IRS, state or local jurisdictions.

*We treat each purchaser of units as having the same tax benefits without regard to the actual units purchased. The IRS may challenge this treatment, which could result in a Unitholder owing more tax and may adversely affect the value of the units.*

Because we cannot match transferors and transferees of units and because of other reasons, we have adopted certain methods for allocating depreciation, depletion and amortization that may not conform to all aspects of existing Treasury Regulations. A successful IRS challenge to the use of these methods could adversely affect the amount of tax benefits available to our Unitholders. It also could affect the timing of these tax benefits or the amount of gain from the sale of units and could have a negative impact on the value of our units or result in audit adjustments to tax returns of our Unitholders. Moreover, because we have subsidiaries that are organized as C corporations for federal income tax purposes, a successful IRS challenge could result in these subsidiaries having a greater tax liability than we anticipate and, therefore, reduce the cash available for distribution to our partnership and, in turn, to our Unitholders.

*We generally prorate our items of income, gain, loss and deduction between transferors and transferees of our units each month based upon the ownership of our units on the first business day of each month, instead of on the basis of the date a particular unit is transferred. The IRS may challenge aspects of our proration method, and if successful, we would be required to change the allocation of items of income, gain, loss and deduction among our Unitholders.*

We generally prorate our items of income, gain, loss and deduction between transferors and transferees of our units each month based upon the ownership of our units on the first business day of each month (the “Allocation Date”), instead of on the basis of the date a particular unit is transferred. Similarly, we generally allocate (i) certain deductions for depreciation of capital additions, (ii) gain or loss realized on a sale or other disposition of our assets and (iii) in the discretion of the general partner, any other extraordinary item of income, gain, loss or deduction based upon ownership on the Allocation Date. Treasury Regulations allow a similar monthly simplifying convention, but such regulations do not specifically authorize all aspects of the proration method we have adopted. If the IRS were to challenge our proration method, we may be required to change the allocation of items of income, gain, loss and deduction among our Unitholders.

*A Unitholder whose common or preferred units are the subject of a securities loan (e.g. a loan to a short seller to cover a short sale of common or preferred units) may be considered as having disposed of those units. If so, such Unitholder would no longer*

*be treated for tax purposes as a partner with respect to those units during the period of the loan and may recognize gain or loss from the disposition.*

Because there are no specific rules governing the federal income tax consequences of loaning a partnership interest, a Unitholder whose units are the subject of a securities loan may be considered as having disposed of the loaned units. In that case, the Unitholder may no longer be treated for tax purposes as a partner with respect to those units during the period of the loan to the short seller, and the Unitholder and may recognize gain or loss from such disposition. Moreover, during the period of the loan, any of our income, gain, loss or deduction with respect to those units may not be reportable by the Unitholder and any cash distributions received by the Unitholder as to those units could be fully taxable as ordinary income. Unitholders desiring to assure their status as partners and avoid the risk of gain recognition from a securities loan are urged to consult a tax advisor to determine whether it is advisable to modify any applicable brokerage account agreements to prohibit their brokers from borrowing their units.

*We have adopted certain valuation methodologies in determining Unitholder's allocations of income, gain, loss and deduction. The IRS may challenge these methods or the resulting allocations, and such a challenge could adversely affect the value of our Common Units.*

When we issue additional units or engage in certain other transactions, we determine the fair market value of our assets and allocate any unrealized gain or loss attributable to such assets to the capital accounts of our Unitholders and our general partner. Although we may from time to time consult with professional appraisers regarding valuation matters, including the valuation of our assets, we make many of the fair market value estimates of our assets ourselves using a methodology based on the market value of our Common Units as a means to measure the fair market value of our assets. Our methodology may be viewed as understating the value of our assets. In that case, there may be a shift of income, gain, loss and deduction between certain Unitholders and our general partner, which may be unfavorable to such Unitholders. Moreover, under our current valuation methods, subsequent purchasers of our Common Units may have a greater portion of their Internal Revenue Code Section 743(b) adjustment allocated to our tangible assets and a lesser portion allocated to our intangible assets. The IRS may challenge our valuation methods, or our allocation of Section 743(b) adjustment attributable to our tangible and intangible assets, and allocations of income, gain, loss and deduction between our general partner and certain of our Unitholders.

A successful IRS challenge to these methods or allocations could adversely affect the amount of taxable income or loss being allocated to our Unitholders. It also could affect the amount of gain on the sale of Common Units by our Unitholders and could have a negative impact on the value of our Common Units or result in audit adjustments to the tax returns of our Unitholders without the benefit of additional deductions.

*Unitholders will likely be subject to state and local taxes and income tax return filing requirements in jurisdictions where they do not live as a result of investing in our units.*

In addition to United States federal income taxes, the Unitholders may be subject to other taxes, including state and local taxes, unincorporated business taxes and estate, inheritance or intangible taxes that are imposed by the various jurisdictions in which we or our subsidiaries conduct business or own property now or in the future, even if they do not live in any of those jurisdictions. Unitholders will likely be required to file state and local income tax returns and pay state and local income taxes in some or all of these various jurisdictions. Further, Unitholders may be subject to penalties for failure to comply with those requirements. It is the responsibility of each Unitholder to file all federal, state and local tax returns.

*Unitholders may be subject to limitation on their ability to deduct interest expense incurred by us.*

In general, we are entitled to a deduction for interest paid or accrued on indebtedness properly allocable to our trade or business during our taxable year. However, our deduction for "business interest" is generally limited to the sum of our business interest income and 30% of our "adjusted taxable income." For the purposes of this limitation, adjusted taxable income is computed without regard to any business interest expense or business interest income.

If our "business interest" is subject to limitation under these rules, our Unitholders will be limited in their ability to deduct their share of any interest expense that has been allocated to them. As a result, Unitholders may be subject to limitation on their ability to deduct interest expense incurred by us.

*The treatment of Energy Transfer Preferred Units is uncertain, and distributions on Energy Transfer Preferred Units (other than Series I Preferred Units) may not be eligible for the 20% deduction for qualified publicly traded partnership income.*

The tax treatment of our Preferred Units is uncertain. With respect to Preferred Units (other than Series I Preferred Units), we will treat Preferred Unitholders as partners for tax purposes and will treat distributions on such Preferred Units as guaranteed payments for the use of capital that will generally be taxable to such Preferred Unitholders as ordinary income. Holders of our

Preferred Units (other than Series I Preferred Units) will recognize taxable income from the accrual of such a guaranteed payment (even in the absence of a contemporaneous cash distribution). Otherwise, except in the case of our liquidation, holders of our Preferred Units (other than Series I Preferred Units) are generally not anticipated to share in our items of income, gain, loss or deduction, nor will we allocate any share of our nonrecourse liabilities to such Preferred Unitholders. If the Energy Transfer Preferred Units (other than Series I Preferred Units) were treated as indebtedness for tax purposes, rather than as guaranteed payments for the use of capital, distributions likely would be treated as payments of interest by us to Preferred Unitholders.

Although we expect that much of the income we earn will be eligible for the 20% deduction for qualified publicly traded partnership income, the Treasury Regulations provide that income attributable to a guaranteed payment for the use of capital is not eligible for the 20% deduction for qualified business income. As a result income attributable to a guaranteed payment for use of capital recognized by holders of our Preferred Units is not eligible for the 20% deduction for qualified business income.

With respect to Series I Preferred Units, we will treat distributions as distributions to a partner and will treat Preferred Unitholders that hold Series I Preferred Units (the “Series I Preferred Unitholders”) as receiving an allocable share of gross income from us, to the extent we have sufficient gross income to make such allocations. In the event there is not sufficient gross income to match such distributions, the distributions on the Series I Preferred Units would reduce the capital accounts of the Series I Preferred Units, requiring a subsequent allocation of income or gain to provide the Series I Preferred Units with their liquidation preference, if possible. However, if the IRS were to determine that such distributions were guaranteed payments for the use of capital, the distributions would generally be taxable to each of the Series I Preferred Unitholders as ordinary income and the Series I Preferred Unitholders would recognize taxable income from the accrual of such guaranteed payment (even in the absence of a contemporaneous cash distribution), as described above with respect to Preferred Units (other than Series I Preferred Units). If the Series I Preferred Units are not treated as partnership interests, they would likely constitute indebtedness for tax purposes, and distributions on the Series I Preferred Units likely would be treated as payments of interest by us to such Series I Preferred Unitholders.

A Preferred Unitholder will be required to recognize gain or loss on a sale of Energy Transfer Preferred Units equal to the difference between the amount realized by such Preferred Unitholder and such Preferred Unitholder’s tax basis in the Energy Transfer Preferred Units sold. The amount realized generally will equal the sum of the cash and the fair market value of other property such Preferred Unitholder receives in exchange for such Energy Transfer Preferred Units. Subject to general rules requiring a blended basis among multiple partnership interests and the rules applicable in determining the exchanged tax basis of a Series I Preferred Unit received by a Unitholder pursuant to the Crestwood acquisition, the tax basis of a Preferred Unit will generally be equal to the sum of the cash and the fair market value of other property paid by the Preferred Unitholder to acquire such Energy Transfer Preferred Units. Gain or loss recognized by a Preferred Unitholder on the sale or exchange of Energy Transfer Preferred Units held for more than one year generally will be taxable as long-term capital gain or loss. Because Preferred Unitholders will generally not be allocated a share of our items of depreciation, depletion or amortization, it is not anticipated that such Preferred Unitholders would be required to recharacterize any portion of their gain as ordinary income as a result of the recapture rules.

Investment in our Preferred Units by tax-exempt investors, such as employee benefit plans and individual retirement accounts, and non-United States persons raises issues unique to them. With respect to Preferred Units (other than Series I Preferred Units), the treatment of guaranteed payments for the use of capital to tax-exempt investors is not certain and such payments may be treated as unrelated business taxable income for federal income tax purposes. With respect to Series I Preferred Units, virtually all of our gross income allocated to tax-exempt investors will be unrelated business taxable income and will be taxable to them. Distributions to non-United States Preferred Unitholders will be subject to withholding taxes. If the amount of withholding exceeds the amount of United States federal income tax actually due, non-United States Preferred Unitholders may be required to file United States federal income tax returns in order to seek a refund of such excess.

All Preferred Unitholders are urged to consult a tax advisor with respect to the consequences of owning Energy Transfer Preferred Units.

#### **ITEM 1B. UNRESOLVED STAFF COMMENTS**

None.

#### **ITEM 1C. CYBERSECURITY**

##### **Description of Processes for Assessing, Identifying and Managing Cybersecurity Risks**

The information and operational technology infrastructure we use is important to the operation of our business and to our ability to perform day-to-day operations. In the normal course of business, we may collect and store certain sensitive information of

the Partnership, including proprietary and confidential business information, trade secrets, intellectual property, sensitive third-party and employee information, and certain personally identifiable information.

The Partnership maintains a shared services cybersecurity program for assessing, identifying and managing material risks from cybersecurity threats. This program includes processes that are modeled after the National Institute of Standards and Technology's Cybersecurity Framework and focuses on using business drivers to guide cybersecurity activities. This program is managed by our Chief Information Officer, who is supported by a team of full-time employees tasked with conducting our day-to-day information technology ("IT") operations (collectively, the "IT team"). Furthermore, the Partnership considers cybersecurity risks as part of, and has incorporated its cybersecurity program into, the Partnership's overall risk management processes. Through engagement with the guidance of the Federal Bureau of Investigation (FBI), Cybersecurity and Infrastructure Security Agency (CISA), Transportation Security Administration (TSA) and the U.S. Coast Guard (USCG), we seek to follow industry cybersecurity standards and protect our infrastructure against cyber attacks from domestic and international threats.

We seek to use a defense-in-depth approach for cybersecurity management, layers of technology, policies and training at all levels of the enterprise designed to keep the Partnership's assets secure and operational. We use various processes as part of our efforts to maintain the confidentiality, integrity and availability of our systems, including security threat intelligence, incident response, identity and access management, supply-chain security assessments, endpoint extended detection and response protection, network segmentation, data encryption, event monitoring and a Security Operations Center (SOC). In an effort to validate the effectiveness of our cybersecurity program and assess such program's compliance with legal and regulatory requirements, we engage third-party service providers to perform audits, assessments and penetration tests.

Cybersecurity awareness among our employees is promoted with regular training and awareness programs. All employees who have access to our systems are required to undergo annual cybersecurity training and, each year, our employees must review and acknowledge our cybersecurity policies. Further, our IT team is trained to understand how to manage, use and protect personally identifiable information. User access controls have been implemented to limit unauthorized access to sensitive information and critical systems. Employees are required to use multifactor authentication and keep their passwords confidential, among other measures.

We recognize that third-party service providers may introduce cybersecurity risks. In an effort to mitigate these risks, before contracting with certain technology service providers, when possible, we conduct due diligence to evaluate their cybersecurity capabilities. Additionally, we endeavor to include cybersecurity requirements in our contracts with these providers and endeavor to require them to adhere to security standards and protocols. Further, we also endeavor to engage with any third-party service providers with access to personally identifiable employee information to evaluate their security controls.

Finally, the Partnership maintains cybersecurity insurance coverage.

### **Impact of Risks from Cybersecurity Threats**

The energy industry's increasing dependence on information technology and operational technology to support critical functions, such as energy distribution and management activities, has heightened its vulnerability to cybersecurity incidents. Consequently, the global surge in cybersecurity incidents, whether caused by intentional attacks or accidental events, presents a significant challenge to our sector. As cybersecurity threats grow in complexity and scale, preventing, detecting, mitigating and remediating these incidents remains a continuous and increasingly demanding task for the industry. Compliance with evolving cybersecurity reporting requirements, such as those mandated by FERC, presents significant challenges. These regulations necessitate timely and detailed reporting of cyber incidents, demanding substantial resources and robust internal processes to ensure adherence. Failure to comply could result in legal penalties, increased regulatory scrutiny and reputational damage. Moreover, the dynamic nature of these requirements may lead to overlapping or inconsistent obligations, further complicating compliance efforts. Monitoring these developments and integrating them into our cybersecurity and compliance frameworks is essential to mitigate potential risks.

As of the date of this Annual Report on Form 10-K, though the Partnership and our service providers have experienced certain cybersecurity incidents, we are not aware of any cybersecurity threats that have materially affected, or are reasonably likely to materially affect, the Partnership, either financially or operationally. Cybersecurity incident response is a component of both the Partnership's cybersecurity program and the Partnership's business continuity plans, which are designed to limit service interruptions and provide for continued business operation in the event of disaster, whether physical, environmental or cyber in nature. However, we recognize that cybersecurity threats are continually evolving, and there remains a risk that a cybersecurity incident could potentially negatively impact the Partnership. Despite the implementation of our cybersecurity processes, we cannot guarantee that a significant cybersecurity attack will not occur. A successful attack on our information system or operational technology system could have significant consequences to our business, including the interruption of key services that our customers depend on. While we devote resources to our security measures to protect our systems and information,

these measures cannot provide absolute security. Due to the number of acquisitions made by the Partnership over the past few years and the time it takes to implement technology standards across the enterprise, certain assets may be in different stages of integration and may have incomplete cybersecurity controls applied. For additional information on cybersecurity risks, see “Item 1A. Risk Factors—*Cybersecurity attacks, data breaches and other disruptions affecting us, or our service providers, could materially and adversely affect our business, operations, reputation, and financial results; and — Our operations could be disrupted if our information systems fail, causing increased expenses and loss of sales.*”

### **Board of Directors’ Oversight and Management’s Role**

Our Chief Information Officer is responsible for assessing and managing the Partnership’s material risks from cybersecurity threats, including cybersecurity threat prevention, detection, mitigation and remediation for the combined organization, and oversees the Partnership’s functions of IT, cybersecurity, infrastructure and IT governance (including the Partnership’s IT team). Our Chief Information Officer has more than 35 years of experience leading business technology functions. The Partnership’s IT team supports the Chief Information Officer in our efforts to comply with applicable cybersecurity standards, establish effective cybersecurity protocols and protect the integrity, confidentiality and availability of our IT infrastructure. The members of this team have over 50 years of combined experience in the field of IT, including 20 years dedicated to cybersecurity, and hold various certifications, including Global Industrial Cyber Security Professional (GICSP), Certified Information Systems Security Professional (CISSP) and Certified Ethical Hacker (CEH) certifications. Our cyber incident response plan requires IT team members who detect suspicious activity in our IT environment to escalate that activity to a supervisor who then evaluates the threat. If necessary, the suspicious activity is reported to the Chief Information Officer. Management (including representatives from the legal, human resources, IT and corporate security departments) is notified by the IT team whenever a discovered cybersecurity incident may potentially have a significant impact on our business operations.

The Partnership’s Board of Directors has delegated the responsibility for the oversight of cybersecurity risks to the Audit Committee. The IT team provides periodic cybersecurity program updates to senior management and to the Audit Committee. Management also updates the Audit Committee as new risks are identified and regarding the steps taken to mitigate such risks. The Audit Committee reviews periodic reporting and updates regarding our cybersecurity risk management.

## **ITEM 2. PROPERTIES**

A description of our properties is included in “Item 1. Business.” In addition, we own office buildings for our executive offices in Dallas, Texas and office buildings in Newton Square, Pennsylvania; Houston, Texas and San Antonio, Texas. While we may require additional office space as our business expands, we believe that our existing facilities are adequate to meet our needs for the immediate future, and that additional facilities will be available on commercially reasonable terms as needed.

We believe that we have satisfactory title to or valid rights to use all of our material properties. Although some of our properties are subject to liabilities and leases, liens for taxes not yet due and payable, encumbrances securing payment obligations under non-competition agreements and immaterial encumbrances, easements and restrictions, we do not believe that any such burdens will materially interfere with our continued use of such properties in our business, taken as a whole. In addition, we believe that we have, or are in the process of obtaining, all required material approvals, authorizations, orders, licenses, permits, franchises and consents of, and have obtained or made all required material registrations, qualifications and filings with, the various state and local government and regulatory authorities which relate to ownership of our properties or the operations of our business.

Substantially all of our pipelines, which are described in “Item 1. Business,” are constructed on rights-of-way granted by the apparent record owners of the property. Lands over which pipeline rights-of-way have been obtained may be subject to prior liens that have not been subordinated to the right-of-way grants. We have obtained, where necessary, easement agreements from public authorities and railroad companies to cross over or under, or to lay facilities in or along, watercourses, county roads, municipal streets, railroad properties and state highways, as applicable. In some cases, properties on which our pipelines were built were purchased in fee. We also own and operate multiple natural gas and NGL storage facilities and own or lease other processing, treating and conditioning facilities in connection with our midstream operations.

## **ITEM 3. LEGAL PROCEEDINGS**

For information regarding legal proceedings, see Note 11 to our consolidated financial statements included in “Item 8. Financial Statements and Supplementary Data” in this Annual Report on Form 10-K for the year ended December 31, 2025.

Additionally, we have received notices of violations and potential fines under various federal, state and local provisions relating to the discharge of materials into the environment or protection of the environment. While we believe that even if any one or more of the following environmental proceedings were decided against us, it would not be material to our financial position, results of operations or cash flows, we are required to report environmental governmental proceedings if we reasonably believe that such proceedings reasonably could result in monetary sanctions in excess of \$1 million (previously \$0.3 million).

ETC Sunoco and Energy Transfer R&M (collectively, “Sunoco Defendants”) are defendants in lawsuits alleging MTBE contamination of groundwater. The plaintiffs, state-level governmental entities, assert product liability, nuisance, trespass, negligence, violation of environmental laws, and/or deceptive business practices claims. The plaintiffs seek to recover compensatory damages, and in some cases also seek natural resource damages, injunctive relief, punitive damages and attorneys’ fees.

As of March 31, 2023, Sunoco Defendants are defendants in two cases: one case initiated by the State of Maryland and one by the Commonwealth of Pennsylvania. The actions brought also named as defendants ETO, ETP Holdco and Sunoco Partners Marketing & Terminals L.P., now known as Energy Transfer Marketing & Terminals L.P.

It is reasonably possible that a loss may be realized in the remaining cases; however, we are unable to estimate the possible loss or range of loss in excess of amounts accrued. An adverse determination with respect to one or more of the MTBE cases could have a significant impact on results of operations during the period in which any such adverse determination occurs, but such an adverse determination likely would not have a material adverse effect on the Partnership’s consolidated financial position.

Sunoco LP, Aloha Petroleum and other Energy Transfer affiliates are defendants in lawsuits alleging liability for climate change impacts from greenhouse gas emissions in Hawaii, Maine and Vermont. Plaintiffs in these cases allege deceptive marketing and concealment of information about these effects, violations of state consumer protection and unfair trade practices laws, and seek certain equitable relief, statutory and civil penalties, punitive damages, disgorgement of profits and attorney’s fees. We are unable to estimate the possible loss or range of loss in excess of amounts accrued. Energy Transfer intends to vigorously defend the subject claims.

In late 2016, FERC Enforcement Staff began a non-public investigation related to Rover’s purchase and removal of a potentially historic home (known as the Stoneman House) while Rover’s application for permission to construct the new 711-mile interstate natural gas pipeline and related facilities was pending. On March 18, 2021, FERC issued an Order to Show Cause and Notice of Proposed Penalty (Docket No. IN19-4-000), ordering Rover to explain why it should not pay a \$20 million civil penalty for alleged violations of FERC regulations requiring certificate holders to be forthright in their submissions of information to the FERC. Rover filed its answer and denial to the order on June 21, 2021 and a surreply on September 15, 2021. FERC issued an order on January 20, 2022 setting the matter for hearing before an administrative law judge. On January 25, 2022, the chief judge assigned an administrative law judge and set a timeline for a prehearing conference.

On February 1, 2022, Energy Transfer and Rover filed a Complaint for Declaratory Relief in the United States District Court for the Northern District of Texas (“USDC”) seeking an order declaring that FERC must bring its enforcement action in federal district court (instead of before an administrative law judge). Also on February 1, 2022, Energy Transfer and Rover filed an expedited request to stay the proceedings before the FERC administrative law judge pending the outcome of the federal district court case. On May 24, 2022, the District Court ordered a stay of the FERC’s enforcement case and the District Court case pending the resolution of two cases pending before the United States Supreme Court. Arguments were heard in those cases on November 7, 2022. On April 14, 2023, the United States Supreme Court held against the government in both cases, finding that the federal district courts had jurisdiction to hear those suits and to resolve the parties’ constitutional challenges. The cases were remanded to the federal district courts for further proceedings.

On September 13, 2023 the District Court ordered that the District Court case would be stayed pending the resolution of another case pending before the United States Supreme Court and that the FERC enforcement case would remain stayed. On November 13, 2023, the FERC appealed the District Court order to the United States Court of Appeals for the Fifth Circuit. On December 11, 2023, FERC filed a motion to withdraw that appeal, which the Fifth Circuit granted on December 12, 2023. The FERC and District Court proceedings remain stayed pending resolution of the case pending before the United States Supreme Court. The Supreme Court issued a decision in that case on June 27, 2024. The FERC and District Court proceedings remain stayed at this time. The USDC set a scheduling conference for December 16, 2025. The parties filed a motion to continue the status conference on December 10, 2025 and on January 20, 2026 to extend the status conference to March 2026 for the purposes of the parties engaging in settlement discussions. The USDC has set the status conference for March 3, 2026. Energy Transfer and Rover intend to vigorously defend this claim.

In mid-2017, FERC Enforcement Staff began a non-public investigation regarding allegations that diesel fuel may have been included in the drilling mud at the Tuscarawas River horizontal directional drilling (“HDD”) operations. Rover and the Partnership are cooperating with the investigation. Enforcement Staff has provided Rover with a notice pursuant to Section 1b.19 of the FERC’s regulations that Enforcement Staff intends to recommend that the FERC pursue an enforcement action against Rover and the Partnership. The Partnership disagrees with Enforcement Staff’s findings and intends to vigorously defend against any potential penalty. On December 16, 2021, FERC issued an Order to Show Cause and Notice of Proposed Penalty (Docket No. IN17-4-000), ordering Rover to show cause why it should not be found to have violated Section 7(e) of the

NGA, Section 157.20 of FERC's regulations, and the Rover Pipeline Certificate Order, and assessed civil penalties of \$40 million.

Rover and Energy Transfer filed their answer to this order on March 21, 2022, and Enforcement Staff filed a reply on April 20, 2022. Rover and Energy Transfer filed their surreply to this order on May 13, 2022. FERC has taken no further action on the case since that time. Any and all losses, including any fines and penalties from government agencies, resulting from the general contractor's alleged actions in conducting such HDD operations are subject to indemnity rights in favor of Rover and the Partnership. Given the stage of the proceedings, the Partnership is unable at this time to provide an assessment of the potential outcome or range of potential liability, if any; however, the Partnership believes the indemnity described above will be applicable to the penalty proposed by Enforcement Staff and intends to vigorously defend itself against the subject claims.

On November 3, 2017, the State of Ohio and the Ohio Environmental Protection Agency ("Ohio EPA") filed suit against Rover and other defendants (collectively, the "Defendants") seeking to recover approximately \$2.6 million in civil penalties allegedly owed and certain injunctive relief related to permit compliance. The Defendants filed several motions to dismiss, which were granted on all counts. The Ohio EPA appealed, and on December 9, 2019, the Fifth District court of appeals entered a unanimous judgment affirming the trial court. The Ohio EPA sought review from the Ohio Supreme Court. On April 22, 2020, the Ohio Supreme Court granted the review. On March 17, 2022, the Ohio Supreme Court reversed in part and remanded to the Ohio trial court. The Ohio Supreme Court agreed with Rover that the State of Ohio had waived its rights under Section 401 of the Clean Water Act but remanded to the trial court to determine whether any of the allegations fell outside the scope of the waiver. On remand, the Ohio EPA voluntarily dismissed four of the other five defendants and dismissed one of its counts against Rover. In its Fourth Amended Complaint, the Ohio EPA removed all paragraphs that alleged violations by the four dismissed defendants, including those where the dismissed defendants were alleged to have acted jointly with Rover or others. At a June 2, 2022, status conference, the trial judge set a schedule for Rover and the other remaining defendant to file motions to dismiss the Fourth Amended Complaint. On August 1, 2022, Rover and the other remaining defendant each filed their respective motions. Briefing on those motions was completed on November 4, 2022. By order issued on October 20, 2023, the trial judge dismissed the Ohio EPA's Fourth Amended Petition. On November 17, 2023, the State of Ohio appealed the trial judge's decision to Ohio's Fifth District Court of Appeals. The State filed its initial brief on January 8, 2024 and Energy Transfer's and Rover's responsive brief was filed February 20, 2024. The State filed a reply brief on February 26, 2024. Oral argument on the appeal was held on August 27, 2024. On October 1, 2024, Ohio's Fifth District Court of Appeals affirmed the trial judge's decision. The State of Ohio sought permission to appeal this decision from the Ohio State Supreme Court. Energy Transfer and Rover have opposed such permission. On January 28, 2025, the Ohio State Supreme Court declined to hear the State's appeal. The time period has passed for the State of Ohio to seek reconsideration of this Order with the Ohio Supreme Court. On April 25, 2025, the State of Ohio filed a Petition for Writ of Certiorari with the U.S. Supreme Court. Rover filed a Brief in Opposition on June 30, 2025. The State of Ohio filed a reply brief on July 11, 2025. On October 6, 2025, the U.S. Supreme Court denied the State of Ohio's Petition for Writ of Certiorari, concluding this matter.

On February 3, 2022, the State of New Mexico, ex rel. Hector Balderas, Attorney General filed a complaint against ETO, Transwestern, Kinder Morgan, Inc., El Paso Natural Gas L.L.C. and Northwest Pipeline, LLC in Cause No. D-101-CV-2022-00174 in the First Judicial District Court, County of Santa Fe, State of New Mexico, seeking to recover statewide damages for contamination with PCBs used for decades by the oil and gas industry in the operation and maintenance of pipeline infrastructure. The complaint alleged discharge or release of PCBs into the natural environment from compressor stations in connection with the operation of Transwestern. The State sought damages in the range of \$50 million to \$60 million plus the attorneys' fees from Transwestern. The parties agreed to a settlement in September 2025. The parties executed a settlement agreement in February 2026 and dismissed the case.

On June 29, 2022, near Henderson, Tennessee, a Mid Valley mowing contractor struck an exposed section of the 22-inch diameter Hornsby to Denver line segment while mowing. The brush cutter mowing implement cut open the pipeline and released an estimated 4,345 barrels of crude oil into the surrounding area. Approximately 3,343 barrels of crude oil were recovered during initial remediation activities with the remaining volume contained within the materials removed and disposed of in accordance with applicable environmental laws and regulations. Corrective action was completed pursuant to the Tennessee Department of Environment and Conservation's ("TDEC") Division of Remediation -Voluntary Action Program ("VAP") and on May 23, 2023, Mid Valley received a No Further Action letter from the TDEC for the corrective action work related to the incident. Additional environmental work was completed in late August 2023 along the pipeline right-of-way to address a small oil seep which required soil removal and site restoration. The TDEC was notified and a follow-up report will be submitted to the agency documenting completion. Mid Valley received a Notice of Federal Interest regarding the incident and is awaiting final invoicing from the federal agencies (United States Environmental Protection Agency and United States Fish and Wildlife Service) and their consultants related to the incident. Mid Valley has also supplied PHMSA with information as requested. On October 13, 2023, Mid Valley received a Notice of Proposed Safety Order ("NOPSO") from PHMSA related to this incident and other historical incidents on the Mid Valley pipeline system. Following an informal consultation with PHMSA, PHMSA executed a Consent Agreement with Mid Valley on April 24, 2025. No other government agency action has

occurred. Groundwater monitoring wells were abandoned on June 12, 2023, which concluded environmental related activities associated with the incident site. No injuries resulted from the incident.

On June 26, 2023, Plaintiffs Michael and Cecilia Weinman ("Plaintiffs") filed suit in Chester County, Tennessee, against Mid Valley and other Energy Transfer defendants asserting claims for negligence, trespass, and other tort claims and alleging damage to their property stemming from the crude oil release. Plaintiffs alleged actual monetary damages and punitive damages totaling \$380 million. The Energy Transfer defendants were served on or around July 5, 2023, and timely filed a notice of removal of the lawsuit to federal court in the Western District of Tennessee Eastern Division on August 2, 2023. On August 8, 2023, Plaintiffs filed a notice of voluntary dismissal of their lawsuit without prejudice. On or about August 7, 2024, Plaintiffs refiled their suit with slight modifications and removing their negligence per se claim in Chester County, Tennessee. On or about August 27, 2024, the first two Energy Transfer defendants were served. On or about September 13, 2024, Plaintiffs filed a notice of voluntary dismissal of their latest lawsuit without prejudice.

On November 29, 2023, the United States Coast Guard issued the final invoice for all federal expenses related to the incident response in the amount of \$90,000. The expenses have been validated and sent for payment.

On October 13, 2023, Mid Valley Pipeline Company LLC, ("Mid Valley") received a NOPSO from the PHMSA related to various historical accidents and complaints reported to PHMSA on the Mid Valley system. The NOPSO requests that Mid Valley perform several proposed corrective measures within six months of receipt of a Safety Order; however, in response, Mid Valley requested that PHMSA engage in informal consultations prior to issuing a Safety Order in an effort for the parties to potentially enter into a Consent Agreement and Order. Informal consultation is underway. In the event a Consent Agreement and Order is not reached between the parties during this process, Mid Valley may request a Hearing on the NOPSO. The informal consultation process has concluded with PHMSA and Mid Valley reaching agreement on the Corrective Measures. PHMSA issued the Consent Agreement which was signed by Mid Valley on March 21, 2025. The fully executed version of the Consent Agreement was received by Mid Valley on April 24, 2025. All items required by the Consent Agreement have been completed and documentation submitted to PHMSA for review except for the bi-annual report on the internal corrosion control program which is due in March 2026.

On June 15, 2023, PHMSA issued a Notice of Probable Violation, Proposed Civil Penalty, and Proposed Compliance Order (collectively "NOPV"), CPF 4-2023-011-NOPV, identifying three probable violations with compliance order actions associated with two of them and civil penalties proposed in an amount totaling approximately \$2 million. The NOPV related to a PHMSA Accident Investigation Division investigation of a pigging incident which occurred on March 26, 2020 at the Partnership's Borchert Station in Kansas and resulted in a fatality. The Partnership challenged PHMSA's alleged violations and related civil penalties and compliance order actions contained in the NOPV. After an administrative hearing, which was held on April 24, 2024 before a PHMSA Presiding Official, the PHMSA Southwest Region recommended to remain relatively firm on the NOPV, only slightly reducing the civil penalty by approximately \$19 thousand. The Partnership challenged the PHMSA administrative process in federal court, alleging among other things that PHMSA's in-house administrative enforcement process was unconstitutional. In response, PHMSA has withdrawn the NOPV, terminated its in-house administrative action, and elected to file an enforcement action in federal court. The Partnership paid approximately \$1.4 million and settled the case on December 31, 2025. The Court terminated the case on January 12, 2026.

On August 31, 2023, the United States Department of Justice filed suit in the District Court for the Southern District of Texas (Corpus Christi Division) captioned as United States v. Energy Transfer (R&M), LLC et al. Civil Action No. 2:23-cv-214, against Sunoco and two other parties seeking to recover past CERCLA response costs allegedly incurred by the EPA in excess of \$500,000 and certain declaratory relief related to compliance. Suntime Refining Company (Sunoco as successor) is alleged to have arranged for the transport and disposal of refinery wastes containing hazardous substances at the Brine Service Company Superfund Site in Corpus Christi, Nueces County, TX. At this time, we cannot determine the likelihood of any liability in this matter; however, Sunoco intends to defend and dispute the allegations of the lawsuit, including but not limited to the joint and several liability determination sought. This lawsuit is included among the matters described in our discussion of our other environmental remediation matters. Please see Note 11 to our consolidated financial statements included in "Item 8. Financial Statements and Supplementary Data."

On January 31, 2025, a release of refined products was discovered from the 14-inch Twin-Oaks to Newark Pipeline in Upper Makefield Township, Bucks County, Pennsylvania. The release allegedly impacted certain properties and water wells near the release location. On February 13, 2025, SPLP voluntarily entered into the Pennsylvania remediation program through a Notice of Intent to Remediate, which was revised on March 4, 2025. On March 6, 2025, the Pennsylvania Department of Environmental Protection issued an Administrative Order directing that SPLP conduct the remediation. On May 2, 2025, PHMSA entered a Consent Order, adopting an agreement SPLP entered into with PHMSA on April 30, 2025. Finally, on April 9, 2025, SPLP was advised that the Bucks County District Attorney's Office has referred the matter to the Pennsylvania Attorney General's Office, Environmental Crimes Unit. The Attorney General's Office has accepted the referral and opened an

investigation. Potential charges, penalties or damages are not known at this time. PHMSA issued a Warning Letter to the Partnership on September 11, 2025 alleging certain violations of the Consent Order but stating that it would not conduct additional enforcement action at this time. In addition, certain property owners near the release location have filed civil suits in Philadelphia County Court, 1st Judicial District of Pennsylvania, against SPLP, Energy Transfer and Energy Transfer R&M, alleging damages for lost property values, nuisance, remediation costs and other tort damages relating to the release. We cannot predict the ultimate outcome of this litigation or the amount of time and expense that will be required to resolve it.

On February 13, 2025, SPLP received a Notice of Proposed Safety Order (“NOPSO”) from PHMSA related to a release of jet fuel on the Twin Oaks Discharge pipeline system in Bucks County, Pennsylvania. The NOPSO made certain preliminary findings and proposes that SPLP take certain measures with respect to the system to ensure safety. SPLP engaged in informal settlement discussions with PHMSA and entered into a Consent Agreement that was finalized into a Consent Order on May 2, 2025. We cannot predict the outcome, timeline or costs associated with this administrative action.

On March 3, 2025, SPLP received an Administrative Order from the Pennsylvania Department of Environmental Protection regarding the release of jet fuel from the Twin Oaks Discharge pipeline system in Bucks County, Pennsylvania. SPLP has complied with all of the Interim Remedial Measures and Remediation requirements identified in the administrative order that were required to be completed as of the date of this submission. SPLP will continue to complete and comply all the requirements of the administrative order. We cannot predict the timeline or costs associated with this administrative order.

#### **ITEM 4. MINE SAFETY DISCLOSURES**

Not applicable.

## PART II

### ITEM 5. MARKET FOR REGISTRANT'S COMMON UNITS, RELATED UNITHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

#### Description of Units

As of February 13, 2026, there were 9,702 holders of record of our Common Units, which number does not separately account for individual participants in securities positions listings. Common units represent limited partner interests in us that entitle the holders to the rights and privileges specified in Energy Transfer's Partnership Agreement.

As of December 31, 2025, limited partners own an aggregate 99.9% limited partner interest in us. Our General Partner owns an aggregate 0.1% general partner interest in us. Our Common Units are registered under the Exchange Act, and are listed for trading on the NYSE under the ticker symbol "ET." Each holder of a common unit is entitled to one vote per unit on all matters presented to the limited partners for a vote. In addition, if at any time any person or group (other than our General Partner and its affiliates) owns beneficially 20% or more of all common units, any Common Units owned by that person or group may not be voted on any matter and are not considered to be outstanding when sending notices of a meeting of unitholders (unless otherwise required by law), calculating required votes, determining the presence of a quorum or for other similar purposes under our Partnership Agreement. The common units are entitled to distributions of Available Cash as described in "Cash Distribution Policy."

#### Energy Transfer Class A Units

As of February 13, 2026, the Partnership had outstanding 851,501,729 Class A units ("Energy Transfer Class A Units") representing limited partner interests in the Partnership to the General Partner. The Energy Transfer Class A Units are entitled to vote together with the Partnership's common units, as a single class, except as required by law. Additionally, Energy Transfer's Partnership Agreement provides that, under certain circumstances, upon the issuance by the Partnership of additional Common Units or any securities that have voting rights that are pari passu with the Partnership Common Units, the Partnership will issue to any holder of Energy Transfer Class A Units additional Energy Transfer Class A Units such that the holder maintains a voting interest in the Partnership that is identical to its voting interest in the Partnership prior to such issuance of common units. The Energy Transfer Class A Units are not entitled to distributions and otherwise have no economic attributes.

#### Energy Transfer Preferred Units

As of December 31, 2025, the Partnership had the following series of preferred units outstanding:

| Series of Preferred Units   | Units Issued and Outstanding | Liquidation Preference per Unit |
|---|------------------------------|---------------------------------|
| Series B Fixed-to-Floating Rate Cumulative Redeemable Perpetual Preferred Units | 550,000                      | \$ 1,000                        |
| Series G Fixed-Rate Reset Cumulative Redeemable Perpetual Preferred Units       | 1,484,780                    | 1,000                           |
| Series H Fixed-Rate Reset Cumulative Redeemable Perpetual Preferred Units       | 900,000                      | 1,000                           |
| Series I Fixed Rate Perpetual Preferred Units                                   | 41,464,179                   | 9.1273                          |

The Partnership redeemed all of the Series A Preferred Units, Series C Preferred Units, Series D Preferred Units and Series E Preferred Units during 2024, and all of the Series F Preferred Units in 2025.

Additional information for each series of outstanding preferred units, including information on distributions and redemption, is available in Note 8 to our consolidated financial statements included in "Item 8. Financial Statements and Supplementary Data."

#### Cash Distribution Policy

**General.** Energy Transfer will distribute all of its "Available Cash" to its Unitholders and its General Partner within 50 days following the end of each fiscal quarter.

**Definition of Available Cash.** Available Cash is defined in the Partnership Agreement and generally means, with respect to any calendar quarter, all cash on hand at the end of such quarter less the amount of cash reserves that are necessary or appropriate in the reasonable discretion of the General Partner to:

- provide for the proper conduct of its business;
- comply with applicable law and/or debt instrument or other agreement; and

- provide funds for distributions to Unitholders and its General Partner in respect of any one or more of the next four quarters.

#### **Recent Sales of Unregistered Securities**

None.

#### **Issuer Purchases of Equity Securities**

None.

#### **Securities Authorized for Issuance Under Equity Compensation Plans**

For information on the securities authorized for issuance under Energy Transfer's equity compensation plans, see "Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Unitholder Matters."

### **ITEM 6. [RESERVED]**

### **ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

(Tabular dollar and unit amounts, except per unit data, are in millions)

Energy Transfer LP is a Delaware limited partnership whose common units are publicly traded on the NYSE under the ticker symbol "ET."

The following discussion of our consolidated financial condition and results of operations for the years ended December 31, 2025 and 2024 should be read in conjunction with our consolidated financial statements and accompanying notes thereto included in "Item 8. Financial Statements and Supplementary Data" of this report. This discussion includes forward-looking statements that are subject to risks and uncertainties. Actual results may differ substantially from the statements we make in this section due to a number of factors that are discussed in "Item 1A. Risk Factors" of this report.

Discussion and analysis of matters pertaining to the year ended December 31, 2023 and year-to-year comparisons between the years ended December 31, 2024 and 2023 are not included in this Form 10-K, but can be found under Part II, Item 7 of our annual report on Form 10-K for the year ended December 31, 2024 that was filed with the SEC on February 16, 2024.

Unless the context requires otherwise, references to "we," "us," "our," the "Partnership" and "Energy Transfer" mean Energy Transfer LP and its consolidated subsidiaries.

#### **OVERVIEW**

The primary activities in which we are engaged, which are located in the United States, are as follows:

- natural gas operations, including the following:
  - natural gas midstream and intrastate transportation and storage;
  - interstate natural gas transportation and storage; and
- crude oil, NGL and refined products transportation, terminalling services and acquisition and marketing activities, as well as NGL storage and fractionation services and LNG regasification.

In addition, we own investments in other businesses, including Sunoco LP and USAC, both of which are master limited partnerships, and we own the managing member of SunocoCorp, a publicly traded limited liability company.

Energy Transfer derives cash flows from distributions related to its investment in its subsidiaries, including Sunoco LP and USAC. The amount of cash that our subsidiaries distribute to us is based on earnings from their respective business activities and the amount of available cash. Energy Transfer's primary cash requirements are for distributions to its partners, capital expenditures, general and administrative expenses and debt service requirements. Energy Transfer distributes its available cash remaining after satisfaction of the aforementioned cash requirements to its Unitholders on a quarterly basis.

We expect our subsidiaries to utilize their resources, along with cash from their operations, to fund their announced growth capital expenditures and working capital needs; however, Energy Transfer may issue debt or equity securities from time to time as we deem prudent to provide liquidity for new capital projects of our subsidiaries or for other partnership purposes.

## **General**

Our primary objective is to increase the level of our distributable cash flow to our Unitholders over time by pursuing a business strategy that is currently focused on growing our subsidiaries' natural gas and liquids businesses through, among other things, pursuing certain construction and expansion opportunities relating to our subsidiaries' existing infrastructure and acquiring certain strategic operations and businesses or assets. The actual amounts of cash that we will have available for distribution will primarily depend on the amount of cash our subsidiaries generate from their operations.

Our reportable segments are as follows:

- intrastate transportation and storage;
- interstate transportation and storage;
- midstream;
- NGL and refined products transportation and services;
- crude oil transportation and services;
- investment in Sunoco LP;
- investment in USAC; and
- all other.

## **Recent Developments**

### **Acquisitions**

#### ***Terminal Facilities Acquisition***

In the third quarter of 2025, Energy Transfer completed the acquisition of two terminal facilities for total cash consideration of approximately \$176 million.

#### ***Parkland Acquisition by Sunoco LP***

On October 31, 2025, Sunoco LP completed the previously announced acquisition of Parkland whereby Sunoco Retail LLC, a wholly owned corporate subsidiary of Sunoco LP, indirectly acquired all the outstanding shares of Parkland, in exchange for cash and SunocoCorp units that were contributed by SunocoCorp to Sunoco LP at the close of the acquisition. Under the terms of the agreement, Parkland shareholders received 0.295 SunocoCorp units and C\$19.80 for each Parkland share. Parkland shareholders could elect, in the alternative, to receive C\$44.00 per Parkland share in cash or 0.536 SunocoCorp units for each Parkland share, subject to proration to ensure that the aggregate consideration payable in connection with the transaction would not exceed C\$19.80 in cash per Parkland share outstanding as of immediately before close and 0.295 SunocoCorp units per Parkland share outstanding as of immediately before close. In connection with the closing of the Parkland acquisition, Sunoco LP paid approximately \$2.6 billion to Parkland's shareholders and transferred 51,517,198 SunocoCorp common units, which Sunoco LP had received from SunocoCorp in exchange for its issuance of 51,517,198 Class D Units to SunocoCorp.

#### ***TanQuid Acquisition by Sunoco LP***

On January 16, 2026, Sunoco LP completed the previously announced acquisition of TanQuid for approximately €465 million (approximately \$540 million as of January 16, 2026), including approximately €300 million of assumed debt, less approximately €39 million of cash acquired. TanQuid owns and operates 15 fuel terminals in Germany and one fuel terminal in Poland. The transaction was funded using cash on hand and amounts available under Sunoco LP's credit facility.

#### ***Other Sunoco LP Acquisitions***

In the first quarter of 2025, Sunoco LP acquired fuel equipment, motor fuel inventory and supply agreements in two separate transactions for total consideration of approximately \$17 million. Aggregate consideration included \$12 million in cash and 91,776 newly issued Sunoco LP common units, which had an aggregate acquisition-date fair value of approximately \$5 million.

In the second quarter of 2025, Sunoco LP acquired a total of 151 fuel distribution consignment sites in three separate transactions for total consideration of approximately \$105 million plus working capital. Aggregate consideration included \$92 million in cash and 251,646 newly issued Sunoco LP common units which had an aggregate acquisition-date fair value of approximately \$13 million.

In the third quarter of 2025, Sunoco LP acquired approximately 70 fuel distribution consignment sites and 100 supply agreements in five separate transactions for total cash consideration of approximately \$85 million, plus working capital.

In the fourth quarter of 2025, Sunoco LP acquired a total of 27 fuel distribution consignment sites and 36 dealer sites, as well as commercial customers, in four separate transactions for total cash consideration of approximately \$64 million, plus working capital.

### ***J-W Power Company Acquisition by USAC***

On January 12, 2026, USAC completed the J-W Power Company acquisition, a large privately-held provider of compression services in the United States, for total consideration of approximately \$860 million, consisting of approximately \$430 million in cash and approximately 18.2 million newly issued USAC common units.

## **Regulatory Update**

### ***Interstate Natural Gas Transportation Regulation***

#### ***Rate Regulation***

Effective January 2018, the 2017 Tax Cuts and Jobs Act (the “Tax Act”) changed several provisions of the federal tax code, including a reduction in the maximum corporate tax rate. On March 15, 2018, in a set of related proposals, the FERC addressed treatment of federal income tax allowances in regulated entity rates. The FERC issued a Revised Policy Statement on Treatment of Income Taxes (“Revised Policy Statement”) stating that it will no longer permit master limited partnerships to recover an income tax allowance in their cost-of-service rates. The FERC issued the Revised Policy Statement in response to a remand from the U.S. Court of Appeals for the District of Columbia Circuit (“D.C. Circuit”) in *United Airlines v. FERC*, in which the court determined that the FERC had not justified its conclusion that a pipeline organized as a master limited partnership would not “double recover” its taxes under the current policy by both including an income tax allowance in its cost of service and earning a return on equity calculated using the discounted cash flow methodology. On July 18, 2018, the FERC clarified that a pipeline organized as a master limited partnership will not be precluded in a future proceeding from arguing and providing evidentiary support that it is entitled to an income tax allowance and demonstrating that its recovery of an income tax allowance does not result in a double-recovery of investors’ income tax costs. On July 31, 2020, the D.C. Circuit issued an opinion upholding the FERC’s decision denying a separate master limited partnership recovery of an income tax allowance and its decision not to require the master limited partnership to refund accumulated deferred income tax balances. In light of the rehearing order’s clarification regarding an individual entity’s ability to argue in support of recovery of an income tax allowance and the court’s subsequent opinion upholding denial of an income tax allowance to a master limited partnership, the impact of the FERC’s policy on the treatment of income taxes on the rates we can charge for FERC-regulated transportation services is unknown at this time.

Even without application of the FERC’s rate making-related policy statements and rulemakings, the FERC or our shippers may challenge the cost-of-service rates we charge. The FERC’s establishment of a just and reasonable rate is based on many components, including return on equity and tax-related components, but also other pipeline costs that will continue to affect FERC’s determination of just and reasonable cost-of-service rates. Moreover, we receive revenues from our pipelines based on a variety of rate structures, including cost-of-service rates, negotiated rates, discounted rates and market-based rates. Many of our interstate pipelines, such as Tiger Pipeline, Midcontinent Express Pipeline and Fayetteville Express Pipeline, have negotiated market rates that were agreed to by customers in connection with long-term contracts entered into to support the construction of the pipelines. Other systems, such as Florida Gas Transmission Pipeline, Transwestern and Panhandle, have a mix of tariff rate, discount rate and negotiated rate agreements. The revenues we receive from natural gas transportation services we provide pursuant to cost-of-service based rates may decrease in the future as a result of changes to FERC policies, combined with the reduced corporate federal income tax rate established in the Tax Act. The extent of any revenue reduction related to our cost-of-service rates, if any, will depend on a detailed review of all of our cost-of-service components and the outcomes of any challenges to our rates by the FERC or our shippers.

On July 18, 2018, the FERC issued a final rule establishing procedures to evaluate rates charged by the FERC-jurisdictional gas pipelines in light of the Tax Act and the FERC’s Revised Policy Statement. By an order issued on January 16, 2019, the FERC initiated a review of Panhandle’s then-existing rates pursuant to Section 5 of the NGA to determine whether the rates charged by Panhandle are just and reasonable and set the matter for hearing. On August 30, 2019, Panhandle filed a general rate proceeding under Section 4 of the NGA. The NGA Section 5 and Section 4 proceedings were consolidated by order of the Chief Judge on October 1, 2019. The initial decision by the administrative law judge was issued on March 26, 2021, and on December 16, 2022, the FERC issued its order on the initial decision. On January 17, 2023, Panhandle and the Michigan Public Service Commission each filed a request for rehearing of FERC’s order on the initial decision, which were denied by operation of law as of February 17, 2023. On March 23, 2023, Panhandle appealed these orders to the D.C. Circuit, and the Michigan

Public Service Commission also subsequently appealed these orders. On April 25, 2023, the D.C. Circuit consolidated Panhandle's and Michigan Public Service Commission's appeals and stayed the consolidated appeal proceeding while the FERC further considered the requests for rehearing of its December 16, 2022 order. On September 25, 2023, the FERC issued its order addressing arguments raised on rehearing and compliance, which denied our requests for rehearing. Panhandle filed its Petition for Review with the D.C. Circuit regarding the September 25, 2023 order. On October 25, 2023, Panhandle filed a limited request for rehearing of the September 25 order addressing arguments raised on rehearing and compliance, which was subsequently denied by operation of law on November 27, 2023. On November 17, 2023, Panhandle provided refunds to shippers and on November 30, 2023, Panhandle submitted a refund report regarding the consolidated rate proceedings, which was protested by several parties. On January 5, 2024, the FERC issued a second order addressing arguments raised on rehearing in which it modified certain discussion from its September 25, 2023 order and sustained its prior conclusions. Panhandle has timely filed its Petition for Review with the D.C. Circuit regarding the January 5, 2024 order. On May 28, 2024, the FERC issued an order rejecting Panhandle's refund report. On June 27, 2024, Panhandle filed a revised refund report in compliance with the FERC's May 28, 2024 order rejecting Panhandle's refund report and a request for rehearing of the FERC's May 28, 2024 order rejecting Panhandle's refund report, and provided revised refunds to shippers, or in the case of shippers whose revised refunds are less than the original amounts refunded, notices of upcoming debits. One party protested Panhandle's revised refund report, and Panhandle submitted a response to the protest on July 24, 2024. By notice issued July 29, 2024, Panhandle's rehearing request was deemed denied. In an order issued September 9, 2024, FERC addressed arguments raised on rehearing, modified the discussion in the May 28, 2024 order and continued to reach the same result. On September 18, 2024, Panhandle petitioned the D.C. Circuit for review of the September 9, 2024, July 29, 2024, and May 28, 2024 orders. On December 5, 2024, the FERC issued an order rejecting Panhandle's June 27, 2024, refund report, ordering a corrected refund report and directing the issuance of additional refunds. On January 3, 2025, Panhandle submitted an adjusted refund report as well as a request for rehearing of the FERC's December 5, 2024 order. The FERC approved the adjusted refund report by letter order dated January 23, 2025. On February 3, 2025, the FERC issued a Notice of Denial of Rehearing by Operation of Law and Providing for Further Consideration. On March 24, 2025, Panhandle petitioned the D.C. Circuit for review of the December 5, 2024 and February 3, 2025 orders. On April 4, 2025, the FERC issued an Order on Rehearing and Clarification. On May 16, 2025, Panhandle petitioned the D.C. Circuit for review of the April 4, 2025 order. On May 19, 2025, the D.C. Circuit consolidated all cases before it and placed the consolidated cases in abeyance pending further order of the D.C. Circuit. On August 12, 2025, the D.C. Circuit issued an order returning all cases to the court's active docket and issued a briefing schedule. Panhandle filed its initial brief on November 10, 2025, and FERC's brief is due on February 9, 2026.

### Pipeline Certification

The FERC issued a Notice of Inquiry ("NOI") on April 19, 2018, thereby initiating a review of its policies on certification of natural gas pipelines, including an examination of its long-standing Policy Statement on Certification of New Interstate Natural Gas Pipeline Facilities, issued in 1999, that is used to determine whether to grant certificates for new pipeline projects. On February 18, 2021, the FERC issued another NOI ("2021 NOI"), reopening its review of the 1999 Policy Statement. Comments on the 2021 NOI were due on May 26, 2021; we filed comments in the FERC proceeding. In September 2021, FERC issued a Notice of Technical Conference on Greenhouse Gas Mitigation related to natural gas infrastructure projects authorized under Sections 3 and 7 of the NGA. A technical conference was held on November 19, 2021, and post-technical conference comments were submitted to the FERC on January 7, 2022.

On February 18, 2022, the FERC issued two new policy statements: (1) an Updated Policy Statement on the Certification of New Interstate Natural Gas Facilities ("2022 Certificate Policy Statement") and (2) a Policy Statement on the Consideration of Greenhouse Gas Emissions in Natural Gas Infrastructure Project Reviews ("GHG Policy Statement"), to be effective that same day. On March 24, 2022, the FERC issued an order designating the 2022 Certificate Policy Statement and the GHG Policy Statement as draft policy statements, and requested further comments. The FERC stated that it will not apply the now draft policy statements to pending applications or applications to be filed at FERC until it issues any final guidance on these topics. Comments on the 2022 Certificate Policy Statement and GHG Policy Statement were due on April 25, 2022, and reply comments were due on May 25, 2022. On January 24, 2025, the FERC issued an order withdrawing the draft GHG Policy Statement and terminating the proceeding. On September 12, 2025, the FERC issued an order withdrawing the draft 2022 Certificate Policy Statement and terminating the proceeding.

### ***Interstate Common Carrier Regulation***

Liquids pipelines transporting in interstate commerce are regulated by FERC as common carriers under the ICA. Under the ICA, the FERC utilizes an indexing rate methodology which, as currently in effect, allows common carriers to change their rates within prescribed ceiling levels that are tied to changes in the Producer Price Index for Finished Goods, or PPI-FG. Many existing pipelines utilize the FERC liquids index to change transportation rates annually. The indexing methodology is applicable to existing rates, with the exclusion of market-based rates. The FERC's indexing methodology is subject to review every five years.

On December 17, 2020, FERC issued an order establishing a new index of PPI-FG plus 0.78%. The FERC received requests for rehearing of its December 17, 2020 order and on January 20, 2022, granted rehearing and modified the oil index. Specifically, for the five-year period commencing July 1, 2021 and ending June 30, 2026, FERC-regulated liquids pipelines charging indexed rates are permitted to adjust their indexed ceilings annually by PPI-FG minus 0.21%. FERC directed liquids pipelines to recompute their ceiling levels for July 1, 2021 through June 30, 2022, as well as the ceiling levels for the period July 1, 2022 to June 30, 2023, based on the new index level. Where an oil pipeline's filed rates exceed its ceiling levels, FERC ordered such oil pipelines to reduce the rate to bring it into compliance with the recomputed ceiling level to be effective March 1, 2022. Some parties sought rehearing of the January 20 order with FERC, which was denied by FERC on May 6, 2022. Certain parties appealed the January 20 and May 6 orders. On July 26, 2024, the D.C. Circuit ruled in *LEPA v. FERC* that FERC violated the Administrative Procedure Act because the January 20 order modified the index without following notice and comment. As a result, the D.C. Circuit vacated the January 20 order and on September 17, 2024, the FERC reinstated the index level established by its original December 17 order, directed pipelines to file an informational filing to show their recomputed ceiling levels reflecting the reinstated index level and stated that pipelines may file to prospectively increase their indexed rates to their recomputed levels. On October 17, 2024, the FERC issued a Supplemental NOPR that proposes a reduction to the currently effective index by one percent. On November 20, 2025, the FERC withdrew the Supplemental NOPR and confirmed that the PPI-FG-0.78% index established in December 2020 will remain in place through June 30, 2026. On the same day, the FERC approved limited relief for pipelines. Oil pipelines with index-based rates may recover applicable rate differences from March 1, 2022 to September 17, 2024 but only if such pipelines charged the maximum rate allowed under the applicable index ceiling during the relevant time period. Parties have since filed requests for clarification or rehearing, as well as court appeals, to determine whether pipelines may recover rate differences in other scenarios. Also on November 20, 2025, the FERC issued a Notice of Proposed Rulemaking for the Five-Year Review of the Oil Pipeline Index proposing an index level of Producer Price Index for Finished Goods (PPI-FG) minus 1.42% for the period from July 1, 2026 to June 30, 2031.

On October 20, 2022, the FERC issued a policy statement on the Standard Applied to Complaints Against Oil Pipeline Index Rate Changes to establish guidelines regarding how the FERC will evaluate shipper complaints against oil pipeline index rate increases. Specifically, the policy statement adopted the proposal in the FERC's earlier Notice of Inquiry issued on March 25, 2020 to eliminate the "Substantially Exacerbate Test" as the preliminary screen applied to complaints against index rate increases and instead adopt the proposal to apply the "Percentage Comparison Test" as the preliminary screen for both protests and complaints against index rate increases. At this time, we cannot determine the effect of a change in the FERC's preliminary screen for complaints against index rates changes, however, a revised screen would result in a threshold aligned with the existing threshold for protests against index rate increases. Any complaint or protest raised by a shipper could materially and adversely affect our financial condition, results of operations or cash flows.

#### ***Air Quality Standards***

In 2023, the U.S. Environmental Protection Agency ("EPA") finalized its Good Neighbor Plan (the "Plan") which seeks to reduce nitrogen oxide pollution from power plants and other industrial facilities from 23 upwind states which the EPA determined is contributing to National Ambient Air Quality Standards (NAAQS) nonattainment and interfering with maintenance of the 2015 ozone NAAQS in downwind states. As part of the Plan, the EPA announced that it would be issuing prescriptive emission standards for several sectors, including certain new and existing internal combustion engines of a certain size used in pipeline transportation of natural gas. The EPA's final rule was to become effective on August 4, 2023, and the prescribed emission standards were scheduled to be effective in 2026. However, on March 12, 2025, the EPA announced plans to end the Plan.

Operators and industry groups have challenged the Plan in the D.C. Circuit, as well as the legal predicates to the individual upwind states' inclusion in the Plan in the regional circuits. The effectiveness of the rule is currently stayed in the nine states within the Partnership's footprint, by nature of judicial stays of the legal predicate to the Plan, by judicial stay of the Plan itself by the U.S. Supreme Court, or by the administrative stay issued by the EPA in October 2024. On June 18, 2025, the U.S. Supreme Court ruled that the regional circuits are the appropriate venue for the proceedings. On July 30, 2025, the Court of Appeals for the Tenth Circuit placed the case in abeyance pending the EPA's reconsideration of its disapproval of upwind states' state implementation plans addressing their Plan obligations. Proceedings challenging the Plan in the D.C. Circuit were also placed in abeyance on May 2, 2025 pending the EPA's reconsideration of the Plan. The EPA is preparing a proposed rulemaking as part of the reconsideration process, and on January 27, 2026, the EPA announced its proposal to approve state implementation plans for eight states, including those in which we operate, which would resolve those states' obligations under the Good Neighbor Plan. We cannot predict with any certainty the substance of any later proposed rule or the potential impacts on the Partnership.

The Partnership currently estimates that the existing final rule would require retrofitting or replacement of approximately 192 engines in its interstate and intrastate natural gas transportation and storage operations. The Partnership is involved in challenging application of the Plan in the nine states impacted within its footprint. Compliance with the Plan (if implementation

is not stayed or otherwise delayed) will still require substantial capital expenditures which could adversely affect our business in future periods. However, at this time, we are still assessing the potential costs of this rule and, given uncertainties resulting from the multiple legal challenges filed against the Plan in various states, in the D.C. Circuit and the U.S. Supreme Court, we cannot predict with any certainty what the final costs of compliance for the Plan for the Partnership ultimately may be.

### ***OECD Pillar Two Global Minimum Tax***

The acquisition of Parkland brought the Partnership into scope of the Pillar Two global minimum tax regime. Several jurisdictions in which we now operate have enacted legislation implementing the Organization for Economic Co-operation and Development ("OECD") Pillar Two global minimum tax framework. These rules generally impose a 15% minimum top-up tax on the profits of large multinational enterprises. The Partnership has accrued \$1 million of current tax expense related to Pillar Two global minimum taxes subsequent to the Parkland acquisition in 2025.

On January 5, 2026, the OECD released administrative guidance that provides safe harbors for U.S. parented multinational groups under the Pillar Two framework. Effective for fiscal years beginning on or after January 1, 2026, U.S. parented multinational groups would be exempt from the main charging provisions under the Pillar Two framework. Management expects that, starting in 2026, the Partnership should not be subject to top-up taxes in certain low-tax jurisdictions to the extent legislation adopting the safe harbors is enacted in the jurisdictions in which the Partnership operates. However, the timing of legislative enactment in the various countries is uncertain and the magnitude of such impacts cannot be reasonably estimated at this time.

### **Trends and Outlook**

Overall, we continue to believe the Partnership's outlook is strong, as it has a stable business that has demonstrated its ability to manage through various market cycles. We expect future growth to be supported by production improvements and increased utilization of our existing assets, as well as continued strong domestic and international demand for our products.

We previously announced, and recently updated, the Partnership's outlook for 2026, which reflected our expectation for an increase in the Partnership's Adjusted EBITDA, which includes the benefit of significant new projects ramping up and/or coming online and also includes the benefit of recent acquisitions by Sunoco LP and USAC.

While we anticipate that current and projected commodity prices and the related impact to activity levels in both the upstream and midstream sectors will continue to impact our business, we cannot predict the ultimate magnitude of that impact and expect it to be varied across our operations, depending on the region, customer, type of service, contract term and other factors.

For 2026 and beyond, we expect continued increasing demand from new data centers, power plants and LNG exports to support increased production, while increased global demand for petrochemicals and NGL feedstocks is expected to support higher volumes of NGL production and exports on existing assets and assets currently being developed or under construction. In addition, in the United States, we expect a constructive regulatory environment, which we anticipate being favorable for project development and our operations in general.

Ultimately, the extent to which our business will be impacted by future market developments depends on factors beyond our control, which are highly uncertain and cannot be predicted. Our previously announced outlook includes an expected increase in growth capital expenditures up to a range of \$5.0 billion to \$5.5 billion in 2026, primarily on projects enhancing the Partnership's natural gas and NGL networks. While we anticipate a healthy capital expenditure program in 2026 and beyond, we expect to continue to be prudent going forward as we allocate capital across our business segments. See "Liquidity and Capital Resources" for additional information on our capital expenditures over the last two years and our forecasted capital expenditures for 2026.

We currently have ample liquidity to fund our business, and we do not anticipate any liquidity concerns in the immediate future (see "Liquidity and Capital Resources"). In addition, we continue to have access to the debt capital markets on generally favorable terms. We will continue to evaluate growth projects and acquisitions as such opportunities may be identified in the future.

### **Results of Operations**

We report Segment Adjusted EBITDA and consolidated Adjusted EBITDA as measures of segment performance. We define Segment Adjusted EBITDA and consolidated Adjusted EBITDA as total Partnership earnings before interest, taxes, depreciation, depletion, amortization and other non-cash items, such as non-cash compensation expense, gains and losses on disposals of assets, the allowance for equity funds used during construction, unrealized gains and losses on commodity risk management activities, inventory valuation adjustments, non-cash impairment charges, losses on extinguishments of debt, certain foreign currency transaction gains and losses and other non-operating income or expense items, as well as certain non-

recurring gains and losses. Inventory valuation adjustments that are excluded from the calculation of Adjusted EBITDA represent only the changes in lower of cost or market reserves on inventory that is carried at LIFO. These amounts are unrealized valuation adjustments applied to Sunoco LP's fuel volumes remaining in inventory at the end of the period.

Segment Adjusted EBITDA and consolidated Adjusted EBITDA reflect amounts for unconsolidated affiliates based on the same recognition and measurement methods used to record equity in earnings of unconsolidated affiliates. Adjusted EBITDA related to unconsolidated affiliates excludes the same items with respect to the unconsolidated affiliate as those excluded from the calculation of Segment Adjusted EBITDA and consolidated Adjusted EBITDA, such as interest, taxes, depreciation, depletion, amortization and other non-cash items. Although these amounts are excluded from Adjusted EBITDA related to unconsolidated affiliates, such exclusion should not be understood to imply that we have control over the operations and resulting revenues and expenses of such affiliates. We do not control our unconsolidated affiliates; therefore, we do not control the earnings or cash flows of such affiliates. The use of Segment Adjusted EBITDA or Adjusted EBITDA related to unconsolidated affiliates as an analytical tool should be limited accordingly.

Segment Adjusted EBITDA, as reported for each segment in the following table, is analyzed for each segment in the section titled "Segment Operating Results." Adjusted EBITDA is a non-GAAP measure used by industry analysts, investors, lenders and rating agencies to assess the financial performance and the operating results of the Partnership's fundamental business activities and should not be considered in isolation or as a substitution for net income, income from operations, cash flows from operating activities or other GAAP measures.

### Year Ended December 31, 2025 Compared to the Year Ended December 31, 2024

#### Consolidated Results

|  | Years Ended December 31, |           | Change   |
|--|--------------------------|-----------|----------|
|  | 2025                     | 2024      |          |
| Segment Adjusted EBITDA:                             |                          |           |          |
| Intrastate transportation and storage                | \$ 1,213                 | \$ 1,358  | \$ (145) |
| Interstate transportation and storage                | 1,936                    | 1,828     | 108      |
| Midstream  | 3,164                    | 2,910     | 254      |
| NGL and refined products transportation and services | 4,143                    | 4,179     | (36)     |
| Crude oil transportation and services                | 2,942                    | 3,177     | (235)    |
| Investment in Sunoco LP                              | 2,047                    | 1,457     | 590      |
| Investment in USAC                                   | 614                      | 584       | 30       |
| All other  | (75)                     | (10)      | (65)     |
| Adjusted EBITDA (consolidated)                       | \$ 15,984                | \$ 15,483 | \$ 501   |

|   | Years Ended December 31, |           | Change   |
|---|--------------------------|-----------|----------|
|   | 2025                     | 2024      |          |
| Reconciliation of net income to Adjusted EBITDA:                  |                          |           |          |
| Net income  | \$ 5,708                 | \$ 6,565  | \$ (857) |
| Depreciation, depletion and amortization                          | 5,682                    | 5,165     | 517      |
| Interest expense, net of interest capitalized                     | 3,474                    | 3,125     | 349      |
| Income tax expense  | 350                      | 541       | (191)    |
| Impairment losses and other                                       | 285                      | 52        | 233      |
| Non-cash compensation expense                                     | 148                      | 151       | (3)      |
| Unrealized (gains) losses on commodity risk management activities | (130)                    | 56        | (186)    |
| Inventory valuation adjustments (Sunoco LP)                       | 156                      | 86        | 70       |
| Losses on extinguishments of debt                                 | 34                       | 12        | 22       |
| Adjusted EBITDA related to unconsolidated affiliates              | 726                      | 692       | 34       |
| Equity in earnings of unconsolidated affiliates                   | (419)                    | (379)     | (40)     |
| Gain on sale of West Texas assets (Sunoco LP)                     | —                        | (586)     | 586      |
| Other, net  | (30)                     | 3         | (33)     |
| Adjusted EBITDA (consolidated)                                    | \$ 15,984                | \$ 15,483 | \$ 501   |

*Net Income.* For the year ended December 31, 2025 compared to the prior year, net income decreased \$857 million, or 13%, primarily due to a \$586 million gain recognized by Sunoco LP on its sale of West Texas assets in the prior year, a \$517 million increase in depreciation, depletion and amortization and a \$349 million increase in interest expense, net of interest capitalized, partially offset by a \$501 million increase in Adjusted EBITDA, a \$191 million decrease in income tax expense and a \$186 million favorable impact from unrealized gains and losses on commodity risk management activities. These changes are discussed in more detail below.

*Adjusted EBITDA (consolidated).* For the year ended December 31, 2025 compared to the prior year, Adjusted EBITDA increased \$501 million, or 3%, primarily due to increases in our midstream segment, our interstate transportation and storage segment and our investment in Sunoco LP segment, partially offset by decreases in our intrastate transportation and storage segment and our crude oil transportation and services segment.

Additional information on changes impacting Adjusted EBITDA for the year ended December 31, 2025 compared to the prior year is available below and in “Segment Operating Results.”

*Depreciation, Depletion and Amortization.* Depreciation, depletion and amortization expense increased primarily due to additional depreciation and amortization from assets recently placed in service and recent acquisitions.

*Interest Expense, Net of Interest Capitalized.* Interest expense, net of interest capitalized, increased primarily due to an increase in aggregate debt balances following the acquisitions of NuStar, Parkland and WTG Midstream Holdings LLC and the refinancing of certain preferred units with long-term debt.

*Income Tax Expense.* For the year ended December 31, 2025 compared to the same period last year, income tax expense decreased primarily due to a taxable gain recognized by a corporate subsidiary of Sunoco LP upon its completion of the sale of convenience stores to 7-Eleven, Inc. in 2024.

*Impairment Losses and Other.* For the year ended December 31, 2025, impairment losses and other primarily reflected an impairment of the assets associated with the Lake Charles LNG export project due to the suspension of the project. For the year ended December 31, 2024 impairment losses and other were primarily related to Sunoco LP’s termination of a lease in June 2024.

*Unrealized (Gains) Losses on Commodity Risk Management Activities.* The unrealized gains and losses on our commodity risk management activities include changes in fair value of commodity derivatives and the hedged inventory included in designated fair value hedging relationships. Information on the unrealized gains and losses within each segment are included in “Segment Operating Results” below, and additional information on the commodity-related derivatives, including notional volumes, maturities and fair values, is available in “Item 7A. Quantitative and Qualitative Disclosures About Market Risk” and in Note 14 to our consolidated financial statements included in “Item 8. Financial Statements and Supplementary Data.”

*Inventory Valuation Adjustments (Sunoco LP).* Inventory valuation adjustments represent changes in lower of cost or market using the last-in, first-out method on Sunoco LP’s inventory. These amounts are unrealized valuation adjustments applied to fuel volumes remaining in inventory at the end of the period. For the years ended December 31, 2025 and 2024, decreases in fuel prices caused the lower of cost or market reserve requirements to increase by \$156 million and \$86 million, respectively, which reduced net income.

*Losses on Extinguishment of Debt.* For the year ended December 31, 2025, losses on extinguishment of debt primarily related to Sunoco LP’s termination of bridge financing related to the Parkland acquisition. For year ended December 31, 2024, losses on extinguishment of debt included amounts recognized upon debt redemptions by Energy Transfer, Sunoco LP and USAC.

*Adjusted EBITDA Related to Unconsolidated Affiliates and Equity in Earnings of Unconsolidated Affiliates.* See additional information in “Supplemental Information on Unconsolidated Affiliates” and “Segment Operation Results” below.

*Gain on Sale of West Texas Assets (Sunoco LP).* The gain on sale of West Texas assets relates to the gain recognized by Sunoco LP upon completion of the sale of convenience stores to 7-Eleven, Inc. in April 2024.

*Other, net.* Other, net primarily includes amortization of regulatory assets and other income and expense amounts.

## Supplemental Information on Unconsolidated Affiliates

The following table presents financial information related to unconsolidated affiliates:

|   | Years Ended December 31, |        | Change |
|---|--------------------------|--------|--------|
|   | 2025                     | 2024   |        |
| <b>Equity in earnings of unconsolidated affiliates:</b> |                          |        |        |
| Citrus  | \$ 153                   | \$ 136 | \$ 17  |
| MEP   | 74                       | 63     | 11     |
| White Cliffs  | 17                       | 19     | (2)    |
| Explorer  | 26                       | 34     | (8)    |
| SESH  | 57                       | 45     | 12     |
| Other   | 92                       | 82     | 10     |
| Total equity in earnings of unconsolidated affiliates   | \$ 419                   | \$ 379 | \$ 40  |

### Adjusted EBITDA related to unconsolidated affiliates<sup>(1)</sup>:

|  |        |        |       |
|--|--------|--------|-------|
| Citrus   | \$ 341 | \$ 329 | \$ 12 |
| MEP  | 108    | 98     | 10    |
| White Cliffs   | 37     | 38     | (1)   |
| Explorer   | 43     | 53     | (10)  |
| SESH   | 62     | 53     | 9     |
| Other  | 135    | 121    | 14    |
| Total Adjusted EBITDA related to unconsolidated affiliates | \$ 726 | \$ 692 | \$ 34 |

### Distributions received from unconsolidated affiliates:

|   |        |        |        |
|---|--------|--------|--------|
| Citrus  | \$ 128 | \$ 129 | \$ (1) |
| MEP   | 105    | 86     | 19     |
| White Cliffs  | 37     | 38     | (1)    |
| Explorer  | 27     | 36     | (9)    |
| SESH  | 52     | 59     | (7)    |
| Other   | 94     | 83     | 11     |
| Total distributions received from unconsolidated affiliates | \$ 443 | \$ 431 | \$ 12  |

<sup>(1)</sup> These amounts represent our proportionate share of the Adjusted EBITDA of our unconsolidated affiliates and are based on our equity in earnings or losses of our unconsolidated affiliates adjusted for our proportionate share of the unconsolidated affiliates' interest, depreciation, depletion, amortization, non-cash items and taxes.

## Segment Operating Results

We evaluate segment performance based on Segment Adjusted EBITDA, which we believe is an important performance measure of the core profitability of our operations. This measure represents the basis of our internal financial reporting and is one of the performance measures used by senior management in deciding how to allocate capital resources among business segments.

The following tables identify the components of Segment Adjusted EBITDA, which is calculated as follows:

- *Segment margin, operating expenses and selling, general and administrative expenses.* These amounts represent the amounts included in our consolidated financial statements that are attributable to each segment.
- *Unrealized gains or losses on commodity risk management activities and inventory valuation adjustments.* These are the unrealized amounts that are included in cost of products sold to calculate segment margin. These amounts are not included in Segment Adjusted EBITDA; therefore, the unrealized losses are added back and the unrealized gains are subtracted to calculate the segment measure.

- *Non-cash compensation expense.* These amounts represent the total non-cash compensation recorded in operating expenses and selling, general and administrative expenses related to equity awards. This expense is not included in Segment Adjusted EBITDA and therefore is added back to calculate the segment measure.
- *Adjusted EBITDA related to unconsolidated affiliates.* Adjusted EBITDA related to unconsolidated affiliates excludes the same items with respect to the unconsolidated affiliate as those excluded from the calculation of Segment Adjusted EBITDA, such as interest, taxes, depreciation, depletion, amortization and other non-cash items. Although these amounts are excluded from Adjusted EBITDA related to unconsolidated affiliates, such exclusion should not be understood to imply that we have control over the operations and resulting revenues and expenses of such affiliates. We do not control our unconsolidated affiliates; therefore, we do not control the earnings or cash flows of such affiliates.

In the following analysis of segment operating results, a measure of segment margin is reported for segments with sales revenues. Segment margin is a non-GAAP financial measure and is presented herein to assist in the analysis of segment operating results and particularly to facilitate an understanding of the impacts that changes in sales revenues have on the segment performance measure of Segment Adjusted EBITDA. Segment margin is similar to the GAAP measure of gross margin, except that segment margin excludes charges for depreciation, depletion and amortization. Among the GAAP measures reported by the Partnership, the most directly comparable measure to segment margin is Segment Adjusted EBITDA; a reconciliation of segment margin to Segment Adjusted EBITDA is included in the following tables for each segment where segment margin is presented.

In addition, for certain segments, the following sections include information on the components of segment margin by sales type, which components are included in order to provide additional disaggregated information to facilitate the analysis of segment margin and Segment Adjusted EBITDA. For example, these components include transportation margin, storage margin and other margin. These components of segment margin are calculated consistent with the calculation of segment margin; therefore, these components also exclude charges for depreciation, depletion and amortization.

## Segment Operating Results

### *Intrastate Transportation and Storage*

|   | Years Ended December 31, |          | Change   |
|---|--------------------------|----------|----------|
|   | 2025                     | 2024     |          |
| Natural gas transported (BBtu/d)  | 13,946                   | 13,418   | 528      |
| Withdrawals from storage natural gas inventory (BBtu)                                 | 8,225                    | 20,905   | (12,680) |
| Revenues  | \$ 3,996                 | \$ 3,053 | \$ 943   |
| Cost of products sold   | 2,525                    | 1,390    | 1,135    |
| Segment margin  | 1,471                    | 1,663    | (192)    |
| Unrealized (gains) losses on commodity risk management activities                     | 15                       | (35)     | 50       |
| Operating expenses, excluding non-cash compensation expense                           | (257)                    | (246)    | (11)     |
| Selling, general and administrative expenses, excluding non-cash compensation expense | (46)                     | (50)     | 4        |
| Adjusted EBITDA related to unconsolidated affiliates                                  | 24                       | 24       | —        |
| Other   | 6                        | 2        | 4        |
| Segment Adjusted EBITDA   | \$ 1,213                 | \$ 1,358 | \$ (145) |

*Volumes.* For the year ended December 31, 2025 compared to the prior year, transported volumes of gas on our Texas intrastate pipelines increased primarily due to more third-party transportation. Transported volumes reported above exclude volumes attributable to purchases and sales of gas for our pipelines' own accounts and the optimization of any unused capacity.

*Segment Margin.* The table below represents the components of our intrastate transportation and storage segment margin. Amounts previously reported for transportation fees, natural gas sales and other, and retained fuel revenues have been adjusted

to reflect the reclassification of certain amounts to conform to the current period presentation; these changes did not impact total segment margin.

|  | Years Ended December 31, |          | Change   |
|--|--------------------------|----------|----------|
|  | 2025                     | 2024     |          |
| Transportation fees  | \$ 891                   | \$ 875   | \$ 16    |
| Natural gas sales and other (excluding unrealized gains and losses)    | 445                      | 659      | (214)    |
| Retained fuel margin (excluding unrealized gains and losses)           | 40                       | 24       | 16       |
| Storage margin, including fees (excluding unrealized gains and losses) | 110                      | 70       | 40       |
| Unrealized gains (losses) on commodity risk management activities      | (15)                     | 35       | (50)     |
| Total segment margin   | \$ 1,471                 | \$ 1,663 | \$ (192) |

*Segment Adjusted EBITDA.* For the year ended December 31, 2025 compared to the prior year, Segment Adjusted EBITDA related to our intrastate transportation and storage segment decreased due to the net impact of the following:

- a decrease of \$214 million in realized natural gas sales and other primarily due to lower pipeline optimization as a result of lower volatility in natural gas prices, lower optimization volumes with shifts to long-term third-party contracts from the Permian Basin and narrower price spreads in the first half of the year; and
- an increase of \$11 million in operating expenses primarily due to increases in ad valorem taxes and employee costs; partially offset by
- an increase of \$40 million in storage margin primarily due to higher storage optimization;
- an increase of \$16 million in transportation fees primarily due to the volume shift to long-term third-party contracts from our optimization group on our Texas system, partially offset by \$16 million recognized in the prior period from the recovery of certain disputed fees on our Texas system;
- an increase of \$16 million in retained fuel margin due to favorable gas pricing; and
- a decrease of \$4 million in selling, general and administrative expenses primarily due to lower legal fees.

#### *Interstate Transportation and Storage*

|  | Years Ended December 31, |          | Change |
|--|--------------------------|----------|--------|
|  | 2025                     | 2024     |        |
| Natural gas transported (BBtu/d)   | 18,018                   | 16,877   | 1,141  |
| Natural gas sold (BBtu/d)  | 41                       | 32       | 9      |
| Revenues   | \$ 2,445                 | \$ 2,296 | \$ 149 |
| Cost of products sold  | 9                        | 9        | —      |
| Segment margin   | 2,436                    | 2,287    | 149    |
| Operating expenses, excluding non-cash compensation, amortization, accretion and other non-cash expenses           | (887)                    | (807)    | (80)   |
| Selling, general and administrative expenses, excluding non-cash compensation, amortization and accretion expenses | (121)                    | (129)    | 8      |
| Adjusted EBITDA related to unconsolidated affiliates   | 507                      | 477      | 30     |
| Other  | 1                        | —        | 1      |
| Segment Adjusted EBITDA  | \$ 1,936                 | \$ 1,828 | \$ 108 |

*Volumes.* For the year ended December 31, 2025 compared to the prior year, transported volumes increased primarily due to more capacity sold and higher utilization across the segment due to increased demand.

*Segment Adjusted EBITDA.* For the year ended December 31, 2025 compared to the prior year, Segment Adjusted EBITDA related to our interstate transportation and storage segment increased due to the net impact of the following:

- an increase of \$149 million in segment margin primarily due to a \$79 million increase in transportation revenue from several of our interstate pipeline systems due to higher rates on higher contracted volumes, a \$40 million negative impact in the prior period related to the conclusion of a rate case on our Panhandle system, a \$24 million increase in operational gas sales and liquids and a \$5 million increase in storage and parking revenue;

- an increase of \$30 million in Adjusted EBITDA related to unconsolidated affiliates primarily due to an \$11 million increase from our Citrus joint venture, an \$11 million increase from our Midcontinent Express Pipeline joint venture and a \$7 million increase from our Southeast Supply Header joint venture; and
- a decrease of \$8 million in selling, general and administrative expenses primarily due to a decrease in professional fees; partially offset by
- an increase of \$80 million in operating expenses primarily due to a \$43 million increase from the resolution of a prior period ad valorem tax obligation on our Rover system and a \$36 million increase in transportation expense on affiliate pipelines.

**Midstream**

|   | Years Ended December 31, |           | Change   |
|---|--------------------------|-----------|----------|
|   | 2025                     | 2024      |          |
| Gathered volumes (BBtu/d)   | 21,205                   | 20,272    | 933      |
| NGLs produced (MBbls/d)   | 1,149                    | 1,019     | 130      |
| Equity NGLs (MBbls/d)   | 64                       | 58        | 6        |
| Revenues  | \$ 12,503                | \$ 11,199 | \$ 1,304 |
| Cost of products sold   | 7,391                    | 6,637     | 754      |
| Segment margin  | 5,112                    | 4,562     | 550      |
| Operating expenses, excluding non-cash compensation expense                           | (1,784)                  | (1,550)   | (234)    |
| Selling, general and administrative expenses, excluding non-cash compensation expense | (193)                    | (199)     | 6        |
| Adjusted EBITDA related to unconsolidated affiliates                                  | 25                       | 23        | 2        |
| Other   | 4                        | 74        | (70)     |
| Segment Adjusted EBITDA   | \$ 3,164                 | \$ 2,910  | \$ 254   |

*Volumes.* For the year ended December 31, 2025 compared to the prior year, gathered volumes increased primarily due to newly acquired assets, as well as additional and upgraded plants in the Permian region, partially offset by lower dry gas gathering volumes in the Northeast and Ark-La-Tex regions. NGL production increased primarily due to recently acquired assets and increased Permian plant utilization.

*Segment Adjusted EBITDA.* For the year ended December 31, 2025 compared to the prior year, Segment Adjusted EBITDA related to our midstream segment increased due to the net impact of the following:

- an increase of \$414 million in segment margin primarily due to recently acquired assets and higher volumes in the Permian region;
- an increase of \$160 million in segment margin due to the non-recurring recognition of certain amounts associated with Winter Storm Uri in 2021, which represents the remainder of midstream segment margin from Winter Storm Uri that had not already been recognized;
- an increase of \$32 million in segment margin due to higher natural gas prices of \$133 million, partially offset by lower NGL prices of \$101 million;
- a decrease of \$6 million in selling, general and administrative expenses primarily due to a legal settlement; and
- an increase of \$2 million in Adjusted EBITDA related to unconsolidated affiliates due to a contract restructuring; partially offset by
- an increase of \$234 million in operating expenses due to a \$206 million increase related to recently acquired assets and assets placed in service, a \$33 million increase in employee costs, and a \$10 million increase related to increased volumes and repairs in the Permian region, partially offset by a \$13 million decrease primarily due to ad valorem taxes, retainage credits, and tax audit penalties;
- a decrease of \$70 million in other income due to the recognition of proceeds from a business interruption claim in September 2024;
- a decrease of \$28 million in segment margin due a \$14 million decrease on our Jackalope gathering system and a \$14 million decrease from intersegment transportation fees related to a regulatory order impacting prior period and current period rates; and

- a decrease of \$27 million in segment margin due to lower dry gas gathering volumes in the Northeast and Ark-La-Tex regions.

***NGL and Refined Products Transportation and Services***

|   | Years Ended December 31, |           | Change  |
|---|--------------------------|-----------|---------|
|   | 2025                     | 2024      |         |
| NGL transportation volumes (MBbls/d)  | 2,341                    | 2,206     | 135     |
| Refined products transportation volumes (MBbls/d)                                     | 594                      | 579       | 15      |
| NGL and refined products terminal volumes (MBbls/d)                                   | 1,577                    | 1,469     | 108     |
| NGL fractionation volumes (MBbls/d)   | 1,135                    | 1,110     | 25      |

| Unrealized (gains) losses on commodity risk management activities                     | (93)                     | 38        | (131)   |
| Operating expenses, excluding non-cash compensation expense                           | (1,066)                  | (957)     | (109)   |
| Selling, general and administrative expenses, excluding non-cash compensation expense | (172)                    | (160)     | (12)    |
| Adjusted EBITDA related to unconsolidated affiliates                                  | 125                      | 134       | (9)     |
| Other   | 1                        | —         | 1       |
| Segment Adjusted EBITDA   | \$ 4,143                 | \$ 4,179  | \$ (36) |

*Volumes.* For the year ended December 31, 2025 compared to the prior year, NGL transportation and fractionation volumes increased primarily due to higher volumes from the Permian region. Terminal volumes also increased as result of recently acquired assets.

*Segment Margin.* The table below presents the components of our NGL and refined products transportation and services segment margin. Certain transportation fees previously reported within marketing margin have been reclassified to transportation margin to conform to the current period presentation; these changes did not impact total segment margin.

|   | Years Ended December 31, |          | Change |
|---|--------------------------|----------|--------|
|   | 2025                     | 2024     |        |
| Fractionators and refinery services margin                        | \$ 945                   | \$ 935   | \$ 10  |
| Transportation margin   | 2,830                    | 2,602    | 228    |
| Storage margin  | 326                      | 315      | 11     |
| Terminal services margin  | 1,013                    | 984      | 29     |
| Marketing margin  | 140                      | 326      | (186)  |
| Unrealized gains (losses) on commodity risk management activities | 94                       | (38)     | 132    |
| Total segment margin  | \$ 5,348                 | \$ 5,124 | \$ 224 |

*Segment Adjusted EBITDA.* For the year ended December 31, 2025 compared to the prior year, Segment Adjusted EBITDA related to our NGL and refined products transportation and services segment decreased due to the net impact of the following:

- a decrease of \$186 million in marketing margin (excluding unrealized gains and losses on commodity risk management activities) primarily due to lower premiums from the sale of blended gasoline and from the sale of propane and butane for export due to less favorable market prices. In addition, we realized lower gains due to the timing of the settlement of NGL and refined product inventory hedges. This timing, which was the result of market price movements on hedged physical product, resulted in the recognition of significant gains in the fourth quarter of 2024, as well as reduced gains in the fourth quarter of 2025, a significant portion of which we anticipate will be recognized during the first quarter of 2026;
- an increase of \$109 million in operating expenses primarily due to \$34 million in one-time investigation and remediation costs, a \$28 million increase in costs driven by higher volumes across our system, a \$22 million increase in employee costs, a \$16 million increase in reserves related to the transportation revenues recognized in connection with a regulatory order impacting prior period and current period rates as discussed below, and a \$9 million increase from project related expenses;
- an increase of \$12 million in selling, general and administrative expenses primarily due to increased costs from recently acquired assets and legal settlement received in 2024; and

- a decrease of \$9 million in Adjusted EBITDA related to unconsolidated affiliates due to lower throughput on certain of our joint venture pipelines; partially offset by
- an increase of \$228 million in transportation margin primarily due to a \$148 million increase resulting from higher throughput and contractual rate escalations on our NGL pipeline systems, a \$73 million increase related to a regulatory order impacting prior period and current period rates and a \$7 million increase resulting from higher throughput and contractual rate escalations on our refined pipeline systems;
- an increase of \$29 million in terminal services margin primarily due to a \$19 million increase from higher throughput and storage at our refined product terminals and a \$24 million increase in fees from loading volumes for export at our Nederland and Marcus Hook terminals. These increases were partially offset by a \$14 million decrease due to fog related closures in December 2025, which we expect to make up in the first quarter of 2026.
- an increase of \$11 million in storage margin primarily due to timing of deficiency payments and cavern withdrawals; and
- an increase of \$10 million in fractionators and refinery services margin primarily due to higher throughput.

**Crude Oil Transportation and Services**

|   | Years Ended December 31, |           | Change     |
|---|--------------------------|-----------|------------|
|   | 2025                     | 2024      |            |
| Crude oil transportation volumes (MBbls/d)  | 7,014                    | 6,612     | 402        |
| Crude oil terminals volumes (MBbls/d)   | 3,258                    | 3,346     | (88)       |
| Revenue   | \$ 26,478                | \$ 28,539 | \$ (2,061) |
| Cost of products sold   | 22,465                   | 24,407    | (1,942)    |
| Segment margin  | 4,013                    | 4,132     | (119)      |
| Unrealized (gains) losses on commodity risk management activities                     | (25)                     | 16        | (41)       |
| Operating expenses, excluding non-cash compensation expense                           | (927)                    | (852)     | (75)       |
| Selling, general and administrative expenses, excluding non-cash compensation expense | (152)                    | (149)     | (3)        |
| Adjusted EBITDA related to unconsolidated affiliates                                  | 33                       | 28        | 5          |
| Other   | —                        | 2         | (2)        |
| Segment Adjusted EBITDA   | \$ 2,942                 | \$ 3,177  | \$ (235)   |

**Volumes.** For the year ended December 31, 2025 compared to the prior year, crude oil transportation volumes were higher due to continued growth on our Texas pipeline system, our gathering systems, and from the ET-S Permian joint venture with Sunoco LP, partially offset by lower volumes on our Bakken Pipeline. Crude terminal volumes were lower primarily due to Gulf Coast refinery maintenance and lower volumes received from our Bakken Pipeline system.

**Segment Adjusted EBITDA.** For the year ended December 31, 2025 compared to the prior year, Segment Adjusted EBITDA related to our crude oil transportation and services segment decreased due to the net impact of the following:

- a decrease of \$160 million in segment margin (excluding unrealized gains and losses on commodity risk management activities) primarily due to a decrease of \$206 million on our joint venture Bakken Pipeline system due to lower transportation volumes, a decrease of \$22 million on our Bakken gathering systems, a decrease of \$20 million from product sales, a legal accrual of \$20 million, and a \$12 million decrease on our Texas Pipeline system from lower rates, partially offset by an increase of \$30 million related to a regulatory order impacting prior period and current period rates, and a \$92 million increase from assets contributed upon the formation of the ET-S Permian joint venture in the third quarter of 2024; and
- an increase of \$75 million in operating expenses primarily due to a \$23 million increase in expenses associated with assets contributed to the ET-S Permian joint venture in third quarter of 2024, a \$22 million increase in employee expenses, a \$14 million increase in volume-related expenses, an \$11 million increase in reserves related to a regulatory order impacting prior period and current period rates and an \$8 million increase in right of way lease expenses.

**Investment in Sunoco LP**

|  | Years Ended December 31, |           | Change   |
|--|--------------------------|-----------|----------|
|  | 2025                     | 2024      |          |
| Revenues   | \$ 25,201                | \$ 22,693 | \$ 2,508 |
| Cost of products sold  | 22,409                   | 20,595    | 1,814    |
| Segment margin   | 2,792                    | 2,098     | 694      |
| Unrealized (gains) losses on commodity risk management activities            | (11)                     | 12        | (23)     |
| Operating expenses, excluding non-cash compensation expense                  | (873)                    | (611)     | (262)    |
| Selling, general and administrative, excluding non-cash compensation expense | (283)                    | (266)     | (17)     |
| Adjusted EBITDA related to unconsolidated affiliates                         | 221                      | 101       | 120      |
| Inventory valuation adjustments  | 156                      | 86        | 70       |
| Other, net   | 45                       | 37        | 8        |
| Segment Adjusted EBITDA  | \$ 2,047                 | \$ 1,457  | \$ 590   |

The Investment in Sunoco LP segment reflects the consolidated results of Sunoco LP.

*Segment Adjusted EBITDA.* For the year ended December 31, 2025 compared to the prior year, Segment Adjusted EBITDA related to the Investment in Sunoco LP segment increased due to the net impact of the following:

- an increase of \$741 million in segment margin (excluding unrealized gains and losses on commodity risk management activities and inventory valuation adjustments) primarily related to the acquisitions of Parkland, NuStar and Zenith European terminals. NuStar was acquired in May 2024 and the prior period only reflected eight months of results as well as an increase in fuel volumes and increased volume from transmix blending activities. These increases were partially offset by a decrease of \$50 million from Sunoco LP's deconsolidation of certain of NuStar's assets in connection with the formation of ET-S Permian effective July 1, 2024; and
- an increase of \$120 million in Adjusted EBITDA related to unconsolidated affiliates related to ET-S Permian; partially offset by
- an increase of \$262 million in operating expenses, excluding non-cash compensation expense, due to increased costs resulting from the full-year impact of NuStar's operations and two months of Parkland's operations. This increase was partially offset by a decrease of \$6 million from Sunoco LP's deconsolidation of certain of NuStar's assets in connection with the formation of ET-S Permian effective July 1, 2024; and
- an increase of \$17 million in selling, general and administrative expenses, excluding non-cash compensation expense, due to the full-year impact of NuStar's operations and two months of Parkland's operations, as well as one-time transaction related expenses associated with the Parkland acquisition in 2025, partially offset by one-time NuStar acquisition expenses in 2024.

**Investment in USAC**

|  | Years Ended December 31, |        | Change |
|--|--------------------------|--------|--------|
|  | 2025                     | 2024   |        |
| Revenues   | \$ 998                   | \$ 950 | \$ 48  |
| Cost of products sold  | 148                      | 146    | 2      |
| Segment margin   | 850                      | 804    | 46     |
| Operating expenses, excluding non-cash compensation expense                  | (180)                    | (166)  | (14)   |
| Selling, general and administrative, excluding non-cash compensation expense | (56)                     | (54)   | (2)    |
| Segment Adjusted EBITDA  | \$ 614                   | \$ 584 | \$ 30  |

The investment in USAC segment reflects the consolidated results of USAC.

*Segment Adjusted EBITDA.* For the year ended December 31, 2025 compared to last year, Segment Adjusted EBITDA related to our investment in USAC segment increased due to the net impact of the following:

- an increase of \$46 million in segment margin primarily due to higher market-based and CPI-based rates; partially offset by

- an increase of \$14 million in operating expenses primarily due to an increase in employee costs associated with increased revenue-generating horsepower.

**All Other**

|   | Years Ended December 31, |          | Change   |
|---|--------------------------|----------|----------|
|   | 2025                     | 2024     |          |
| Revenue   | \$ 3,909                 | \$ 1,747 | \$ 2,162 |
| Cost of products sold   | 3,821                    | 1,709    | 2,112    |
| Segment margin  | 88                       | 38       | 50       |
| Unrealized (gains) losses on commodity risk management activities                     | (16)                     | 25       | (41)     |
| Operating expenses, excluding non-cash compensation expense                           | (32)                     | (20)     | (12)     |
| Selling, general and administrative expenses, excluding non-cash compensation expense | (53)                     | (62)     | 9        |
| Adjusted EBITDA related to unconsolidated affiliates                                  | 5                        | 6        | (1)      |
| Other and eliminations  | (67)                     | 3        | (70)     |
| Segment Adjusted EBITDA   | \$ (75)                  | \$ (10)  | \$ (65)  |

Amounts reflected in our all other segment primarily include:

- our natural gas marketing operations;
- our wholly owned natural gas compression operations; and
- our natural resources business.

*Segment Adjusted EBITDA.* For the year ended December 31, 2025 compared to the prior year, Segment Adjusted EBITDA decreased due to the net impact of the following:

- a decrease of \$114 million due to the intersegment elimination of Sunoco LP's 32.5% share of ET-S Permian, which is consolidated in our crude oil transportation and services segment and also reflected as an unconsolidated affiliate in our investment in Sunoco LP segment; and
- a decrease of \$6 million from our natural resources business; partially offset by
- an increase of \$13 million in lease income from recently acquired real estate;
- an increase of \$13 million from our power-related business;
- an increase of \$13 million due to higher transaction-related expenses in the prior period;
- an increase of \$5 million related to corporate allocations;
- an increase of \$5 million from gains recognized by our captive insurance company; and
- an increase of \$5 million in our natural gas marketing business driven by residue gas sales.

**LIQUIDITY AND CAPITAL RESOURCES**

Our ability to satisfy our obligations and pay distributions to Unitholders will depend on our future performance, which will be subject to prevailing economic, financial, business, weather conditions and other factors, many of which are beyond management's control. The significant trends and uncertainties that we currently believe could significantly impact our liquidity and cash flows going forward are discussed in "Trends and Outlook" above.

We believe that we have sufficient liquidity and sources of funding to meet our cash requirements over the near term and for the longer term. We expect to satisfy our working capital needs through cash generated by our operations. As of December 31, 2025, we had cash and cash equivalents of \$1.27 billion and availability under our revolving credit facility of \$2.12 billion.

The Partnership's material contractual obligations include long-term debt service, payments under operating leases and purchase commitments. The Partnership's obligations under its long-term debt agreements are described below under "Description of Indebtedness," and information on the maturities and interest rates related to the Partnership's long-term debt is available in Note 6 to our consolidated financial statements included in "Item 8. Financial Statements and Supplementary Data." In addition, information on the Partnership's obligations under its lease arrangements is included in Note 13 to our consolidated financial statements included in "Item 8. Financial Statements and Supplementary Data."

We define a purchase commitment as an agreement to purchase goods or services that is enforceable and legally binding (unconditional) on us that specifies all significant terms, including: fixed or minimum quantities to be purchased; fixed, minimum or variable price provisions; and the approximate timing of the transactions. We have long and short-term product purchase obligations for commodities with third-party suppliers. These purchase obligations are entered into at either variable or fixed prices. The purchase prices that we are obligated to pay under variable price contracts approximate market prices at the time we take delivery of the volumes. The purchase prices that we are obligated to pay under fixed price contracts are established at the inception of the contract. We have material purchase commitments for crude oil; as of December 31, 2025, those purchase commitments totaled an estimated \$93.24 billion (of which \$26.13 billion would be due in 2026) based on either the current market price for variable price contracts or the contracted price for fixed price contracts.

We currently expect capital expenditures in 2026 to be approximately as follows (including capitalized interest and overhead and only our proportionate share for joint ventures, but excluding capital expenditures related to our investments in Sunoco LP and USAC):

|   | Growth          | Maintenance     |
|---|-----------------|-----------------|
| Intrastate transportation and storage                               | \$ 1,375        | \$ 80           |
| Interstate transportation and storage                               | 825             | 265             |
| Midstream   | 1,225           | 385             |
| NGL and refined products transportation and services <sup>(1)</sup> | 1,300           | 165             |
| Crude oil transportation and services <sup>(1)</sup>                | 350             | 170             |
| All other (including eliminations)                                  | 175             | 85              |
| <b>Total capital expenditures</b>                                   | <b>\$ 5,250</b> | <b>\$ 1,150</b> |

<sup>(1)</sup> Includes capital expenditures related to the Partnership's proportionate ownership of the Bakken, Rover and Bayou Bridge pipeline joint ventures as well as the Orbit Gulf Coast NGL Exports joint venture.

The assets used in our natural gas and liquids operations, including pipelines, gathering systems and related facilities, are generally long-lived assets and do not require significant maintenance capital expenditures. Accordingly, we do not have any significant financial commitments for maintenance capital expenditures in our businesses. From time to time, we experience increases in pipe costs due to a number of reasons, including but not limited to, delays from steel mills, limited selection of mills capable of producing large diameter pipe timely, higher steel prices, including as a result of the recent governmental action on tariffs, and other factors beyond our control. However, we have included these factors in our anticipated growth capital expenditures for each year.

We generally fund capital expenditures and distributions with cash flows from operating activities.

Sunoco LP expects to invest between \$400 million and \$450 million in maintenance capital expenditures and at least \$600 million in growth capital expenditures in 2026.

USAC currently has budgeted between \$60 million and \$70 million in maintenance capital expenditures and at currently has budgeted between \$230 million and \$250 million in expansion capital expenditures in 2026.

### **Cash Flows**

Our cash flows may change in the future due to a number of factors, some of which we cannot control. These include regulatory changes, the price of our products and services, the demand for such products and services, margin requirements resulting from significant changes in commodity prices, operational risks, the successful integration of our acquisitions and other factors.

### ***Operating Activities***

Changes in cash flows from operating activities between periods primarily result from changes in earnings (as discussed in "Results of Operations" above), excluding the impacts of non-cash items and changes in operating assets and liabilities. Non-cash items include recurring non-cash expenses, such as depreciation, depletion and amortization expense and non-cash compensation expense. The increase in depreciation, depletion and amortization expense during the periods presented primarily resulted from construction and acquisitions of assets, while changes in non-cash compensation expense resulted from changes in the number of units granted and changes in the grant date fair value for such grants. Cash flows from operating activities also differ from earnings as a result of non-cash charges that may not be recurring such as impairment charges and allowance for equity funds used during construction. The allowance for equity funds used during construction increases in periods when Energy Transfer has a significant amount of interstate pipeline construction in progress. Changes in operating assets and

liabilities between periods result from factors such as the changes in the value of derivative assets and liabilities, timing of accounts receivable collection, payments on accounts payable, the timing of purchases and sales of inventories, and the timing of advances and deposits received from customers.

Following is a summary of operating activities by period:

*Year Ended December 31, 2025*

Cash provided by operating activities in 2025 was \$10.15 billion and net income was \$5.71 billion. The difference between net income and net cash provided by operating activities in 2025 primarily consisted of net changes in operating assets and liabilities (net of effects of acquisitions and divestitures) of \$1.98 billion and other items totaling \$6.09 billion, which includes non-cash items and items related to investing and financing activities that are included in net income.

The non-cash activity in 2025 consisted primarily of depreciation, depletion and amortization of \$5.68 billion, deferred income taxes of \$178 million, unfavorable inventory valuation adjustments of \$156 million, non-cash compensation expense of \$148 million and impairment losses of \$285 million. Net income also included equity in earnings of unconsolidated affiliates of \$419 million and losses on extinguishments of debt of \$34 million in 2025.

Cash provided by operating activities includes cash distributions received from unconsolidated affiliates that are deemed to be paid from cumulative earnings, which distributions were \$382 million in 2025.

*Year Ended December 31, 2024*

Cash provided by operating activities in 2024 was \$11.51 billion and net income was \$6.57 billion. The difference between net income and net cash provided by operating activities in 2024 primarily consisted of net changes in operating assets and liabilities (net of effects of acquisitions and divestitures) of \$196 million and other items totaling \$4.84 billion, which includes non-cash items and items related to financing activities that are included in net income.

The non-cash activity in 2024 consisted primarily of depreciation, depletion and amortization of \$5.17 billion, deferred income taxes of \$276 million, unfavorable inventory valuation adjustments of \$86 million, non-cash compensation expense of \$151 million and impairment losses of \$52 million. Net income also included equity in earnings of unconsolidated affiliates of \$379 million, a \$586 million gain on Sunoco LP's sale of its West Texas assets and losses on extinguishments of debt of \$12 million in 2024.

Cash provided by operating activities includes cash distributions received from unconsolidated affiliates that are deemed to be paid from cumulative earnings, which distributions were \$356 million in 2024.

***Investing Activities***

Cash flows from investing activities primarily consist of cash amounts paid for acquisitions, capital expenditures, cash distributions from our joint ventures, and cash proceeds from sales or contributions of assets or businesses. Changes in capital expenditures between periods primarily result from increases or decreases in our growth capital expenditures to fund our construction and expansion projects.

Following is a summary of investing activities by period:

*Year Ended December 31, 2025*

Cash used in investing activities in 2025 was \$8.37 billion. Total capital expenditures (excluding the allowance for equity funds used during construction and net of contributions in aid of construction costs) were \$6.20 billion. Additional detail related to our capital expenditures is provided in the following table. We received \$30 million of cash proceeds from the sale of assets. The Partnership also received distributions of \$61 million from unconsolidated affiliates.

In 2025, Sunoco LP paid \$2.00 billion, net of cash received, for the Parkland acquisition and paid \$253 million in cash for acquisitions of other assets.

*Year Ended December 31, 2024*

Cash used in investing activities in 2024 was \$5.90 billion. Total capital expenditures (excluding the allowance for equity funds used during construction and net of contributions in aid of construction costs) were \$4.09 billion. Additional detail related to our capital expenditures is provided in the following table. We received \$24 million of cash proceeds from the sale of assets. The Partnership also received distributions of \$75 million from unconsolidated affiliates.

In 2024, we paid \$2.17 billion, net of cash received, for the WTG Midstream acquisition, we paid \$84 million to acquire the outstanding noncontrolling interest in Edwards Lime Gathering, LLC, which is now a wholly owned subsidiary, and we also paid \$250 million, net of cash received, for other acquisitions. In 2024, Sunoco LP paid \$224 million in cash for acquisitions of terminals and other assets and received \$27 million in cash from the NuStar acquisition. Additionally, in 2024, Sunoco LP received cash proceeds of \$987 million from its sale of West Texas assets.

The following is a summary of the Partnership's capital expenditures (including only our proportionate share for joint ventures, net of contributions in aid of construction costs) by period:

|  | Capital Expenditures Recorded During Period |             |          |
|--|---|-------------|----------|
|  | Growth                                      | Maintenance | Total    |
| <b>Year Ended December 31, 2025:</b>                 |   |             |          |
| Intrastate transportation and storage                | \$ 1,479                                    | \$ 93       | \$ 1,572 |
| Interstate transportation and storage                | 160   | 199         | 359      |
| Midstream  | 1,232                                       | 384         | 1,616    |
| NGL and refined products transportation and services | 1,571                                       | 152         | 1,723    |
| Crude oil transportation and services                | (80)  | 170         | 90       |
| Investment in Sunoco LP                              | 440   | 211         | 651      |
| Investment in USAC                                   | 118   | 39          | 157      |
| All other (including eliminations)                   | 176   | 68          | 244      |
| Total capital expenditures                           | \$ 5,096                                    | \$ 1,316    | \$ 6,412 |
| <b>Year Ended December 31, 2024:</b>                 |   |             |          |
| Intrastate transportation and storage                | \$ 58                                       | \$ 60       | \$ 118   |
| Interstate transportation and storage                | 135   | 197         | 332      |
| Midstream  | 929   | 394         | 1,323    |
| NGL and refined products transportation and services | 1,291                                       | 133         | 1,424    |
| Crude oil transportation and services                | 271   | 152         | 423      |
| Investment in Sunoco LP                              | 220   | 124         | 344      |
| Investment in USAC                                   | 244   | 32          | 276      |
| All other (including eliminations)                   | 272   | 70          | 342      |
| Total capital expenditures                           | \$ 3,420                                    | \$ 1,162    | \$ 4,582 |

### Financing Activities

Changes in cash flows from financing activities between periods primarily result from changes in the levels of borrowings and equity issuances, which are primarily used to fund our acquisitions and growth capital expenditures. Distributions to partners increased between the periods as a result of increases in the number of common units outstanding or increases in the distribution rate.

Following is a summary of financing activities by period:

#### Year Ended December 31, 2025

Cash used in financing activities was \$816 million in 2025. In 2025, we had a net increase in our debt level of \$4.82 billion. During 2025, we paid distributions of \$4.73 billion to our partners, we paid distributions of \$1.73 billion to noncontrolling interests and we paid distributions of \$56 million to our redeemable noncontrolling interests. In 2025, we received capital contributions of \$27 million in cash from noncontrolling interests. In 2025, we incurred debt issuance costs of \$119 million.

#### Year Ended December 31, 2024

Cash used in financing activities was \$5.45 billion in 2024. In 2024, we had a net increase in our debt level of \$4.74 billion. During 2024, we paid distributions of \$4.62 billion to our partners, we paid distributions of \$1.78 billion to noncontrolling interests and we paid distributions of \$67 million to our redeemable noncontrolling interests. In 2024, we paid \$2.65 billion in cash for the Redemption of our Series A, Series C, Series D and Series E preferred units and we paid \$37 million in cash to

redeem a portion of the outstanding Crestwood Niobrara LLC preferred units. In 2024, we received capital contributions of \$638 million in cash from noncontrolling interests and we received capital contributions of \$2 million in cash from redeemable noncontrolling interests. In 2024, we incurred debt issuance costs of \$147 million. Additionally, in 2024, USAC paid \$749 million in cash for investments in government securities in connection with the legal defeasance of senior notes, and Sunoco LP paid \$784 million in cash for the redemption of NuStar preferred units.

### **Description of Indebtedness**

Our outstanding consolidated indebtedness was as follows:

|  | December 31, |           |
|--|--------------|-----------|
|  | 2025         | 2024      |
| Energy Transfer indebtedness:  |              |           |
| Notes and debentures <sup>(1)(2)</sup>   | \$ 48,870    | \$ 46,269 |
| Five-Year Credit Facility <sup>(2)</sup>   | 2,856        | 2,759     |
| Subsidiary indebtedness:   |              |           |
| Transwestern senior notes  | 75           | 75        |
| Bakken Project senior notes  | 850          | 850       |
| Sunoco LP and its subsidiaries senior notes, bonds and lease-related obligations <sup>(1)(2)</sup> | 13,470       | 7,304     |
| USAC senior notes <sup>(2)</sup>   | 1,750        | 1,750     |
| Sunoco LP credit facility  | —            | 203       |
| USAC credit facility   | 795          | 772       |
| Other long-term debt   | 19           | 11        |
| Net unamortized premiums, discounts and fair value adjustments                                     | 32           | 77        |
| Deferred debt issuance costs   | (384)        | (310)     |
| Total debt   | 68,333       | 59,760    |
| Less: current maturities of long-term debt   | 25           | 8         |
| Long-term debt, less current maturities  | \$ 68,308    | \$ 59,752 |

<sup>(1)</sup> As of December 31, 2025, these balances included a total of \$3.49 billion aggregate principal amount of senior notes due on or before December 31, 2026 which were classified as long-term as management has the intent and ability to refinance the borrowings on a long-term basis.

<sup>(2)</sup> See additional information below under “Recent Transactions.”

The terms of our consolidated indebtedness and that of our subsidiaries are described in more detail below and in Note 6 to our consolidated financial statements included in “Item 8. Financial Statements and Supplementary Data.”

### **Recent Financing Transactions**

#### ***Energy Transfer Notes Issuances and Redemptions***

In March 2025, the Partnership issued \$650 million aggregate principal amount of 5.20% senior notes due April 2030, \$1.25 billion aggregate principal amount of 5.70% senior notes due April 2035 and \$1.10 billion aggregate principal amount of 6.20% senior notes due April 2055. The Partnership used the net proceeds to refinance existing indebtedness, including to repay commercial paper and borrowings under its Five-Year Credit Facility (described below), and for general partnership purposes.

In March 2025, the Partnership redeemed its \$1.00 billion aggregate principal amount of 4.05% senior notes due March 2025 using cash on hand and commercial paper borrowings.

In May 2025, the Partnership redeemed its \$1.00 billion aggregate principal amount of 2.90% senior notes due May 2025 using cash on hand and commercial paper borrowings.

In August 2025, the Partnership issued \$1.20 billion aggregate principal amount of its Series 2025A junior subordinated notes due 2056 and \$800 million aggregate principal amount of its Series 2025B junior subordinated notes due 2056. The Partnership used the net proceeds to repay borrowings under its Five-Year Credit Facility and for general partnership purposes.

In September 2025, the Partnership redeemed its \$400 million aggregate principal amount of 5.95% senior notes due December 2025 using cash on hand and commercial paper borrowings.

In January 2026, the Partnership issued \$1.00 billion aggregate principal amount of 4.55% senior notes due 2031, \$1.00 billion aggregate principal amount of 5.35% senior notes due 2036 and \$1.00 billion aggregate principal amount of 6.30% senior notes due 2056. The Partnership used the net proceeds to refinance existing indebtedness, including to repay commercial paper and borrowings under its Five-Year Credit Facility.

In January 2026, the Partnership redeemed its \$1.00 billion aggregate principal amount of 4.75% senior notes due January 2026 using cash on hand and commercial paper borrowings.

In February 2026, the Partnership redeemed its \$600 million aggregate principal amount of 5.625% senior notes due May 2027 using cash on hand and commercial paper borrowings.

#### ***Sunoco LP Senior Notes Issuances and Redemption***

In March 2025, Sunoco LP issued \$1.00 billion aggregate principal amount of 6.25% senior notes due 2033 in a private offering. These notes will mature on July 1, 2033 and interest is payable semi-annually on January 1 and July 1 of each year. Sunoco LP used the net proceeds from the private offering to repay its \$600 million aggregate principal amount of 5.75% senior notes due 2025 and to repay a portion of the outstanding borrowings under Sunoco LP's revolving credit facility.

In September 2025, Sunoco LP issued \$1.00 billion aggregate principal amount of 5.625% senior notes due 2031 and \$900 million aggregate principal amount of 5.875% senior notes due 2034 in a private offering. These notes will mature on March 15, 2031 and March 15, 2034, respectively, and interest is payable semi-annually on March 15 and September 15 of each year, commencing on March 15, 2026. Sunoco LP used the net proceeds from this private offering (i) on the closing date of the Parkland acquisition to fund a portion of the cash consideration for the Parkland acquisition and related transaction costs, with the remaining proceeds used for general corporate purposes, and (ii) prior to the closing date of the Parkland acquisition, to temporarily reduce the borrowings outstanding under its revolving credit facility and to pay interest and fees in connection therewith.

The 5.625% senior notes due 2031 and 5.875% senior notes due 2034 were originally subject to a special mandatory redemption requirement, which was eliminated upon closing of the Parkland acquisition.

#### ***Sunoco LP Parkland Senior Note Exchange***

In October 2025, in connection with Sunoco LP's Parkland acquisition, Sunoco LP commenced a private offering to exchange up to C\$1.60 billion Canadian dollar denominated notes issued by Parkland (collectively, the "PKI CAD Notes") and up to \$2.60 billion U.S. dollar denominated notes issued by Parkland (collectively, the "PKI USD Notes") for new notes issued by the Partnership. The exchange offer closed on November 7, 2025, with approximately C\$1.47 billion of the PKI CAD Notes and approximately \$2.58 billion of the PKI USD Notes being validly tendered and not validly withdrawn.

#### ***USAC Senior Notes Issuance and Redemption***

In September 2025, USAC issued \$750 million aggregate principal amount of 6.250% senior notes due 2033. USAC used the net proceeds from this issuance, together with borrowings under USAC's credit facility, to redeem its \$750 million aggregate principal amount of 6.875% senior notes due 2027 in October 2025.

### **Credit Facilities and Commercial Paper**

#### ***Five-Year Credit Facility***

The Partnership's Five-Year Credit Facility allows for unsecured borrowings up to \$5.00 billion until April 11, 2027, and, following the Partnership's exercise of its option to extend the maturity date on December 18, 2024, up to \$4.84 billion until April 11, 2029. The Five-Year Credit Facility contains an accordion feature, under which the total aggregate commitment may be increased up to \$7.00 billion under certain conditions.

As of December 31, 2025, the Five-Year Credit Facility had \$2.86 billion of outstanding borrowings, of which \$2.57 billion consisted of commercial paper. The amount available for future borrowings was \$2.12 billion, after accounting for outstanding letters of credit in the amount of \$21 million. The weighted average interest rate on the total amount outstanding as of December 31, 2025 was 4.00%.

### ***Sunoco LP Credit Facility***

As of December 31, 2025, the Sunoco LP Credit Facility had no outstanding borrowings and \$26 million in standby letters of credit. The amount available for future borrowings was \$2.47 billion at December 31, 2025. The weighted average interest rate on the total amount outstanding as of December 31, 2025 was 6.38%.

### ***USAC Credit Facility***

As of December 31, 2025, USAC had \$795 million of outstanding borrowings and \$1 million in outstanding letters of credit under the credit agreement. As of December 31, 2025, USAC had \$954 million of remaining unused availability, all of which was available to be drawn. The weighted average interest rate on the total amount outstanding as of December 31, 2025 was 5.74%.

### **Covenants Related to Our Credit Agreements**

The agreements relating to the senior notes contain restrictive covenants customary for an issuer with an investment-grade rating from the rating agencies, which covenants include limitations on liens and a restriction on sale-leaseback transactions.

The Five-Year Credit Facility contains covenants that limit (subject to certain exceptions) the Partnership's and certain of the Partnership's subsidiaries' ability to, among other things:

- incur indebtedness;
- grant liens;
- enter into mergers;
- dispose of assets;
- make certain investments;
- make Distributions (as defined in the Five-Year Credit Facility) during certain Defaults (as defined in the Five-Year Credit Facility) and during any Event of Default (as defined in the Five-Year Credit Facility);
- engage in business substantially different in nature than the business currently conducted by the Partnership and its subsidiaries;
- engage in transactions with affiliates; and
- enter into restrictive agreements.

The applicable margin and rate used in connection with the interest rates and commitment fees, respectively, are based on the credit ratings assigned to our senior, unsecured, non-credit enhanced long-term debt. The applicable margin for eurodollar rate loans under the Five-Year Credit Facility ranges from 1.125% to 2.000% and the applicable margin for base rate loans ranges from 0.125% to 1.000%. The applicable rate for commitment fees under the Five-Year Credit Facility ranges from 0.125% to 0.300%.

The Five-Year Credit Facility contains various covenants including limitations on the creation of indebtedness and liens and related to the operation and conduct of our business. The Five-Year Credit Facility also limits us, on a rolling four quarter basis, to a maximum Consolidated Funded Indebtedness to Consolidated EBITDA ratio, as defined in the underlying credit agreement, of 5.00 to 1.00, which can generally be increased to 5.50 to 1.00 during a Specified Acquisition Period. Our Leverage Ratio was 3.21 to 1.00 at December 31, 2025, as calculated in accordance with the credit agreement.

Failure to comply with the various restrictive and affirmative covenants of our revolving credit facilities could require us to pay debt balances prior to scheduled maturity and could negatively impact the Partnership's or our subsidiaries' ability to incur additional debt and/or our ability to pay distributions to Unitholders.

### ***Covenants Related to Transwestern***

The agreements relating to the Transwestern senior notes contain certain restrictions that, among other things, limit the incurrence of additional debt, the sale of assets and the payment of dividends and specify a maximum debt to capitalization ratio.

### ***Covenants Related to Sunoco LP***

The Sunoco LP Credit Facility contains various customary representations, warranties, covenants and events of default, including a change of control event of default, as defined therein. Sunoco LP's Credit Facility requires Sunoco LP to maintain a specified net leverage ratio and interest coverage ratio.

### ***Covenants Related to USAC***

The USAC Credit Facility contains covenants that limit (subject to certain exceptions) USAC's ability to, among other things:

- grant liens;
- make certain loans or investments;
- incur additional indebtedness or guarantee other indebtedness;
- enter into transactions with affiliates;
- merge or consolidate;
- sell our assets; and
- make certain acquisitions.

The USAC Credit Facility is also subject to the following financial covenants, including covenants requiring USAC to maintain:

- a minimum EBITDA to interest coverage ratio;
- a ratio of total secured indebtedness to EBITDA within a specified range; and
- a maximum funded debt to EBITDA ratio.

### ***Compliance with our Covenants***

We and our subsidiaries were in compliance with all requirements, tests, limitations, and covenants related to our debt agreements as of December 31, 2025.

### **Cash Distributions**

#### **Cash Distributions Paid by Energy Transfer**

Under its Partnership Agreement, Energy Transfer will distribute all of its Available Cash, as defined in the Partnership Agreement, within 50 days following the end of each fiscal quarter. Available Cash generally means, with respect to any quarter, all cash on hand at the end of such quarter less the amount of cash reserves that are necessary or appropriate in the reasonable discretion of our general partner that is necessary or appropriate to provide for future cash requirements.

#### **Energy Transfer Common Unit Distributions**

Distributions declared and paid with respect to Energy Transfer Common Units were as follows:

| Quarter Ended      | Record Date      | Payment Date      | Rate      |
|--------------------|------------------|-------------------|-----------|
| December 31, 2023  | February 7, 2024 | February 20, 2024 | \$ 0.3150 |
| March 31, 2024     | May 13, 2024     | May 20, 2024      | 0.3175    |
| June 30, 2024      | August 9, 2024   | August 19, 2024   | 0.3200    |
| September 30, 2024 | November 8, 2024 | November 19, 2024 | 0.3225    |
| December 31, 2024  | February 7, 2025 | February 19, 2025 | 0.3250    |
| March 31, 2025     | May 9, 2025      | May 20, 2025      | 0.3275    |
| June 30, 2025      | August 8, 2025   | August 19, 2025   | 0.3300    |
| September 30, 2025 | November 7, 2025 | November 19, 2025 | 0.3325    |
| December 31, 2025  | February 6, 2026 | February 19, 2026 | 0.3350    |

The total amounts of distributions declared and paid during the periods presented (all from Available Cash from Energy Transfer’s operating surplus and are shown in the period to which they relate) are as follows:

|  | Years Ended December 31, |                 |
|--|--------------------------|-----------------|
|  | 2025                     | 2024            |
| Limited Partners                           | \$ 4,551                 | \$ 4,384        |
| General Partner interest                   | 4                        | 4               |
| <b>Total Energy Transfer distributions</b> | <b>\$ 4,555</b>          | <b>\$ 4,388</b> |

### Energy Transfer Preferred Unit Distributions

Distributions on Energy Transfer’s preferred units declared and/or paid by Energy Transfer were as follows:

| Period Ended       | Record Date <sup>(1)</sup> | Payment Date      | Series A | Series B <sup>(2)</sup> | Series C  | Series D  | Series E  | Series F | Series G <sup>(2)</sup> | Series H <sup>(2)</sup> | Series I <sup>(1)</sup> |
|--------------------|----------------------------|-------------------|----------|-------------------------|-----------|-----------|-----------|----------|-------------------------|-------------------------|-------------------------|
| December 31, 2023  | February 1, 2024           | February 15, 2024 | \$ 24.71 | \$ 33.125               | \$ 0.6075 | \$ 0.6199 | \$ 0.4750 | \$ —     | \$ —                    | \$ —                    | \$ 0.2111               |
| March 31, 2024     | May 1, 2024                | May 15, 2024      | 23.99    | —                       | —         | —         | 0.4750    | 33.7500  | 35.63                   | 32.50                   | 0.2111                  |
| June 30, 2024      | August 1, 2024             | August 15, 2024   | 9.88     | 33.125                  | —         | —         | —         | —        | —                       | —                       | 0.2111 <sup>(2)</sup>   |
| September 30, 2024 | November 1, 2024           | November 15, 2024 | —        | —                       | —         | —         | —         | 33.7500  | 35.63                   | 32.50                   | 0.2111 <sup>(2)</sup>   |

<sup>(1)</sup> The record date and payment date shown above apply to all Energy Transfer Preferred Units, except for the Series I Preferred Units. For the period ended December 31, 2025, the cash distribution for the Series I Preferred Units was paid on February 17, 2026 to unitholders of record as of the close of business on February 4, 2026. For the period ended September 30, 2025, the cash distribution for the Series I Preferred Units were paid on November 14, 2025 to unitholders of record as of the close of business on November 4, 2025. For the period ended June 30, 2025, the cash distribution for the Series I Preferred Units was paid on August 14, 2025 to unitholders of record as of the close of business on August 4, 2025. For the period ended March 31, 2025, the cash distribution for the Series I Preferred Units was paid on May 15, 2025 to unitholders of record as of the close of business on May 2, 2025. For the period ended December 31, 2024, the cash distribution for the Series I Preferred Units was paid on February 14, 2025 to unitholders of record as of the close of business on February 4, 2025. For the period ended September 30, 2024, the cash distribution for the Series I Preferred Units was paid on November 14, 2024 to unitholders of record as of the close of business on November 4, 2024. For the period ended June 30, 2024, the cash distribution for the Series I Preferred Units was paid on August 14, 2024 to unitholders of record as of the close of business on August 2, 2024.

<sup>(2)</sup> Series B, Series G and Series H distributions are currently paid on a semi-annual basis. Distributions on the Series B Preferred Units will begin to be paid quarterly on February 15, 2028.

### SunocoCorp Cash Distributions

SunocoCorp’s company agreement sets forth its policy for paying regular quarterly cash distributions. For the quarter ended December 31, 2025, SunocoCorp declared a cash distribution of \$0.9317 to be paid on February 19, 2026 to unitholders of record as of February 6, 2026.

### Sunoco LP Cash Distributions

Energy Transfer owns approximately 28.5 million Sunoco LP common units and all of Sunoco LP’s IDR. As of December 31, 2025, Sunoco LP had approximately 136.9 million common units outstanding and 51,517,198 Class D Units outstanding.

The following table illustrates the percentage allocations of available cash from operating surplus between Sunoco LP’s common unitholders and the holder of its IDRs based on the specified target distribution levels, after the payment of distributions to Class C unitholders. The amounts set forth under “marginal percentage interest in distributions” are the percentage interests of the IDR holder and the common unitholders in any available cash from operating surplus which Sunoco LP distributes up to and including the corresponding amount in the column “total quarterly distribution per unit target amount.” The percentage interests shown for common unitholders and IDR holder for the minimum quarterly distribution are also applicable to quarterly distribution amounts that are less than the minimum quarterly distribution.

|                                | Total Quarterly Distribution Target Amount | Marginal Percentage Interest in Distributions |                |
|--------------------------------|--|---|----------------|
|                                |  | Common Unitholders                            | Holder of IDRs |
| Minimum Quarterly Distribution | \$0.4375                                   | 100%  | —%             |
| First Target Distribution      | \$0.4375 to \$0.503125                     | 100%  | —%             |
| Second Target Distribution     | \$0.503125 to \$0.546875                   | 85%   | 15%            |
| Third Target Distribution      | \$0.546875 to \$0.656250                   | 75%   | 25%            |
| Thereafter                     | Above \$0.656250                           | 50%   | 50%            |

Distributions on Sunoco LP’s common units and Class D Units declared and/or paid by Sunoco LP were as follows:

| Quarter Ended      | Payment Date      | Per Common Unit Rate | Per Class D Unit Rate |
|--------------------|-------------------|----------------------|-----------------------|
| December 31, 2023  | February 20, 2024 | \$ 0.8420            | \$ —                  |
| March 31, 2024     | May 20, 2024      | 0.8756               | —                     |
| June 30, 2024      | August 19, 2024   | 0.8756               | —                     |
| September 30, 2024 | November 19, 2024 | 0.8756               | —                     |
| December 31, 2024  | February 19, 2025 | 0.8865               | —                     |
| March 31, 2025     | May 20, 2025      | 0.8976               | —                     |
| June 30, 2025      | August 19, 2025   | 0.9088               | —                     |
| September 30, 2025 | November 19, 2025 | 0.9202               | —                     |
| December 31, 2025  | February 19, 2026 | 0.9317               | 0.9317                |

#### ***Sunoco LP Series A Preferred Units***

Cash distributions paid or to be paid with respect to Sunoco LP Series A Preferred Units were as follows:

| Record Date   | Payment Date   | Rate     |
|---------------|----------------|----------|
| March 2, 2026 | March 18, 2026 | \$ 39.38 |

The total amount of distributions to the Partnership from Sunoco LP for the periods presented below is as follows:

|                                    | Years Ended December 31, |        |
|------------------------------------|--------------------------|--------|
|                                    | 2025                     | 2024   |
| Distributions from Sunoco LP       |                          |        |
| Limited Partner interests          | \$ 104                   | \$ 100 |
| General Partner interest and IDRs  | 182                      | 145    |
| Total distributions from Sunoco LP | \$ 286                   | \$ 245 |

#### **USAC Cash Distributions**

Energy Transfer owns approximately 46.1 million USAC common units. As of December 31, 2025, USAC had approximately 127 million common units outstanding. USAC currently has a non-economic general partner interest and no outstanding IDRs.

Distributions on USAC's units declared and/or paid by USAC were as follows:

| Quarter Ended      | Payment Date     | Rate      |
|--------------------|------------------|-----------|
| December 31, 2023  | February 2, 2024 | \$ 0.5250 |
| March 31, 2024     | May 3, 2024      | 0.5250    |
| June 30, 2024      | August 2, 2024   | 0.5250    |
| September 30, 2024 | November 1, 2024 | 0.5250    |
| December 31, 2024  | February 7, 2025 | 0.5250    |
| March 31, 2025     | May 9, 2025      | 0.5250    |
| June 30, 2025      | August 8, 2025   | 0.5250    |
| September 30, 2025 | November 7, 2025 | 0.5250    |
| December 31, 2025  | February 6, 2026 | 0.5250    |

The total amount of distributions to the Partnership from USAC for the periods presented below is as follows:

|                               | Years Ended December 31, |       |
|-------------------------------|--------------------------|-------|
|                               | 2025                     | 2024  |
| Distributions from USAC       |                          |       |
| Limited Partner interests     | \$ 97                    | \$ 97 |
| Total distributions from USAC | \$ 97                    | \$ 97 |

### **Critical Accounting Estimates**

The selection and application of accounting policies is an important process that has developed as our business activities have evolved and as the accounting rules have developed. Accounting rules generally do not involve a selection among alternatives, but involve an implementation and interpretation of existing rules, and the use of judgment applied to the specific set of circumstances existing in our business. We make every effort to properly comply with all applicable rules, and we believe the proper implementation and consistent application of the accounting rules are critical. Our critical accounting policies are discussed below. For further details on our accounting policies see Note 2 to our consolidated financial statements included in "Item 8. Financial Statements and Supplementary Data."

**Use of Estimates.** The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the accrual for and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. The natural gas industry conducts its business by processing actual transactions at the end of the month following the month of delivery. Consequently, the most current month's financial results are estimated using volume estimates and market prices for our intrastate transportation and storage segment, our midstream segment, and our NGL and refined products transportation and services segment. Any differences between estimated results and actual results are recognized in the following month's financial statements. Management believes that the operating results estimated for the year ended December 31, 2025 represent the actual results in all material respects.

Some of the other significant estimates made by management include, but are not limited to, the timing of certain forecasted transactions that are hedged, the fair value of derivative instruments, useful lives for depreciation, depletion and amortization, purchase accounting allocations and subsequent realizability of intangible assets, fair value measurements used in the goodwill impairment test, market value of inventory, assets and liabilities resulting from the regulated ratemaking process, contingency reserves and environmental reserves. Actual results could differ from those estimates.

**Fair Value Estimates in Business Combination Accounting and Impairment of Long-Lived Assets, Goodwill, Intangible Assets and Investments in Unconsolidated Affiliates.** Business combination accounting and quantitative impairment testing are required from time to time due to the occurrence of events, changes in circumstances, or annual testing requirements. For business combinations, assets and liabilities are required to be recorded at estimated fair value in connection with the initial recognition of the transaction. For impairment testing, long-lived assets are required to be tested for recoverability whenever events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. Goodwill and intangibles with indefinite lives must be tested for impairment annually or more frequently if events or changes in circumstances indicate that the related asset might be impaired. An impairment of an investment in an unconsolidated affiliate is recognized when circumstances indicate that a decline in the investment value is other than temporary. An impairment loss

should be recognized only if the carrying amount of the asset/goodwill is not recoverable and exceeds its fair value. Calculating the fair value of assets or reporting units in connection with business combination accounting or impairment testing requires management to make several estimates, assumptions and judgments, and in some circumstances management may also utilize third-party specialists to assist and advise on those calculations.

In order to allocate the purchase price in a business combination or to test for recoverability when performing a quantitative impairment test, we must make estimates of projected cash flows related to the asset, which include, but are not limited to, assumptions about the use or disposition of the asset, estimated remaining life of the asset, and future expenditures necessary to maintain the asset's existing service potential. In order to determine fair value, we make certain estimates and assumptions, including, among other things, changes in general economic conditions in regions in which our markets are located, the availability and prices of commodities, our ability to negotiate favorable sales agreements, the risks that exploration and production activities will not occur or be successful, our dependence on certain significant customers and producers, and competition from other companies, including major energy producers. While we believe we have made reasonable assumptions to calculate the fair value, if future results are not consistent with our estimates, we could be exposed to future impairment losses that could be material to our results of operations.

The Partnership determines the fair value of its assets and/or reporting units using the discounted cash flow method, the guideline company method, the reproduction and replacement methods, or a weighted combination of these methods. Determining the fair value of a reporting unit requires judgment and the use of significant estimates and assumptions. Such estimates and assumptions include revenue growth rates, operating margins, weighted average costs of capital and future market conditions, among others. The Partnership believes the estimates and assumptions used in our business combination accounting and impairment assessments are reasonable and based on available market information, but variations in any of the assumptions could result in materially different calculations of fair value and determinations of whether or not an impairment is indicated. Under the discounted cash flow method, the Partnership determines fair value based on estimated future cash flows of each reporting unit including estimates for capital expenditures, discounted to present value using the risk-adjusted industry rate, which reflect the overall level of inherent risk of the reporting unit. Cash flow projections are derived from one year budgeted amounts and five year operating forecasts plus an estimate of later period cash flows, all of which are evaluated by management. Subsequent period cash flows are developed for each reporting unit using growth rates that management believes are reasonably likely to occur. Under the guideline company method, the Partnership determines the estimated fair value of each of our reporting units by applying valuation multiples of comparable publicly traded companies to each reporting unit's projected EBITDA and then averaging that estimate with similar historical calculations using a multi-year average. In addition, the Partnership estimates a reasonable control premium, when appropriate, representing the incremental value that accrues to the majority owner from the opportunity to dictate the strategic and operational actions of the business. Under the reproduction and replacement methods, the Partnership determines the fair value of assets based on the estimated installation, engineering, and set-up costs related to the asset; these methods require the use of trend factors, such as inflation indices.

One key assumption in these fair value calculations is management's estimate of future cash flows and EBITDA. In accounting for a business combination, these estimates are generally based on the forecasts that were used to analyze the deal economics. For impairment testing, these estimates are based on the annual budget for the upcoming year and forecasted amounts for multiple subsequent years. The annual budget process is typically completed near the annual goodwill impairment testing date, and management uses the most recent information for the annual impairment tests. The forecast is also subjected to a comprehensive update annually in conjunction with the annual budget process and is revised periodically to reflect new information and/or revised expectations. The estimates of future cash flows and EBITDA are subjective in nature and are subject to impacts from the business risks described in "Item 1A. Risk Factors." Therefore, the actual results could differ significantly from the amounts used for business combination accounting and impairment testing, and significant changes in fair value estimates could occur in a given period. Such changes in fair value estimates could result in changes to the fair value estimates used in business combination accounting, which could significantly impact results of operations in a period subsequent to the business combination, depending on multiple factors, including the timing of such changes. In the case of impairment testing, such changes could result in additional impairments in future periods; therefore, the actual results could differ significantly from the amounts used for goodwill impairment testing, and significant changes in fair value estimates could occur in a given period, resulting in additional impairments.

In addition, we may change our method of impairment testing, including changing the weight assigned to different valuation models. Such changes could be driven by various factors, including the level of precision or availability of data for our assumptions. Any changes in the method of testing could also result in an impairment or impact the magnitude of an impairment.

During the years ended December 31, 2025, 2024 and 2023, the Partnership recorded total assets of approximately \$13.37 billion, \$11.36 billion and \$9.71 billion, respectively, in connection with business combinations.

During the years ended December 31, 2025, 2024 and 2023, the Partnership recorded impairments totaling \$285 million, \$52 million and \$12 million, respectively. Additional information on the impairments recorded during these periods is available in Note 2 to our consolidated financial statements included in “Item 8. Financial Statements and Supplementary Data.”

**Estimated Useful Lives of Long-Lived Assets.** Depreciation and amortization of long-lived assets is provided using the straight-line method based on their estimated useful lives. Changes in the estimated useful lives of the assets could have a material effect on our results of operation. The Partnership’s results of operations have not been significantly impacted by changes in the estimated useful lives of our long-lived assets during the periods presented, and we do not anticipate any such significant changes in the future. However, changes in facts and circumstances could cause us to change the estimated useful lives of the assets, which could significantly impact the Partnership’s results of operations. Additional information on our accounting policies and the estimated useful lives associated with our long-lived assets is available in Note 2 to our consolidated financial statements in “Item 8. Financial Statements and Supplementary Data.”

**Legal and Regulatory Matters.** We are subject to litigation and regulatory proceedings as a result of our business operations and transactions. We utilize both internal and external counsel in evaluating our potential exposure to adverse outcomes from claims, orders, judgments or settlements. To the extent that actual outcomes differ from our estimates, or additional facts and circumstances cause us to revise our estimates, our earnings will be affected. We expense legal costs as incurred, and all recorded legal liabilities are revised, as required, as better information becomes available to us. The factors we consider when recording an accrual for contingencies include, among others: (i) the opinions and views of our legal counsel; (ii) our previous experience; and (iii) the decision of our management as to how we intend to respond to the complaints. As of December 31, 2025 and 2024, accruals of \$324 million and \$281 million, respectively, were reflected in our consolidated balance sheets related to these contingent obligations.

For more information on our litigation and contingencies, see Note 11 to our consolidated financial statements included in “Item 8. Financial Statements and Supplementary Data” in this annual report.

**Environmental Remediation Activities.** The Partnership’s accrual for environmental remediation activities reflects anticipated work at identified sites where an assessment has indicated that cleanup costs are probable and reasonably estimable. The accrual for known claims is undiscounted and is based on currently available information, estimated timing of remedial actions and related inflation assumptions, existing technology and presently enacted laws and regulations. It is often extremely difficult to develop reasonable estimates of future site remediation costs due to changing regulations, changing technologies and their associated costs, and changes in the economic environment. Engineering studies, historical experience and other factors are used to identify and evaluate remediation alternatives and their related costs in determining the estimated accruals for environmental remediation activities.

Losses attributable to unasserted claims are generally reflected in the accruals on an undiscounted basis, to the extent they are probable of occurrence and reasonably estimable. We have established a wholly owned captive insurance company to bear certain risks associated with environmental obligations related to certain sites that are no longer operating. The premiums paid to the captive insurance company include estimates for environmental claims that have been incurred but not reported, based on an actuarially determined fully developed claims expense estimate. In such cases, we accrue losses attributable to unasserted claims based on the discounted estimates that are used to develop the premiums paid to the captive insurance company.

In general, each remediation site/issue is evaluated individually based upon information available for the site/issue and no pooling or statistical analysis is used to evaluate an aggregate risk for a group of similar items (e.g., service station sites) in determining the amount of probable loss accrual to be recorded. The Partnership’s estimates of environmental remediation costs also frequently involve evaluation of a range of estimates. In many cases, it is difficult to determine that one point in the range of loss estimates is more likely than any other. In these situations, existing accounting guidance requires that the minimum of the range be accrued. Accordingly, the low end of the range often represents the amount of loss which has been recorded. The Partnership’s consolidated balance sheets reflected \$416 million and \$278 million in environmental accruals as of December 31, 2025 and 2024, respectively.

Total future costs for environmental remediation activities will depend upon, among other things, the identification of any additional sites, the determination of the extent of the contamination at each site, the timing and nature of required remedial actions, the nature of operations at each site, the technology available and needed to meet the various existing legal requirements, the nature and terms of cost-sharing arrangements with other potentially responsible parties, the availability of insurance coverage, the nature and extent of future environmental laws and regulations, inflation rates, terms of consent agreements or remediation permits with regulatory agencies and the determination of the Partnership’s liability at the sites, if any, in light of the number, participation level and financial viability of the other parties. The recognition of additional losses, if and when they were to occur, would likely extend over many years. Management believes that the Partnership’s exposure to adverse developments with respect to any individual site is not expected to be material. However, if changes in environmental

laws or regulations occur or the assumptions used to estimate losses at multiple sites are adjusted, such changes could impact multiple facilities, formerly owned facilities and third-party sites at the same time. As a result, from time to time, significant charges against income for environmental remediation may occur; however, management does not believe that any such charges would have a material adverse impact on the Partnership's consolidated financial position.

**Deferred Income Taxes.** Energy Transfer recognizes benefits in earnings and related deferred tax assets for net operating loss carryforwards ("NOLs") and tax credit carryforwards. If necessary, a charge to earnings and a related valuation allowance are recorded to reduce deferred tax assets to an amount that is more likely than not to be realized by the Partnership in the future. Deferred income tax assets attributable to federal, state, and foreign NOLs and federal excess business interest expense and a corporate alternative minimum tax ("CAMT") credit carryforward totaling \$443 million have been included in Energy Transfer's consolidated balance sheet as of December 31, 2025. The state NOL carryforward benefits of \$87 million (\$69 million net of federal benefit) began expiring in 2025 with a substantial portion expiring between 2033 and 2039. Energy Transfer's corporate subsidiaries have federal NOLs of \$651 million (\$136 million in benefits) all of which were generated in 2018 or later. Of this amount, \$531 million is subject to limitations under IRC §382 (ownership-change limitation) and \$35 million is limited under Separate Return Limitation Year (SRLY) rules. Although these federal NOLs are expected to be fully utilized, the amount utilized in a particular year may be limited. Any federal NOL generated in 2018 and future years can be carried forward indefinitely. Energy Transfer's corporate subsidiaries had foreign NOLs of \$93 million, of which \$77 million will expire between 2026 and 2045. In addition, Energy Transfer's corporate subsidiaries have a CAMT credit carryforward totaling \$73 million, which are expected to be fully utilized. For the year ended December 31, 2025, the net change in the total valuation allowances was an increase of \$64 million, and for the year ended December 31, 2024, there was no net change. Valuation allowances totaling \$52 million and \$12 million are attributable to the foreign and federal NOLs, respectively. In making the assessment of the future realization of the deferred tax assets, we rely on future reversals of existing taxable differences, tax planning strategies and forecasted taxable income based on historical and projected future operating results. The potential need for valuation allowances is regularly reviewed by management. If it is more likely than not that the recorded asset will not be realized, additional valuation allowances which increase income tax expense may be recognized in the period such determination is made. Likewise, if it is more likely than not that additional deferred tax assets will be realized, an adjustment to the deferred tax asset will increase income in the period such determination is made.

### **Forward-Looking Statements**

This annual report contains various forward-looking statements and information that are based on our beliefs and those of our General Partner, as well as assumptions made by and information currently available to us. These forward-looking statements are identified as any statement that does not relate strictly to historical or current facts. When used in this annual report, words such as "anticipate," "project," "expect," "plan," "goal," "forecast," "estimate," "intend," "could," "believe," "may," "will" and similar expressions and statements regarding our plans and objectives for future operations, are intended to identify forward-looking statements. Although we and our General Partner believe that the expectations on which such forward-looking statements are based are reasonable, neither we nor our General Partner can give assurances that such expectations will prove to be correct. Forward-looking statements are subject to a variety of risks, uncertainties and assumptions. If one or more of these risks or uncertainties materialize, or if underlying assumptions prove incorrect, our actual results may vary materially from those anticipated, estimated, projected or expected. Among the key risk factors that may have a direct bearing on our results of operations and financial condition are:

- the ability of our subsidiaries to make cash distributions to us, which is dependent on their results of operations, cash flows and financial condition;
- the actual amount of cash distributions by our subsidiaries to us;
- the volumes transported on our subsidiaries' pipelines and gathering systems;
- the level of throughput in our subsidiaries' processing and treating facilities;
- the fees our subsidiaries charge and the margins they realize for their gathering, treating, processing, storage and transportation services;
- the prices and market demand for, and the relationship between, natural gas and NGLs;
- energy prices generally;
- impacts of world health events;
- the possibility of cyber and malware attacks;
- the prices of natural gas and NGLs compared to the price of alternative and competing fuels;
- the general level of petroleum product demand and the availability and price of NGL supplies;

- the level of domestic oil, natural gas and NGL production;
- the availability of imported oil, natural gas and NGLs;
- actions taken by foreign oil and gas producing nations;
- the political and economic stability of petroleum producing nations;
- the effect of weather conditions on demand for oil, natural gas and NGLs;
- availability of local, intrastate and interstate transportation systems;
- the continued ability to find and contract for new sources of natural gas supply;
- availability and marketing of competitive fuels;
- the impact of energy conservation efforts;
- energy efficiencies and technological trends;
- governmental regulation, taxation and tariffs;
- changes to, and the application of, regulation of tariff rates and operational requirements related to our subsidiaries' interstate and intrastate pipelines;
- hazards or operating risks incidental to the gathering, treating, processing and transporting of natural gas and NGLs;
- competition from other midstream companies and interstate pipeline companies;
- loss of key personnel;
- loss of key natural gas producers or the providers of fractionation services;
- reductions in the capacity or allocations of third-party pipelines that connect with our subsidiaries pipelines and facilities;
- the effectiveness of risk-management policies and procedures and the ability of our subsidiaries liquids marketing counterparties to satisfy their financial commitments;
- the nonpayment or nonperformance by our subsidiaries' customers;
- risks related to the development of new infrastructure projects or other growth projects, including failure to make sufficient progress to justify continued development, delays in obtaining customers, increased costs of financing and regulatory, environmental, political and legal uncertainties that may affect the timing and cost of these projects;
- risks associated with the construction of new pipelines, treating and processing facilities or other facilities, or additions to our subsidiaries' existing pipelines and their facilities, including difficulties in obtaining permits and rights-of-way or other regulatory approvals and the performance by third-party contractors;
- the availability and cost of capital and our subsidiaries' ability to access certain capital sources;
- a deterioration of the credit and capital markets;
- risks associated with the assets and operations of entities in which our subsidiaries own a noncontrolling interests, including risks related to management actions at such entities that our subsidiaries may not be able to control or exert influence;
- the ability to successfully identify and consummate strategic acquisitions at purchase prices that are accretive to our financial results and to successfully integrate acquired businesses;
- changes in laws and regulations to which we are subject, including tax, environmental, transportation and employment regulations or new interpretations by regulatory agencies concerning such laws and regulations;
- the costs and effects of legal and administrative proceedings; and
- risks associated with a potential failure to successfully combine our business with those of companies we have acquired or may acquire in the future.

You should not put undue reliance on any forward-looking statements. When considering forward-looking statements, please review the risks described under "Item 1A. Risk Factors" in this annual report. Any forward-looking statement made by us in this Annual Report on Form 10-K is based only on information currently available to us and speaks only as of the date on which it is made. We undertake no obligation to publicly update any forward-looking statement, whether written or oral, that may be made from time to time, whether as a result of new information, future developments or otherwise.

## ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

(Tabular dollar amounts are in millions)

Market risk includes the risk of loss arising from adverse changes in market rates and prices. We face market risk from commodity variations, risk and interest rate variations, and to a lesser extent, credit risks. From time to time, we may utilize derivative financial instruments as described below to manage our exposure to such risks.

### Commodity Price Risk

We are exposed to market risks related to the volatility of commodity prices. To manage the impact of volatility from these prices, we utilize various exchange-traded and OTC commodity financial instrument contracts. These contracts consist primarily of futures, swaps and options and are recorded at fair value in our consolidated balance sheets.

We use futures and basis swaps, designated as fair value hedges, to hedge our natural gas inventory stored in our Bammel storage facility. At hedge inception, we lock in a margin by purchasing gas in the spot market or off-peak season and entering into a financial contract. Changes in the spreads between the forward natural gas prices and the physical inventory spot price result in unrealized gains or losses until the underlying physical gas is withdrawn and the related designated derivatives are settled. Once the gas is withdrawn and the designated derivatives are settled, the previously unrealized gains or losses associated with these positions are realized.

We use futures, swaps and options to hedge the sales price of natural gas we retain for fees in our intrastate transportation and storage segment and operational gas sales on our interstate transportation and storage segment. These contracts are not designated as hedges for accounting purposes.

We use NGL and crude derivative swap contracts to hedge forecasted sales of NGL and condensate equity volumes we retain for fees in our midstream segment whereby our subsidiaries generally gather and process natural gas on behalf of producers, sell the resulting residue gas and NGL volumes at market prices and remit to producers an agreed upon percentage of the proceeds based on an index price for the residue gas and NGL. These contracts are not designated as hedges for accounting purposes.

We utilize swaps, futures and other derivative instruments to mitigate the risk associated with market movements in the price of natural gas, refined products and NGLs to manage our storage facilities and the purchase and sale of purity NGL. These contracts are not designated as hedges for accounting purposes.

We use futures and swaps to achieve ratable pricing of crude oil purchases, to convert certain expected refined product sales to fixed or floating prices, to lock in margins for certain refined products and to lock in the price of a portion of natural gas purchases or sales. These contracts are not designated as hedges for accounting purposes.

We use financial commodity derivatives to take advantage of market opportunities in our trading activities which complement our intrastate transportation and storage segment's operations and are netted in cost of products sold in our consolidated statements of operations. We also have trading and marketing activities related to power and natural gas in our all other segment which are also netted in cost of products sold. As a result of our trading activities and the use of derivative financial instruments in our intrastate transportation and storage segment, the degree of earnings volatility that can occur may be significant, favorably or unfavorably, from period to period. We attempt to manage this volatility through the use of daily position and profit and loss reports provided to our risk oversight committee, which includes members of senior management, and the limits and authorizations set forth in our commodity risk management policy.

The following tables summarize commodity-related financial derivative instruments, fair values and the effect of an assumed hypothetical 10% change in the underlying price of the commodity as of December 31, 2025 and 2024 for the Partnership and its consolidated subsidiaries. Dollar amounts are presented in millions.

|   | December 31, 2025 |                              |                                   | December 31, 2024 |                              |                                   |
|---|-------------------|------------------------------|-----------------------------------|-------------------|------------------------------|-----------------------------------|

| Other                                   | *                 | 3                            | 7                                 | —                 | —                            | —                                 |
| <b>Fair Value Hedging Derivatives</b>   |                   |                              |                                   |                   |                              |                                   |
| Natural Gas (BBtu)                      | (100,346)         | 22                           | 20                                | (94,340)          | (3)                          | 17                                |

\* Forward contracts consisting of 54 million renewable identification numbers (“RINs”) maturing in 2026 and emission credits of 747,038 metric tons maturing through 2042.

The fair values of the commodity-related financial positions have been determined using independent third-party prices, readily available market information and appropriate valuation techniques. Non-trading positions offset physical exposures to the cash market; none of these offsetting physical exposures are included in the above tables. Price-risk sensitivities were calculated by assuming a theoretical 10% change (increase or decrease) in price regardless of term or historical relationships between the contractual price of the instruments and the underlying commodity price. Results are presented in absolute terms and represent a potential gain or loss in net income or in other comprehensive income. In the event of an actual 10% change in prompt month natural gas prices, the fair value of our total derivative portfolio may not change by 10% due to factors such as when the financial instrument settles and the location to which the financial instrument is tied (i.e., basis swaps) and the relationship between prompt month and forward months.

#### Interest Rate Risk

As of December 31, 2025, we and our subsidiaries had \$4.25 billion of floating rate debt outstanding. A hypothetical change of 100 basis points would result in a maximum potential change to interest expense of \$43 million annually; however, our actual change in interest expense may be less in a given period due to interest rate floors included in our variable rate debt instruments. We may manage a portion of our interest rate exposure by utilizing interest rate swaps, including forward-starting interest rate swaps to hedge anticipated debt issuances. As of December 31, 2025, the Partnership did not have any outstanding interest rate swaps.

#### Foreign Currency Translation Risk

We generate revenues, incur expenses, and maintain investments and subsidiaries in currencies other than the U.S. dollar. As a result, our reported earnings, cash flows, and AOCI are exposed to fluctuations in foreign currency exchange rates. Changes in exchange rates can affect the U.S. dollar value of our foreign-currency-denominated assets and liabilities, as well as the translation of the operating results and financial position of our international subsidiaries. We may utilize derivative instruments, including foreign currency forward contracts and other hedging strategies, to mitigate the effects of foreign currency-denominated cash flow and earnings exposures. As of December 31, 2025, the Partnership did not have any outstanding foreign currency derivatives.

#### Credit Risk and Customers

Credit risk refers to the risk that a counterparty may default on its contractual obligations resulting in a loss to the Partnership. Credit policies have been approved and implemented to govern the Partnership’s portfolio of counterparties with the objective of mitigating credit losses. These policies establish guidelines, controls and limits to manage credit risk within approved tolerances by mandating an appropriate evaluation of the financial condition of existing and potential counterparties, monitoring agency credit ratings and by implementing credit practices that limit exposure according to the risk profiles of the counterparties. Furthermore, the Partnership may, at times, require collateral under certain circumstances to mitigate credit risk as necessary. The Partnership also uses industry standard commercial agreements which allow for the netting of exposures associated with transactions executed under a single commercial agreement. Additionally, we utilize master netting agreements to offset credit exposure across multiple commercial agreements with a single counterparty or affiliated group of counterparties.

Our natural gas transportation and midstream revenues are derived significantly from companies that engage in exploration and production activities. In addition to oil and gas producers, the Partnership's counterparties consist of a diverse portfolio of customers across the energy industry, including petrochemical companies, commercial and industrial end-users, municipalities, gas and electric utilities, midstream companies and independent power generators. Our overall exposure may be affected positively or negatively by macroeconomic or regulatory changes that impact our counterparties to one extent or another. Currently, management does not anticipate a material adverse effect in our financial position or results of operations as a consequence of counterparty non-performance.

For financial instruments, failure of a counterparty to perform on a contract could result in our inability to realize amounts that have been recorded on our consolidated balance sheets and recognized in net income or other comprehensive income.

The financial statements starting on page [F-1](#) of this report are incorporated by reference.

#### **ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE**

None.

## ITEM 9A. CONTROLS AND PROCEDURES

### Evaluation of Disclosure Controls and Procedures

An evaluation was performed under the supervision and with the participation of our management, including Marshall S. McCrea, III and Thomas E. Long, Co-Chief Executive Officers of our General Partner (Co-Principal Executive Officers), and Dylan A. Bramhall (Principal Financial Officer), of the effectiveness of the design and operation of our disclosure controls and procedures (as such terms are defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act) as of the end of the period covered by this report. Based upon that evaluation, management, including Messrs. McCrea, Long and Bramhall, concluded that our disclosure controls and procedures were adequate and effective as of December 31, 2025.

### Management's Report on Internal Control over Financial Reporting

The management of Energy Transfer LP and subsidiaries is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f). Under the supervision and with the participation of our management, including the Co-Chief Executive Officers and Chief Financial Officer of our General Partner, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (“COSO Framework”).

On October 31, 2025, Sunoco LP completed its acquisition of Parkland. Management acknowledges that it is responsible for establishing and maintaining a system of internal controls over financial reporting for Parkland. Sunoco LP is in the process of integrating Parkland, and therefore we have excluded Parkland from our December 31, 2025 assessment of the effectiveness of internal control over financial reporting. Parkland had total asset of \$13.35 billion as of December 31, 2025 and revenues of \$3.17 billion from November 1, 2025 to December 31, 2025, which are included in our consolidated financial statements as of and for the year ended December 31, 2025. As a result of these integration activities, certain controls are being evaluated and may be changed. We believe, however, that we will be able to maintain sufficient controls over the substantive results of our financial reporting throughout this integration process.

Based on our evaluation under the COSO framework, our management concluded that our internal control over financial reporting was effective as of December 31, 2025.

Grant Thornton LLP, an independent registered public accounting firm, has audited the effectiveness of our internal control over financial reporting as of December 31, 2025, as stated in their report, which is included herein.

## REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors of LE GP, LLC and  
Unitholders of Energy Transfer LP

### Opinion on internal control over financial reporting

We have audited the internal control over financial reporting of Energy Transfer LP (a Delaware limited partnership) and subsidiaries (the “Partnership”) as of December 31, 2025, based on criteria established in the 2013 *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (“COSO”). In our opinion, the Partnership maintained, in all material respects, effective internal control over financial reporting as of December 31, 2025, based on criteria established in the 2013 *Internal Control—Integrated Framework* issued by COSO.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (“PCAOB”), the consolidated financial statements of the Partnership as of and for the year ended December 31, 2025, and our report dated February 19, 2026 expressed an unqualified opinion on those financial statements.

### Basis for opinion

The Partnership’s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management’s Report on Internal Control over Financial Reporting (“Management’s Report”). Our responsibility is to express an opinion on the Partnership’s internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Partnership in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Our audit of, and opinion on, the Partnership’s internal control over financial reporting does not include the internal control over financial reporting of Parkland Corporation (“Parkland”), a consolidated subsidiary, whose financial statements reflect total assets and revenues constituting nine and four percent, respectively, of the related consolidated financial statement amounts as of and for the year ended December 31, 2025. As indicated in Management’s Report, Parkland was acquired during 2025. Management’s assertion on the effectiveness of the Partnership’s internal control over financial reporting excluded internal control over financial reporting of Parkland.

### Definition and limitations of internal control over financial reporting

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

/s/ GRANT THORNTON LLP

Dallas, Texas  
February 19, 2026

## Changes in Internal Controls over Financial Reporting

Except for the Parkland Acquisition, there have been no changes in our internal control over financial reporting during three months ended December 31, 2025 that have materially affected or are reasonably likely to materially affect our internal control over financial reporting.

## ITEM 9B. OTHER INFORMATION

On February 14, 2026, Gregory G. McIlwain, Executive Vice President – Operations, informed the Partnership of his intention to retire, effective April 6, 2026. The Partnership thanks Mr. McIlwain for his years of dedicated service and significant contributions to the Partnership and wishes him well in his retirement.

In connection with Mr. McIlwain's retirement and (i) his willingness to be available on a consulting basis through the end of 2026; and (ii) in order to recognize his contributions to the Partnership, Mr. McIlwain and the Partnership intend to enter into a Restrictive Covenant and Separation Agreement and Full Release of Claims (the "McIlwain Separation Agreement"). The McIlwain Separation Agreement will become effective after execution and the expiration of a seven (7) day revocation period. The McIlwain Separation Agreement will provide for the following: (i) accelerated vesting of 10% of his unvested cash restricted units (3,862 units) under the Partnership's Long-Term Cash Restricted Unit Plan (the "CRU Plan"), less all required governmental payroll deductions and withholdings, in exchange for the release of claims described below; (ii) accelerated vesting of 60% of his unvested restricted units (203,041 units) under the Partnership's Amended and Restated Energy Transfer LP Long-Term Incentive Plan (the "ET LTIP Plan"), less all required governmental payroll deductions and withholdings, in consideration of the restrictive covenants described below; and (iii) accelerated vesting of 50% of his unvested cash restricted units (19,309 units) under the CRU Plan, less all required governmental payroll deductions and withholdings, in consideration of Mr. McIlwain entering into a consulting agreement, pursuant to which Mr. McIlwain will provide consulting services through December 31, 2026.

The McIlwain Separation Agreement will include, among other things, (i) a standard release of claims in favor of the Partnership, specifically including our General Partner and each of the Partnership's respective past and present subsidiaries, affiliates, partners, directors, officers, owners, shareholders, employees, benefit plans, benefit plan fiduciaries, predecessors, joint employers, successor employers and agents; (ii) a twelve (12) month restrictive covenant provision whereby Mr. McIlwain acknowledges obligations with respect to competition and solicitation of customers and employees; (iii) a non-disparagement clause; (iv) a confirmation and acknowledgement by Mr. McIlwain of his obligations with respect to proprietary and confidential information; and (v) a general twenty-four (24) month cooperation clause and an open-ended cooperation clause with respect to any currently pending litigation matter in which Mr. McIlwain is involved.

In addition to the foregoing, Mr. McIlwain will also receive the remaining 40% of his unvested restricted units (135,360 units) under the ET LTIP Plan and the remaining 40% of his unvested cash restricted units (15,446 units) under the CRU Plan pursuant to the qualified retirement provisions of each plan, which vesting will be subject to a six-month delay in the acceleration of vesting and payment of any associated distribution amount pursuant to the terms of the plans and Internal Revenue Code Section 409(A). Additional information on the retirement provisions associated with the Partnership's incentive plans is available in Item 11, "Executive Compensation," in this annual report on Form 10-K.

On February 19, 2026, the Partnership announced that, upon Mr. McIlwain's retirement, Daniel Wentworth, 47, will assume the role of Executive Vice President – Operations, replacing Mr. McIlwain. Mr. Wentworth has served as Group Senior Vice President – Operations and Engineering of the Partnership since 2022. Prior to joining Energy Transfer in 2022, Mr. Wentworth worked for Caiman Energy II, LLC, a midstream energy company focused on the design, construction, operation and acquisition of midstream assets, having served as Executive Vice President and Chief Operating Officer, from 2017 to 2022, and as Senior Vice President – Engineering and Operations, from 2012 to 2017. He graduated from Mississippi State University with a degree in Mechanical Engineering.

In his new position, Mr. Wentworth will receive an annual base salary of \$500,000 and will be eligible to participate in the Partnership's Annual Bonus Plan, as amended (the "Bonus Plan"), at a bonus pool target of 130% of his annual eligible earnings. Actual bonus payments under the Bonus Plan will be at the discretion of the Partnership's compensation committee and generally will be based upon the Partnership's performance as compared to stated objectives and certain other factors as may be determined from time to time. Mr. Wentworth will also be eligible for long-term incentive awards under the ET LTIP Plan and the CRU Plan at an annual equity pool target of 500% of his annual base salary. Actual incentive equity awards under the ET LTIP Plan and CRU Plan are at the discretion of the Partnership's compensation committee and are generally based on Partnership and individual performance. Mr. Wentworth will also receive a one-time grant of 22,500 restricted units under the ET LTIP Plan that will vest 60% on December 5, 2028, and the remaining 40% on December 5, 2030, and 7,500 cash restricted units under the CRU Plan, which shall vest in equal 1/3 increments on December 5, 2026, December 5, 2027, and December 5, 2028.

Mr. Wentworth will also be eligible to participate in all benefit and retirement plans on the same terms and conditions as other Partnership executives. There are no arrangements or understandings between Mr. Wentworth and any other person pursuant to which he was selected as an officer. There are no existing relationships between Mr. Wentworth, the General Partner, or the Partnership or any of their respective subsidiaries that would require disclosure pursuant to Item 404(a) of Regulation S-K or any familial relationship that would require disclosure under Item 401(d) of Regulation S-K.

**ITEM 9C. DISCLOSURE REGARDING FOREIGN JURISDICTIONS THAT PREVENT INSPECTIONS**

Not applicable.

## **PART III**

### **ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE**

#### **Board of Directors**

Our general partner, LE GP, LLC, manages and directs all of our activities. The officers and directors of Energy Transfer are officers and directors of LE GP, LLC. The members of our general partner elect our general partner's Board of Directors. The board of directors of our general partner has the authority to appoint our executive officers, subject to provisions in the limited liability company agreement of our general partner. Pursuant to other authority, the board of directors of our general partner may appoint additional management personnel to assist in the management of our operations and, in the event of the death, resignation or removal of our chief executive officer, to appoint a replacement.

As of January 1, 2026, our Board of Directors is comprised of eight persons, four of whom qualify as "independent" under the NYSE's corporate governance standards. As a limited partnership, we are not required under the NYSE's corporate governance standards (Section 303A) to have a majority of independent directors. We have determined that Messrs. Anderson, Grimm, Perry and Ramsey are all "independent" under the NYSE's corporate governance standards.

As a limited partnership, we are not required by the rules of the NYSE to seek Unitholder approval for the election of any of our directors. We believe that the members of our general partner have appointed as directors individuals with experience, skills and qualifications relevant to the business of Energy Transfer, such as experience in energy or related industries or with financial markets, expertise in natural gas operations or finance, and a history of service in senior leadership positions. We do not have a formal process for identifying director nominees, nor do we have a formal policy regarding consideration of diversity in identifying director nominees, but we believe that the members of our general partner have endeavored to assemble a group of individuals with the qualities and attributes required to provide effective oversight of Energy Transfer.

*Board Leadership Structure.* We have no policy requiring either that the positions of the Chairman of the Board and the Chief Executive Officer, or CEO, be separate or that they be occupied by the same individual. The Board of Directors believes that this issue is properly addressed as part of the succession planning process and that a determination on this subject should be made when it elects a new chief executive officer or at such other times as when consideration of the matter is warranted by circumstances. Previously, the Board of Directors believed that the CEO was best situated to serve as Chairman because he was the director most familiar with the Partnership's business and industry, and most capable of effectively identifying strategic priorities and leading the discussion and execution of strategy. Beginning in 2021, the Board of Directors has established separate roles for the Executive Chairman and Co-Chief Executive Officers. Independent directors and management have different perspectives and roles in strategy development. Our independent directors bring experience, oversight and expertise from outside the Partnership and from a variety of industries, while the Executive Chairman and Co-Chief Executive Officers bring extensive experience and expertise specifically related to the Partnership's business.

*Risk Oversight.* Our Board of Directors generally administers its risk oversight function through the board as a whole. Our Co-CEOs, who report to the Board of Directors, have day-to-day risk management responsibilities. Our Co-CEOs attend the meetings of our Board of Directors, where the Board of Directors routinely receives reports on our financial results, the status of our operations, and other aspects of implementation of our business strategy, with ample opportunity for specific inquiries of management. In addition, at each regular meeting of the Board, management provides a report of Energy Transfer's financial and operational performance, which often prompts questions or feedback from the Board of Directors. The Audit Committee provides additional risk oversight through its quarterly meetings, where it receives a report from Energy Transfer's internal auditor, who reports directly to the Audit Committee, and reviews Energy Transfer's contingencies with management and our independent auditors.

#### **Corporate Governance**

The Board of Directors has adopted both a Code of Business Conduct and Ethics applicable to our directors, officers and employees, and Corporate Governance Guidelines for directors and the Board. Current copies of our Code of Business Conduct and Ethics, Corporate Governance Guidelines and charters of the Audit and Compensation Committees of our Board of Directors are available on our website at [www.energytransfer.com](http://www.energytransfer.com) and will be provided in print form to any Unitholder requesting such information.

Please note that the preceding internet address is for information purposes only and is not intended to be a hyperlink. Accordingly, no information found and/or provided at such internet address or contained on our website in general is intended or deemed to be incorporated by reference in this report.

## **Annual Certification**

In 2025, our Co-Chief Executive Officers provided to the NYSE the annual CEO certification regarding our compliance with the NYSE's corporate governance listing standards.

## **Conflicts Committee**

Our Partnership Agreement provides that the Board of Directors may, from time to time, appoint members of the Board to serve on the Conflicts Committee with the authority to review specific matters for which the Board of Directors believes there may be a conflict of interest in order to determine if the resolution of such conflict proposed by the general partner is fair and reasonable to Energy Transfer and our Unitholders. As a policy matter, the Conflicts Committee generally reviews any proposed related-party transaction that may be material to Energy Transfer to determine if the transaction presents a conflict of interest and whether the transaction is fair and reasonable to Energy Transfer. Pursuant to the terms of our Partnership Agreement, any matters approved by the Conflicts Committee will be conclusively deemed to be fair and reasonable to Energy Transfer, approved by all partners of Energy Transfer and not a breach by the general partner or its Board of Directors of any duties they may owe Energy Transfer or the Unitholders. These duties are limited by our Partnership Agreement (see "Risks Related to Conflicts of Interest" in "Item 1A. Risk Factors" in this annual report).

## **Audit Committee**

The Board of Directors has established an Audit Committee in accordance with Section 3(a)(58)(A) of the Exchange Act. The Board of Directors appoints persons who are independent under the NYSE's standards for audit committee members to serve on its Audit Committee. In addition, the Board determines that at least one member of the Audit Committee has such accounting or related financial management expertise sufficient to qualify such person as the audit committee financial expert in accordance with Item 407(d)(5) of Regulation S-K. The Board determined that based on relevant experience, Audit Committee member Michael K. Grimm qualified as an audit committee financial expert during 2025. A description of the qualifications of Mr. Grimm may be found elsewhere in this Item 10 under "Directors and Executive Officers of the General Partner."

The Audit Committee meets on a regularly scheduled basis with our independent accountants at least four times each year and is available to meet at their request. The Audit Committee has the authority and responsibility to review our external financial reporting, review our procedures for internal auditing and the adequacy of our internal accounting controls, consider the qualifications and independence of our independent accountants, engage and direct our independent accountants, including the letter of engagement and statement of fees relating to the scope of the annual audit work and special audit work which may be recommended or required by the independent accountants, and to engage the services of any other advisors and accountants as the Audit Committee deems advisable. The Audit Committee reviews and discusses the audited financial statements with management, discusses with our independent auditors matters required to be discussed by auditing standards, and approves the filing of our Form 10-K, which includes our audited financial statements. The Audit Committee periodically recommends to the Board of Directors any changes or modifications to its charter that may be required. The Audit Committee has received written disclosures and the letter from Grant Thornton required by applicable requirements of the Audit Committee concerning independence and has discussed with Grant Thornton the firm's independence. The Audit Committee recommended to the Board that the audited financial statements of Energy Transfer be included in Energy Transfer's Annual Report on Form 10-K for the year ended December 31, 2025.

The Board of Directors adopts the charter for the Audit Committee. Steven R. Anderson, Michael K. Grimm and Matthew S. Ramsey currently serve as elected members of the Audit Committee, and Richard D. Brannon served on the Audit Committee for a portion of 2025.

## **Compensation and Nominating/Corporate Governance Committees**

Although we are not required under NYSE rules to appoint a Compensation Committee or a Nominating/Corporate Governance Committee because we are a limited partnership, the Board of Directors of LE GP, LLC has previously established a Compensation Committee to establish standards and make recommendations concerning the compensation of our officers and directors. In addition, the Compensation Committee determines and establishes the standards for any awards to our employees and officers under the equity compensation plans, including the performance standards or other restrictions pertaining to the vesting of any such awards. Messrs. Anderson and Grimm serve as members of the Compensation Committee.

The responsibilities of the Energy Transfer Compensation Committee include, among other duties, the following:

- annually review and approve goals and objectives relevant to compensation of our Co-CEOs and CFO, if applicable;

- annually evaluate the Co-CEOs and CFO's performance in light of these goals and objectives, and make recommendations to the Board of Directors with respect to the Co-CEOs and CFO's compensation levels, if applicable, based on this evaluation;
- make determinations with respect to the grant of equity-based awards to executive officers under Energy Transfer's equity incentive plans;
- periodically evaluate the terms and administration of Energy Transfer's long-term incentive plans to assure that they are structured and administered in a manner consistent with Energy Transfer's goals and objectives;
- periodically evaluate incentive compensation and equity-related plans and consider amendments if appropriate;
- periodically evaluate the compensation of the directors;
- retain and terminate any compensation consultant to be used to assist in the evaluation of director, Co-CEOs and CFO or executive officer compensation; and
- perform other duties as deemed appropriate by the Board of Directors.

### **Code of Business Conduct and Ethics**

The Board of Directors has adopted a Code of Business Conduct and Ethics applicable to our officers, directors and employees. Specific provisions are applicable to the co-principal executive officers, principal financial officer, principal accounting officer and controller, or those persons performing similar functions, of our general partner. Amendments to, or waivers from, the Code of Business Conduct and Ethics will be available on our website and reported as may be required under SEC rules. Any technical, administrative or other non-substantive amendments to the Code of Business Conduct and Ethics may not be posted.

### **Insider Trading Policy**

The Board has adopted insider trading policies and procedures that we believe are reasonably designed to promote compliance with insider trading laws, rules, and regulations, and the listing standards of the New York Stock Exchange. Our insider trading policy is applicable to all employees, officers and directors and, among other things, (i) prohibits our employees, officers, directors and related persons and entities from trading in securities of Energy Transfer and its affiliated companies while in possession of material, non-public information, (ii) prohibits our employees, officers and directors from disclosing material, non-public information to persons outside of the Partnership, other than in the course of performance of their duties, and (iii) requires that certain individuals who are designated as "Insiders" only transact in Partnership securities during an open trading window period, subject to limited exceptions. A copy of our insider trading policy is filed as Exhibit 19.1 to this Form 10-K.

### **Meetings of Non-management Directors and Communications with Directors**

Our non-management directors meet in regularly scheduled sessions. Our non-management directors alternate as the presiding director of such meetings.

We have established a procedure by which Unitholders or interested parties may communicate directly with the Board of Directors, any committee of the Board, any of the independent directors, or any one director serving on the Board of Directors by sending written correspondence addressed to the desired person, committee or group to the attention of Sonia Aubé at Energy Transfer LP, 8111 Westchester Drive, Suite 600, Dallas, Texas, 75225. Communications are distributed to the Board of Directors, or to any individual director or directors as appropriate, depending on the facts and circumstances outlined in the communication.

## Directors and Executive Officers of Our General Partner

The following table sets forth certain information with respect to the executive officers and members of the Board of Directors of our general partner as of February 19, 2026. Executive officers and directors are elected for indefinite terms.

| <u>Name</u>                      | <u>Age</u> | <u>Position with Our General Partner</u>   |
|----------------------------------|------------|--|
| Kelcy L. Warren                  | 70         | Executive Chairman of the Board of Directors   |
| Thomas E. Long                   | 69         | Co-Chief Executive Officer and Director (Co-Principal Executive Officer)                 |
| Marshall S. (Mackie) McCrea, III | 66         | Co-Chief Executive Officer and Director (Co-Principal Executive Officer)                 |
| Dylan A. Bramhall                | 49         | Executive Vice President and Group Chief Financial Officer (Principal Financial Officer) |
| James M. Wright, Jr.             | 57         | Executive Vice President, General Counsel and Chief Compliance Officer                   |
| Gregory G. McIlwain              | 67         | Executive Vice President — Operations  |
| A. Troy Sturrock                 | 55         | Group Senior Vice President and Controller (Principal Accounting Officer)                |
| Steven R. Anderson               | 76         | Director   |
| Michael K. Grimm                 | 71         | Director   |
| John W. McReynolds               | 75         | Director   |
| James R. (Rick) Perry            | 75         | Director   |
| Matthew S. Ramsey                | 70         | Director   |

Set forth below is biographical information regarding the foregoing officers and directors of our general partner:

**Kelcy L. Warren.** Mr. Warren serves as Executive Chairman of our general partner. Mr. Warren served as Chief Executive Officer from August 2007 through December 2020. He was appointed Co-Chairman of the Board of Directors of our general partner, effective upon the closing of our IPO, and in August 2007, he became the sole Chairman of the Board of our general partner and the Chief Executive Officer and Chairman of the Board of the general partner of ETO until its merger into Energy Transfer LP in April 2021. Prior to August 2007, Mr. Warren had served as Co-Chief Executive Officer and Co-Chairman of the Board of the general partner of ETO since the combination of the midstream and intrastate transportation storage operations of La Grange Acquisition, L.P. and the retail propane operations of Heritage in January 2004. Mr. Warren also served as the Chief Executive Officer of PennTex Midstream Partners, LP's general partner from November 2016 to July 2017. Mr. Warren was selected to serve as a director and as Executive Chairman because he previously served as Chief Executive Officer and has more than 30 years in the natural gas industry. Mr. Warren also has relationships with chief executives and other senior management at natural gas transportation companies throughout the United States and brings a unique and valuable perspective to the Board of Directors.

**Thomas E. Long.** Mr. Long has served as the Co-Chief Executive Officer of our general partner since January 2021. Mr. Long served as Chief Financial Officer of Energy Transfer's general partner from February 2016 until January 2021, and has been a director of our general partner since April 2019. Mr. Long also served as the Chief Financial Officer and as a director of PennTex Midstream Partners, LP's general partner from November 2016 to July 2017. Mr. Long also served as Chief Financial Officer of ETO until its merger into Energy Transfer LP in April 2021, and was previously Executive Vice President and Chief Financial Officer of Regency GP LLC from November 2010 to April 2015. Mr. Long served as a director of Sunoco LP from May 2016 until May 2021, and has served on the Board of USAC since April 2018. In May 2022, Mr. Long was appointed to the board of directors of Texas Capital Bancshares, Inc (NASDAQ: TCBI). Mr. Long was appointed to the board of directors of TXSE Group Inc., the parent company of the Texas Stock Exchange, in July 2024. Mr. Long was selected to serve on our Board of Directors because of his understanding of energy-related corporate finance gained through his extensive experience in the energy industry.

**Marshall S. (Mackie) McCrea, III.** Mr. McCrea has served as the Co-Chief Executive Officer of our general partner since January 2021. Prior to that he was the President and Chief Commercial Officer of our general partner, having served in that role since October 2018 following the merger of Energy Transfer Equity, L.P. and Energy Transfer Partners, L.P. Prior to that time, he had been the Group Chief Operating Officer and Chief Commercial Officer of the Energy Transfer family since November 2015. Mr. McCrea has served on the Board of Directors of our general partner since December 2009. Mr. McCrea was appointed as a director of the general partner of ETO in December 2009 and served in that capacity until ETO's merger into Energy Transfer LP in April 2021. Prior to December 2009, he served as President and Chief Operating Officer of ETO's general partner from June 2008 to November 2015 and President – Midstream from March 2007 to June 2008. Previously he served as the Senior Vice President – Commercial Development since January 2004. In March 2005, Mr. McCrea was named President of La Grange Acquisition LP, ETO's primary operating subsidiary, after serving as Senior Vice President-Business

Development and Producer Services since 1997. Mr. McCrea also served as the Chairman of the Board of Directors of the general partner of Sunoco Logistics Partners L.P. from October 2012 to April 2017. Mr. McCrea was selected to serve as a director because he brings extensive project development and operational experience to the Board. He has held various positions in the natural gas business over the past 25 years and is able to assist the Board of Directors in creating and executing the Partnership's strategic plan.

**Dylan A. Bramhall.** Mr. Bramhall has served as Executive Vice President and Group Chief Financial Officer of our general partner since November 2022 and currently is also Chief Financial Officer of Sunoco LP's general partner. He has also served on the board of directors of USAC since April 2024. Mr. Bramhall joined Energy Transfer in 2015 as a result of its merger with Regency Energy Partners and is responsible for oversight of the Partnership's Financial Planning and Analysis, Credit and Commodity Risk Management, Insurance, Cash Management, Capital Markets, Accounting, Financial Reporting and Investor Relations groups. He also serves as a member of Energy Transfer's Risk Oversight Committee. While at Regency, Mr. Bramhall held management positions in the finance, risk, commercial and operations groups. Mr. Bramhall holds a Bachelor of Business Administration in finance and Master of Business Administration in finance and operations management, both from the University of Iowa.

**Gregory G. McIlwain.** Mr. McIlwain is Executive Vice President of Operations for Energy Transfer and has more than three decades of experience in the oil and gas industry. Mr. McIlwain has been with the Partnership since its acquisition of Transwestern Pipeline in 2006 and has held senior leadership positions in the operations group for more than 10 years, most recently as Group Senior Vice President. Prior to joining Energy Transfer, he worked for Texas Utilities Generating Company and several Enron entities. He graduated from Texas A&M with a Mechanical Engineering degree.

**James M. Wright, Jr.** Mr. Wright was appointed as Executive Vice President, General Counsel and Chief Compliance Officer of our general partner in December 2022. He became Executive Vice President - Legal and Chief Compliance Officer of ET's general partner in October 2018 following the merger of Energy Transfer Equity, L.P. and Energy Transfer Partners, L.P. Mr. Wright has been a part of the Energy Transfer legal team with increasing levels of responsibility since July 2005 and has held various senior-level positions in the legal department including General Counsel of the general partner of Energy Transfer Partners, L.P. from December 2015 to October 2018 and Deputy General Counsel from May 2008 to December 2015. Since April 2024, Mr. Wright has served on the board of directors of USAC. Prior to joining Energy Transfer, Mr. Wright gained significant experience at Enterprise Products Partners, L.P., El Paso Corp., Sonat Exploration Company and KPMG Peat Marwick LLP. Mr. Wright earned a Bachelor of Business Administration degree in Accounting and Finance from Texas A&M University and a JD from South Texas College of Law.

**A. Troy Sturrock.** Mr. Sturrock has served as the Group Senior Vice President, Controller and Principal Accounting Officer of our general partner since September 2022. He previously served as Senior Vice President, Controller and Principal Accounting Officer, having assumed that role in October 2018 following the merger of Energy Transfer Equity, L.P. and Energy Transfer Partners, L.P. He served as the Senior Vice President, Controller and Principal Accounting Officer of the general partner of ETO from August 2016 until ETO's merger into Energy Transfer LP in April 2021, and previously served as Vice President, Controller and Principal Accounting Officer of our general partner beginning in June 2015. In 2026, Mr. Sturrock was elected to the board of directors of Dorchester Minerals, L.P. (Nasdaq: DMLP), a publicly traded partnership that owns crude oil and natural gas interests in 28 states. Mr. Sturrock is a Certified Public Accountant.

**Steven R. Anderson.** Mr. Anderson was elected to the Board of Directors of our general partner in June 2018 and serves on the audit committee and compensation committee. Mr. Anderson began his career in the energy business in the early 1970s with Conoco in the Permian Basin area. He then spent some 25 years with ANR Pipeline and its successor, The Coastal Corporation, as a natural gas supply and midstream executive. He later was Vice President of Commercial Operations with Aquila Midstream and, upon the sale of that business to Energy Transfer in 2002, he became a part of the management team there. For the six years prior to his retirement from Energy Transfer in October 2009, he served as Vice President of Mergers and Acquisitions. Since that time, he has been involved in private investments and has served on the boards of directors of the St. John Health System and Saint Simeon's Episcopal Home in Tulsa, Oklahoma, as well as various other community and civic organizations. Mr. Anderson also served as a member of the board of directors of Sunoco Logistics Partners L.P. from October 2012 until April 2017. Mr. Anderson was selected to serve on our Board of Directors based on his experience in the midstream energy industry generally, and his knowledge of Energy Transfer's business specifically.

**Michael K. Grimm.** Mr. Grimm was appointed to the Board of Directors of our general partner in October 2018, and has served on the audit committee and compensation committee since that time. Prior to that time, Mr. Grimm served as a director of ETO's general partner beginning in December 2005, and served on the audit and compensation committee during that time. Mr. Grimm is one of the original founders of Rising Star Energy, L.L.C., a privately held upstream exploration and production company active in onshore continental United States, and served as its President and Chief Executive Officer from 1995 until 2006 when it was sold. Mr. Grimm is currently President of Rising Star Petroleum, LLC. Mr. Grimm was formerly Chairman of

the Board of RSP Permian, Inc. (NYSE: RSPP) from January 2014 until June 2018. From November 2018 until it was sold in 2019, Mr. Grimm served on the Board of Directors of Anadarko Petroleum Corporation. Prior to the formation of Rising Star, Mr. Grimm was Vice President of Worldwide Exploration and Land for Placid Oil Company from 1990 to 1994. Prior to joining Placid Oil Company, Mr. Grimm was employed by Amoco Production Company for thirteen years where he held numerous positions throughout the exploration department in Houston, New Orleans and Chicago. Mr. Grimm has been an active member of the American Association of Professional Landmen, Dallas Wildcat Committee, Dallas Producers Club, and the All-American Wildcatters. He has a B.B.A. from the University of Texas at Austin. Mr. Grimm was selected to serve as a director because of his extensive experience in the energy industry and his service as a senior executive at several energy-related companies, in addition to his contacts in the industry gained through his involvement in energy-related organizations.

**John W. McReynolds.** Mr. McReynolds is a director of Energy Transfer LP, having served in that capacity since August 2004. Mr. McReynolds previously served as the President of Energy Transfer LP from March 2005 until October 2018, at which time he became Special Advisor to the Partnership. Mr. McReynolds also previously served as our Chief Financial Officer from August 2005 to June 2013. Prior to becoming President of Energy Transfer LP, Mr. McReynolds was a partner in the international law firm of Hunton & Williams LLP for over 20 years. As a lawyer, he specialized in energy related finance, securities, partnerships, mergers and acquisitions, syndication and litigation matters, and served as an expert in numerous arbitration, litigation, and governmental proceedings, including as an expert in special projects for boards of directors of public companies. Mr. McReynolds was selected to serve in the indicated roles with Energy Transfer because of this extensive background and experience, as well as his many contacts and relationships in the industry.

**James R. (Rick) Perry.** Mr. Perry was appointed to the Board of Directors of our general partner in January 2020. He formerly served as U.S. Secretary of Energy from March 2017 until December 2019. Prior to that, he served as the Governor of the State of Texas from 2000 until January 2015. Mr. Perry served as Lieutenant Governor of Texas from 1998 to 2000, and as Agriculture Commissioner from 1991 to 1998. Prior to 1991, he also served in the Texas House of Representatives. Mr. Perry previously served on the Board of Directors of ETO from February 2015 until December 2016. Mr. Perry was appointed to the board of directors of TXSE Group Inc., the parent company of the Texas Stock Exchange, in July 2024, and in September 2025, he was appointed to the board of directors of Fermi Inc. (Nasdaq and LSE: FRMI), an advanced energy and hyperscaler development company. Mr. Perry was selected to serve as a director because of his vast experience as an executive in the highest office of state government. In addition, Mr. Perry has been involved in finance and budget planning processes throughout his career in government as a member of the Texas House Appropriations Committee, the Legislative Budget Board and as Governor.

**Matthew S. Ramsey.** Mr. Ramsey was appointed as a director of Energy Transfer's general partner in July 2012 and served as a director of ETO's general partner from November 2015 until its merger into Energy Transfer LP in April 2021. Mr. Ramsey has served on the audit committee since October 2025. Mr. Ramsey served as the Chief Operating Officer of our general partner from October 2018 until his retirement in April 2022, and served as President and Chief Operating Officer of ETO's general partner from November 2015 until its merger into Energy Transfer LP in April 2021. Mr. Ramsey also served as President and Chief Operating Officer and Chairman of the board of directors of PennTex Midstream Partners, LP's general partner from November 2016 to July 2017. Mr. Ramsey also previously served as a director of Sunoco LP, having served as chairman of Sunoco LP's board from April 2015 until March 2022, and of USAC, having served on that board from April 2018 until March 2022. Mr. Ramsey previously served as President of RPM Exploration, Ltd., a private oil and gas exploration partnership, and previously served as a director of RSP Permian, Inc. where he served on the audit and compensation committees. In addition to his work in the energy business, Mr. Ramsey is currently a Trustee of the Southwestern Medical Foundation. He is the former Chairman of the University of Texas Chancellor's Council. Mr. Ramsey holds a B.B.A. in Marketing from the University of Texas at Austin and a J.D. from South Texas College of Law. Mr. Ramsey was selected to serve based on vast experience in the oil and gas space and Energy Transfer believes that he provides valuable industry insight as a member of our Board of Directors.

#### **Delinquent Section 16(a) Reports**

Section 16(a) of the Securities Exchange Act of 1934 requires the directors and executive officers of our general partner, as well as persons who own more than ten percent of the common units representing limited partnership interests in us, to file reports of ownership and changes of ownership on Forms 3, 4 and 5 with the SEC. The SEC regulations also require that copies of these Section 16(a) reports be furnished to us by such reporting persons. Based upon a review of copies of these reports, we believe all applicable Section 16(a) reports were timely filed in 2025, with the exception of one late filing by Mr. Perry.

## ITEM 11. EXECUTIVE COMPENSATION

### Compensation Discussion and Analysis

#### *Named Executive Officers*

Energy Transfer does not have officers or directors. Instead, we are managed by the board of directors of our General Partner, and the executive officers of our General Partner perform all of Energy Transfer's management functions. As a result, the executive officers of our General Partner are Energy Transfer's executive officers, and their compensation is administered by our General Partner. This Compensation Discussion and Analysis is, therefore, focused on the total compensation of the executive officers of our General Partner as set forth below. The persons we refer to in this discussion as our "named executive officers" or "NEOs" for the 2025 fiscal year are the following:

- Marshall S. (Mackie) McCrea, III, Co-Chief Executive Officer;
- Thomas E. Long, Co-Chief Executive Officer;
- Dylan A. Bramhall, Executive Vice President and Group Chief Financial Officer;
- James M. Wright, Jr., Executive Vice President, General Counsel and Chief Compliance Officer;
- Gregory G. McIlwain, Executive Vice President, Operations; and
- Aden (Troy) Sturrock, Group Senior Vice President and Controller.

#### *Our Philosophy for Compensation of Executives*

In general, our General Partner's philosophy for executive compensation is based on the premise that a significant portion of each executive's compensation should be incentive-based or "at-risk" compensation and that executives' total compensation levels should be highly competitive in the marketplace for executive talent and abilities. Our General Partner seeks a total compensation program for its executive officers, including the NEOs, that provides for a slightly below the median market annual base compensation (i.e., approximately the 30<sup>th</sup> to 40<sup>th</sup> percentile of market) but incentive-based compensation composed of a combination of compensation vehicles to reward both short- and long-term performance that are both targeted to pay out at approximately the top-quartile of market. Our General Partner believes the incentive-based balance is achieved by (i) the payment of annual discretionary cash bonuses that consider the achievement of the Partnership's financial performance objectives for a fiscal year set at the beginning of such fiscal year and the individual contributions of its executive officers, including the NEOs, to the success of the Partnership and the achievement of the annual financial performance objectives and (ii) the annual grant of time-based restricted unit, phantom unit awards or cash restricted unit awards under the Partnership's equity incentive plan(s). Annual equity-based incentive awards, including awards to the named executive officers, are intended to provide a long-term incentive and retention value to key employees, and to encourage key employees to focus their efforts on increasing the market price of the Partnership's publicly traded units and to increase the cash distribution the Partnership and/or the other affiliated partnerships pay to their respective unitholders.

The Partnership grants a combination of restricted unit and/or phantom unit awards ("RSUs") and cash restricted units ("CRSUs"). The total annual awards to executives, including NEOs, are generally split with 75% in the form of RSUs and 25% in the form of CRSUs. The RSUs vest, based generally upon continued employment, at a rate of 60% after the third year of service and the remaining 40% after the fifth year of service and the CRSUs vest, based generally upon continued employment, at a rate of 1/3 annually over a three-year period. The Partnership believes that these equity-based incentive arrangements are important in attracting and retaining executive officers and key employees as well as motivating these individuals to achieve stated business objectives. The equity-based compensation reflects the importance our General Partner places on aligning the interests of its named executive officers with those of Unitholders.

While the Partnership utilizes time-based forms of equity awards, the grant date valuation utilizes a modified total unitholder return ("TUR") performance as measured against the average return of Energy Transfer's identified peer group over defined time periods. The modified TUR is designed to create a recognition of a performance adjustment to the equity awards based on the prior periods measured to add an element of performance impact in setting grant date value even though the RSUs and CRSUs themselves are a time-vested vehicle.

As discussed below, our compensation committee, in consultation with our General Partner, are responsible for the compensation policies and compensation level of our executive officers, including the named executive officers of our General Partner. In this discussion, we refer to our compensation committee as the "Energy Transfer Compensation Committee."

For a more detailed description of the compensation to the Partnership's NEOs, please see "– Compensation Tables" below.

### ***Distributions to Our General Partner***

Our General Partner is majority-owned by Mr. Kelcy Warren. We pay quarterly distributions to our General Partner in accordance with our Partnership Agreement with respect to its ownership of its general partner interest as specified in our Partnership Agreement. The cash distributions we make to our General Partner bear no relationship to the level or components of compensation of our General Partner's executive officers. Distributions to our General Partner are described in detail in Note 8 to our consolidated financial statements included in "Item 8. Financial Statements and Supplementary Data." Our named executive officers also own directly and indirectly certain of our limited partner interests and, accordingly, receive quarterly distributions. Such per-unit distributions equal the per-unit distributions made to all our limited partners and bear no relationship to the level of compensation of the named executive officers or the services they perform as employees.

For a more detailed description of the compensation of our NEOs, please see "– Compensation Tables" below.

### ***Compensation Philosophy***

Our compensation programs are structured to achieve the following:

- reward executives with an industry-competitive total compensation package of base salaries and significant incentive opportunities yielding a total compensation package approaching the top-quartile of the market;
- attract, retain and reward talented executive officers and key management employees by providing total compensation competitive with that of other executive officers and key management employees employed by publicly traded limited partnerships or other peer companies of similar size and in similar lines of business;
- motivate executive officers and key employees to achieve strong financial and operational performance;
- emphasize performance-based, or "at-risk," compensation; and
- reward individual performance.

### ***Components of Executive Compensation***

For the year ended December 31, 2025, the compensation granted to our NEOs consisted of the following components:

- annual base salary;
- non-equity incentive plan compensation consisting solely of discretionary cash bonuses based on stated performance objectives;
- time-vested RSUs and CRSUs under the equity incentive plan(s);
- payment of distribution equivalent rights ("DERs") on unvested RSUs under our equity incentive plan(s); and
- 401(k) plan employer matching contributions.

### ***Methodology***

The Energy Transfer Compensation Committee considers relevant data available to it to assess our competitive position with respect to base salary, annual short-term incentives and long-term incentive compensation for our executives, including the named executive officers. The Energy Transfer Compensation Committee also considers individual performance, levels of responsibility, skills and experience.

Periodically, the Energy Transfer Compensation Committee engages a third-party independent compensation consultant to provide a full market competitive compensation analysis for compensation levels at peer companies in order to assist in the determination of compensation levels for our executive officers, including the named executive officers. In 2025, Meridian Compensation Partners, LLC ("Meridian") completed an evaluation of the market competitiveness of total compensation levels of a number of officers of the Partnership, including the named executive officers. The Meridian review provided market information with respect to compensation of Partnership executives, including NEOs during the year ended December 31, 2025, which replaced and updated data from the previous review conducted in 2023. In particular, the review by Meridian was designed to (i) evaluate the market competitiveness of total compensation levels for certain members of senior management, including our named executive officers; (ii) assist in the determination of appropriate compensation levels for our senior management, including the named executive officers; and (iii) confirm that our compensation programs were yielding compensation packages consistent with our overall compensation philosophy.

In conducting its review, Meridian assisted in the development of the final "peer group" of leading companies in the energy industry that most closely reflect the profile of Energy Transfer. The final "peer group" consisted of the core group of peers (i.e.

the eight most similar peers in terms of business, revenues, assets and market value as well as competition for talent at the senior management level) and a group of expanded reference companies composed of a broader group of oil and gas companies, including additional integrated, upstream and midstream comparators whose data provided additional market context. For 2025, the core group of peer companies was updated from the 2023 study to reflect changes assessed by Meridian from the prior market review. As part of the evaluation conducted by Meridian, a determination was made with respect to the NEOs to focus the analysis with a trend to reflect a more concentrated focus on the core energy industry peers. This decision was based on a determination that the core peer group, in most situations, provided a more than sufficient amount of comparative data to consider and evaluate total compensation. This enhanced focus allowed Meridian to report, where available, specific core peer data comparing the levels of annual base salary, annual short-term cash bonus and long-term equity incentive awards at industry peer group companies with those of our executives, including the NEOs to ensure that compensation of the executives, including the NEOs is both consistent with the compensation philosophy and competitive with the compensation for named executive officers of these other companies, while at the same time considering whether the context provided by the expanded group offered additional information that should be considered by the Compensation Committee. The core identified companies were:

**Energy Peer Group:**

- |                                      |                                |
|--------------------------------------|--------------------------------|
| • Enterprise Products Partners, L.P. | • Kinder Morgan, Inc.          |
| • MPLX LP                            | • ONEOK Inc.                   |
| • Plains All American Pipeline, L.P. | • The Williams Companies, Inc. |
| • Targa Resources Corp               | • Phillips 66                  |

The compensation analysis provided by Meridian covered all major components of total compensation, including annual base salary, annual short-term cash bonus and long-term incentive awards for the senior executives. In preparing the review materials, Meridian utilized generally accepted compensation principles and gathered data from public disclosures of peer companies, including Form 10-K and proxy data and published survey data from multiple sources that are relevant to Energy Transfer's core peer group, industry, financial size and operational breadth. The Meridian review process also included significant engagement with management to fully understand job scope, responsibilities and roles of each of the executive officers, which discussions allow Meridian the ability to completely evaluate specific aspects of an executive officer's position to allow for more accurate comparisons.

After the completion of the 2025 review, the Energy Transfer Compensation Committee reviewed the information provided, including Meridian's specific summary observations and recommended considerations for all compensation going forward. The observations addressed overall competitive market trends, peer company approaches to compensation and short and long-term incentive plan design. The Energy Transfer Compensation Committee considered and reviewed the results of the study performed by Meridian to determine if the results indicated that the compensation programs were yielding a competitive total compensation model prioritizing incentive-based compensation and rewarding achievement of short and long-term performance objectives and considered Meridian's conclusions and recommendations. While Meridian found that the Partnership is continuing to achieve its stated objectives with respect to the "at-risk" approach, Meridian also recommended certain adjustments for consideration, which considerations were designed to allow the Partnership to continue to achieve its targeted percentiles on base compensation and incentive compensation (short and long-term). In respect of the 2025 Meridian review, the Energy Transfer Compensation Committee, in consultation with Meridian and executive management, made certain changes to base compensation of the executives, including the NEOs and certain adjustments to the variable compensation targets for the annual bonus plan and the equity plan.

In addition to the information received as part of Meridian's review, the Energy Transfer Compensation Committee also utilizes information obtained from other sources in its determination of compensation levels for our named executive officers, such as annual third-party surveys, although third-party survey data is not used by the Energy Transfer Compensation Committee to benchmark the amount of total compensation or any specific element of compensation for the named executive officers.

*Base Salary.* Base salary is designed to provide for a competitive fixed level of pay that attracts and retains executive officers and compensates them for their level of responsibility and sustained individual performance (including experience, scope of responsibility and results achieved). The salaries of the named executive officers are reviewed on an annual basis. As discussed above, the base salaries of our named executive officers are targeted to yield an annual base salary slightly below the median level of market (i.e., approximately the 30th to 40th percentile of market) and are determined by the Energy Transfer Compensation Committee after taking into account the recommendations of Mr. Warren and market information.

In August, in response to the 2025 Meridian review, the Energy Transfer Compensation Committee approved base salary increases to certain of the NEOs. Mr. Bramhall's salary increased to \$750,000 from his previous level of \$675,000, Mr. Wright's salary increased to \$675,000 from his previous level of \$622,500, and Mr. Sturrock's salary increased to \$425,000

from his previous level of \$395,600. No changes were made to the base salary levels of Messrs. McCrea, Long or McIlwain in response to the 2025 Meridian review. In June during the annual merit process, the Energy Transfer Compensation Committee considers the recommendations of Mr. Warren with respect to the Co-Chief Executive Officer(s), any relevant compensation study data (with the data aged as appropriate) and the merit increase pool set for all employees of the Partnership and/or its employing affiliates. During 2025, the Energy Transfer Compensation Committee approved a 3.75% increase to the base salary of Mr. McCrea to \$1,581,700 from the prior level of \$1,524,500; a 3.75% increase to the base salary of Mr. Long to \$1,581,700 from the previous level of \$1,524,500; an approximately 4.75% increase to the base salary of Mr. Bramhall to \$675,000 from the previous level of \$644,500; an approximately 3.75% increase to the base salary of Mr. Wright to \$622,500 from the previous level of \$600,000; an approximately 3.75% increase to the base salary of Mr. McIlwain to \$480,365 from the previous level of \$463,000; and an approximately 3.75% increase to the base salary of Mr. Sturrock to \$395,600 from the previous level of \$381,300. In general, Energy Transfer approved a merit pool increase of 3.75% for all of its employees and all of the named executive officers adjustments were in line with the pool for all employees.

*Annual Bonus.* In addition to base salary, the Energy Transfer Compensation Committee makes determinations whether to make discretionary annual cash bonus awards to executives, including our named executive officers, following the end of the year under the Amended Bonus Plan.

The Amended Bonus Plan is a discretionary annual cash bonus plan available to all employees, including the named executive officers. The purpose of the Amended Bonus Plan is to reward employees for contributions towards the Partnership's business goals and to aid in motivating employees. The Amended Bonus Plan is administered by the Energy Transfer Compensation Committee and the Energy Transfer Compensation Committee has the authority to establish and interpret the rules and regulations relating to the Amended Bonus Plan, to select participants, to determine and approve the size of any actual award amount, to make all determinations, including factual determinations and to take all other actions necessary or appropriate for the proper administration of the Amended Bonus Plan.

Under the Amended Bonus Plan, the Energy Transfer Compensation Committee will evaluate and determine an overall funded cash bonus pool based on achievement of (i) an Adjusted EBITDA Target, (ii) a DCF Target and (iii) a Departmental Budget Target. Under the Amended Bonus Plan, the Budget Targets were weighted 60% on the achievement of the Adjusted EBITDA Target, 25% on the achievement of the DCF Target and 15% on the achievement of the Departmental Budget Target. The total amount of cash to be allocated to the funded bonus pool will range from 0% to 135% for each of the budgeted DCF Target and Adjusted EBITDA Target and will range from 0% to 100% of the Departmental Budget Target. The maximum funding of the bonus pool under the Amended Bonus Plan is 130% of the total pool target.

While the funded bonus pool will reflect an aggregation of performance under each target, in the event performance under the Adjusted EBITDA Target is below 80% of its target, no bonus pool will be funded. If the bonus pool is funded, a participant may earn a cash award for the Performance Period based upon the level of attainment of the Budget Targets and his or her individual performance. Awards under both the Amended Bonus Plan are paid in cash as soon as practicable after the end of the Performance Period but in no event later than two and one-half months after the end of the Performance Period.

While the achievement of the Budget Targets sets a bonus pool under the Amended Bonus Plan, actual bonus awards are discretionary. These discretionary bonuses, if awarded, are intended to reward our named executive officers for the achievement of the Budget Targets during the Performance Period in light of the contribution of each individual to our profitability and success during such year. The Energy Transfer Compensation Committee also considers the recommendation of Mr. Warren in determining the specific annual cash bonus amounts for the Co-Chief Executive Officers. The Energy Transfer Compensation Committee does not establish its own financial performance objectives in advance for purposes of determining whether to approve any annual bonuses, and it does not utilize any formulaic approach to determine annual bonuses.

For Messrs. McCrea and Long, their 2025 bonus pool targets were 175% of their respective annual base earnings, which pool target reflected an increase from their previous target of 160% as recommended as part of the 2025 Meridian review. For 2024, the Energy Transfer Compensation Committee approved short-term annual cash bonus pool targets for Messrs. Bramhall and Wright of 140% and Mr. McIlwain had a bonus pool target of 130% of his respective annual base earnings, consistent with his previous 2024 targets. Mr. Sturrock's target for 2025 is 105% of his annual base earnings, consistent with his previous 2024 targets.

In February 2026, the Energy Transfer Compensation Committee certified 2025 performance results under the Amended Bonus Plan and authorized payment of 100% of the targeted pool. This bonus payout reflected the achievement of 97.3% of the Adjusted EBITDA Target, 98.6% of the DCF Target and 93% of, or \$77 million under, the Department Budget Target.

Based on the approved results, the Energy Transfer Compensation Committee approved a cash bonus relating to the 2025 calendar year to Messrs. McCrea, Long, Bramhall, Wright, McIlwain and Sturrock in the amounts of \$2,718,000, \$2,718,000, \$975,000, \$885,000, \$615,000 and \$445,000, respectively.

*Equity Awards.* Energy Transfer maintains and operates (i) the Amended and Restated Energy Transfer LP Long-Term Incentive Plan (the “Energy Transfer Incentive Plan” ). The Energy Transfer Incentive Plan authorize the Energy Transfer Compensation Committee, in its discretion, to grant awards, as applicable, under each respective plan of RSUs upon such terms and conditions as it may determine appropriate and in accordance with general guidelines as defined by the Energy Transfer Incentive Plans. Energy Transfer has generally used time-vested restricted units and/or phantom units as the vehicle for its annual equity awards to eligible employees, including the named executive officers.

In addition, in 2020, Energy Transfer adopted the Energy Transfer LP Long-Term Cash Restricted Unit Plan (the “CRU Plan”). The CRU Plan authorizes the Energy Transfer Compensation Committee, in its discretion, to grant awards, as applicable, of CRSUs, upon such terms and conditions as it may determine appropriate and in accordance with general guidelines as defined by the CRU Plan. Like awards from the Energy Transfer Incentive Plans, awards from the CRU Plan will be used to incentivize and reward eligible employees over a long-term basis, and the CRU Plan is included for purposes of these discussions as an “Energy Transfer Incentive Plan.”

For 2025, consistent the Meridian review, the Energy Transfer Compensation Committee established long-term incentive targets for Messrs. McCrea and Long of 1,000% of their annual base earnings, which targets represent an increase from their previous targets of 900%. For 2025, also consistent with the Meridian review the Energy Transfer Compensation Committee approved long-term incentive targets for Messrs. Bramhall, Wright and Sturrock of 600%, 600%, and 300%, respectively, of their respective annual base earnings, which represent an increase from their previous targets of 500%, 500% and 250%, respectively. Mr. McIlwain had a long-term incentive target of 500% of his annual base salary, which is consistent with his previous 2024 target.

The annual long-term incentive targets are used as the basis to determine the target number of units to be awarded to the eligible participant, including the named executive officers. A multiple of base salary is used to set the pool target, that number is then divided by a weighted average price determined by considering Energy Transfer’s modified total unitholder return (“TUR”) performance as measured against the average return of Energy Transfer’s identified peer group over defined time periods. The modified TUR is designed to create a recognition of a performance adjustment to the equity awards based on the prior periods measured to add an element of performance impact in setting grant date value even though the RSUs and CRSUs themselves are time-vested vehicles. For purposes of establishing an initial price, Energy Transfer utilizes a 60 trading-day trailing weighted average price of Energy Transfer common units prior to November 1 of the respective year. This average trading price is then subject to adjustment when Energy Transfer’s TUR is more than 5% greater or less than that of its identified peer group. If the TUR analysis yields a result that is within 5% of its identified peer group, the Energy Transfer Compensation Committee will simply use the 60 trading day trailing weighted average price divided by the applicable salary multiple to establish a target pool for each eligible participant, including the named executive officers. If Energy Transfer’s TUR is outside of the 5% deviation, the 60 trading day trailing weighted average will be adjusted up or down to a maximum of 15% from the trailing weighted average price based on Energy Transfer’s performance as compared to the identified group. For 2024, the peer group included the following:

- |                                      |                                      |
|--------------------------------------|--------------------------------------|
| • Enterprise Products Partners, L.P. | • Plains All American Pipeline, L.P. |
| • The Williams Companies, Inc.       | • MPLX LP                            |
| • Kinder Morgan, Inc.                | • ONEOK Inc.                         |
| • Targa Resources Corp               |                                      |

For 2025, the Partnership’s TUR performed within 5% of the identified peer group based on the average of the identified comparison periods. Consequently, the 2025 long-term incentive base price was not adjusted, and the total available unit pool reflected 100% of the target.

In December 2025, the Energy Transfer Compensation Committee approved grants of RSUs to Messrs. McCrea, Long, Bramhall, Wright, and Sturrock of 704,438 units, 704,438 units, 200,438 units, 180,375 units, and 56,775 units, respectively. The Energy Transfer Compensation Committee also approved grants of CRSUs to Messrs. McCrea, Long, Bramhall, Wright, and Sturrock of 234,812 units, 234,812 units, 66,812 units, 60,125 units, and 18,925 units, respectively. The Energy Transfer Compensation Committee did not approve an award to Mr. McIlwain for 2025 as the committee was advised, Mr. McIlwain was considering retirement during 2026. It was agreed that the consideration of a grant could be subsequently reviewed by the Energy Transfer Compensation Committee during early 2026 if Mr. McIlwain determined to not retire.

The RSUs granted in 2025 provide for incremental vesting over a five-year period, with 60% vesting at the end of the third year and the remaining 40% vesting at the end of the fifth year. Vesting of the awards is generally subject to continued employment through each specified vesting date. The RSU awards entitle the recipients to receive, with respect to each Energy Transfer unit

subject to such award that has not either vested or been forfeited, a DER cash payment promptly following each such distribution by Energy Transfer to its common unitholders.

The CRSUs granted in 2025 provide for incremental vesting over a three-year period, with 1/3 vesting at the end of each year. Each CRSU entitles the award recipient to receive cash equal to the market value of one Energy Transfer common unit upon vesting. The CRSUs do not include rights to DER cash payments.

In approving the grant of such RSUs and CRSUs, including to the named executive officers, the Energy Transfer Compensation Committee considered several factors, including the long-term objective of retaining such individuals as key drivers of Energy Transfer's future success, the existing level of equity ownership of such individuals and the previous awards to such individuals of equity awards subject to vesting. Vesting of the 2024 awards would accelerate in the event of the death or disability of the recipient, including the named executive officers, or in the event of a change in control of Energy Transfer as that term is defined under the Energy Transfer Incentive Plans.

As discussed below under "Potential Payments Upon a Termination or Change of Control," all outstanding equity awards would automatically accelerate upon a change in control event, which means vesting automatically accelerates upon a change of control irrespective of whether the officer is terminated. In addition, the award agreements also include certain acceleration provisions upon retirement with the ability to accelerate 40% of outstanding unvested awards under the Energy Transfer Incentive Plans at age 65 and 50% at age 68. These acceleration provisions require that the participant have not less than five (5) years of employment service to the Partnership or an affiliate and are subject to the applicable provisions of IRC Section 409A, which may include a six (6) month delay in the vesting after retirement. Beginning in 2022, the retirement provision also requires that the award be held for at least one year after the grant date in order to be eligible for acceleration.

We believe that permitting the accelerated vesting of equity awards upon a change in control creates an important retention tool for us by enabling employees to realize value from these awards in the event that we undergo a change in control transaction. In addition, we believe permitting acceleration of vesting upon a change in control creates a sense of stability in the course of transactions that could create uncertainty regarding their future employment and encourage these officers to remain focused on their job responsibilities.

*Executive Compensation Clawback Policy.* In November 2023, the Energy Transfer Compensation Committee adopted the Energy Transfer Executive Officer Incentive Compensation Clawback Policy (the "Clawback Policy"), which requires the Partnership to recover erroneously awarded incentive-based compensation from executive officers in the event the Partnership is required to prepare an accounting restatement. The Clawback Policy applies to any individual who is currently or was previously designated as an "officer" of the Partnership as defined in Rule 16a-1(f) under the Securities Exchange Act of 1934, including all of our current NEOs. The Clawback Policy is designed to comply with the requirements of the SEC and the NYSE Listed Company Manual, including (i) the definition of an accounting restatement, (ii) the applicable types of incentive-based compensation, (iii) the relevant recovery period, and (iv) the approach for calculating the recovery amount.

*Unit Ownership Guidelines.* The Board of Directors of our General Partner has adopted Executive Unit Ownership Guidelines (the "Guidelines"), which set forth minimum ownership guidelines applicable to certain executives of Energy Transfer with respect to Energy Transfer and Sunoco LP common units, as applicable. The applicable Guidelines are denominated as a multiple of base salary, and the amount of common units required to be owned increases with the level of responsibility. Under these Guidelines, (i) the Chief Executive Officer/Co-Chief Executive Officer(s) are expected to own common units having a minimum value of six times base salary; (ii) the Chief Operating Officer, the Chief Financial Officer, the General Counsel and other C-Suite executives expected to own common units having a minimum value of four times their respective base salary; and (iii) Senior Vice Presidents are expected to own common units having a minimum value of two times their respective base salary. In addition to the named executive officers, these Guidelines also apply to other covered executives, which executives are expected to own either directly or indirectly in accordance with the terms of the Guidelines, common units having minimum values ranging from one to four times their respective base salary.

The Energy Transfer Compensation Committee believes that the ownership of Energy Transfer and/or Sunoco LP common units, as reflected in these Guidelines, is an important means of tying the financial risks and rewards for its executives to Energy Transfer's total unitholder return, aligning the interests of such executives with those of Unitholders, and promoting Energy Transfer's interest in good corporate governance.

Covered executives are generally required to achieve their ownership level within five years of becoming subject to the Guidelines. As of December 31, 2025, all of the named executive officers were compliant with the level required of the Guidelines as of that date.

Covered executives may satisfy the Guidelines through direct ownership of Energy Transfer and/or Sunoco LP common units or indirect ownership by certain immediate family members. Direct or indirect ownership of Energy Transfer and/or Sunoco LP

common units shall count on a one-to-one ratio for purposes of satisfying minimum ownership requirements; however, unvested unit awards may not be used to satisfy the minimum ownership requirements.

Executive officers, including the named executive officers, who have not yet met their respective guideline must retain and hold all common units (less common units sold to cover the executive's applicable taxes and withholding obligation) received in connection with long-term incentive awards. Once the required ownership level is achieved, ownership of the required common units must be maintained for as long as the covered executive is subject to the Guidelines. However, those individuals who have met or exceeded their applicable ownership level guideline may dispose of the common units in a manner consistent with applicable laws, rules and regulations, including regulations of the SEC and our internal policies, but only to the extent that such individual's remaining ownership of common units would continue to exceed the applicable ownership level.

*Qualified Retirement Plan Benefits.* The Energy Transfer LP 401(k) Plan (the "Energy Transfer 401(k) Plan") is a defined contribution 401(k) plan, which covers substantially all of our employees, including the named executive officers. Employees may elect to defer up to 100% of their eligible compensation after applicable taxes, as limited under the Internal Revenue Code. We make a matching contribution that is not less than the aggregate amount of matching contributions that would be credited to a participant's account based on a rate of match equal to 100% of each participant's elective deferrals up to 5% of covered compensation. The amounts deferred by the participant are fully vested at all times, and the amounts contributed by the Partnership become vested based on years of service. We provide this benefit as a means to incentivize employees and provide them with an opportunity to save for their retirement.

The Partnership provides a 3% profit sharing contribution to employee 401(k) accounts for all employees with a base compensation below a specified threshold. The contribution is in addition to the 401(k) matching contribution and employees become vested based on years of service.

*Health and Welfare Benefits.* All full-time employees, including our named executive officers, may participate in the Partnership's health and welfare benefit programs including medical, dental, vision, flexible spending, life insurance and disability insurance.

*Termination Benefits.* Our named executive officers do not have any employment agreements that call for payments of termination or severance benefits or that provide for any payments in the event of a change in control of our General Partner; however, the award agreement to the named executive officers under the Energy Transfer Incentive Plans, the 2018 Sunoco LP Plan and the Sunoco LP 2012 Long-Term Incentive Plan (the "2012 Sunoco LP Plan") provide for immediate vesting of all unvested restricted unit awards in the event of a (i) change of control, as defined in the plan; (ii) death or (iii) disability, as defined in the applicable plan. Please refer to "Compensation Tables - Potential Payments Upon a Termination or Change of Control" for additional information.

In addition, the Partnership has also adopted the Partnership Severance Plan and Summary Plan Description (the "Severance Plan"), which provides for payment of certain severance benefits in the event of Qualifying Termination (as that term is defined in the Severance Plan). In general, the Severance Plan provides payment of two weeks of annual base salary for each year or partial year of employment service up to a maximum of fifty-two weeks or one year of annual base salary (with a minimum of four weeks of annual base salary) and up to three months of continued group health insurance coverage. The Severance Plan also provides that we may determine to pay benefits in addition to those provided under the Severance Plan based on special circumstances, which additional benefits shall be unique and non-precedent setting. The Severance Plan is available to all salaried employees on a nondiscriminatory basis; therefore, amounts that would be payable to our named executive officers upon a Qualified Termination have been excluded from "Compensation Tables – Potential Payments Upon a Termination or Change of Control" below.

*Energy Transfer LP Non-Qualified Deferred Compensation Plan* (the "Energy Transfer NQDC Plan") is a deferred compensation plan, which permits eligible highly compensated employees to defer a portion of their salary, bonus, and/or quarterly non-vested phantom unit distribution equivalent income until retirement, termination of employment or other designated distribution event. Energy Transfer may make annual discretionary matching contributions to participants' accounts; however, Energy Transfer has not made any discretionary contributions to participants' accounts (including the 2025 year) and currently has no plans to make any discretionary contributions to participants' accounts.

*Risk Assessment Related to our Compensation Structure.* We believe that the compensation plans and programs for our named executive officers, as well as our other employees, are appropriately structured and are not reasonably likely to result in material risk to us. We believe these compensation plans and programs are structured in a manner that does not promote excessive risk-taking that could harm our value or reward poor judgment. We also believe we have allocated compensation among base salary and short and long-term compensation in such a way as to not encourage excessive risk-taking. In particular, we generally do not adjust base annual salaries for executive officers and other employees significantly from year to year, and therefore the annual base salary of our employees is not generally impacted by our overall financial performance or the financial

performance of a portion of our operations. Our subsidiaries generally determine whether, and to what extent, their respective named executive officers receive a cash bonus based on achievement of specified financial performance objectives as well as the individual contributions of our named executive officers to the Partnership's success. We and our subsidiaries use restricted units and phantom units rather than unit options for equity awards because restricted units and phantom units retain value even in a depressed market so that employees are less likely to take unreasonable risks to get, or keep, options "in-the-money." Finally, the time-based vesting over five years for our long-term incentive awards ensures that the interests of employees align with those of Unitholders and our subsidiaries' unitholders for our long-term performance.

*Practices Related to the Grant of Certain Equity Awards in Relation to the Release of Material Nonpublic Information.* We do not currently grant unit options or option-like equity awards to our employees or directors; therefore, we do not currently have a formal practice or policy with respect to the grant of unit options or option-like awards.

### **Tax and Accounting Implications of Equity-Based Compensation Arrangements**

#### *Deductibility of Executive Compensation*

We are a limited partnership and not a corporation for United States federal income tax purposes. Therefore, we believe that the compensation paid to the named executive officers is not subject to the deduction limitations under Section 162(m) of the Internal Revenue Code and therefore is generally fully deductible for United States federal income tax purposes.

#### *Accounting for Non-Cash Compensation*

For non-cash compensation arrangements, we record compensation expense over the vesting period of the awards, as discussed further in Note 2 and Note 9 to our consolidated financial statements included in "Item 8. Financial Statements and Supplementary Data."

### **Compensation Committee Interlocks and Insider Participation**

Mr. Steven R. Anderson and Mr. Michael K. Grimm are the only members of the Energy Transfer Compensation Committee. During 2025, no member of the Energy Transfer Compensation Committee was an officer or employee of us or any of our subsidiaries or served as an officer of any company with respect to which any of our executive officers served on such company's board of directors. Mr. Grimm is not a former employee of ours or any of our subsidiaries. Mr. Anderson was previously an employee of the Partnership until his retirement in October 2009, as discussed in his biographical information included in "Item 10. Directors, Executive Officers and Corporate Governance."

### **Report of Compensation Committee**

The board of directors of our General Partner has reviewed and discussed the section entitled "Compensation Discussion and Analysis" with the management of Energy Transfer. Based on this review and discussion, we have recommended that the Compensation Discussion and Analysis be included in this annual report on Form 10-K.

The Compensation Committee of the  
Board of Directors of LE GP, LLC,  
general partner of Energy Transfer LP

Michael K. Grimm (Chairman)  
Steven R. Anderson

The foregoing report shall not be deemed to be incorporated by reference by any general statement or reference to this annual report on Form 10-K into any filing under the Securities Act of 1933, as amended, or the Exchange Act, except to the extent that we specifically incorporate this information by reference, and shall not otherwise be deemed filed under those Acts.

## Compensation Tables

### Summary Compensation Table

| Name and Principal Position  | Year | Salary (\$)  | Bonus (\$) | Equity Awards <sup>(1)</sup> (\$) | Non-Equity Incentive Plan Compensation <sup>(2)</sup> (\$) | Change in Pension Value and Nonqualified Deferred Compensation Earnings (\$) | All Other Compensation <sup>(3)</sup> (\$) | Total (\$)    |
|--|------|--------------|------------|-----------------------------------|--|--|--|---------------|

<sup>(1)</sup> Equity award amounts reflect the aggregate grant date fair value of unit awards granted for the periods presented, computed in accordance with FASB ASC Topic 718, disregarding any estimates for forfeitures. See Note 9 to our consolidated financial statements included in “Item 8. Financial Statements and Supplementary Data” for additional assumptions underlying the value of the equity awards. Although the CRSU awards may only be settled in cash, they are based upon the value of Energy Transfer common units and are accounted for as equity awards within these compensation tables.

<sup>(2)</sup> Energy Transfer maintains the Amended Bonus Plan which provides for discretionary bonuses. Awards of discretionary bonuses are tied to achievement of targeted performance objectives and described in the Compensation Discussion and Analysis.

<sup>(3)</sup> The amounts reflected for 2025 in this column include (i) matching contributions to the Energy Transfer 401(k) Plan made on behalf of the named executive officers of \$17,500 each for Messrs. Long, McCrea, Bramhall, Wright and Sturrock and \$5,342 for Mr. McIlwain, and (ii) health savings account contributions made on behalf of the named executive officers of \$2,000 each for Messrs. McCrea and Wright and \$1,500 for Messrs. Long, McIlwain and Sturrock, and (iii) the dollar value of life insurance premiums paid for the benefit of the named executive officers. The amounts reflected for all periods exclude distribution payments in connection with distribution equivalent rights on unvested unit awards, because the dollar value of such distributions are factored into the grant date fair value reported in the “Equity Awards” column of the Summary Compensation Table at the time that the unit awards and distribution equivalent rights were originally granted. For 2025, distribution payments in connection with distribution equivalent rights totaled \$4,108,078 for Mr. Long, \$4,239,368 for Mr. McCrea, \$867,708 for Mr. Bramhall, \$705,899 for Mr. Wright, \$599,569 for Mr. McIlwain, and \$273,307 for Mr. Sturrock; these amounts include distribution payments on Sunoco LP unit awards for those executives with such unvested Sunoco LP awards.

<sup>(4)</sup> As noted in the Equity Awards section of the Compensation Discussion and Analysis, the Energy Transfer Compensation did not consider an award to Mr. McIlwain at the time awards were made to the other NEOs in December 2025 as Mr. McIlwain had expressed to executive management at that time that he was considering retirement at some point during 2026. Had Mr. McIlwain determined not to retire in 2026, the Energy Transfer Compensation Committee would have considered an equity award during early 2026. Mr. McIlwain informed the Co-Chief Executive Officers on February 14, 2026 of his intention to retire effective as of April 6, 2026.

<sup>(1)</sup> We have computed the grant date fair value of unit awards in accordance with FASB ASC Topic 718, as further described above and in Note 9 to our consolidated financial statements included in “Item 8. Financial Statements and Supplementary Data.” For Energy Transfer CRSUs, the grant date fair value is discounted for the expected distribution yield during the vesting period, as those awards do not include distribution equivalent rights.

**Narrative Disclosure to Summary Compensation Table and Grants of the Plan-Based Awards Table**

A description of material factors necessary to understand the information disclosed in the tables above with respect to salaries, bonuses, equity awards, and 401(k) plan contributions can be found in the Compensation Discussion and Analysis that precedes these tables.

**Outstanding Equity Awards at 2025 Fiscal Year-End**

|   | 12/16/2021 | 5,200   | 272,532   |

(1) Energy Transfer and Sunoco LP RSU awards outstanding vest as follows:

- at a rate of 60% in December 2028 and 40% in December 2030 for awards granted in December 2025;
- at a rate of 60% in December 2027 and 40% in December 2029 for awards granted in December 2024;
- at a rate of 60% in December 2026 and 40% in December 2028 for awards granted in December 2023;
- 100% in December 2027 for the remaining outstanding portion of awards granted in December 2022; and
- 100% in December 2026 for the remaining outstanding portion of awards granted in December 2021.

Such awards may be settled at the election of the Energy Transfer Compensation Committee in (i) common units of Energy Transfer (subject to the approval of the Energy Transfer Incentive Plans prior to the first vesting date by a majority of Unitholders pursuant to the rules of the New York Stock Exchange); (ii) cash equal to the Fair Market Value (as such term is defined in the Energy Transfer Incentive Plans) of the Energy Transfer common units that would otherwise be delivered pursuant to the terms of each named executive officers grant agreement; or (iii) other securities or property in an amount equal to the Fair Market Value of Energy Transfer common units that would otherwise be delivered pursuant to the terms of the grant agreement, or a combination thereof as determined by the Energy Transfer Compensation Committee in its discretion.

Energy Transfer CRSU awards granted in December 2025 vest 1/3 per year in December 2026, 2027 and 2028. The remaining Energy Transfer cash restricted unit awards granted in December 2024 vest 1/2 per year in December 2026 and 2027. The remaining outstanding Energy Transfer CRSU awards granted in December 2023 vest in December 2026.

(2) Market value was computed as the number of unvested awards as of December 31, 2025 multiplied by the closing price of respective common units of Energy Transfer and Sunoco LP.

**Units Vested in 2025**

| Name  | Unit Awards                             |   |
|---|---|---|
|   | Number of Units Acquired on Vesting (#) | Value Realized on Vesting (\$) <sup>(1)</sup> |
| <b>Energy Transfer Unit Awards:</b>                 |   |   |
| Thomas E. Long                                      | 840,241                                 | \$ 14,116,049                                 |
| Marshall S. (Mackie) McCrea, III                    | 970,635                                 | 16,306,668                                    |

| Marshall S. (Mackie) McCrea, III                    | 264,454                                 | 4,442,827                                     |
| Dylan A. Bramhall                                   | 57,625                                  | 968,100                                       |
| James M. Wright, Jr.                                | 49,392                                  | 829,786                                       |
| Gregory G. McIlwain                                 | 44,621                                  | 749,633                                       |
| Aden (Troy) Sturrock                                | 18,521                                  | 311,153                                       |
| <b>Sunoco LP Unit Awards:</b>                       |   |   |
| Thomas E. Long                                      | 11,120                                  | 605,262                                       |
| Dylan A. Bramhall                                   | 22,920                                  | 1,247,536                                     |

<sup>(1)</sup> Amounts presented represent the value realized upon vesting of these awards, which is calculated as the number of units vested multiplied by the applicable closing market price of applicable common units upon the vesting date.

We have not issued option awards.

**Nonqualified Deferred Compensation Table**

The Energy Transfer NQDC Plan is a deferred compensation plan which permits eligible highly compensated employees to defer a portion of their salary, bonus, and/or quarterly non-vested phantom unit distribution equivalent income until retirement, termination of employment or other designated distribution event. Each year under the Energy Transfer NQDC Plan, eligible employees are permitted to make an irrevocable election to defer up to 50% of their annual base salary, 50% of their quarterly non-vested phantom unit distribution income, and/or 50% of their discretionary performance bonus compensation during the following year. Pursuant to the Energy Transfer NQDC Plan, Energy Transfer may make annual discretionary matching contributions to participants' accounts; however, Energy Transfer has not made any discretionary contributions to participants' accounts and currently has no plans to make any discretionary contributions to participants' accounts. All amounts credited under the Energy Transfer NQDC Plan (other than discretionary credits) are immediately 100% vested. Participant accounts are credited with deemed earnings or losses based on hypothetical investment fund choices made by the participants among available funds.

Participants may elect to have their account balances distributed in one lump sum payment or in annual installments over a period of three or five years upon retirement, and in a lump sum upon other termination events. Participants may also elect to take lump sum in-service withdrawals five years or longer in the future, and such scheduled in-service withdrawals may be further deferred prior to the withdrawal date. Upon a change in control (as defined in the Energy Transfer NQDC Plan) of Energy Transfer, all Energy Transfer NQDC Plan accounts are immediately vested in full. However, distributions are not accelerated and, instead, are made in accordance with the Energy Transfer NQDC Plan's normal distribution provisions unless a participant has elected to receive a change of control distribution pursuant to his deferral agreement.

| Name                 | Executive Contributions in Last FY (\$) Acquired on Vesting (#) | Registrant Contributions in Last FY (\$) <sup>(1)</sup> | Aggregate Earnings in Last FY (\$) <sup>(1)</sup> | Aggregate Withdrawals/Distributions (\$) | Aggregate Balance at Last FYE (\$) |

| James M. Wright, Jr. | —   | —   | (5,728)   | —  | 108,150                            |
| Gregory G. McIlwain  | 603,785   | —   | 353,215   | —  | 3,182,389                          |

<sup>(1)</sup> Amounts included in the aggregate earnings column above have been included in the change in non-qualified deferred compensation earnings column of the summary compensation table.

## Potential Payments Upon a Termination or Change of Control

*Equity Awards.* As discussed in our Compensation Discussion and Analysis above, any unvested equity awards (including CRSU awards granted pursuant to the Energy Transfer Incentive Plans and/or the CRU Plan and/or the CRU Plan will automatically become vested upon a change of control, which is generally defined as the occurrence of one or more of the following events: (i) any person or group becomes the beneficial owner of 50% or more of the voting power or voting securities of Energy Transfer or its general partner; (ii) LE GP, LLC or an affiliate of LE GP, LLC ceases to be the general partner of Energy Transfer; or (iii) the sale or other disposition, including by liquidation or dissolution, of all or substantially all of the assets of Energy Transfer in one or more transactions to anyone other than an affiliate of Energy Transfer.

In addition, as explained in *Equity Awards* section of our Compensation Discussion and Analysis above, the RSU and CRSU awards under the Energy Transfer Incentive Plans, the Sunoco LP Plan, the 2012 Sunoco LP Plan and the CRU Plan generally require the continued employment of the recipient during the vesting period, provided however, the unvested awards will be accelerated in the event of the death or disability of the award recipient prior to the applicable vesting period being satisfied. All awards outstanding to the named executive officers under the Energy Transfer Incentive Plans, the 2018 Sunoco LP Plan, the 2012 Sunoco LP Plan or the CRU Plan would be accelerated in the event of a change in control of the Partnership.

In addition, the Energy Transfer Compensation Committee and the compensation committee of the general partner of Sunoco LP, have approved a retirement provision, which provides that employees, including the named executive officers with at least five years of service with the general partner, who leave the respective general partner voluntarily due to retirement (i) after age 65 but prior to age 68 are eligible for accelerated vesting of 40% of his or her award; or (ii) after 68 are eligible for accelerated vesting of 50% his or her award. The acceleration of the awards is subject to the applicable provisions of IRC Section 409A. Beginning with awards granted in 2022, the retirement provision also requires that the award be held for at least one year after the grant date in order to be eligible for acceleration. As of December 31, 2024, Messrs. Long, McCrea and McIlwain would be eligible to benefit from the retirement provisions. Awards that were granted to Messrs. Long, McCrea and McIlwain on or prior to December 31, 2024 (which would have been held for a full year as of a retirement that occurred on December 31, 2025), would have been eligible to accelerate under the 40% accelerated vesting provisions, estimated as of December 31, 2025 to be valued as \$40,930,208, \$40,930,208 and \$6,217,027, respectively. The timing of payments upon retirement would be delayed in compliance with IRC Section 409A.

The following table shows the amount of incremental value that would have been received by each of the NEOs upon certain events of termination or a change of control resulting in the accelerated vesting of the restricted units and/or restricted phantom units held by our NEOs on December 31, 2025:

| Name                             | Benefit      | Termination due to Death or Disability (\$) <sup>(1)</sup> | Termination for Any Other Reason (\$) <sup>(1)</sup> | Change of Control with or without Continued Employment (\$) <sup>(1)</sup> | Not for Cause Termination (\$) <sup>(1)</sup> |
|----------------------------------|--------------|--|--|--|---|
| Thomas E. Long <sup>(2)</sup>    | Unit Vesting | \$ 56,418,424  | \$ —   | \$ 56,418,424  | \$ —  |
| Marshall S. (Mackie) McCrea, III | Unit Vesting | 56,418,424   | —  | 56,418,424   | —   |
| Dylan A. Bramhall <sup>(2)</sup> | Unit Vesting | 13,257,808   | —  | 13,257,808   | —   |
| James M. Wright, Jr.             | Unit Vesting | 11,702,871   | —  | 11,702,871   | —   |
| Gregory G. McIlwain              | Unit Vesting | 6,217,027  | —  | 6,217,027  | —   |
| Aden (Troy) Sturrock             | Unit Vesting | 3,992,443  | —  | 3,992,443  | —   |

<sup>(1)</sup> The amounts reflected above represent the product of the number of RSUs and CRSUs units that were subject to vesting/restrictions on December 31, 2025 multiplied by the closing price of applicable common units on that date. However, at the time of an actual payment of the CRSUs, the “fair market value” that the payment will be based upon is not a single closing day price, but will be the average closing day price for the 10 trading days immediately preceding the vesting date. As an example of the difference that could occur at payment, as of December 31, 2025, the closing price used for the calculations above was \$16.49 for each Partnership-based unit; the 10-day average price was \$16.36, therefore amounts for the CRSUs would be calculated at a slightly lower per-unit price for a hypothetical payment on December 31, 2025.

<sup>(2)</sup> For Mr. Bramhall, the amounts reported above include outstanding Energy Transfer plan-based awards and outstanding Sunoco LP restricted units.

*Deferred Compensation Plan.* As discussed in our Compensation Discussion and Analysis above, all amounts under the Energy Transfer NQDC Plan (other than discretionary credits) are immediately 100% vested. Upon a change of control (as defined in the Energy Transfer NQDC Plan), distributions from the respective plan would be made in accordance with the normal distribution provisions of the respective plan. A change of control is generally defined in the Energy Transfer NQDC Plan as any change of control event within the meaning of Treasury Regulation Section 1.409A-3(i)(5).

## CEO Pay Ratio

In accordance with Section 953(b) of the Dodd-Frank Wall Street Reform and Consumer Protection Act, and Item 402(u) of Regulation S-K, set forth below is information about the relationship of the annual total compensation of Messrs. Long and McCrea, Co-Chief Executive Officers, and the annual total compensation of our employees.

For the 2025 calendar year, the annual total compensation of Messrs. Long and McCrea, as reported in the Summary Compensation Table of this Item 11 was \$20,076,151 and \$20,076,651, respectively.

The median total compensation of the employees supporting the Partnership (other than Messrs. Long and McCrea) was \$164,291 for 2025.

Based on this information, for 2025 the ratio of the annual total compensation of Messrs. Long and McCrea to the median of the annual total compensation of the employees supporting the Partnership as of December 31, 2025 was approximately 122 to 1.

To identify the median of the annual total compensation of the employees supporting the Partnership, the following steps were taken:

1. It was determined that, as of December 31, 2025, the applicable employee populations consisted of 11,191 with all of the identified individuals being employed in the United States. This population consisted of all of our full-time and part-time employees. We did not engage any independent contractors in 2025 that are required to be included in our employee population for the CEO pay ratio evaluation.
2. To identify the “median employee” from our employee population, we compared the total earnings of our employees as reflected in our payroll records as reported on Form W-2 for 2025.
3. We identified our median employee using W-2 reporting and applied this compensation measure consistently to all of our employees required to be included in the calculation. We did not make any cost of living adjustments in identifying the “median employee.”
4. Once we identified our median employee, we combined all elements of the employee’s compensation for 2025 resulting in an annual compensation of \$164,291 with total cash compensation of \$140,522. The difference between such employee’s total earnings and the employee’s total compensation represents the estimated value of the employee’s health care benefits (estimated for the employee and such employee’s eligible dependents at \$15,810) and the employee’s 401(k) matching contribution and profit sharing contribution (estimated at \$7,959 per employee, includes \$4,986 per employee on average matching contribution and \$2,973 per employee on average profit sharing contribution (employees earning over \$175,000 in base are ineligible for profit sharing)).
5. With respect to Messrs. Long and McCrea, we used the amount reported in the “Total” column of our 2025 Summary Compensation Table under this Item 11.

## Director Compensation

In 2025, the compensation arrangements for outside directors included a \$100,000 annual retainer for services on the board. If a director served on the Energy Transfer Audit Committee, such director would receive an annual cash retainer (\$15,000 or \$25,000 in the case of the chairman). If a director served on the Energy Transfer Compensation Committee, such director would receive an annual cash retainer (\$7,500 or \$15,000 in the case of the chairman). The fees for membership on the Conflicts Committee are determined on a per instance basis for each committee assignment.

The outside directors of our General Partner are also entitled to an annual restricted unit award under the Energy Transfer Incentive Plans equal to an aggregate of \$125,000 based on the same grant date valuation as is used for annual long-term incentive awards made to Partnership officers, including the named executive officers, through the annual modified total unitholder return analysis. These Energy Transfer common units will vest 60% after the third year and the remaining 40% after the fifth year after the grant date. The compensation expense recorded is based on the grant-date market value of the Energy Transfer common units and is recognized over the vesting period. Distributions are paid during the vesting period.

The compensation paid to the non-employee directors of our General Partner in 2025 is reflected in the following table:

| Name                              | Fees Paid in Cash <sup>(1)</sup><br>(\$) | Unit Awards <sup>(2)</sup><br>(\$) | All Other Compensation<br>(\$) | Total<br>(\$) |
|-----------------------------------|--|------------------------------------|--------------------------------|---------------|
| Steven R. Anderson                | \$ 122,500                               | \$ 125,000                         | \$ —                           | \$ 247,500    |
| Richard D. Brannon <sup>(3)</sup> | 125,000                                  | —                                  | —                              | 125,000       |
| Michael K. Grimm                  | 130,000                                  | 125,000                            | —                              | 255,000       |
| John W. McReynolds                | 100,000                                  | 125,000                            | —                              | 225,000       |
| James R. Perry                    | 100,000                                  | 125,000                            | —                              | 225,000       |
| Matthew S. Ramsey                 | 100,000                                  | 125,000                            | —                              | 225,000       |

<sup>(1)</sup> The amounts in this column reflect the aggregate dollar amount of fees earned or paid in cash including the annual retainer fee. The amounts reflected exclude distribution payments in connection with DERs on unvested unit awards, because the dollar value of such distributions are factored into the grant date fair value reported in the “Unit Awards” column above at the time that the unit awards and DERs were originally granted. For 2025, distribution payments in connection with DERs totaled \$54,551 for Mr. Anderson, \$40,758 for Mr. Brannon, \$54,551 for Mr. Grimm, \$45,928 for Mr. McReynolds, \$54,551 for Mr. Perry and \$44,418 for Mr. Ramsey.

<sup>(2)</sup> Equity award amounts reflect the aggregate grant date fair value of unit awards granted for the periods presented, computed in accordance with FASB ASC Topic 718, disregarding any estimates for forfeitures. See Note 9 to our consolidated financial statements included in “Item 8. Financial Statements and Supplementary Data” for additional assumptions underlying the value of the equity awards.

As discussed above, the number of units awarded is based on the annual award amount of \$125,000 divided by the same grant-date valuation as is used for annual long-term incentive award to Partnership officers through the modified total unitholders return analysis.

Current year amounts reflect annual awards granted on January 2, 2026.

<sup>(3)</sup> Mr. Brannon was previously a director until October 2025.

As of December 31, 2025, Mr. Anderson had 34,926 unvested Energy Transfer restricted units outstanding, Mr. Brannon had 34,926 unvested Energy Transfer restricted units outstanding, Mr. Grimm had 34,926 unvested Energy Transfer restricted units outstanding, Mr. McReynolds had 34,926 unvested Energy Transfer restricted units outstanding, Mr. Perry had 34,926 unvested Energy Transfer restricted units outstanding and Mr. Ramsey had 33,778 unvested Energy Transfer restricted units outstanding.

The executive chairman and the employee directors do not receive compensation for their service on the board of our General Partner.

## ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED UNITHOLDER MATTERS

### Equity Compensation Plan Information

The following table sets forth in tabular format, a summary of our equity plan information as of December 31, 2025:

| Plan Category  | Number of securities to be issued upon exercise of outstanding options, warrants and rights<br>(a) | Weighted-average exercise price of outstanding options, warrants and rights<br>(b) | Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))<br>(c) |
|--|--|--|--|
| Equity compensation plans approved by security holders     | —  | \$ —   | —  |
| Equity compensation plans not approved by security holders | 35,169,831   | —  | 33,058,325   |
| Total  | 35,169,831   | \$ —   | 33,058,325   |

### Energy Transfer LP Units

The following table sets forth certain information as of February 13, 2026, regarding the beneficial ownership of our voting securities by (i) certain beneficial owners of more than 5% of our Common Units, (ii) each director and named executive officer

of our General Partner and (iii) all current directors and executive officers of our General Partner as a group. The General Partner knows of no other person not disclosed herein who beneficially owns more than 5% of our Common Units.

| Name and Address of Beneficial Owner <sup>(1)</sup>          | Beneficially Owned <sup>(2)</sup> |                              | Percent of Class |               |
|--|-----------------------------------|------------------------------|------------------|---------------|
|  | Common Units                      | Class A Units <sup>(3)</sup> | Common Units     | Class A Units |

\* Less than 1%

<sup>(1)</sup> The address for all listed beneficial owners is 8111 Westchester Drive, Suite 600, Dallas, Texas 75225.

<sup>(2)</sup> Beneficial ownership for the purposes of this table is defined by Rule 13d-3 under the Exchange Act of 1934. Under that rule, a person is generally considered to be the beneficial owner of a security if he has or shares the power to vote or direct the voting thereof or to dispose or direct the disposition thereof or has the right to acquire either of those powers within sixty days. The nature of beneficial ownership for all listed persons is direct with sole investment and disposition power unless otherwise noted. The beneficial ownership of each listed person is based on 3,440,314,575 common units outstanding in the aggregate as of February 13, 2026.

<sup>(3)</sup> The Energy Transfer Class A Units are entitled to vote together with the Partnership's common units and are not entitled to distributions and otherwise have no economic attributes. The Energy Transfer Class A Units are not convertible into, or exchangeable for, Partnership Common Units. Under the terms of the Energy Transfer Class A Units, upon the issuance by the Partnership of additional common units or any securities that have voting rights that are pari passu with the Partnership Common Units, the Partnership will issue to the general partner additional Energy Transfer Class A Units such that Mr. Warren, through his majority ownership of our general partner, maintains the approximately 20% voting percentage in the Partnership represented by such Energy Transfer Class A Units equivalent to such Energy Transfer Class A Unit voting interest prior to such issuance of additional common units. This provision of the Energy Transfer Class A Units shall terminate at such time as Mr. Warren ceases to be an officer or director of our general partner, provided that all Energy Transfer Class A Units outstanding at such time shall be unchanged and remain outstanding. Mr. Warren's combined common unit and Energy Transfer Class A Unit ownership results in a voting interest in the Partnership of 27%.

<sup>(4)</sup> Includes 146,901,879 common units held by Kelcy Warren Partners, L.P. and 10,224,429 common units held by Kelcy Warren Partners II, L.P., the general partners of which are owned by Mr. Warren. Also includes 133,136,757 common units held by Kelcy Warren Partners III, LLC formerly known as Seven Bridges Holdings, LLC, of which Mr. Warren is the sole member. Also includes 1,233,857 common units held by Warren Capital Corp., of which Mr. Warren is the sole shareholder. Also includes 328,383 common units attributable to the interest of Mr. Warren in ET Company Ltd and Three Dawaco, Inc., over which Mr. Warren exercises shared voting and dispositive power with Ray Davis. Also includes 601,076 common units and 851,501,729 Energy Transfer Class A Units held by LE GP, LLC. Mr. Warren may be deemed to own common units and Energy Transfer Class A Units held by LE GP, LLC due to his ownership of 81.2% of its member interests. Mr. Warren disclaims beneficial ownership of common units and Energy Transfer Class A Units owned by LE GP, LLC other than to the extent of his interest in such entity. Mr. Warren's combined common unit and Energy Transfer Class A Unit ownership results in a voting interest in the Partnership of 27%.

<sup>(5)</sup> Includes 45,389 common units held by a trust for the benefit of Mr. McCrea's son, for which Mr. McCrea serves as trustee. Mr. McCrea disclaims beneficial ownership of these units.

- (6) Includes 1,544,558 common units held by Steven R. Anderson Revocable Trust, for which Mr. Anderson serves as trustee. Includes 603,100 common units pledged as collateral for lines of credit.
- (7) Includes 675,972 common units held Grimm Family Limited Partnership, a limited partnership of which a limited liability company owned by Mr. Grimm is the sole general partner. Also includes 10,570 common units held by two trusts for the benefit of Mr. Grimm's children, for which Mr. Grimm serves as trustee.
- (8) Includes 17,445,608 common units held by McReynolds Energy Partners L.P. and 12,142,593 common units held by McReynolds Equity Partners L.P., the general partners of which are owned by Mr. McReynolds. Mr. McReynolds disclaims beneficial ownership of common units owned by such limited partnerships other than to the extent of his interest in such entities.

### ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The Partnership's principal sources of cash flow are derived from cash flows from the operations of its subsidiaries, including its direct and indirect investments in the limited partner and general partner interests in Sunoco LP and USAC, both of which are limited partnerships engaged in energy-related services.

Fermi Inc. (NASDAQ & LSE: FRMI) ("Fermi") is a publicly traded advanced energy and hyperscaler development company. James R. Perry, who serves on Energy Transfer's Board of Directors and on the board of directors of Fermi, owns an approximately 2.5% equity interest in Fermi, while his son Griffin Perry owns an approximately 11.5% interest. Neither James R. Perry nor Griffin Perry are employees or officers of Fermi. In September 2025, an Energy Transfer affiliate, ETC Marketing, Ltd., and Fermi entered into a gas supply agreement and gas purchase agreement, pursuant to which ETC Marketing, Ltd. has agreed to supply natural gas to Fermi's planned data center facility in Texas. The transaction is contingent upon the satisfaction of conditions precedent by a specified date, which has not yet occurred. If the conditions precedent are met, it is expected that Fermi would pay ETC Marketing, Ltd. approximately \$30 million per year for an initial term of 15 years under the agreements.

In making its director independence determination, the Board considered the nature and extent of any business, employment or familial relationships between the Partnership and each such director and/or any person or entity with which he is affiliated, and determined that no such relationships impacted such director's independence.

For a discussion of director independence, see "Item 10. Directors, Executive Officers and Corporate Governance."

As a policy matter, our Conflicts Committee generally reviews any proposed related party transaction that may be material to the Partnership to determine whether the transaction is fair and reasonable to the Partnership. The Partnership's board of directors makes the determinations as to whether there exists a related party transaction in the normal course of reviewing transactions for approval as the Partnership's board of directors is advised by its management of the parties involved in each material transaction as to which the board of directors' approval is sought by the Partnership's management. In addition, the Partnership's board of directors makes inquiries to independently ascertain whether related parties may have an interest in the proposed transaction. While there are no written policies or procedures for the board of directors to follow in making these determinations, the Partnership's board makes those determinations in light of its contractually-limited fiduciary duties to the Unitholders. The Partnership Agreement of Energy Transfer provides that any matter approved by the Conflicts Committee will be conclusively deemed to be fair and reasonable to Energy Transfer, approved by all the partners of Energy Transfer and not a breach by the General Partner or its Board of Directors of any duties they may owe Energy Transfer or the Unitholders (see "Risks Related to Conflicts of Interest" in "Item 1A. Risk Factors" in this annual report).

Additional information on our related party transactions is included in Note 2 to our consolidated financial statements included in "Item 8. Financial Statements and Supplementary Data."

#### ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

The following sets forth fees billed by Grant Thornton LLP for the audit of our annual financial statements and other services rendered (dollars in millions):

|                                   | Years Ended December 31, |                |
|-----------------------------------|--------------------------|----------------|
|                                   | 2025                     | 2024           |
| Audit fees <sup>(1)</sup>         | \$ 17.5                  | \$ 13.0        |
| Audit-related fees <sup>(2)</sup> | 2.1                      | 2.0            |
| Tax fees <sup>(3)</sup>           | 0.1                      | 0.1            |
| Total                             | <u>\$ 19.7</u>           | <u>\$ 15.1</u> |

<sup>(1)</sup> Includes fees for audits of annual financial statements of our companies, reviews of the related quarterly financial statements and services that are normally provided by the independent accountants in connection with statutory and regulatory filings or engagements, including reviews of documents filed with the SEC and services related to the audit of our internal control over financial reporting.

<sup>(2)</sup> Includes fees for audit-related services of subsidiary entities.

<sup>(3)</sup> Includes fees for tax consulting and tax compliance services.

Pursuant to the charter of the Audit Committee, the Audit Committee is responsible for the oversight of our accounting, reporting and financial practices. The Audit Committee has the responsibility to select, appoint, engage, oversee, retain, evaluate and terminate our external auditors; pre-approve all audit and non-audit services to be provided, consistent with all applicable laws, to us by our external auditors; and establish the fees and other compensation to be paid to our external auditors. The Audit Committee also oversees and directs our internal auditing program and reviews our internal controls.

The Audit Committee has adopted a policy for the pre-approval of audit and permitted non-audit services provided by our principal independent accountants. The policy requires that all services provided by Grant Thornton LLP including audit services, audit-related services, tax services and other services, must be pre-approved by the Audit Committee. All fees paid or expected to be paid to Grant Thornton LLP for fiscal years 2025 and 2024 were pre-approved by the Audit Committee in accordance with this policy.

The Audit Committee reviews the external auditors' proposed scope and approach as well as the performance of the external auditors. It also has direct responsibility for and sole authority to resolve any disagreements between our management and our external auditors regarding financial reporting, regularly reviews with the external auditors any problems or difficulties the auditors encountered in the course of their audit work, and, at least annually, uses its reasonable efforts to obtain and review a report from the external auditors addressing the following (among other items):

- the auditors' internal quality-control procedures;
- any material issues raised by the most recent internal quality-control review, or peer review, of the external auditors;
- the independence of the external auditors;
- the aggregate fees billed by our external auditors for each of the previous two years; and
- the rotation of the lead partner.

## REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors of LE GP, LLC and  
Unitholders of Energy Transfer LP

### Opinion on the financial statements

We have audited the accompanying consolidated balance sheets of Energy Transfer LP (a Delaware limited partnership) and subsidiaries (the “Partnership”) as of December 31, 2025 and 2024, the related consolidated statements of operations, comprehensive income, equity, and cash flows for each of the three years in the period ended December 31, 2025, and the related notes (collectively referred to as the “consolidated financial statements”). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Partnership as of December 31, 2025 and 2024, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2025, in conformity with accounting principles generally accepted in the United States of America.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (“PCAOB”), the Partnership’s internal control over financial reporting as of December 31, 2025, based on criteria established in the 2013 *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (“COSO”), and our report dated February 19, 2026 expressed an unqualified opinion.

### Basis for opinion

These consolidated financial statements are the responsibility of the Partnership’s management. Our responsibility is to express an opinion on the Partnership’s consolidated financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Partnership in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

### Critical audit matters

The critical audit matters communicated below are matters arising from the current period audit of the financial statements that were communicated or required to be communicated to the audit committee and that: (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

#### *Goodwill impairment assessment*

As described further in Note 2 to the consolidated financial statements, the Partnership’s consolidated goodwill balance was \$5.45 billion as of December 31, 2025. Management evaluates goodwill for impairment annually on October 1st of each year or whenever events or changes in circumstances indicate potential asset impairment has occurred. As of December 31, 2025, there was \$368 million of goodwill associated with a reporting unit within the NGL and Refined Products Transportation and Services segment in which we identified the Partnership’s determination of the fair value of the reporting unit as a critical audit matter.

The principal considerations for our determination that the estimation of the fair value of the reporting unit is a critical audit matter are that there are significant judgments required by management when determining the fair value of the reporting unit. In particular, the fair value estimate was sensitive to significant assumptions used to estimate future revenues and cash flows, including revenue growth rates, operating expenses, discount rate, and the inherent uncertainty around future market conditions as well as valuation methodologies applied by the Partnership. This in turn led to a higher degree of auditor judgment and subjectivity, in performing procedures and evaluating audit evidence related to management’s forecasted future cash flows and assumptions.

Our audit procedures related to the valuation of the reporting unit within the NGL and Refined Products Transportation and Services segment included the following, among others:

- We tested the effectiveness of controls relating to management’s review of the assumptions used to develop the future cash flows, the discount rate used, and valuation methodologies applied.
- We assessed the reasonableness of management’s forecast of future projected results by comparing such items to industry projections and conditions found in industry reports.

- We tested forecasted revenues and expected future cash flows by comparing forecasted amounts to actual historical results to identify material changes, corroborating the basis for increases in forecasted revenues and expected future cash flows.
- We tested significant operating expenses and cash expenditures by comparing to historical trends and evaluating significant deviations from recent actual amounts.

We utilized our valuation specialists to evaluate:

- The methodologies used and whether they were acceptable for the underlying assets or operations and whether such methodologies were being applied correctly, and
- The appropriateness of the discount rate by developing an independent range of acceptable discount rates and comparing those ranges to the amounts selected and applied by management.

*Fair value of assets acquired in the acquisition of Parkland Corporation*

As described further in Note 3 to the consolidated financial statements, on October 31, 2025, the Partnership's subsidiary, Sunoco LP, completed its acquisition of Parkland Corporation ("Parkland") and the assets acquired and liabilities assumed were recorded at fair value as of the transaction date. The fair values of property and equipment and intangible assets recorded in the Parkland acquisition were \$5.61 billion and \$1.87 billion, respectively. Management utilized third-party valuation specialists to determine the fair values of the acquired property and equipment and intangible assets. We identified the estimation of the fair values of the acquired property and equipment and intangible assets as a critical audit matter.

The principal consideration for our determination that the estimation of the fair values of the acquired property and equipment and intangible assets is a critical audit matter is that there was estimation uncertainty due to significant judgments required by management when determining the fair value. In particular, the significant judgments were the replacement cost and market assumptions and methodology used for property and equipment as well as the estimated long-term cash flows and the discount rate related to the fair value of the intangible assets. This in turn led to a higher degree of auditor judgment and subjectivity, in performing procedures and evaluating audit evidence related to management's forecasted future cash flows and assumptions. In addition, the audit effort involved the use of specialists to assist in performing these procedures and evaluating the audit evidence.

Our audit procedures related to the estimation of the fair value of the acquired property and equipment and intangible assets included the following procedures, among others. We tested the effectiveness of controls relating to management's review of the assumptions used to project future cash flows, the reconciliation of the future cash flows prepared by management to the data used in the valuation report prepared by the third-party specialists, and review of the valuation methodologies and assumptions applied by the third-party valuation specialists. In addition to testing the effectiveness of controls, we also performed the following:

- Assessed the reasonableness of management's future cash flows by:
  - evaluating management's significant assumptions used to project future cash flows, which included forecasted gross profit, earnings before interest, taxes, depreciation, and amortization, capital expenditures and discount rates, and
  - testing the projected future cash flows by comparing forecasted amounts to actual historical results to identify material changes and corroborating the basis for the changes, as applicable.
- Utilized our valuation specialists to evaluate:
  - the qualifications of the third-party valuation specialists engaged by management based on their credentials and experience,
  - the process used by management to develop the estimate, including valuation methodologies and assumptions used by the third-party valuation specialists and whether they were acceptable for the underlying assets and applied correctly,
  - the estimates of fair values for assets which were valued based on comparable market data and the appropriateness of the replacement costs, by performing independent market research and analyses, and
  - the appropriateness of the discount rate used by developing an independent range of acceptable discount rates and comparing those ranges to the amounts selected and applied by management.

/s/ GRANT THORNTON LLP

We have served as the Partnership's auditor since 2004.

The accompanying notes are an integral part of these consolidated financial statements.

**ENERGY TRANSFER LP AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
(Tabular dollar and unit amounts, except per unit data, are in millions)

**1. OPERATIONS AND BASIS OF PRESENTATION:**

The consolidated financial statements presented herein contain the results of Energy Transfer LP and its subsidiaries (the “Partnership,” “we,” “us,” “our” or “Energy Transfer”).

Our consolidated financial statements reflect the following reportable segments:

- intrastate transportation and storage;
- interstate transportation and storage;
- midstream;
- NGL and refined products transportation and services;
- crude oil transportation and services;
- investment in Sunoco LP;
- investment in USAC; and
- all other.

The Partnership owns and operates intrastate natural gas pipeline systems and storage facilities that are engaged in the business of purchasing, gathering, transporting, processing and marketing natural gas and NGLs in the states of Texas, Oklahoma and Louisiana.

The Partnership also owns and operates interstate pipelines, either directly or through equity method investments, that transport natural gas to various markets in the United States.

The Partnership is also engaged in midstream services, focusing on providing gathering, processing, compression, treating and transportation of natural gas in some of the most prolific natural gas producing regions in the United States, including the Permian, Anadarko, Arkoma, Hugoton, Powder River and Williston basins, as well as the Eagle Ford, Haynesville, Barnett, Marcellus and Utica shales.

The Partnership’s operations also include crude oil, NGL and refined products transportation, terminalling services, and acquisition and marketing activities, as well as NGL storage and fractionation and LNG regasification.

The Partnership owns a controlling interest in Sunoco LP which is engaged in energy infrastructure and distribution of motor fuels across 32 countries and territories in North America, the Greater Caribbean and Europe. Sunoco LP’s midstream operations include an extensive network of over 14,000 miles of pipeline and over 160 terminals. Sunoco LP’s fuel distribution operations serve approximately 11,000 Sunoco and partner branded locations, as well as additional independent dealers and commercial customers. As of December 31, 2025, our interest in Sunoco LP consisted of 100% of the general partner and IDRs, as well as 28.5 million common units. In addition, the Partnership controls SunocoCorp Management LLC, which controls SunocoCorp. SunocoCorp’s only cash-generating assets are Sunoco LP’s Class D units.

The Partnership owns a controlling interest in USAC which provides compression services to producers, processors, gatherers and transporters of natural gas and crude oil. As of December 31, 2025, our interest in USAC consisted of 100% of the general partner and 46.1 million common units.

*Basis of Presentation.* The consolidated financial statements of Energy Transfer LP presented herein have been prepared in accordance with GAAP and pursuant to the rules and regulations of the SEC. We consolidate all subsidiaries in which we have a controlling financial interest and limited partnerships in which we control the general partner. All significant intercompany transactions and accounts are eliminated in consolidation.

The consolidated financial statements of Energy Transfer presented herein include the results of operations of our controlled subsidiaries, including SunocoCorp, Sunoco LP and USAC. We also consolidate SunocoCorp as its primary beneficiary under the variable interest model, based on the Partnership’s interests in its subsidiary, Sunoco LP.

The operations of certain pipelines and terminals in which we own an undivided interest are proportionately consolidated in the accompanying consolidated financial statements.

## **2. ESTIMATES, SIGNIFICANT ACCOUNTING POLICIES AND BALANCE SHEET DETAIL:**

### **Use of Estimates**

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the accrual for and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period.

The oil and gas industry conducts its business by processing actual transactions at the end of the month following the month of delivery. Consequently, the most current month's financial results for much of our business are estimated using volume estimates and market prices. Any differences between estimated results and actual results are recognized in the following month's financial statements. Management believes that the estimated operating results represent the actual results in all material respects.

Some of the other significant estimates made by management include, but are not limited to, the timing of certain forecasted transactions that are hedged, the fair value of derivative instruments, useful lives for depreciation and amortization, purchase accounting allocations and subsequent realizability of intangible assets, fair value measurements used in the goodwill impairment test, market value of inventory, assets and liabilities resulting from the regulated ratemaking process, contingency reserves and environmental reserves. Actual results could differ from those estimates.

### **Regulatory Accounting – Regulatory Assets and Liabilities**

Our interstate transportation and storage segment is subject to regulation by certain state and federal authorities, and certain subsidiaries in that segment have accounting policies that conform to the accounting requirements and ratemaking practices of the regulatory authorities, in accordance with Accounting Standards Codification (“ASC”) Topic 980. The application of these accounting policies allows certain of our regulated entities to defer expenses and revenues on the balance sheet as regulatory assets and liabilities when it is probable that those expenses and revenues will be allowed in the ratemaking process in a period different from the period in which they would have been reflected in the consolidated statement of operations by an unregulated company. These deferred assets and liabilities will be reported in results of operations in the period in which the same amounts are included in rates and recovered from or refunded to customers. Management's assessment of the probability of recovery or pass through of regulatory assets and liabilities will require judgment and interpretation of laws and regulatory commission orders. If, for any reason, we cease to meet the criteria for application of regulatory accounting treatment under ASC Topic 980 for these entities, the regulatory assets and liabilities related to those portions ceasing to meet such criteria would be eliminated from the consolidated balance sheet for the period in which the discontinuance of regulatory accounting treatment occurs.

Although Panhandle's natural gas transmission systems and storage operations are subject to the jurisdiction of the FERC in accordance with the NGA and NGPA, Panhandle does not currently apply ASC Topic 980 in its GAAP-basis consolidated financial statements, primarily due to the level of discounting from tariff rates and its inability to recover specific costs.

### **Cash, Cash Equivalents and Supplemental Cash Flow Information**

Cash and cash equivalents include all cash on hand, demand deposits and investments with original maturities of three months or less. We consider cash equivalents to include short-term, highly liquid investments that are readily convertible to known amounts of cash and that are subject to an insignificant risk of changes in value.

We place our cash deposits and temporary cash investments with high credit quality financial institutions. At times, our cash and cash equivalents may be uninsured or in deposit accounts that exceed the Federal Deposit Insurance Corporation insurance limit.

The net change in operating assets and liabilities, net of effects of acquisitions and divestitures, included in cash flows from operating activities is comprised as follows:

|   | Years Ended December 31, |          |          |
|---|--------------------------|----------|----------|
|   | 2025                     | 2024     | 2023     |
| Accounts receivable   | \$ (77)                  | \$ (775) | \$ (171) |
| Accounts receivable from related companies  | 31                       | 15       | (5)      |
| Inventories   | (717)                    | (735)    | 35       |
| Other current assets  | (80)                     | 82       | 221      |
| Other non-current assets, net   | (120)                    | (166)    | (125)    |
| Accounts payable  | (322)                    | 1,315    | (501)    |
| Accounts payable to related companies   | (24)                     | (35)     | (38)     |
| Accrued and other current liabilities   | (96)                     | 166      | 209      |
| Other non-current liabilities   | (523)                    | (123)    | (33)     |
| Derivative assets and liabilities, net  | (48)                     | 60       | (43)     |
| Net change in operating assets and liabilities, net of effects of acquisitions and divestitures | \$ (1,976)               | \$ (196) | \$ (451) |

Non-cash investing and financing activities and supplemental cash flow information are as follows:

|  | Years Ended December 31, |          |          |
|--|--------------------------|----------|----------|
|  | 2025                     | 2024     | 2023     |
| <b>NON-CASH INVESTING AND FINANCING ACTIVITIES:</b>  |                          |          |          |
| Accrued capital expenditures   | \$ 1,112                 | \$ 688   | \$ 442   |
| Lease assets obtained in exchange for new lease liabilities  | 296                      | 7        | 23       |
| Distribution reinvestment  | 45                       | 89       | 90       |
| Energy Transfer common units issued in connection with acquisitions <sup>(1)</sup>                           | —                        | 833      | 3,940    |
| USAC exercise and conversion of preferred units into common units  | 164                      | 301      | —        |
| USAC government securities transferred in connection with the legal defeasance of USAC senior notes due 2026 | —                        | 749      | —        |
| Legal defeasance of USAC senior notes due 2026   | —                        | 725      | —        |
| Sunoco LP senior notes redeemed and issued in exchange transaction   | 3,654                    | —        | —        |
| Sunoco LP common units (noncontrolling interest) issued in connection with acquisitions <sup>(1)</sup>       | 4,038                    | 2,850    | —        |
| <b>SUPPLEMENTAL CASH FLOW INFORMATION:</b>   |                          |          |          |
| Cash paid for interest, net of interest capitalized  | \$ 3,136                 | \$ 2,884 | \$ 2,298 |

<sup>(1)</sup> See Note 3 for additional information.

#### Accounts Receivable, net

Our operations deal with a variety of counterparties across the energy sector. Internal credit ratings and credit limits are assigned to all counterparties and limits are monitored against credit exposure. Letters of credit or prepayments may be required from those counterparties that are not investment grade depending on the internal credit rating and level of commercial activity with the counterparty.

We have a diverse portfolio of customers; however, because of the midstream and transportation services we provide, many of our customers are engaged in the exploration and production sector. We manage trade credit risk to mitigate credit losses and exposure to uncollectible trade receivables. Prospective and existing customers are reviewed regularly for creditworthiness to manage credit risk within approved tolerances. Customers that do not meet minimum credit standards are required to provide additional credit support in the form of a letter of credit, prepayment, or other forms of security. We establish an allowance for credit losses on trade receivables based on the expected ultimate recovery of these receivables and consider many factors including historical customer collection experience, general and specific economic trends, and known specific issues related to individual customers, sectors, and transactions that might impact collectability. Changes in the allowance are recorded as a component of operating expenses; reductions in the allowance are recorded when

receivables are subsequently collected or written-off. Past due receivable balances are written-off when our efforts have been unsuccessful in collecting the amount due.

### **Inventories**

Inventories consist principally of natural gas held in storage, NGLs and refined products, crude oil and spare parts, all of which are valued at the lower of cost or net realizable value utilizing the weighted-average cost method.

Sunoco LP's fuel inventories, other than in the Caribbean, are stated at the lower of cost or market using the last-in-first-out ("LIFO") method. As of December 31, 2025 and 2024, Sunoco LP's fuel inventory balance included lower of cost or market reserves of \$472 million and \$316 million, respectively. For the years ended December 31, 2025, 2024 and 2023, the Partnership's consolidated statements of operations and comprehensive income did not include any material amounts of income from the liquidation of Sunoco LP's LIFO fuel inventory. For the years ended December 31, 2025, 2024 and 2023, the Partnership's cost of products sold included unfavorable inventory adjustments of \$156 million, \$86 million and \$114 million, respectively, which decreased net income.

Sunoco LP's fuel inventories in the Caribbean, which totaled \$88 million at December 31, 2025, are stated at the lower of cost or market using the FIFO method. Under this methodology, the cost of fuel sold consists of older acquisition costs, which includes transportation and storage costs.

The Partnership's inventories consisted of the following:

|  | December 31,    |                 |
|--|-----------------|-----------------|
|  | 2025            | 2024            |
| Natural gas, NGLs and refined products | \$ 3,506        | \$ 1,989        |
| Crude oil                              | 286             | 400             |
| Spare parts and other                  | 978             | 681             |
| Total inventories                      | <u>\$ 4,770</u> | <u>\$ 3,070</u> |

We utilize commodity derivatives to manage price volatility associated with our natural gas inventory. Changes in fair value of designated hedged inventory are recorded in inventory on our consolidated balance sheets and cost of products sold in our consolidated statements of operations.

### **Other Current Assets**

Other current assets consisted of the following:

|                            | December 31,  |               |
|----------------------------|---------------|---------------|
|                            | 2025          | 2024          |
| Deposits paid to vendors   | \$ 216        | \$ 150        |
| Prepaid expenses and other | 472           | 327           |
| Total other current assets | <u>\$ 688</u> | <u>\$ 477</u> |

### **Property, Plant and Equipment, net**

Property, plant and equipment is stated at cost less accumulated depreciation. Depreciation is computed using the straight-line method over the estimated useful or FERC-mandated lives of the assets, if applicable. Expenditures for maintenance and repairs that do not add capacity or extend the useful life are expensed as incurred. Expenditures to refurbish assets that either extend the useful lives of the asset or prevent environmental contamination are capitalized and depreciated over the remaining useful life of the asset. Additionally, we capitalize certain costs directly related to the construction of assets including internal labor costs, interest and engineering costs. Upon disposition or retirement of pipeline components or natural gas plant components, any gain or loss is recorded to accumulated depreciation. When entire pipeline systems, gas plants or other property and equipment is retired or sold, any gain or loss is included in our consolidated statements of operations.

Property, plant and equipment is reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. If such a review should indicate that the carrying amount of long-lived assets is not recoverable, we reduce the carrying amount of such assets to fair value.

For the years ended December 31 2025, 2024 and 2023, USAC recognized fixed asset impairments of \$8 million, \$1 million and \$12 million, respectively, primarily related to its compression equipment as a result of its evaluation of the future deployment of idle fleet.

In 2025, the Partnership recorded a \$256 million fixed asset impairment related to the suspension of the Lake Charles LNG export project.

Capitalized interest is included for pipeline construction projects, except for certain interstate projects for which an allowance for funds used during construction (“AFUDC”) is accrued. Interest is capitalized based on the then current weighted average interest rate of our outstanding debt when the related costs are incurred. AFUDC is calculated under guidelines prescribed by the FERC and capitalized as part of the cost of utility plant for interstate projects. It represents the cost of servicing the capital invested in construction work-in-process. AFUDC is segregated into two component parts – borrowed funds and equity funds.

Components and useful lives of property, plant and equipment were as follows:

|  | December 31,      |                  |
|--|-------------------|------------------|
|  | 2025              | 2024             |
| Land and improvements                                  | \$ 3,051          | \$ 1,675         |
| Buildings and improvements (1 to 40 years)             | 8,448             | 4,688            |
| Pipelines and equipment (5 to 65 years)                | 101,506           | 97,078           |
| Product storage and related facilities (2 to 40 years) | 8,399             | 7,869            |
| Right of way (20 to 65 years)                          | 9,344             | 9,239            |
| Other (1 to 48 years)                                  | 4,694             | 4,060            |
| Construction work-in-process                           | 5,841             | 4,633            |
|  | 141,283           | 129,242          |
| Less – Accumulated depreciation and depletion          | (39,141)          | (34,030)         |
| Property, plant and equipment, net                     | <u>\$ 102,142</u> | <u>\$ 95,212</u> |

We recognized the following amounts for the periods presented:

|  | Years Ended December 31, |          |          |
|--|--------------------------|----------|----------|
|  | 2025                     | 2024     | 2023     |
| Depreciation, depletion and amortization expense | \$ 5,203                 | \$ 4,701 | \$ 3,986 |
| Capitalized interest                             | 150                      | 120      | 77       |

#### Investments in Unconsolidated Affiliates

We own interests in a number of related businesses that are accounted for by the equity method. In general, we use the equity method of accounting for an investment for which we exercise significant influence over, but do not control, the investee’s operating and financial policies. An impairment of an investment in an unconsolidated affiliate is recognized when circumstances indicate that a decline in the investment value is other than temporary.

### Other Non-Current Assets, net

Other non-current assets, net are stated at cost less accumulated amortization. Other non-current assets, net consisted of the following:

|  | December 31,    |                 |
|--|-----------------|-----------------|
|  | 2025            | 2024            |
| Crude pipeline linefill and tank bottoms   | \$ 787          | \$ 743          |
| Regulatory assets                          | 40              | 39              |
| Pension assets                             | 209             | 188             |
| Deferred charges                           | 146             | 151             |
| Restricted funds                           | 210             | 216             |
| Other                                      | 1,199           | 680             |
| <b>Total other non-current assets, net</b> | <b>\$ 2,591</b> | <b>\$ 2,017</b> |

Restricted funds primarily consist of investments held in our wholly owned captive insurance companies, including an immaterial amount of restricted cash.

### Intangible Assets, net

Intangible assets are stated at cost, net of amortization computed on the straight-line method. The Partnership removes the gross carrying amount and the related accumulated amortization for any fully amortized intangibles in the year they are fully amortized.

Components and useful lives of intangible assets were as follows:

|  | December 31, 2025     |                          | December 31, 2024     |                          |
|--|-----------------------|--------------------------|-----------------------|--------------------------|
|  | Gross Carrying Amount | Accumulated Amortization | Gross Carrying Amount | Accumulated Amortization |
| Amortizable intangible assets:                                   |                       |                          |                       |                          |
| Customer relationships, contracts and agreements (3 to 46 years) | \$ 10,859             | \$ (4,128)               | \$ 9,304              | \$ (3,654)               |
| Patents (10 years)   | 48                    | (48)                     | 48                    | (48)                     |
| Trade names (20 years)   | 66                    | (51)                     | 66                    | (48)                     |
| Other (5 to 20 years)  | 95                    | (9)                      | 12                    | (11)                     |
| <b>Total amortizable intangible assets</b>                       | <b>11,068</b>         | <b>(4,236)</b>           | <b>9,430</b>          | <b>(3,761)</b>           |
| Non-amortizable intangible assets:                               |                       |                          |                       |                          |
| Trademarks   | 606                   | —                        | 302                   | —                        |
| <b>Total non-amortizable intangible assets</b>                   | <b>606</b>            | <b>—</b>                 | <b>302</b>            | <b>—</b>                 |
| <b>Total intangible assets</b>                                   | <b>\$ 11,674</b>      | <b>\$ (4,236)</b>        | <b>\$ 9,732</b>       | <b>\$ (3,761)</b>        |

Aggregate amortization expense of intangible assets was as follows:

|  | Years Ended December 31, |        |        |
|--|--------------------------|--------|--------|
|  | 2025                     | 2024   | 2023   |
| Reported in depreciation, depletion and amortization expense | \$ 479                   | \$ 464 | \$ 399 |

Estimated aggregate amortization of intangible assets for the next five years is as follows:

Years Ending December 31:

|      |    |     |
|------|----|-----|
| 2026 | \$ | 558 |
| 2027 |    | 542 |
| 2028 |    | 539 |
| 2029 |    | 533 |
| 2030 |    | 516 |

We review amortizable intangible assets for impairment whenever events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. If such a review should indicate that the carrying amount of amortizable intangible assets is not recoverable, we reduce the carrying amount of such assets to fair value. We review non-amortizable intangible assets for impairment annually, or more frequently if circumstances dictate.

**Goodwill**

Goodwill is tested for impairment annually or more frequently if circumstances indicate that goodwill might be impaired. The annual impairment test was performed during the fourth quarter.

Changes in the carrying amount of goodwill were as follows:

|                            | Midstream | NGL and<br>Refined Products<br>Transportation<br>and Services | Crude Oil<br>Transportation<br>and Services | Investment in<br>Sunoco LP | All Other | Total    |
|----------------------------|-----------|---|---|----------------------------|-----------|----------|
| Balance, December 31, 2023 | \$ 601    | \$ 884  | \$ 853                                      | \$ 1,599                   | \$ 82     | \$ 4,019 |
| Acquired                   | —         | —   | —   | 16                         | —         | 16       |

| Other                      | —         | —   | —   | 21                         | —         | 21       |
| Balance, December 31, 2025 | \$ 617    | \$ 886  | \$ 841                                      | \$ 3,026                   | \$ 82     | \$ 5,452 |

Goodwill is recorded at the acquisition date based on a preliminary purchase price allocation and generally may be adjusted when the purchase price allocation is finalized. During 2025, \$1.53 billion of goodwill was recorded in connection with Sunoco LP's acquisition of Parkland. During 2024, \$16 million of goodwill was recorded in connection with Sunoco LP's acquisition of NuStar and \$138 million of goodwill was removed in connection with Sunoco LP's sale of 204 convenience stores to 7-Eleven, Inc.

The Partnership determines the fair value of our reporting units using the discounted cash flow method, the guideline company method, or a weighted combination of the discounted cash flow method and the guideline company method. Determining the fair value of a reporting unit requires judgment and the use of significant estimates and assumptions. Such estimates and assumptions include revenue growth rates, operating margins, weighted average costs of capital and future market conditions, among others. The Partnership believes the estimates and assumptions used in our impairment assessments are reasonable and based on available market information, but variations in any of the assumptions could result in materially different calculations of fair value and determinations of whether or not an impairment is indicated. Under the discounted cash flow method, the Partnership determines fair value based on estimated future cash flows of each reporting unit including estimates for capital expenditures, discounted to present value using the risk-adjusted industry rate, which reflect the overall level of inherent risk of the reporting unit. Cash flow projections are derived from one year budgeted amounts and five year operating forecasts plus an estimate of later period cash flows, all of which are evaluated by management. Subsequent period cash flows are developed for each reporting unit using growth rates that management believes are reasonably likely to occur. Under the guideline company method, the Partnership determines the estimated fair value of each of our reporting units by applying valuation multiples of comparable publicly-traded companies to each reporting unit's projected EBITDA and then averaging that estimate with similar historical calculations using a three year average. In addition, the Partnership estimates a reasonable control premium representing the incremental value that accrues to the majority owner from the opportunity to dictate the strategic and operational actions of the business. The fair

value estimates used in the long-lived asset and goodwill tests were primarily based on Level 3 inputs of the fair value hierarchy.

### Asset Retirement Obligations

We have determined that we are obligated by contractual or regulatory requirements to remove facilities or perform other remediation upon retirement of certain assets. The fair value of any ARO is determined based on estimates and assumptions related to retirement costs, which the Partnership bases on historical retirement costs, future inflation rates and credit-adjusted risk-free interest rates. These fair value assessments are considered to be Level 3 measurements, as they are based on both observable and unobservable inputs. Changes in the liability are recorded for the passage of time (accretion) or for revisions to cash flows originally estimated to settle the ARO.

An ARO is required to be recorded when a legal obligation to retire an asset exists and such obligation can be reasonably estimated. We will record an ARO in the periods in which management can reasonably estimate the settlement dates.

As of December 31, 2025 and 2024, other non-current liabilities in the Partnership's consolidated balance sheets included AROs of \$589 million and \$418 million, respectively. For the years ended December 31, 2025, 2024 and 2023 aggregate accretion expense related to AROs was \$13 million, \$11 million and \$10 million, respectively.

Except for the AROs discussed above, management was not able to reasonably measure the fair value of AROs as of December 31, 2025 and 2024, in most cases because the settlement dates were indeterminable. Although a number of onshore assets in our systems are subject to agreements or regulations that give rise to an ARO upon discontinued use of these assets, AROs were not recorded because these assets have an indeterminate removal or abandonment date given the expected continued use of the assets with proper maintenance or replacement. Our subsidiaries also have legal obligations for several other assets at previously owned refineries, pipelines and terminals, for which it is not possible to estimate when the obligations will be settled. Consequently, the retirement obligations for these assets cannot be measured at this time. At the end of the useful life of these underlying assets, our subsidiaries are legally or contractually required to abandon in place or remove the asset. We believe we may have additional AROs related to pipeline assets and storage tanks, for which it is not possible to estimate whether or when the AROs will be settled. Consequently, these AROs cannot be measured at this time. Sunoco LP also has AROs related to the estimated future cost to remove underground storage tanks.

Individual component assets have been and will continue to be replaced, but the pipeline and the natural gas gathering and processing systems will continue in operation as long as supply and demand for natural gas exists. Based on the widespread use of natural gas in industrial and power generation activities, management expects supply and demand to exist for the foreseeable future. We have in place a rigorous repair and maintenance program that keeps the pipelines and the natural gas gathering and processing systems in good working order. Therefore, although some of the individual assets may be replaced, the pipelines and the natural gas gathering and processing systems themselves will remain intact indefinitely.

As of December 31, 2025 and 2024, other non-current assets on the Partnership's consolidated balance sheets included \$35 million and \$31 million, respectively, of funds that were legally restricted for the purpose of settling AROs.

### Accrued and Other Current Liabilities

Accrued and other current liabilities consisted of the following:

|  | December 31,    |                 |
|--|-----------------|-----------------|
|  | 2025            | 2024            |
| Interest payable                                   | \$ 878          | \$ 685          |
| Customer advances and deposits                     | 343             | 360             |
| Accrued capital expenditures                       | 1,112           | 688             |
| Accrued wages and benefits                         | 494             | 422             |
| Taxes payable other than income taxes              | 844             | 737             |
| Exchanges payable                                  | 86              | 90              |
| Deferred revenue                                   | 366             | 322             |
| Other  | 1,042           | 937             |
| <b>Total accrued and other current liabilities</b> | <b>\$ 5,165</b> | <b>\$ 4,241</b> |

In certain circumstances, customer advances and deposits are received from our customers as prepayments for natural gas deliveries in the following month. Prepayments and security deposits may be required when customers exceed their credit limits or do not qualify for open credit.

### Redeemable Noncontrolling Interests

Our redeemable noncontrolling interests relate to certain preferred unitholders of our consolidated subsidiaries that have the option to convert their preferred units to such subsidiary's common units at the election of the holders and the noncontrolling interest holders in our consolidated subsidiaries that have the option to sell their interests to us. In accordance with applicable accounting guidance, the noncontrolling interest is excluded from total equity and reflected as redeemable noncontrolling interests on our consolidated balance sheets. See Note 7 for further information.

### Environmental Remediation

We accrue environmental remediation costs for work at identified sites where an assessment has indicated that cleanup costs are probable and reasonably estimable. Such accruals are undiscounted and are based on currently available information, estimated timing of remedial actions and related inflation assumptions, existing technology and presently enacted laws and regulations. If a range of probable environmental cleanup costs exists for an identified site, the minimum of the range is accrued unless some other point in the range is more likely in which case the most likely amount in the range is accrued.

### Fair Value of Financial Instruments

The carrying amounts of cash and cash equivalents, accounts receivable and accounts payable approximate their fair value.

Commodity derivatives, excluding those designated as normal purchases or normal sales, are recognized as assets or liabilities at fair value on our consolidated balance sheets. Fair value is determined using the highest level of observable inputs available, in accordance with the fair value hierarchy.

Exchange-traded contracts, such as futures, swaps and options, are valued using quoted market prices from exchanges including the New York Mercantile Exchange, Intercontinental Exchange or similar platforms. These are classified as Level 1.

Over-the-counter (OTC) swaps, options and physical forward contracts that are comparable to actively traded instruments are valued using third-party broker quotes, pricing services or relevant exchange data. This category also includes OTC options valued using an option pricing model based on observable market inputs. These instruments are classified as Level 2.

Less liquid instruments, including non-standard term OTC swaps and options, as well as long-dated contracts, are valued using internally developed models based on historical industry practices. These models incorporate forward price curves, volatility assumptions, time value and other relevant economic factors. These are classified as Level 3.

The following tables summarize the fair value of our financial assets and liabilities measured and recorded at fair value on a recurring basis as of December 31, 2025 and 2024 based on inputs used to derive their fair values:

|                             | Fair Value Total | Fair Value Measurements at<br>December 31, 2025 |                |
|-----------------------------|------------------|---|----------------|
|                             |                  | Level 1   | Level 2        |
| Assets:                     |                  |   |                |
| Total commodity derivatives | \$ 618           | \$ 531  | \$ 87          |

|                             | Fair Value Total | Fair Value Measurements at<br>December 31, 2024 |             |
|-----------------------------|------------------|---|-------------|
|                             |                  | Level 1   | Level 2     |
| <b>Assets:</b>              |                  |   |             |
| Total commodity derivatives | \$ 263           | \$ 263  | \$ —        |
| Other non-current assets    | 212              | 212   | —           |
| <b>Total assets</b>         | <b>\$ 475</b>    | <b>\$ 475</b>                                   | <b>\$ —</b> |
| <b>Liabilities:</b>         |                  |   |             |
| Total commodity derivatives | \$ (293)         | \$ (293)  | \$ —        |
| <b>Total liabilities</b>    | <b>\$ (293)</b>  | <b>\$ (293)</b>                                 | <b>\$ —</b> |

Based on the estimated borrowing rates currently available to us and our subsidiaries for loans with similar terms and average maturities, the aggregate fair value and carrying amount of our debt obligations as of December 31, 2025 was \$68.55 billion and \$68.33 billion, respectively. As of December 31, 2024, the aggregate fair value and carrying amount of our debt obligations was \$59.01 billion and \$59.76 billion, respectively. The fair value of our consolidated debt obligations is a Level 2 valuation based on the observable inputs used for similar liabilities.

### Contributions in Aid of Construction Costs

On certain of our capital projects, third parties are obligated to reimburse us for all or a portion of project expenditures. The majority of such arrangements are associated with pipeline construction and production well tie-ins. For our regulated businesses, contributions in aid of construction costs (“CIAC”) are netted against our project costs as they are received. For our non-regulated businesses, contributions in aid of construction costs are included in the transaction price of the underlying contract.

### Shipping and Handling Costs

Shipping and handling costs are included in cost of products sold, except for shipping and handling costs related to fuel consumed for compression and treating which are included in operating expenses.

### Costs and Expenses

Cost of products sold include actual cost of fuel sold, adjusted for the effects of our hedging and other commodity derivative activities, and the cost of appliances, parts and fittings. Operating expenses include all costs incurred to provide products to customers, including compensation for operations personnel, insurance costs, vehicle maintenance, advertising costs, purchasing costs and plant operations. Selling, general and administrative expenses include all partnership related expenses and compensation for executive, partnership and administrative personnel.

We record the collection of taxes to be remitted to government authorities on a net basis, except for consumer excise taxes collected by Sunoco LP on sales of refined products and merchandise which are included in both revenues and costs and expenses in the consolidated statements of operations, with no effect on net income. For the years ended December 31, 2025, 2024 and 2023, excise taxes collected by Sunoco LP were \$261 million, \$164 million and \$274 million, respectively.

### Issuances of Subsidiary Units

We record changes in our ownership interest of our subsidiaries as equity transactions, with no gain or loss recognized in consolidated net income or comprehensive income. For example, upon our subsidiary’s issuance of common units in a public offering, we record any difference between the amount of consideration received or paid and the amount by which the noncontrolling interests are adjusted as a change in partners’ capital.

### Related Party Transactions

The Partnership regularly enters into related party transactions with several of its unconsolidated affiliates. In addition to commercial transactions, these transactions include the provision of certain management services and leases of certain assets. While the Partnership believes that such related party transactions generally reflect market rates, the pricing under such agreements may not be comparable to similar transactions with unaffiliated third parties. For the years ended December 31, 2025, 2024 and 2023, the Partnership’s consolidated income statements reflect revenues from related parties of \$568 million, \$603 million and \$626 million, respectively.

## Foreign Currency Translation

The functional currencies of our foreign subsidiaries are the local currencies of the countries in which the subsidiaries are located. Transactions in foreign currencies are translated to the respective functional currencies at the exchange rates applicable on the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies are translated to the appropriate functional currency at the exchange rate at the consolidated balance sheet date. Foreign exchange gains and losses are recorded in the consolidated statements of operations. Non-monetary assets and liabilities denominated in foreign currencies are measured at cost using the exchange rates on the dates of initial recognition.

On consolidation, the financial statements of foreign operations are translated to U.S. dollars. The assets and liabilities of foreign operations are translated to U.S. dollars at the exchange rate prevailing at the consolidated balance sheet date. Income and expenses of foreign operations are translated to U.S. dollars at the exchange rates that approximate those on the dates of the transactions. Foreign exchange differences arising on translation for consolidation are recognized in other comprehensive income (loss). The results and financial position of subsidiaries with the functional currencies of hyperinflationary economies, after being restated for the effects of inflation in line with the Partnership's policy over hyperinflation accounting, are translated to U.S. dollars at the exchange rate prevailing at the consolidated balance sheet date.

In connection with certain internal restructuring transactions subsequent to the Parkland acquisition, Sunoco LP and Parkland established an intercompany loan that is denominated in Canadian dollars. Foreign currency translation gains and losses related to this intercompany loan are recorded in "Other, net" within net income on the Partnership's consolidated statement of operations.

## Income Taxes

Energy Transfer is a publicly traded limited partnership and is not taxable for federal and most state income tax purposes. As a result, our earnings or losses, to the extent not included in a taxable subsidiary, for federal and most state purposes are included in the tax returns of the individual partners. Net earnings for financial statement purposes may differ significantly from taxable income reportable to Unitholders as a result of differences between the tax basis and financial reporting basis of assets and liabilities, in addition to the allocation requirements related to taxable income under our Partnership Agreement. We do not have access to information regarding each partner's individual tax basis in our limited partner interests.

As a publicly traded limited partnership, we are subject to a statutory requirement that our "qualifying income" (as defined by the Internal Revenue Code, related Treasury Regulations, and IRS pronouncements) exceed 90% of our total gross income, determined on a calendar year basis. If our qualifying income does not meet this statutory requirement, Energy Transfer would be taxed as a corporation for federal and state income tax purposes. For the years ended December 31, 2025, 2024 and 2023, our qualifying income met the statutory requirement.

The Partnership conducts certain activities through corporate subsidiaries which are subject to federal, state and local, and foreign income taxes. These corporate subsidiaries include ETP Holdco, Sunoco Retail LLC and Aloha, among others. The Partnership and its corporate subsidiaries account for income taxes under the asset and liability method.

Under this method, deferred tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. Deferred tax assets and liabilities are measured using enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rate is recognized in earnings in the period that includes the enactment date. Valuation allowances are established when necessary to reduce deferred tax assets to the amounts more likely than not to be realized.

The determination of the provision for income taxes requires significant judgment, use of estimates, and the interpretation and application of complex tax laws. Significant judgment is required in assessing the timing and amounts of deductible and taxable items and the probability of sustaining uncertain tax positions. The benefits of uncertain tax positions are recorded in our consolidated financial statements only after determining a more-likely-than-not probability that the uncertain tax positions will withstand challenge, if any, from taxing authorities. When facts and circumstances change, we reassess these probabilities and record any changes through the provision for income taxes.

The acquisition of Parkland by Sunoco LP brought the Partnership into scope for Pillar Two global minimum tax regime, a legislative framework established by Organization for Economic Co-operation and Development, as several jurisdictions in which the Partnership now operates have enacted Pillar Two global minimum tax legislation.

Consistent with ASC 740 and current industry guidance, the Partnership has applied a temporary exception and has not recognized deferred tax assets or liabilities related to Pillar Two tax liability.

The Partnership has elected to account for the tax on global intangible low-taxed income (“GILTI”) under IRC §951A as a period cost in the year the tax is incurred, rather than recognizing deferred taxes on basis differences in its controlled foreign corporations that may give rise to future GILTI inclusions.

#### **Accounting for Derivative Instruments and Hedging Activities**

For qualifying hedges, we formally document, designate and assess the effectiveness of transactions that receive hedge accounting treatment and the gains and losses offset related results on the hedged item in the statement of operations. The market prices used to value our financial derivatives and related transactions have been determined using independent third-party prices, readily available market information, broker quotes and appropriate valuation techniques.

At inception of a hedge, we formally document the relationship between the hedging instrument and the hedged item, the risk management objectives, and the methods used for assessing and testing effectiveness and how any ineffectiveness will be measured and recorded. We also assess, both at the inception of the hedge and on a quarterly basis, whether the derivatives that are used in our hedging transactions are highly effective in offsetting changes in cash flows. If we determine that a derivative is no longer highly effective as a hedge, we discontinue hedge accounting prospectively by including changes in the fair value of the derivative in net income for the period.

If we designate a commodity hedging relationship as a fair value hedge, we record the changes in fair value of the hedged asset or liability in cost of products sold in our consolidated statements of operations. This amount is offset by the changes in fair value of the related hedging instrument. Any ineffective portion or amount excluded from the assessment of hedge ineffectiveness is also included in the cost of products sold in the consolidated statements of operations.

Cash flows from derivatives accounted for as cash flow hedges are reported as cash flows from operating activities, in the same category as the cash flows from the items being hedged.

If we designate a derivative financial instrument as a cash flow hedge and it qualifies for hedge accounting, the change in the fair value is deferred in AOCI until the underlying hedged transaction occurs. Any ineffective portion of a cash flow hedge’s change in fair value is recognized each period in earnings. Gains and losses deferred in AOCI related to cash flow hedges remain in AOCI until the underlying physical transaction occurs, unless it is probable that the forecasted transaction will not occur by the end of the originally specified time period or within an additional two-month period of time thereafter. For financial derivative instruments that do not qualify for hedge accounting, the change in fair value is recorded in cost of products sold in the consolidated statements of operations.

We manage a portion of our interest rate exposures by utilizing interest rate swaps and similar instruments. Certain of our interest rate derivatives are accounted for as either cash flow hedges or fair value hedges. For interest rate derivatives accounted for as either cash flow or fair value hedges, we report realized gains and losses and ineffectiveness portions of those hedges in interest expense. For interest rate derivatives not designated as hedges for accounting purposes, we report realized and unrealized gains and losses on those derivatives in other expenses in the consolidated statements of operations.

#### **Equity Incentive Compensation**

For awards of restricted units, we recognize compensation expense over the vesting period based on the grant-date fair value, which is determined based on the market price of the underlying common units on the grant date. For awards of cash restricted units, we remeasure the fair value of the award at the end of each reporting period based on the market price of the underlying common units as of the reporting date, and the fair value is recorded in other non-current liabilities on our consolidated balance sheets.

#### **Pensions and Other Postretirement Benefit Plans**

The Partnership recognizes the overfunded or underfunded status of defined benefit pension and other postretirement plans, measured as the difference between the fair value of the plan assets and the benefit obligation (the projected benefit obligation for pension plans and the accumulated postretirement benefit obligation for other postretirement plans). Each overfunded plan is recognized as an asset and each underfunded plan is recognized as a liability. Changes in the funded status of the plan are recorded in the year in which the change occurs within AOCI in equity or, for entities applying regulatory accounting, as a regulatory asset or regulatory liability.

## Allocation of Income

For purposes of maintaining partner capital accounts, the Partnership Agreement specifies that items of income and loss shall generally be allocated among the partners in accordance with their percentage interests.

## Recent Accounting Pronouncements

In November 2024, Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) 2024-03, *Income Statement—Reporting Comprehensive Income—Expense Disaggregation Disclosures (Subtopic 220-40)*. ASU 2024-03 requires disclosure of specified information about certain costs and expenses in the notes to the consolidated financial statements. ASU 2024-03 is effective for annual periods beginning after December 15, 2026, and interim periods within annual periods beginning after December 15, 2027, with early adoption permitted. ASU 2024-03 is to be applied on a prospective basis, with retrospective application permitted. We are currently evaluating the impact, if any, of ASU 2024-03 on our consolidated financial statements and related disclosures.

In December 2023, FASB issued ASU 2023-09, *Income Taxes (Topic 740): Improvements to Income Tax Disclosures*. ASU 2023-09 improves and enhances income tax disclosure requirements, including new disclosures related to tax rate reconciliation and income taxes paid. The Partnership retrospectively adopted ASU 2023-09 during the year ended December 31, 2025 and has revised its disclosures accordingly, as reflected above in “Cash, Cash Equivalents and Supplemental Cash Flow Information” within Note 2 and below in Note 10.

## 3. ACQUISITIONS, DIVESTITURES AND RELATED TRANSACTIONS:

### *Terminal Facilities Acquisition*

In the third quarter of 2025, Energy Transfer completed the acquisition of two terminal facilities for total cash consideration of approximately \$176 million.

### *WTG Midstream Acquisition*

On July 15, 2024, Energy Transfer completed the acquisition of 100% of the membership interest in WTG Midstream. Consideration for the transaction was comprised of \$2.28 billion in cash and approximately 50.8 million newly issued Energy Transfer common units, which had a fair value of approximately \$833 million.

The acquired assets include approximately 6,000 miles of complementary gas gathering pipelines that extended Energy Transfer’s network in the Midland Basin. Also, as part of the transaction, the Partnership added eight gas processing plants with a total capacity of approximately 1.3 Bcf/d, and two additional processing plants that were under construction at closing. Since closing the transaction, one of these 200 MMcf/d processing plants was placed into service.

The WTG Midstream acquisition was recorded using the acquisition method of accounting, which requires, among other things, that assets acquired and liabilities assumed be recognized on the balance sheet at their estimated fair values on the date of acquisition with any excess purchase price over the fair value of net assets acquired recorded to goodwill. Determining the fair value of acquired assets requires management’s judgment and the utilization of a third-party valuation specialist, if applicable, and involves the use of significant estimates and assumptions. Acquired assets were valued based on a combination of the discounted cash flow, the guideline company and the reproduction and replacement methods.

The following table summarizes the assumed allocation of the purchase price among the assets acquired and liabilities assumed:

|   | At July 15, 2024 |
|---|------------------|
| Total current assets                      | \$ 334           |
| Property, plant and equipment, net        | 3,109            |
| Lease right-of-use assets, net            | 8                |
| Intangible assets, net                    | 20               |
| Total assets                              | 3,471            |
| Total current liabilities                 | 394              |
| Non-current operating lease liabilities   | 5                |
| Other non-current liabilities             | 20               |
| Total liabilities                         | 419              |
| Total consideration                       | 3,052            |
| Cash received                             | 45               |
| Total consideration, net of cash received | \$ 3,007         |

### ***Crestwood Acquisition***

On November 3, 2023, Energy Transfer acquired Crestwood, which owns gathering and processing assets located in the Williston, Delaware and Powder River basins. Under the terms of the merger agreement, holders of Crestwood common units received 2.07 Energy Transfer common units for each Crestwood common unit held by them (the “Common Unit Merger Consideration”). Additionally, each outstanding Crestwood preferred unit was, at the election of the holder of such Crestwood preferred unit, either, (i) converted into a Series I Preferred Unit, which is a new preferred unit of Energy Transfer that has substantially similar terms, including with respect to economics and structural protections, as the Crestwood preferred units; (ii) redeemed in exchange for \$9.857484 in cash plus accrued and unpaid distributions to the date of such redemption; or (iii) converted into a Crestwood common unit at the then-applicable conversion ratio of one Crestwood common unit for ten Crestwood preferred units, and such Crestwood common units then received the Common Unit Merger Consideration.

In total, consideration issued in the transaction included approximately 216 million Energy Transfer common units, 41 million Series I Preferred Units and \$300 million in cash. Concurrent with the closing of the Crestwood acquisition, the Partnership assumed \$2.85 billion aggregate principal amount of Crestwood senior notes and terminated its revolving credit facility, which included the repayment of \$613 million in outstanding borrowings.

The Crestwood acquisition was recorded using the acquisition method of accounting, which requires, among other things, that assets acquired and liabilities assumed be recognized on the balance sheet at their estimated fair values on the date of acquisition with any excess purchase price over the fair value of net assets acquired recorded to goodwill. Determining the fair value of acquired assets requires management’s judgment and the utilization of an independent valuation specialist, if applicable, and involves the use of significant estimates and assumptions. Acquired assets were valued based on a combination of the discounted cash flow, the guideline company and the reproduction and replacement methods.

The following table summarizes the allocation of the purchase price among the assets acquired and liabilities assumed:

|   | At November 3, 2023 |
|---|---------------------|
| Total current assets                      | \$ 657              |
| Property, plant and equipment, net        | 4,772               |
| Investments in unconsolidated affiliates  | 95                  |
| Lease right-of-use assets, net            | 27                  |
| Other non-current assets                  | 12                  |
| Intangible assets, net                    | 1,139               |
| Goodwill                                  | 1,455               |
| Total assets                              | 8,157               |
| Total current liabilities                 | 445                 |
| Long-term debt, less current maturities   | 3,461               |
| Other non-current liabilities             | 322                 |
| Total liabilities                         | 4,228               |
| Noncontrolling interests                  | 272                 |
| Total consideration                       | 3,657               |
| Cash received                             | 12                  |
| Total consideration, net of cash received | \$ 3,645            |

#### ***Lotus Midstream Acquisition***

On May 2, 2023, Energy Transfer acquired Lotus Midstream for total consideration of \$1.50 billion, including working capital. Consideration included \$930 million in cash and approximately 44.5 million newly issued Energy Transfer common units, which had an aggregate acquisition-date fair value of \$574 million. Lotus Midstream owns and operates Centurion Pipeline Company LLC, an integrated crude midstream platform located in the Permian Basin.

The following table summarizes the allocation of the purchase price among the assets acquired and liabilities assumed:

|   | At May 2, 2023 |
|---|----------------|
| Total current assets                      | \$ 61          |
| Property, plant and equipment, net        | 1,263          |
| Investments in unconsolidated affiliates  | 138            |
| Lease right-of-use assets, net            | 10             |
| Other non-current assets                  | 4              |
| Intangible assets, net                    | 75             |
| Total assets                              | 1,551          |
| Total current liabilities                 | 27             |
| Other non-current liabilities             | 16             |
| Total liabilities                         | 43             |
| Total consideration                       | 1,508          |
| Cash received                             | 4              |
| Total consideration, net of cash received | \$ 1,504       |

## Sunoco LP

### *Parkland Acquisition*

On October 31, 2025, Sunoco LP completed the previously announced acquisition of Parkland whereby Sunoco Retail LLC, a wholly owned corporate subsidiary of Sunoco LP, indirectly acquired all the outstanding shares of Parkland, in exchange for cash and SunocoCorp units that were contributed by SunocoCorp to Sunoco LP at the close of the acquisition. Under the terms of the agreement, Parkland shareholders received 0.295 SunocoCorp units and C\$19.80 for each Parkland share. Parkland shareholders could elect, in the alternative, to receive C\$44.00 per Parkland share in cash or 0.536 SunocoCorp units for each Parkland share, subject to proration to ensure that the aggregate consideration payable in connection with the transaction would not exceed C\$19.80 in cash per Parkland share outstanding as of immediately before close and 0.295 SunocoCorp units per Parkland share outstanding as of immediately before close. In connection with the closing of the Parkland acquisition, Sunoco LP paid approximately \$2.6 billion to Parkland's shareholders and transferred 51,517,198 SunocoCorp common units, which Sunoco LP had received from SunocoCorp in exchange for its issuance of 51,517,198 Class D Units to SunocoCorp.

Parkland is a leading international fuel distributor, marketer and convenience retailer with operations in 26 countries across the Americas. Parkland's functional currency is the Canadian dollar, and its consolidated structure includes subsidiaries with multiple other functional currencies.

As part of the transaction, Sunoco LP repurposed and renamed an existing subsidiary as SunocoCorp. Prior to the Parkland acquisition, SunocoCorp did not have any significant assets, liabilities or operations; in connection with the Parkland Acquisition, Sunoco LP deconsolidated SunocoCorp and SunocoCorp became a publicly traded entity classified as a corporation for U.S. federal income tax purposes. SunocoCorp's common units began trading on the New York Stock Exchange effective November 6, 2025. Subsequent to the Parkland acquisition, SunocoCorp holds limited partnership units of Sunoco LP that are generally economically equivalent to Sunoco LP's publicly traded common units on the basis of one Sunoco LP common unit for each outstanding SunocoCorp unit. For a period of two years following closing of the transaction, Sunoco LP will ensure that SunocoCorp unitholders receive distributions on a per unit basis that are equivalent to the per unit distributions to Sunoco LP unitholders.

The acquisition was recorded using the acquisition method of accounting which requires, among other things, that assets acquired and liabilities assumed be recognized on the balance sheet at their estimated fair values as of the date of acquisition, with any excess purchase price over the fair value of net assets acquired recorded to goodwill. Determining the fair value of acquired assets requires management's judgment and the utilization of a third-party valuation specialist, if applicable, and involves the use of significant estimates and assumptions. Acquired assets were valued based on a combination of the discounted cash flow, the guideline company and the reproduction and replacement methods.

As of the date these financial statements were issued, management and the third-party valuation specialist continue to evaluate certain assumptions, which could result in a change to the allocation of the fair value among reporting units or

between line items on the consolidated balance sheet, potentially impacting deferred tax balances and/or goodwill. The following table summarizes the allocation of the purchase price among assets acquired and liabilities assumed:

|  | At October 31, 2025 |
|--|---------------------|
| Total current assets                             | \$ 2,814            |
| Property, plant and equipment, net               | 5,612               |
| Investments in unconsolidated affiliates         | 341                 |
| Lease right-of-use assets, net                   | 731                 |
| Deferred tax assets                              | 210                 |
| Other non-current assets                         | 266                 |
| Intangible assets, net <sup>(1)</sup>            | 1,871               |
| Goodwill <sup>(2)</sup>                          | 1,528               |
| <b>Total assets</b>                              | <b>13,373</b>       |
| <b>Total current liabilities</b>                 | <b>2,490</b>        |
| Long-term debt, less current maturities          | 3,797               |
| Non-current operating lease liabilities          | 731                 |
| Deferred income taxes                            | 965                 |
| Other non-current liabilities                    | 375                 |
| <b>Total liabilities</b>                         | <b>8,358</b>        |
| <b>Total consideration</b>                       | <b>5,015</b>        |
| Cash received                                    | 464                 |
| <b>Total consideration, net of cash received</b> | <b>\$ 4,551</b>     |

<sup>(1)</sup> Intangible assets, net comprised of \$1.49 billion of customer relationships, with a remaining weighted average life of approximately 20 years, \$297 million of indefinite-lived tradenames and \$85 million of other intangibles with a remaining weighted average life of approximately 10 years.

<sup>(2)</sup> Goodwill represents commercial and operational synergies. Approximately \$660 million of the goodwill recorded as a result of this transaction is expected to be deductible for IRC Sec. 951A GILTI and foreign earnings and profits purposes. The goodwill is not deductible for non-US jurisdictions.

#### ***TanQuid Acquisition***

On January 16, 2026, Sunoco LP completed the previously announced acquisition of TanQuid for approximately €465 million (approximately \$540 million as of January 16, 2026), including approximately €300 million of assumed debt, less approximately €39 million of cash acquired. TanQuid owns and operates 15 fuel terminals in Germany and one fuel terminal in Poland. The transaction was funded using cash on hand and amounts available under Sunoco LP's credit facility. As of the date of this Form 10-K filing, the initial accounting for this business combination is incomplete due to the timing of the close of the acquisition and therefore has not been included herein.

#### ***NuStar Acquisition***

On May 3, 2024, Sunoco LP completed the acquisition of all of the common units of NuStar. Under the terms of the merger agreement, NuStar common unitholders received 0.400 Sunoco LP common units for each NuStar common unit. In connection with the acquisition, Sunoco LP issued approximately 51.5 million common units, which had a fair value of approximately \$2.85 billion, assumed debt totaling approximately \$3.5 billion, including approximately \$56 million of lease related financing obligations, and assumed preferred units with a fair value of approximately \$800 million. NuStar has approximately 9,500 miles of pipeline and 63 terminal and storage facilities that store and distribute crude oil, refined products, renewable fuels, ammonia and specialty liquids.

The NuStar acquisition was recorded using the acquisition method of accounting, which requires, among other things, that assets acquired and liabilities assumed be recognized on the balance sheet at their estimated fair values on the date of acquisition with any excess purchase price over the fair value of net assets acquired recorded to goodwill. Determining the fair value of acquired assets requires management's judgment and the utilization of a third-party valuation specialist, if

applicable, and involves the use of significant estimates and assumptions. Acquired assets were valued based on a combination of the discounted cash flow, the guideline company and the reproduction and replacement methods.

The following table summarizes the assumed allocation of the purchase price among the assets acquired and liabilities assumed:

|  | At May 3, 2024 |
|--|----------------|
| Total current assets                                   | \$ 186         |
| Property, plant and equipment, net                     | 6,958          |
| Lease right-of-use assets, net                         | 136            |
| Goodwill <sup>(1)</sup>                                | 16             |
| Intangible assets, net <sup>(2)</sup>                  | 195            |
| Other non-current assets                               | 127            |
| Total assets   | 7,618          |
| Total current liabilities                              | 245            |
| Long-term debt, less current maturities <sup>(3)</sup> | 3,500          |
| Non-current operating lease liabilities                | 136            |
| Deferred income taxes                                  | 4              |
| Other non-current liabilities                          | 82             |
| Total liabilities                                      | 3,967          |
| Preferred units <sup>(3)</sup>                         | 801            |
| Total consideration                                    | 2,850          |
| Cash received  | 27             |
| Total consideration, net of cash received              | \$ 2,823       |

<sup>(1)</sup> Goodwill primarily represents expected commercial and operational synergies. None of the goodwill recorded as a result of this transaction is deductible for tax purposes.

<sup>(2)</sup> Intangible assets, net comprised of \$151 million of favorable contracts, with a remaining weighted average life of approximately 7 years, and \$44 million of customer relationships, with a remaining weighted average life of approximately 15 years.

<sup>(3)</sup> Subsequent to the closing of the NuStar acquisition, Sunoco LP redeemed all outstanding NuStar preferred units totaling \$784 million, redeemed NuStar's subordinated notes totaling \$403 million and repaid the outstanding balance on the NuStar credit facility totaling \$455 million.

Subsequent to the NuStar acquisition, Sunoco LP purchased a property previously leased by NuStar and cancelled the lease, resulting in an impairment of \$50 million based on the value of comparable real property.

#### ***Zenith European Terminals Acquisition***

On March 13, 2024, Sunoco LP completed the acquisition of liquid fuels terminals in Amsterdam, Netherlands and Bantry Bay, Ireland from Zenith Energy for approximately €170 million (\$185 million), including working capital. The acquisition is expected to supply optimization for Sunoco LP's existing East Coast business and continues its focus on growing its portfolio of stable midstream income. The purchase price was allocated \$6 million to other current assets, \$204 million to property, plant and equipment, \$36 million to other non-current assets and \$6 million to deferred tax assets. In connection with this transaction, Sunoco LP also assumed \$14 million in current liabilities, \$4 million in deferred tax liabilities and \$43 million in other non-current liabilities. Sunoco LP also recognized a \$6 million bargain purchase gain related to the acquisition.

#### ***Other 2025 Acquisitions***

In the first quarter of 2025, Sunoco LP acquired fuel equipment, motor fuel inventory and supply agreements in two separate transactions for total consideration of approximately \$17 million. Aggregate consideration included \$12 million in

cash and 91,776 newly issued Sunoco LP common units, which had an aggregate acquisition-date fair value of approximately \$5 million.

In the second quarter of 2025, Sunoco LP acquired a total of 151 fuel distribution consignment sites in three separate transactions for total consideration of approximately \$105 million plus working capital. Aggregate consideration included \$92 million in cash and 251,646 newly issued Sunoco LP common units which had an aggregate acquisition-date fair value of approximately \$13 million.

In the third quarter of 2025, Sunoco LP acquired approximately 70 fuel distribution consignment sites and 100 supply agreements in five separate transactions for total cash consideration of approximately \$85 million, plus working capital.

In the fourth quarter of 2025, Sunoco LP acquired a total of 27 fuel distribution consignment sites and 36 dealer sites, as well as commercial customers, in four separate transactions for total cash consideration of approximately \$64 million, plus working capital.

#### ***Other 2024 Acquisition***

On August 30, 2024, Sunoco LP acquired a terminal in Portland, Maine for approximately \$24 million, including working capital. The purchase price was primarily allocated to property, plant and equipment.

#### ***Other 2023 Acquisition***

On May 1, 2023, Sunoco LP completed the acquisition of 16 refined product terminals located across the East Coast and Midwest from Zenith Energy for \$111 million, including working capital. The purchase price was primarily allocated to property and equipment.

#### ***West Texas Sale***

On April 16, 2024, Sunoco LP completed the sale of 204 convenience stores located in West Texas, New Mexico and Oklahoma to 7-Eleven, Inc. for approximately \$1.00 billion, including customary adjustments for fuel and merchandise inventory. As part of the sale, Sunoco LP also amended its existing take-or-pay fuel supply agreement with 7-Eleven, Inc. to incorporate additional fuel gross profit. As a result of the sale, Sunoco LP recorded a \$586 million gain (\$442 million, net of tax).

#### **USAC**

#### ***J-W Power Company Acquisition***

On January 12, 2026, USAC completed the J-W Power Company acquisition, a large privately-held provider of compression services in the United States, for total consideration of approximately \$860 million, consisting of approximately \$430 million in cash and approximately 18.2 million newly issued USAC common units. As of the date of this Form 10-K filing, the initial accounting for this business combination is incomplete due to the timing of the close of the acquisition and therefore has not been included herein.

#### **Joint Venture Transaction**

#### ***ET-S Permian***

Effective July 1, 2024, Energy Transfer and Sunoco LP formed ET-S Permian, a joint venture combining their respective crude oil and produced water gathering assets in the Permian Basin. Pursuant to the contribution agreement by and among Sunoco LP, SUN Pipeline Holdings LLC, NuStar Permian Transportation and Storage LLC, NuStar Permian Crude Logistics LLC, NuStar Permian Holdings LLC, NuStar Logistics, L.P., ET-S Permian Holdings Company LP, ET-S Permian Pipeline Company LLC, ET-S Permian Marketing Company LLC, Energy Transfer and Energy Transfer Crude Marketing, LLC dated July 14, 2024, in a cashless transaction, Energy Transfer contributed its Permian crude oil and produced water gathering assets and operations to ET-S Permian. Sunoco LP contributed all of its Permian crude oil gathering assets and operations to ET-S Permian. Energy Transfer's long-haul crude pipeline network that provides transportation of crude oil out of the Permian Basin to Nederland, Houston and Cushing is excluded from ET-S Permian.

ET-S Permian operates more than 5,000 miles of crude oil and water gathering pipelines with crude oil storage capacity in excess of 11 million barrels.

Energy Transfer holds a 67.5% interest, with Sunoco LP holding the remaining 32.5% interest in ET-S Permian. Energy Transfer is the operator of ET-S Permian.

## Pro Forma Results of Operations

The following unaudited pro forma consolidated results of operations for the year ended December 31, 2025 and 2024 are presented as if the Parkland and NuStar acquisitions and the West Texas Sale had been completed on January 1, 2024.

|            | Year Ended December 31, |            |
|------------|-------------------------|------------|
|            | 2025                    | 2024       |
| Revenues   | \$ 101,791              | \$ 103,675 |
| Net income | 5,494                   | 5,679      |

The pro forma consolidated results of operations include adjustments to:

- include the results of Parkland and NuStar for all periods presented;
- include incremental expenses associated with the fair value adjustments recorded as a result of applying the acquisition method of accounting for Parkland and NuStar;
- include incremental interest expense related to financing the transactions;
- include \$175 million of expenses representing one-time costs associated with completing the transaction;
- adjust for relative changes in ownership resulting from the acquisition;
- exclude the results from the convenience stores sold in the West Texas Sale; and
- exclude the gain on sale and related tax impact related to the West Texas Sale.

The pro forma information is not necessarily indicative of the results of operations that would have occurred had the Parkland acquisition been made at the beginning of the periods presented or the future results of the combined operations.

Parkland's revenue and net income, excluding intercompany transactions, since the acquisition date to December 31, 2025 included in our consolidated statement of operations were \$3.17 billion and \$195 million, respectively.

## 4. INVESTMENTS IN UNCONSOLIDATED AFFILIATES:

### Description of Investments

Following is a summary of the Partnership's significant unconsolidated investees.

#### *Citrus*

Energy Transfer owns a 50% interest in Citrus. Citrus owns 100% of FGT, an approximately 5,362-mile natural gas pipeline system that originates in Texas and delivers natural gas to the Florida peninsula. Our investment in Citrus is reflected in our interstate transportation and storage segment.

#### *MEP*

Energy Transfer owns a 50% interest in MEP, which owns the Midcontinent Express Pipeline, an approximately 500-mile natural gas pipeline that extends from Southeast Oklahoma, across Northeast Texas, Northern Louisiana and Central Mississippi to an interconnect with the Transcontinental natural gas pipeline system in Butler, Alabama. Our investment in MEP is reflected in the interstate transportation and storage segment.

#### *White Cliffs*

Energy Transfer owns a 54.3% interest in White Cliffs, which consists of two parallel, 12-inch common carrier pipelines: one crude oil pipeline and one NGL pipeline. These pipelines transport crude and NGLs from Platteville, Colorado to Cushing, Oklahoma. White Cliffs is accounted for as an unconsolidated affiliate, despite the Partnership's ownership of greater than 50%, due to substantive participating rights held by the minority interest owner.

#### *Explorer*

Energy Transfer owns a 15% membership interest in Explorer, which consists of a 1,850-mile pipeline which originates from refining centers in Beaumont, Port Arthur, and Houston, Texas and extends to Chicago, Illinois. Our investment in Explorer is reflected in our NGL and refined products transportation and services segment.

*SESH*

Energy Transfer owns a 50% interest in SESH, which consists of a 290-mile pipeline which provides transportation services in Louisiana, Mississippi and Alabama. Our investment in SESH is reflected in our interstate transportation and storage segment.

**Summary of Balances Related to Unconsolidated Affiliates**

The carrying values of the Partnership's investments in unconsolidated affiliates as of December 31, 2025 and 2024 were as follows:

|              | December 31,    |                 |
|--------------|-----------------|-----------------|
|              | 2025            | 2024            |
| Citrus       | \$ 1,843        | \$ 1,818        |
| MEP          | 279             | 309             |
| White Cliffs | 177             | 196             |
| Explorer     | 65              | 66              |
| SESH         | 231             | 223             |
| Other        | 994             | 654             |
| Total        | <u>\$ 3,589</u> | <u>\$ 3,266</u> |

The following table presents equity in earnings (losses) of unconsolidated affiliates:

|   | Years Ended December 31, |               |               |
|---|--------------------------|---------------|---------------|
|   | 2025                     | 2024          | 2023          |
| Citrus  | \$ 153                   | \$ 136        | \$ 146        |
| MEP   | 74                       | 63            | 87            |
| White Cliffs  | 17                       | 19            | 10            |
| Explorer  | 26                       | 34            | 37            |
| SESH  | 57                       | 45            | 31            |
| Other   | 92                       | 82            | 72            |
| Total equity in earnings of unconsolidated affiliates | <u>\$ 419</u>            | <u>\$ 379</u> | <u>\$ 383</u> |

**Summarized Financial Information**

The following tables present aggregated selected balance sheet and income statement data for our unconsolidated affiliates, Citrus, MEP, White Cliffs, Explorer and SESH (on a 100% basis) for all periods presented:

|                                    | December 31,    |                 |
|------------------------------------|-----------------|-----------------|
|                                    | 2025            | 2024            |
| Current assets                     | \$ 462          | \$ 446          |
| Property, plant and equipment, net | 8,397           | 8,478           |
| Other assets                       | 109             | 105             |
| Total assets                       | <u>\$ 8,968</u> | <u>\$ 9,029</u> |
| Current liabilities                | \$ 365          | \$ 1,160        |
| Non-current liabilities            | 4,319           | 3,541           |
| Equity                             | 4,284           | 4,328           |
| Total liabilities and equity       | <u>\$ 8,968</u> | <u>\$ 9,029</u> |

|                  | Years Ended December 31, |          |          |
|------------------|--------------------------|----------|----------|
|                  | 2025                     | 2024     | 2023     |
| Revenue          | \$ 1,862                 | \$ 1,898 | \$ 1,914 |
| Operating income | 988                      | 1,009    | 1,079    |
| Net income       | 759                      | 750      | 786      |

In addition to the equity method investments described above, we have other equity method investments which are not significant to our consolidated financial statements.

#### 5. **NET INCOME PER COMMON UNIT:**

Basic net income per common unit is computed by dividing net income, after considering the General Partner's interest, by the weighted average number of limited partner interests outstanding. Diluted net income per common unit is computed by dividing net income (as adjusted as discussed herein), after considering the General Partner's interest, by the weighted average number of limited partner interests outstanding. For the diluted earnings per share computation, income allocable to the limited partners is reduced, where applicable, for the decrease in earnings from Energy Transfer's limited partner unit ownership in Sunoco LP and USAC that would have resulted assuming the incremental units related to Sunoco LP's and USAC's respective long-term incentive plans, as applicable, had been issued during the respective periods. Such units have been determined based on the treasury stock method.

A reconciliation of net income and weighted average units used in computing basic and diluted net income per unit is as follows:

|   | Years Ended December 31, |          |          |
|---|--------------------------|----------|----------|
|   | 2025                     | 2024     | 2023     |
| Net income  | \$ 5,708                 | \$ 6,565 | \$ 5,294 |
| Less: Net income attributable to redeemable noncontrolling interests                                | 67                       | 59       | 60       |
| Less: Net income attributable to noncontrolling interests   | 1,208                    | 1,692    | 1,299    |
| Net income, net of noncontrolling interests   | 4,433                    | 4,814    | 3,935    |
| Less: General Partner's interest in income  | 4                        | 4        | 3        |
| Less: Preferred Unitholders' interest in income   | 248                      | 362      | 463      |
| Less: Loss on redemption of preferred units   | 8                        | 54       | —        |
| Common Unitholders' interest in net income  | \$ 4,173                 | \$ 4,394 | \$ 3,469 |
| <b>Basic Income per Common Unit:</b>  |                          |          |          |
| Weighted average common units   | 3,432.9                  | 3,395.1  | 3,161.7  |
| Basic income per common unit  | \$ 1.22                  | \$ 1.29  | \$ 1.10  |
| <b>Diluted Income per Common Unit:</b>  |                          |          |          |
| Common Unitholders' interest in net income  | \$ 4,173                 | \$ 4,394 | \$ 3,469 |
| Dilutive effect of equity-based compensation of subsidiaries and distributions to convertible units | (1)                      | (1)      | (1)      |
| Diluted income available to Common Unitholders  | \$ 4,172                 | \$ 4,393 | \$ 3,468 |
| Weighted average common units   | 3,432.9                  | 3,395.1  | 3,161.7  |
| Dilutive effect of unvested unit awards   | 16.6                     | 25.4     | 15.5     |
| Weighted average common units, assuming dilutive effect of unvested unit awards                     | 3,449.5                  | 3,420.5  | 3,177.2  |
| Diluted income per common unit  | \$ 1.21                  | \$ 1.28  | \$ 1.09  |

## 6. DEBT OBLIGATIONS:

Our debt obligations consist of the following:

<sup>(1)</sup> These notes were redeemed in 2025.

<sup>(2)</sup> As of December 31, 2025, these obligations were classified as long-term as management had the intent and ability to refinance the borrowings on a long-term basis.

<sup>(3)</sup> These notes were redeemed in 2026.

<sup>(4)</sup> These senior notes, totaling \$3.65 billion as of December 31, 2025, were assumed by Sunoco LP in connection with the closing of the Parkland acquisition. For additional information, see “Sunoco LP Parkland Senior Note Exchange” below.

<sup>(5)</sup> These senior notes, totaling \$111 million as of December 31, 2025, represent the aggregate principal amounts not tendered in the private exchange offers and remain outstanding obligations of Parkland. For additional information, see “Sunoco LP Parkland Senior Note Exchange” below.

The following table reflects future maturities of long-term debt for each of the next five years and thereafter. These amounts exclude \$351 million in unamortized premiums, fair value adjustments and deferred debt issuance costs, net:

## Notes and Debentures

### Senior Notes

The Energy Transfer senior notes are the Partnership's senior obligations, ranking equally in right of payment with our other existing and future unsubordinated debt and senior to any of its future subordinated debt. The Energy Transfer senior notes are not guaranteed by any of its subsidiaries.

The covenants related to the Energy Transfer senior notes include a limitation on liens, a limitation on transactions with affiliates, a restriction on sale-leaseback transactions and limitations on mergers and sales of all or substantially all of the Partnership's assets.

### Energy Transfer Notes Issuances and Redemptions

In March 2025, the Partnership issued \$650 million aggregate principal amount of 5.20% senior notes due April 2030, \$1.25 billion aggregate principal amount of 5.70% senior notes due April 2035 and \$1.10 billion aggregate principal amount of 6.20% senior notes due April 2055. The Partnership used the net proceeds to refinance existing indebtedness, including to repay commercial paper and borrowings under its Five-Year Credit Facility (described below), and for general partnership purposes.

In March 2025, the Partnership redeemed its \$1.00 billion aggregate principal amount of 4.05% senior notes due March 2025 using cash on hand and commercial paper borrowings.

In May 2025, the Partnership redeemed its \$1.00 billion aggregate principal amount of 2.90% senior notes due May 2025 using cash on hand and commercial paper borrowings.

In August 2025, the Partnership issued \$1.20 billion aggregate principal amount of its Series 2025A junior subordinated notes due 2056 and \$800 million aggregate principal amount of its Series 2025B junior subordinated notes due 2056. The Partnership used the net proceeds to repay borrowings under its Five-Year Credit Facility and for general partnership purposes.

In September 2025, the Partnership redeemed its \$400 million aggregate principal amount of 5.95% senior notes due December 2025 using cash on hand and commercial paper borrowings.

In January 2026, the Partnership issued \$1.00 billion aggregate principal amount of 4.55% senior notes due 2031, \$1.00 billion aggregate principal amount of 5.35% senior notes due 2036 and \$1.00 billion aggregate principal amount of 6.30% senior notes due 2056. The Partnership used the net proceeds to refinance existing indebtedness, including to repay commercial paper and borrowings under its Five-Year Credit Facility.

In January 2026, the Partnership redeemed its \$1.00 billion aggregate principal amount of 4.75% senior notes due January 2026 using cash on hand and commercial paper borrowings.

In February 2026, the Partnership redeemed its \$600 million aggregate principal amount of 5.625% senior notes due May 2027 using cash on hand and commercial paper borrowings.

### Sunoco LP Senior Notes Issuances and Redemption

In March 2025, Sunoco LP issued \$1.00 billion aggregate principal amount of 6.25% senior notes due 2033 in a private offering. These notes will mature on July 1, 2033 and interest is payable semi-annually on January 1 and July 1 of each year. Sunoco LP used the net proceeds from the private offering to repay its \$600 million aggregate principal amount of

5.75% senior notes due 2025 and to repay a portion of the outstanding borrowings under Sunoco LP’s revolving credit facility.

In September 2025, Sunoco LP issued \$1.00 billion aggregate principal amount of 5.625% senior notes due 2031 and \$900 million aggregate principal amount of 5.875% senior notes due 2034 in a private offering. These notes will mature on March 15, 2031 and March 15, 2034, respectively, and interest is payable semi-annually on March 15 and September 15 of each year, commencing on March 15, 2026. Sunoco LP used the net proceeds from this private offering (i) on the closing date of the Parkland acquisition to fund a portion of the cash consideration for the Parkland acquisition and related transaction costs, with the remaining proceeds used for general corporate purposes, and (ii) prior to the closing date of the Parkland acquisition, to temporarily reduce the borrowings outstanding under its revolving credit facility and to pay interest and fees in connection therewith.

The 5.625% senior notes due 2031 and 5.875% senior notes due 2034 were originally subject to a special mandatory redemption requirement, which was eliminated upon closing of the Parkland acquisition.

***Sunoco LP Parkland Senior Note Exchange***

In October 2025, in connection with Sunoco LP’s Parkland acquisition, Sunoco LP commenced a private offering to exchange up to C\$1.60 billion Canadian dollar denominated notes issued by Parkland (collectively, the “PKI CAD Notes”) and up to \$2.60 billion U.S. dollar denominated notes issued by Parkland (collectively, the “PKI USD Notes”) for new notes issued by the Partnership. The exchange offer closed on November 7, 2025, with approximately C\$1.47 billion of the PKI CAD Notes and approximately \$2.58 billion of the PKI USD Notes being validly tendered and not validly withdrawn.

***USAC Senior Notes Issuance and Redemption***

In September 2025, USAC issued \$750 million aggregate principal amount of 6.250% senior notes due 2033. USAC used the net proceeds from this issuance, together with borrowings under USAC’s credit facility, to redeem its \$750 million aggregate principal amount of 6.875% senior notes due 2027 in October 2025.

***Sunoco LP GoZone Bonds***

Sunoco LP’s obligations also include revenue bonds issued by the Parish of St. James, Louisiana pursuant to the Gulf Opportunity Zone Act of 2005 (the “GoZone Bonds”).

As reflected in the table below, the holders of the Series 2008, Series 2010B and Series 2011 GoZone Bonds are required to tender their bonds at the applicable mandatory purchase date in exchange for 100% of the principal plus accrued and unpaid interest, after which these bonds are expected to be remarketed with a new interest rate established. Each of the Series 2010 and Series 2010A GoZone Bonds is subject to redemption on or after June 1, 2030 by the Parish of St. James, at our option, in whole or in part, at a redemption price of 100% of the principal amount to be redeemed plus accrued and unpaid interest. Interest on the GoZone Bonds is payable semi-annually on June 1 and December 1 of each year.

The following table summarizes the GoZone Bonds outstanding as of December 31, 2025:

| Series       | Date Issued       | Amount Outstanding | Interest Rate | Mandatory Purchase Date | Original Redemption Date | Maturity Date    |
|--------------|-------------------|--------------------|---------------|-------------------------|--------------------------|------------------|
| Series 2008  | June 26, 2008     | 56                 | 6.10 %        | June 1, 2030            | n/a                      | June 1, 2038     |
| Series 2010  | July 15, 2010     | 100                | 6.35 %        | n/a                     | June 1, 2030             | July 1, 2040     |
| Series 2010A | October 7, 2010   | 43                 | 6.35 %        | n/a                     | June 1, 2030             | October 1, 2040  |
| Series 2010B | December 29, 2010 | 48                 | 6.10 %        | June 1, 2030            | n/a                      | December 1, 2040 |
| Series 2011  | October 1, 2025   | 75                 | 3.70 %        | June 1, 2030            | n/a                      | August 1, 2041   |

During 2025, the Sunoco LP completed the remarketing of \$75 million principal amount of Series 2011 GoZone Bonds, which were previously repurchased on the mandatory purchase date of June 1, 2025 but were not remarketed at that time. The remarketed bonds were issued on October 1, 2025 and have a 3.70% interest rate, a mandatory purchase date of June 1, 2030, and a maturity of August 1, 2041.

Sunoco LP’s agreements with the Parish of St. James related to the GoZone Bonds contain: (i) customary restrictive covenants that limit the ability of Sunoco LP and its subsidiaries to, among other things, create liens, enter into certain sale leaseback transactions, and engage in certain consolidations, mergers or asset sales; and (ii) a repurchase provision which provides that if Sunoco LP undergoes a change of control that is followed by a ratings decline that occurs within 60 days of the change of control, then each holder may require the trustee, with funds provided by Sunoco LP, to repurchase all or a

portion of that holder's GoZone Bonds at a price equal to 101% of the aggregate principal amount repurchased, plus any accrued and unpaid interest.

## **Credit Facilities and Commercial Paper**

### ***Five-Year Credit Facility***

The Partnership's Five-Year Credit Facility allows for unsecured borrowings up to \$5.00 billion until April 11, 2027, and, following the Partnership's exercise of its option to extend the maturity date on December 18, 2024, up to \$4.84 billion until April 11, 2029. The Five-Year Credit Facility contains an accordion feature, under which the total aggregate commitment may be increased up to \$7.00 billion under certain conditions.

As of December 31, 2025, the Five-Year Credit Facility had \$2.86 billion of outstanding borrowings, of which \$2.57 billion consisted of commercial paper. The amount available for future borrowings was \$2.12 billion, after accounting for outstanding letters of credit in the amount of \$21 million. The weighted average interest rate on the total amount outstanding as of December 31, 2025 was 4.00%.

### ***Sunoco LP Credit Facility***

Sunoco LP maintains a \$2.50 billion revolving credit facility, which matures on June 17, 2030 (the "Sunoco LP Credit Facility"), which date may be extended in accordance with the terms of Sunoco LP's revolving credit facility. Sunoco LP's revolving credit facility can be increased from time to time upon Sunoco LP's written request, subject to certain conditions, up to an aggregate amount of \$3.50 billion. As of December 31, 2025, the Sunoco LP Credit Facility had no outstanding borrowings and \$26 million in standby letters of credit. The amount available for future borrowings was \$2.47 billion at December 31, 2025. The weighted average interest rate on the total amount outstanding as of December 31, 2025 was 6.38%.

### ***Sunoco LP Receivables Financing Agreement***

Upon the closing of the NuStar acquisition, the commitments under NuStar's receivables financing agreement were reduced to zero during a suspension period, for which the period end has not been determined. As of December 31, 2025, this facility had no outstanding borrowings.

### ***Sunoco LP Lease-Related Financing Obligations***

Southside Oil, LLC, a subsidiary of Sunoco LP, is a party to a sale leaseback transaction that did not meet the criteria for sale leaseback accounting. This transaction was accounted for as a financing arrangement over the course of the lease agreement. The obligations mature in varying dates through 2058, require monthly interest and principal payments, and bear interest at 11.865%. As of December 31, 2025 and 2024, the balance of the sale leaseback financing obligation were \$145 million and \$85 million, respectively.

Lease-related financing obligations also include finance lease obligations of \$87 million and \$47 million as of December 31, 2025 and 2024, respectively.

### ***USAC Credit Facility***

USAC maintains a \$1.75 billion revolving credit facility (the "USAC Credit Facility") which matures on August 27, 2030, except that if more than \$50 million principal amount of USAC's existing 7.125% senior notes due 2029 are outstanding on December 14, 2028, its credit facility will mature on December 14, 2028. As of December 31, 2025, USAC had \$795 million of outstanding borrowings and \$1 million in outstanding letters of credit under the credit agreement. As of December 31, 2025, USAC had \$954 million of remaining unused availability, all of which was available to be drawn. The weighted average interest rate on the total amount outstanding as of December 31, 2025 was 5.74%.

## **Covenants Related to Our Credit Agreements**

The agreements relating to the senior notes contain restrictive covenants customary for an issuer with an investment-grade rating from the rating agencies, which covenants include limitations on liens and a restriction on sale-leaseback transactions.

The Five-Year Credit Facility contains covenants that limit (subject to certain exceptions) the Partnership's and certain of the Partnership's subsidiaries' ability to, among other things:

- incur indebtedness;

- grant liens;
- enter into mergers;
- dispose of assets;
- make certain investments;
- make Distributions (as defined in the Five-Year Credit Facility) during certain Defaults (as defined in the Five-Year Credit Facility) and during any Event of Default (as defined in the Five-Year Credit Facility);
- engage in business substantially different in nature than the business currently conducted by the Partnership and its subsidiaries;
- engage in transactions with affiliates; and
- enter into restrictive agreements.

The applicable margin and rate used in connection with the interest rates and commitment fees, respectively, are based on the credit ratings assigned to our senior, unsecured, non-credit enhanced long-term debt. The applicable margin for eurodollar rate loans under the Five-Year Credit Facility ranges from 1.125% to 2.000% and the applicable margin for base rate loans ranges from 0.125% to 1.000%. The applicable rate for commitment fees under the Five-Year Credit Facility ranges from 0.125% to 0.300%.

The Five-Year Credit Facility contains various covenants including limitations on the creation of indebtedness and liens and related to the operation and conduct of our business. The Five-Year Credit Facility also limits us, on a rolling four quarter basis, to a maximum Consolidated Funded Indebtedness to Consolidated EBITDA ratio, as defined in the underlying credit agreement, of 5.00 to 1.00, which can generally be increased to 5.50 to 1.00 during a Specified Acquisition Period. Our Leverage Ratio was 3.21 to 1.00 at December 31, 2025, as calculated in accordance with the credit agreement.

Failure to comply with the various restrictive and affirmative covenants of our revolving credit facilities could require us to pay debt balances prior to scheduled maturity and could negatively impact the Partnership's or our subsidiaries' ability to incur additional debt and/or our ability to pay distributions to Unitholders.

#### ***Covenants Related to Transwestern***

The agreements relating to the Transwestern senior notes contain certain restrictions that, among other things, limit the incurrence of additional debt, the sale of assets and the payment of dividends and specify a maximum debt to capitalization ratio.

#### ***Covenants Related to Sunoco LP***

The Sunoco LP Credit Facility contains various customary representations, warranties, covenants and events of default, including a change of control event of default, as defined therein. Sunoco LP's Credit Facility requires Sunoco LP to maintain a specified net leverage ratio and interest coverage ratio.

#### ***Covenants Related to USAC***

The USAC Credit Facility contains covenants that limit (subject to certain exceptions) USAC's ability to, among other things:

- grant liens;
- make certain loans or investments;
- incur additional indebtedness or guarantee other indebtedness;
- enter into transactions with affiliates;
- merge or consolidate;
- sell our assets; and
- make certain acquisitions.

The USAC Credit Facility is also subject to the following financial covenants, including covenants requiring USAC to maintain:

- a minimum EBITDA to interest coverage ratio;
- a ratio of total secured indebtedness to EBITDA within a specified range; and
- a maximum funded debt to EBITDA ratio.

**Compliance with our Covenants**

Failure to comply with the various restrictive and affirmative covenants of our revolving credit facilities and note agreements could require us or our subsidiaries to pay debt balances prior to scheduled maturity and could negatively impact the subsidiaries ability to incur additional debt and/or our ability to pay distributions.

We and our subsidiaries were in compliance with all requirements, tests, limitations, and covenants related to our debt agreements as of December 31, 2025.

**7. REDEEMABLE NONCONTROLLING INTERESTS:**

Certain redeemable noncontrolling interests in the Partnership’s subsidiaries are reflected as mezzanine equity on the consolidated balance sheets.

Redeemable noncontrolling interests consisted of the following:

|   | December 31,<br>2025 | December 31,<br>2024 |
|---|----------------------|----------------------|
| USAC Series A preferred units             | \$ —                 | \$ 169               |
| Crestwood Niobrara LLC preferred units    | 225                  | 225                  |
| Other <sup>(1)</sup>                      | 25                   | 23                   |
| Total redeemable noncontrolling interests | <u>\$ 250</u>        | <u>\$ 417</u>        |

<sup>(1)</sup> Relates to noncontrolling interest holders in one of the Partnership’s consolidated subsidiaries that have the option to sell their interests to the Partnership.

**USAC Series A Preferred Units**

On June 3, 2025, the holders of USAC preferred units elected to convert 100,000 preferred units into 4,997,126 common units. On December 2, 2025, the holders of USAC preferred units elected to convert the remaining 80,000 preferred units into 3,997,700 common units. As of December 31, 2025, all of USAC preferred units had been converted to common units.

**Niobrara Preferred Units**

Crestwood Niobrara LLC (“Crestwood Niobrara”), a subsidiary acquired in the Crestwood acquisition in November 2023, has outstanding two series of preferred units (collectively, the “Niobrara Preferred Units”) held by a third-party. The Niobrara Preferred Units are redeemable by the Partnership or the preferred interest holder and are also convertible by the preferred interest holder into Crestwood Niobrara common units. The preferred interest holder also has the option to contribute additional capital to Crestwood Niobrara to increase their common ownership percentage in Crestwood Niobrara to 50% upon the conversion.

On February 23, 2024, the Partnership paid approximately \$37 million in cash to redeem a portion of the outstanding Crestwood Niobrara LLC preferred units.

**8. EQUITY:**

**Limited Partners**

Limited partner interests in the Partnership are represented by Common Units that entitle the holders thereof to the rights and privileges specified in the Partnership Agreement. The Partnership’s Common Units are registered under the Securities Exchange Act of 1934 (as amended) and are listed for trading on the NYSE. Each holder of a Common Unit is entitled to one vote per unit on all matters presented to the Limited Partners for a vote. In addition, if at any time any person or group (other than the Partnership’s General Partner and its affiliates) owns beneficially 20% or more of all Common Units, any Common Units owned by that person or group may not be voted on any matter and are not considered to be outstanding

when sending notices of a meeting of Unitholders (unless otherwise required by law), calculating required votes, determining the presence of a quorum or for other similar purposes under the Partnership Agreement. The Common Units are entitled to distributions of Available Cash as described at “Quarterly Distributions of Available Cash.”

Our Partnership Agreement contains specific provisions for the allocation of net earnings and losses to the partners for purposes of maintaining the partner capital accounts. For any fiscal year that the Partnership has net profits, such net profits are first allocated to the General Partner (which currently holds an approximately 0.1% general partner interest) until the aggregate amount of net profits for the current and all prior fiscal years equals the aggregate amount of net losses allocated to the General Partner for the current and all prior fiscal years. Second, such net profits shall be allocated to the Limited Partners pro rata in accordance with their respective sharing ratios. For any fiscal year in which the Partnership has net losses, such net losses shall be first allocated to the Limited Partners in proportion to their respective adjusted capital account balances, as defined by the Partnership Agreement, (before taking into account such net losses) until their adjusted capital account balances have been reduced to zero. Second, all remaining net losses shall be allocated to the General Partner. The General Partner may distribute to the Limited Partners funds of the Partnership that the General Partner reasonably determines are not needed for the payment of existing or foreseeable Partnership obligations and expenditures.

### **Common Units**

The changes in Energy Transfer Common Units during the years ended December 31, 2025, 2024 and 2023 were as follows:

|  | Years Ended December 31, |         |         |
|--|--------------------------|---------|---------|
|  | 2025                     | 2024    | 2023    |
| Number of Common Units, beginning of period                    | 3,431.0                  | 3,367.5 | 3,094.4 |
| Common Units issued in mergers and acquisitions <sup>(1)</sup> | —                        | 50.8    | 260.2   |
| Issuance of Common Units <sup>(2)</sup>                        | 9.0                      | 12.7    | 12.9    |
| Number of Common Units, end of period                          | 3,440.0                  | 3,431.0 | 3,367.5 |

<sup>(1)</sup> Includes common units issued related to our acquisitions of WTG Midstream in 2024 and of Crestwood and Lotus Midstream in 2023.

<sup>(2)</sup> Includes common units issued in connection with the distribution reinvestment program and restricted unit vestings.

### **Energy Transfer Class A Units**

As of December 31, 2025, the Partnership had outstanding 851,420,597 Class A units (“Energy Transfer Class A Units”) representing limited partner interests in the Partnership to the General Partner. The Energy Transfer Class A Units are entitled to vote together with the Partnership’s common units, as a single class, except as required by law. Additionally, Energy Transfer’s Partnership Agreement provides that, under certain circumstances, upon the issuance by the Partnership of additional common units or any securities that have voting rights that are pari passu with the Partnership common units, the Partnership will issue to any holder of Energy Transfer Class A Units additional Energy Transfer Class A Units such that the holder maintains a voting interest in the Partnership that is identical to its voting interest in the Partnership prior to such issuance. The Energy Transfer Class A Units are not entitled to distributions and otherwise have no economic attributes.

### **Energy Transfer Repurchase Program**

In February 2015, the Partnership announced a common unit repurchase program, whereby the Partnership may repurchase up to \$2 billion of Energy Transfer Common Units in the open market at the Partnership’s discretion, subject to market conditions and other factors, and in accordance with applicable regulatory requirements. The Partnership did not repurchase any Energy Transfer Common Units under this program in 2025 or 2024. As of December 31, 2025, \$880 million remained available to repurchase under the current program.

### **Energy Transfer Distribution Reinvestment Program**

During the year ended December 31, 2025, distributions of \$45 million were reinvested under the distribution reinvestment program. As of December 31, 2025, a total of 36.4 million Energy Transfer common units remained available to be issued under currently effective registration statements in connection with the distribution reinvestment program.

### Energy Transfer Preferred Units

As of December 31, 2025, Energy Transfer's outstanding preferred units included 550,000 Series B Preferred Units, 1,484,780 Series G Preferred Units, 900,000 Series H Preferred Units and 41,464,179 Series I Preferred Units. As of December 31, 2024, Energy Transfer's outstanding preferred units also included 500,000 Series F Preferred Units, which were redeemed in May 2025. Energy Transfer's Series A Preferred Units, Series C Preferred Units, Series D Preferred Units and Series E Preferred Units were previously redeemed as indicated in the tables below.

The following table summarizes changes in the Energy Transfer Preferred Units:

|                                       | Preferred Unitholders |          |          |          |          |          |          |          |          | Total    |
|---------------------------------------|-----------------------|----------|----------|----------|----------|----------|----------|----------|----------|----------|
|                                       | Series A              | Series B | Series C | Series D | Series E | Series F | Series G | Series H | Series I |          |
| Balance, December 31, 2022            | \$ 958                | \$ 556   | \$ 440   | \$ 434   | \$ 786   | \$ 496   | \$ 1,488 | \$ 893   | \$ —     | \$ 6,051 |
| Distributions to partners             | (96)                  | (36)     | (40)     | (36)     | (61)     | (34)     | (106)    | (59)     | —        | (468)    |
| Units issued in Crestwood acquisition | —                     | —        | —        | —        | —        | —        | —        | —        | 413      | 413      |
| Net income                            | 86                    | 36       | 38       | 37       | 61       | 34       | 106      | 59       | 6        | 463      |
| Balance, December 31, 2023            | 948                   | 556      | 438      | 435      | 786      | 496      | 1,488    | 893      | 419      | 6,459    |
| Distributions to partners             | (56)                  | (36)     | (11)     | (11)     | (30)     | (34)     | (106)    | (59)     | (35)     | (378)    |
| Redemption of Preferred Units         | (950)                 | —        | (450)    | (445)    | (800)    | —        | —        | —        | —        | (2,645)  |
| Other, net                            | 13                    | —        | 11       | 10       | 20       | —        | —        | —        | —        | 54       |

| Balance, December 31, 2024            | —                     | 556      | —        | —        | —        | 496      | 1,488    | 893      | 419      | 3,852    |
| Distributions to partners             | —                     | (36)     | —        | —        | —        | (16)     | (106)    | (59)     | (35)     | (252)    |
| Redemption of Preferred Units         | —                     | —        | —        | —        | —        | (500)    | —        | —        | —        | (500)    |
| Other, net                            | —                     | —        | —        | —        | —        | 8        | —        | —        | —        | 8        |
| Net Income                            | —                     | 36       | —        | —        | —        | 12       | 106      | 59       | 35       | 248      |
| Balance, December 31, 2025            | \$ —                  | \$ 556   | \$ —     | \$ —     | \$ —     | \$ —     | \$ 1,488 | \$ 893   | \$ 419   | \$ 3,356 |

The following is a description of the distribution requirements for each currently outstanding series of preferred units.

#### Series B Preferred Units

Distributions on the Series B Preferred Units will accrue and be cumulative from and including the date of original issue to, but excluding, February 15, 2028, at a rate of 6.625% per annum of the stated liquidation preference of \$1,000. On and after February 15, 2028, distributions on the Series B Preferred Units will accumulate at a percentage of the \$1,000 liquidation preference equal to an annual floating rate based on the three-month SOFR, plus a tenor spread adjustment of 0.26161%, plus a spread of 4.155% per annum. The Series B Preferred Units are redeemable at Energy Transfer's option on or after February 15, 2028 at a redemption price of \$1,000 per Series B Preferred Unit, plus an amount equal to all accumulated and unpaid distributions thereon to, but excluding, the date of redemption.

#### Series G Preferred Units

Distributions on the Series G Preferred Units are cumulative from and including the original issue date and will be payable semi-annually in arrears on the 15th day of May and November of each year, commencing on May 15, 2020 to, but excluding, May 15, 2030, at a rate equal to 7.125% per annum of the \$1,000 liquidation preference. On and after May 15, 2030, the distribution rate on the Series G Preferred Units will equal a percentage of the \$1,000 liquidation preference equal to the five-year U.S. treasury rate plus a spread of 5.306% per annum. The Series G Preferred Units are redeemable at Energy Transfer's option on or after May 15, 2030 at a redemption price of \$1,000 per Series G Preferred Unit, plus an amount equal to all accumulated and unpaid distributions thereon to, but excluding, the date of redemption.

### ***Series H Preferred Units***

Distributions on the Series H Preferred Units will accrue and be cumulative to, but excluding, November 15, 2026, at a rate equal to 6.500% per annum of the \$1,000 liquidation preference. On and after November 15, 2026 and each fifth anniversary thereafter, the distribution rate on the Series H Preferred Units will reset to be a percentage of the \$1,000 liquidation preference equal to the five-year U.S. treasury rate plus a spread of 5.694% per annum. Distributions on the Series H Preferred Units will be payable semi-annually in arrears on the 15th day of May and November of each year. The Series H Preferred Units are redeemable at Energy Transfer's option during the three-month period prior to, and including, each distribution reset date at a redemption price of \$1,000 per Series H Preferred Unit, plus an amount equal to all accumulated and unpaid distributions thereon to, but excluding, the date of redemption.

### ***Series I Preferred Units***

On November 3, 2023, Energy Transfer, in connection with its acquisition of Crestwood, issued 41,464,179 of its Series I Preferred Units in exchange for a commensurate number of Crestwood preferred units. Subject to certain conditions, the holders of the Series I Preferred Units will have the right to convert preferred units into (i) common units on a 10-for-2.07 basis, or (ii) a number of common units determined pursuant to a conversion ratio set forth in the Partnership Agreement upon the occurrence of certain events, such as a change in control. The Series I Preferred Units, on an as converted basis, have voting rights that are identical to the voting rights of the common units and will vote with the common units as a single class, except that the preferred units are entitled to vote as a separate class on any matter on which all unitholders are entitled to vote that adversely affects the rights, powers, privileges or preferences of the preferred units in relation to Energy Transfer's other securities outstanding.

The holders of the Series I Preferred Units are entitled to receive fixed quarterly distributions of \$0.2111 per unit. Distributions on the preferred units are paid in cash unless, subject to certain exceptions, (i) there is no distribution being paid on our common units; and (ii) our available cash (as defined in our Partnership Agreement) is insufficient to make a cash distribution to Series I Preferred Unitholders.

### **Sale of Common Units by Subsidiaries**

Energy Transfer on a stand-alone basis (the "Parent Company") accounts for the difference between the carrying amount of its investment in subsidiaries and the underlying book value arising from issuance of units by subsidiaries (excluding unit issuances to the Parent Company) as a capital transaction. If a subsidiary issues units at a price less than the Parent Company's carrying value per unit, the Parent Company assesses whether the investment has been impaired, in which case a provision would be reflected in our statement of operations. The Parent Company did not recognize any impairment related to the issuances of subsidiary common units during the periods presented.

### **Subsidiary Equity Transactions**

#### ***Sunoco LP's Class D Units***

In connection with the closing of the Parkland Acquisition, Sunoco LP issued 51,517,198 Class D Units to SunocoCorp.

Class D Units (i) except as required by law and in addition to the voting rights established in Sunoco LP's partnership agreement, are entitled to vote; (ii) shall represent limited partner interests and common unit interests in the Sunoco LP and shall be economically equivalent to other Sunoco LP common units and no distribution may be made in respect of the Sunoco LP's common units unless an equal distribution is simultaneously made on the Class D Units; and (iii) provide dividend equalization rights for the period beginning on October 31, 2025 and ended December 31, 2027 (the "Equalization Period"), Sunoco LP shall ensure that SunocoCorp shall have cash necessary and sufficient to pay distributions on each SunocoCorp common unit for each quarter during the Equalization Period in an amount equal to 100% of the distributions paid by the Sunoco LP on each Sunoco LP common unit during such quarter.

#### ***Sunoco LP's Series A Preferred Units***

In September 2025, Sunoco LP closed a private offering of 1.5 million of its 7.875% Series A Fixed-Rate Reset Cumulative Redeemable Perpetual Preferred Units (the "Sunoco LP Series A Preferred Units") at an offering price of \$1,000 per unit. Sunoco LP received net proceeds of approximately \$1.47 billion from the sale of the Sunoco LP Series A Preferred Units after deducting the initial purchasers' discount and other estimated offering expenses. Sunoco LP used the net proceeds from this private offering (i) on the closing date of the Parkland Acquisition to fund a portion of the cash consideration for the Parkland Acquisition, and (ii) prior to the closing date of the Parkland Acquisition, to temporarily reduce the borrowings outstanding under Sunoco LP's credit facility and to pay interest and fees in connection therewith.

Distributions on the Sunoco LP Series A Preferred Units are cumulative from the date of original issuance and will be payable semi-annually in arrears commencing on March 18, 2026, when, as, and if declared by Sunoco LP's general partner out of legally available funds for such purpose. An initial distribution on the Sunoco LP Series A Preferred Units will be paid on March 18, 2026 in an amount equal to approximately \$39.38 per Sunoco LP Series A Preferred Unit.

#### ***USAC's Distribution Reinvestment Program***

During the years ended December 31, 2025, 2024 and 2023, USAC issued 7,832, 65,352 and 87,808 USAC common units, respectively, under the USAC distribution reinvestment program.

#### **Energy Transfer Common Unit Distributions**

Our distribution policy is consistent with the terms of our Partnership Agreement, which requires that we distribute all of our available cash quarterly.

Our distributions declared and paid with respect to our common units were as follows:

| <u>Quarter Ended</u> | <u>Record Date</u> | <u>Payment Date</u> | <u>Rate</u> |
|----------------------|--------------------|---------------------|-------------|
| December 31, 2022    | February 7, 2023   | February 21, 2023   | \$ 0.3050   |
| March 31, 2023       | May 8, 2023        | May 22, 2023        | 0.3075      |
| June 30, 2023        | August 14, 2023    | August 21, 2023     | 0.3100      |
| September 30, 2023   | October 30, 2023   | November 20, 2023   | 0.3125      |
| December 31, 2023    | February 7, 2024   | February 20, 2024   | 0.3150      |
| March 31, 2024       | May 13, 2024       | May 20, 2024        | 0.3175      |
| June 30, 2024        | August 9, 2024     | August 19, 2024     | 0.3200      |
| September 30, 2024   | November 8, 2024   | November 19, 2024   | 0.3225      |
| December 31, 2024    | February 7, 2025   | February 19, 2025   | 0.3250      |

| December 31, 2025  | February 1, 2026   | February 15, 2026   | —        | 33.125                  | —         | —         | —         | —        | —                       | —                       | 0.2111                  |

(1) The record date and payment date shown above apply to all Energy Transfer Preferred Units, except for the Series I Preferred Units. For the period ended December 31, 2025, the cash distribution for the Series I Preferred Units was paid on February 17, 2026 to unitholders of record as of the close of business on February 4, 2026. For the period ended September 30, 2025, the cash distribution for the Series I Preferred Units were paid on November 14, 2025 to unitholders of record as of the close of business on November 4, 2025. For the period ended June 30, 2025, the cash distribution for the Series I Preferred Units was paid on August 14, 2025 to unitholders of record as of the close of business on August 4, 2025. For the period ended March 31, 2025, the cash distribution for the Series I Preferred Units was paid on May 15, 2025 to unitholders of record as of the close of business on May 2, 2025. For the period ended December 31, 2024, the cash distribution for the Series I Preferred Units was paid on February 14, 2025 to unitholders of record as of the close of business on February 4, 2025. For the period ended September 30, 2024, the cash distribution for the Series I Preferred Units was paid on November 14, 2024 to unitholders of record as of the close of business on November 4, 2024. For the period ended June 30, 2024, the cash distribution for the Series I Preferred Units was paid on August 14, 2024 to unitholders of record as of the close of business on August 2, 2024.

(2) Series B, Series G and Series H distributions are currently paid on a semi-annual basis. Distributions on the Series B Preferred Units will begin to be paid quarterly on February 15, 2028.

## SunocoCorp Cash Distributions

SunocoCorp’s company agreement sets forth its policy for paying regular quarterly cash distributions. For the quarter ended December 31, 2025, SunocoCorp declared a cash distribution of \$0.9317 to be paid on February 19, 2026 to unitholders of record as of February 6, 2026.

## Sunoco LP Cash Distributions

Energy Transfer owns approximately 28.5 million Sunoco LP common units and all of Sunoco LP’s IDRs. As of December 31, 2025, Sunoco LP had approximately 136.9 million common units outstanding and 51,517,198 Class D Units outstanding.

The following table illustrates the percentage allocations of available cash from operating surplus between Sunoco LP’s common unitholders and the holder of its IDRs based on the specified target distribution levels, after the payment of distributions to Class C unitholders. The amounts set forth under “marginal percentage interest in distributions” are the

percentage interests of the IDR holder and the common unitholders in any available cash from operating surplus which Sunoco LP distributes up to and including the corresponding amount in the column “total quarterly distribution per unit target amount.” The percentage interests shown for common unitholders and IDR holder for the minimum quarterly distribution are also applicable to quarterly distribution amounts that are less than the minimum quarterly distribution.

|                                | Total Quarterly Distribution Target Amount | Marginal Percentage Interest in Distributions |                |
|--------------------------------|--|---|----------------|
|                                |  | Common Unitholders                            | Holder of IDRs |
| Minimum Quarterly Distribution | \$0.4375                                   | 100%  | —%             |
| First Target Distribution      | \$0.4375 to \$0.503125                     | 100%  | —%             |
| Second Target Distribution     | \$0.503125 to \$0.546875                   | 85%   | 15%            |
| Third Target Distribution      | \$0.546875 to \$0.656250                   | 75%   | 25%            |
| Thereafter                     | Above \$0.656250                           | 50%   | 50%            |

Distributions on Sunoco LP’s common units and Class D Units declared and/or paid by Sunoco LP were as follows:

| Quarter Ended      | Payment Date      | Per Common Unit Rate | Per Class D Unit Rate |
|--------------------|-------------------|----------------------|-----------------------|
| December 31, 2022  | February 21, 2023 | \$ 0.8255            | \$ —                  |
| March 31, 2023     | May 22, 2023      | 0.8420               | —                     |
| June 30, 2023      | August 21, 2023   | 0.8420               | —                     |
| September 30, 2023 | November 20, 2023 | 0.8420               | —                     |
| December 31, 2023  | February 20, 2024 | 0.8420               | —                     |
| March 31, 2024     | May 20, 2024      | 0.8756               | —                     |
| June 30, 2024      | August 19, 2024   | 0.8756               | —                     |
| September 30, 2024 | November 19, 2024 | 0.8756               | —                     |
| December 31, 2024  | February 19, 2025 | 0.8865               | —                     |
| March 31, 2025     | May 20, 2025      | 0.8976               | —                     |
| June 30, 2025      | August 19, 2025   | 0.9088               | —                     |
| September 30, 2025 | November 19, 2025 | 0.9202               | —                     |
| December 31, 2025  | February 19, 2026 | 0.9317               | 0.9317                |

#### USAC Cash Distributions

Energy Transfer owns approximately 46.1 million USAC common units. As of December 31, 2025, USAC had approximately 127 million common units outstanding. USAC currently has a non-economic general partner interest and no outstanding IDRs.

Distributions on USAC's units declared and/or paid by USAC were as follows:

| Quarter Ended      | Payment Date     | Rate      |
|--------------------|------------------|-----------|
| December 31, 2022  | February 3, 2023 | \$ 0.5250 |
| March 31, 2023     | May 5, 2023      | 0.5250    |
| June 30, 2023      | August 4, 2023   | 0.5250    |
| September 30, 2023 | November 3, 2023 | 0.5250    |
| December 31, 2023  | February 2, 2024 | 0.5250    |
| March 31, 2024     | May 3, 2024      | 0.5250    |
| June 30, 2024      | August 2, 2024   | 0.5250    |
| September 30, 2024 | November 1, 2024 | 0.5250    |
| December 31, 2024  | February 7, 2025 | 0.5250    |
| March 31, 2025     | May 9, 2025      | 0.5250    |
| June 30, 2025      | August 8, 2025   | 0.5250    |
| September 30, 2025 | November 7, 2025 | 0.5250    |
| December 31, 2025  | February 6, 2026 | 0.5250    |

### Accumulated Other Comprehensive Income

The following table presents the components of AOCI, net of tax:

|  | December 31, |       |
|--|--------------|-------|
|  | 2025         | 2024  |
| Available-for-sale securities  | \$ 30        | \$ 20 |
| Foreign currency translation adjustment                              | (12)         | (6)   |
| Actuarial gain related to pensions and other postretirement benefits | 54           | 45    |
| Investments in unconsolidated affiliates, net                        | 10           | 14    |
| Total AOCI, net of tax   | \$ 82        | \$ 73 |

The following table sets forth the tax amounts included in the respective components of other comprehensive income:

|   | December 31, |        |
|---|--------------|--------|
|   | 2025         | 2024   |
| Available-for-sale securities           | \$ (3)       | \$ (3) |
| Foreign currency translation adjustment | 2            | 2      |
| Total                                   | \$ (1)       | \$ (1) |

## 9. EQUITY INCENTIVE PLANS:

We, Sunoco LP and USAC, have issued equity incentive plans for employees, officers and directors, which provide for various types of awards, including options to purchase Common Units, restricted units, phantom units, distribution equivalent rights ("DERs"), common unit appreciation rights, cash restricted units and other equity-based compensation awards. As of December 31, 2025, an aggregate total of 33.1 million Energy Transfer Common Units remain available to be awarded under our equity incentive plans.

### Energy Transfer Long-Term Incentive Plan

We have granted restricted unit awards to employees that vest over a specified time period, typically a five-year service vesting requirement, with vesting based on continued employment as of each applicable vesting date. Upon vesting, Energy Transfer Common Units are issued. These unit awards entitle the recipients of the unit awards to receive, with respect to each Common Unit subject to such award that has not either vested or been forfeited, a cash payment equal to each cash distribution per Common Unit made by us on our Common Units promptly following each such distribution by us to our Unitholders. We refer to these rights as "distribution equivalent rights." Under our equity incentive plans, our non-employee directors each receive grants with a five-year service vesting requirement.

The following table shows the activity of the awards granted to employees and non-employee directors:

|   | Number of Units | Weighted Average Grant-Date Fair Value Per Unit |
|---|-----------------|---|
| Unvested awards as of December 31, 2024 | 36.1            | \$ 13.18  |
| Awards granted                          | 9.4             | 16.85   |
| Awards vested                           | (9.5)           | 10.20   |
| Awards forfeited                        | (0.8)           | 13.70   |
| Unvested awards as of December 31, 2025 | <u>35.2</u>     | <u>\$ 14.98</u>                                 |

During the years ended December 31, 2025, 2024, and 2023, the weighted average grant-date fair value per unit award granted was \$16.85, \$18.95 and \$13.78, respectively, and the total fair value of awards vested was \$161 million, \$194 million and \$106 million, respectively, based on the market price of the respective Common Units as of the vesting date. As of December 31, 2025, a total of 35.2 million unit awards remain unvested, for which Energy Transfer expects to recognize a total of \$332 million in compensation expense over a weighted average period of 2.9 years.

*Cash Restricted Units.* The Partnership has also granted cash restricted units, which vest through 3 years of service. A cash restricted unit entitles the award recipient to receive cash equal to the market value of one Energy Transfer Common Unit upon vesting. For the years ended December 31, 2025, 2024 and 2023, the Partnership granted a total of 3.1 million, 2.8 million and 3.2 million cash restricted units, respectively. As of December 31, 2025, a total of 5.9 million cash restricted units were unvested. As of December 31, 2025, the Partnership's consolidated balance sheet reflected aggregate liabilities of \$3.8 million related to cash restricted units.

### Subsidiary Long-Term Incentive Plans

Each of SunocoCorp, Sunoco LP and USAC has granted restricted or phantom unit awards (collectively, the "Subsidiary Unit Awards") to employees and directors that entitle the grantees to receive common units of the respective subsidiary. In some cases, at the discretion of the respective subsidiary's compensation committee, the grantee may instead receive an amount of cash equivalent to the value of common units upon vesting. Substantially all of the Subsidiary Unit Awards are time-vested grants, which generally vest over a three or five-year period, that entitles the grantees of the unit awards to receive an amount of cash equal to the per unit cash distributions made by the respective subsidiaries during the period the restricted unit is outstanding.

The following table summarizes the activity of the Subsidiary Unit Awards:

|   | SunocoCorp      |   | Sunoco LP        |   | USAC                    |   |                            |  |
|---|-----------------|---|------------------|---|-------------------------|---|----------------------------|--|
|   | Number of Units | Weighted Average Grant-Date Fair Value Per Unit | Number of Units  | Weighted Average Grant-Date Fair Value Per Unit | Number of Phantom Units | Weighted Average Grant-Date Fair Value Per Phantom Unit | Number of Restricted Units | Weighted Average Grant-Date Fair Value Per Restricted Unit |
| Unvested awards as of December 31, 2024 | —               | \$ —  | 1,542,700        | \$ 46.83  | 1,320,316               | \$ 18.59  | 323,390                    | 22.25  |
| Awards granted                          | 183,813         | 51.24   | 730,078          | 54.79   | —                       | —   | 392,422                    | 24.26  |
| Awards vested                           | —               | —   | (442,386)        | 36.60   | (797,412)               | 17.03   | —                          | —  |

| Unvested awards as of December 31, 2025 | <u>183,813</u>  | <u>\$ 51.24</u>                                 | <u>1,771,372</u> | <u>\$ 52.49</u>                                 | <u>302,334</u>          | <u>\$ 20.16</u>   | <u>646,382</u>             | <u>23.84</u>   |

The total fair value of Subsidiary Unit Awards vested for the years ended December 31, 2025, 2024 and 2023 was \$29 million, \$29 million and \$37 million, respectively, based on the market price of SunocoCorp, Sunoco LP and USAC common units as of the vesting date. As of December 31, 2025, estimated compensation cost related to Subsidiary Unit

Awards not yet recognized was \$93 million, and the weighted average period over which this cost is expected to be recognized in expense is 3.2 years.

As of December 31, 2025, SunocoCorp, Sunoco LP and USAC also had outstanding grants of cash restricted units totaling 61,171 units, 303,179 units and 172,405 units, respectively, for which an aggregate liability of \$0.1 million is included on the Partnership's consolidated balance sheet.

#### 10. INCOME TAXES:

As a partnership, we are not subject to United States federal income tax and most state income taxes. However, the Partnership conducts certain activities through corporate subsidiaries which are subject to federal and state income taxes.

The Partnership's income (loss) before income tax expense by geographic area is shown in the table below:

|               | Years Ended December 31, |          |          |
|---------------|--------------------------|----------|----------|
|               | 2025                     | 2024     | 2023     |
| United States | \$ 5,869                 | \$ 7,101 | \$ 5,602 |
| Foreign       | 189                      | 5        | (5)      |
| Total         | \$ 6,058                 | \$ 7,106 | \$ 5,597 |

The components of the federal and state income tax expense (benefit) of our taxable subsidiaries are summarized as follows:

|                             | Years Ended December 31, |        |        |
|-----------------------------|--------------------------|--------|--------|
|                             | 2025                     | 2024   | 2023   |
| Current expense:            |                          |        |        |
| Federal                     | \$ 164                   | \$ 198 | \$ 56  |
| State                       | 1                        | 66     | 44     |
| Foreign                     | 7                        | 1      | —      |
| Total                       | 172                      | 265    | 100    |
| Deferred expense (benefit): |                          |        |        |
| Federal                     | 177                      | 175    | 227    |
| State                       | (23)                     | 101    | (24)   |
| Foreign                     | 24                       | —      | —      |
| Total                       | 178                      | 276    | 203    |
| Total income tax expense    | \$ 350                   | \$ 541 | \$ 303 |

Historically, our effective tax rate has differed from the statutory rate primarily due to partnership earnings that are not subject to United States federal and most state income taxes at the partnership level. A reconciliation of income tax expense

at the United States statutory rate to the Partnership's income tax benefit for the years ended December 31, 2025, 2024 and 2023 is as follows:

|   | Years Ended December 31, |              |               |              |               |              |
|---|--------------------------|--------------|---------------|--------------|---------------|--------------|
|   | 2025                     |              | 2024          |              | 2023          |              |
|   | Amount                   | Percent      | Amount        | Percent      | Amount        | Percent      |
| Income tax expense at United States statutory rate                          | \$ 1,272                 | 21.00%       | \$ 1,492      | 21.00%       | \$ 1,175      | 21.00%       |
| Increase (reduction) in income taxes resulting from:                        |                          |              |               |              |               |              |
| Non-taxable Partnership earnings  | (944)                    | (15.59)%     | (1,084)       | (15.25)%     | (884)         | (15.79)%     |
| State and local income tax, net of federal income tax effect <sup>(1)</sup> | 4                        | 0.07%        | 113           | 1.59%        | 37            | 0.65%        |
| Foreign tax effects   | (4)                      | (0.06)%      | —             | —            | —             | —            |
| Effect of cross-border tax laws   | 6                        | 0.10%        | —             | —            | —             | —            |
| Changes in valuation allowances   | 2                        | 0.03%        | —             | —            | (3)           | (0.05)%      |
| Changes in unrecognized tax benefits  | (5)                      | (0.08)%      | 21            | 0.29%        | (14)          | (0.24)%      |
| Other adjustments   | 19                       | 0.32%        | (1)           | (0.02)%      | (8)           | (0.16)%      |
| Income tax expense  | <u>\$ 350</u>            | <u>5.79%</u> | <u>\$ 541</u> | <u>7.61%</u> | <u>\$ 303</u> | <u>5.41%</u> |

<sup>(1)</sup> State taxes that made up the majority (greater than 50 percent) of the tax effect in this category were Texas in 2025, Pennsylvania, Texas, New Jersey and New York in 2024 and Texas in 2023.

The One Big Beautiful Bill Act ("OBBBA"), enacted in July 2025, is expected to impact the Partnership primarily through the ability to take higher tax depreciation deductions via 100% expensing on eligible property and higher interest expense deductions via more favorable interest expense limitation calculations. We will continue to monitor regulatory guidance and interpretations, which could have a material impact on our financials condition and results of operations.

Cash paid for income taxes were as follows:

|   | Year Ended December 31, |               |               |
|---|-------------------------|---------------|---------------|
|   | 2025                    | 2024          | 2023          |
| Cash paid for income taxes, net of refunds (excluding federal tax credits purchased from non-governmental third parties): |                         |               |               |
| Federal:  | \$ —                    | \$ 150        | \$ 64         |
| State:  |                         |               |               |
| Texas   | 26                      | 14            | 16            |
| Pennsylvania  | *                       | *             | 6             |
| New Jersey  | *                       | 13            | 6             |
| Other   | 12                      | 29            | 11            |

| Canada  | 62                      | —             | —             |
| Other   | 3                       | —             | —             |
| Total   | <u>\$ 103</u>           | <u>\$ 206</u> | <u>\$ 103</u> |
| Cash paid for federal tax credits purchased from non-governmental third parties   | \$ 97                   | \$ 47         | \$ —          |

\* Amount of income taxes paid during the year did not meet the 5% disaggregation threshold.

Deferred taxes result from the temporary differences between financial reporting carrying amounts and the tax basis of existing assets and liabilities. The following table summarizes the principal components of the deferred tax assets (liabilities) as follows:

|  | December 31, |            |
|--|--------------|------------|
|  | 2025         | 2024       |
| Deferred income tax assets:                  |              |            |
| Net operating losses and other carryforwards | \$ 443       | \$ 197     |
| Other  | 75           | 42         |
| Total deferred income tax assets             | 518          | 239        |
| Valuation allowance                          | (64)         | —          |
| Net deferred income tax assets               | 454          | 239        |
| Deferred income tax liabilities:             |              |            |
| Property, plant and equipment                | (1,083)      | (224)      |
| Investments in affiliates                    | (4,200)      | (4,098)    |
| Trademarks                                   | (240)        | (82)       |
| Other  | (61)         | (18)       |
| Total deferred income tax liabilities        | (5,584)      | (4,422)    |
| Net deferred income taxes                    | \$ (5,130)   | \$ (4,183) |

The completion of the Parkland transaction significantly increased the deferred tax assets (liabilities). The table below provides a rollforward of the net deferred income tax liability:

|  | December 31, |            |
|--|--------------|------------|
|  | 2025         | 2024       |
| Net deferred income tax liability, beginning of year | \$ (4,183)   | \$ (3,931) |
| Acquired in Parkland acquisition                     | (755)        | —          |
| Acquired in NuStar acquisition                       | —            | (3)        |
| Tax accrual  | (192)        | (249)      |
| Net deferred income tax liability                    | \$ (5,130)   | \$ (4,183) |

As of December 31, 2025, ETP Holdco had federal net operating loss (NOL) carryforwards of \$325 million, which are limited under IRC §382 and may be carried forward indefinitely. Although these federal NOLs are expected to be fully utilized, the amount utilized in a particular year may be limited. Sunoco Retail, LLC had federal NOL carryforwards of \$287 million, that may be carried forward indefinitely. Of this amount, \$206 million is subject to limitations under IRC §382 (ownership-change limitation) and \$35 million is limited under Separate Return Limitation Year (SRLY) rules. Although these federal NOLs are expected to be fully utilized, the amount utilized in a particular year may be limited. SunocoCorp, LLC had federal NOL carryforwards of \$9 million that may be carried forward indefinitely. Sunoco Retail, LLC's foreign subsidiaries had NOL carryforwards of \$425 million, of which, \$279 million expire between 2026 and 2045. Evergreen Capital Holdings, LLC had federal NOL carryforwards of \$30 million that may be carried forward indefinitely. Our corporate subsidiaries have state NOL carryforward benefits of \$69 million, net of federal tax, with some expiring between 2026 and 2044 and others carried forward indefinitely. Our corporate subsidiaries have cumulative excess business interest expense carryforwards of \$181 million available for indefinite carryforward, of which, \$159 million is limited under IRC §382. Although the excess business interest expense carryforwards are expected to be fully utilized, the amount utilized in a particular year may be limited. For the year ended December 31, 2025, the net change in the total valuation allowances was an increase of \$64 million, and for the year ended December 31, 2024, there was no net change. Valuation allowances totaling \$52 million and \$12 million are attributable to foreign and federal NOLs, respectively.

The following table sets forth the changes in unrecognized tax benefits:

|  | Years Ended December 31, |       |       |
|--|--------------------------|-------|-------|
|  | 2025                     | 2024  | 2023  |
| Balance at beginning of year                                 | \$ 74                    | \$ 40 | \$ 52 |
| Additions attributable to tax positions taken in prior years | —                        | 34    | —     |
| Reduction attributable to tax positions taken in prior years | (8)                      | —     | (9)   |
| Settlements  | —                        | —     | (3)   |
| Balance at end of year                                       | \$ 66                    | \$ 74 | \$ 40 |

As of December 31, 2025, we had \$66 million (\$59 million after federal income tax benefits) related to tax positions which, if recognized, would impact our effective tax rate.

Our policy is to accrue interest expense and penalties on income tax underpayments (overpayments) as a component of income tax expense. During 2025, we recognized an interest and penalty benefit of \$2 million. At December 31, 2025, we have interest and penalties accrued of \$7 million, net of tax.

### Pennsylvania Case

In November 2015, the Pennsylvania Commonwealth Court determined in *Nextel Communications v. Commonwealth* (“Nextel”) that the Pennsylvania limitation on NOL carryforward deductions violated the uniformity clause of the Pennsylvania Constitution and struck the NOL limitation in its entirety. In October 2017, the Pennsylvania Supreme Court affirmed the decision with respect to the uniformity clause violation; however, the Court reversed with respect to the remedy and instead severed the flat-dollar limitation, leaving the percentage-based limitation intact. ETC Sunoco previously recognized approximately \$67 million (\$53 million after federal income tax benefits) in tax benefit based on previously filed tax returns and certain previously filed protective claims held pending the Nextel matter. Based upon the Pennsylvania Supreme Court’s October 2017 decision, and because of uncertainty in the breadth of the application of the decision, ETC Sunoco reserved \$34 million (\$27 million after federal income tax benefits) against the receivable. On December 22, 2021, the Pennsylvania Supreme Court found in *General Motors Corporation v. Commonwealth* (“GM”) that the taxpayer was entitled to meaningful backwards looking relief under the Due Process Clause, meaning the Commonwealth must equalize the taxpayer’s position with taxpayers who were not affected by the NOL cap in place for the year at issue. The Court therefore held the taxpayer was entitled to a refund by calculating its tax for that year with an uncapped NOL deduction. We believed the Pennsylvania Supreme Court’s ruling in GM would more likely than not be upheld if challenged by the Commonwealth, and we reversed the reserve thereby recognizing the entire tax benefit of \$34 million (\$27 million after federal income tax benefit).

On November 20, 2024, the Pennsylvania Supreme Court reversed its earlier holding in GM and determined taxpayers are not entitled to refunds for excess taxes paid in earlier years. Following the reversal of the GM decision, we reinstated the reserve. Certain Pennsylvania taxpayers filed suit against the Commonwealth following the reversal of the GM decision on the basis that the court’s ruling should not apply to taxpayers who did not claim refunds in prior years but who, instead, took uncapped NOL positions on their tax returns and were subsequently assessed by the Department of Revenue. The lead case in this challenge remains pending before the Pennsylvania Commonwealth Court.

### IRS Audits

The IRS audit of the Partnership’s 2020 U.S. Federal income tax return closed with no changes proposed. In general, Energy Transfer and its subsidiaries are no longer subject to examination by the IRS, and most state jurisdictions, for the 2020 and prior tax years. Energy Transfer and its other subsidiaries also have various state and local income tax returns in the process of examination or administrative appeal in various jurisdictions. We believe the appropriate accruals or unrecognized tax benefits have been recorded for any potential assessment with respect to these examinations.

USAC is currently under examination by the IRS for years 2019 and 2020. The IRS has issued preliminary partnership examination changes, resulting in imputed underpayment computations of approximately \$30 million, including interest, for the 2019 and 2020 tax years. Under the Bipartisan Budget Act of 2015, there are several procedural steps to complete before a final imputed underpayment, if any, is determined. Based on discussions with the IRS, USAC accrued \$2.9 million, which USAC believes is a reasonable estimate of the potential loss from the aggregate final imputed underpayment for the years 2019 and 2020. However, USAC’s final imputed underpayment, if any, has not been determined. Once determined, USAC’s general partner may either elect to pay the imputed underpayment, if any,

(including any applicable penalties and interest) directly to the IRS or, if eligible, issue a revised information statement to each unitholder, or former unitholder as applicable, of USAC with respect to an audited and adjusted return.

## **11. REGULATORY MATTERS, COMMITMENTS, CONTINGENCIES AND ENVIRONMENTAL LIABILITIES:**

### **FERC Proceedings**

#### ***Rover – FERC – Stoneman House***

In late 2016, FERC Enforcement Staff began a non-public investigation related to Rover's purchase and removal of a potentially historic home (known as the Stoneman House) while Rover's application for permission to construct the new 711-mile interstate natural gas pipeline and related facilities was pending. On March 18, 2021, FERC issued an Order to Show Cause and Notice of Proposed Penalty (Docket No. IN19-4-000), ordering Rover to explain why it should not pay a \$20 million civil penalty for alleged violations of FERC regulations requiring certificate holders to be forthright in their submissions of information to the FERC. Rover filed its answer and denial to the order on June 21, 2021, and a surreply on September 15, 2021. FERC issued an order on January 20, 2022, setting the matter for hearing before an administrative law judge. The hearing was set to commence on March 6, 2023; as explained below, this FERC proceeding has been stayed.

On February 1, 2022, Energy Transfer and Rover filed a Complaint for Declaratory Relief in the U.S. District Court for the Northern District of Texas (the "Federal District Court") seeking an order declaring that FERC must bring its enforcement action in federal district court (instead of before an administrative law judge). Also on February 1, 2022, Energy Transfer and Rover filed an expedited request to stay the proceedings before the FERC administrative law judge pending the outcome of the Federal District Court case. On May 24, 2022, the Federal District Court ordered a stay of the FERC's enforcement case and the Federal District Court case pending the resolution of two cases pending before the U.S. Supreme Court. Arguments were heard in those cases on November 7, 2022. On April 14, 2023, the U.S. Supreme Court held against the government in both cases, finding that the federal district courts had jurisdiction to hear those suits and to resolve the parties' constitutional challenges. The cases were remanded to the federal district courts for further proceedings.

On September 13, 2023, the Federal District Court ordered that the Federal District Court case would be stayed pending the resolution of another case pending before the U.S. Supreme Court and that the FERC enforcement case would remain stayed. On November 13, 2023, the FERC appealed the Federal District Court order to the U.S. Court of Appeals for the Fifth Circuit. On December 11, 2023, FERC filed a motion to withdraw that appeal, which the Fifth Circuit granted on December 12, 2023. The FERC and the Federal District Court proceedings were stayed pending resolution of the case pending before the U.S. Supreme Court. The Supreme Court issued a decision in that case on June 27, 2024. The Federal District Court set a status conference for December 16, 2025. The parties filed a motion to continue the status conference on December 10, 2025 and on January 20, 2026 to extend the status conference to mid-February 2026. At the Department of Justice's request, the parties requested that the court extend the status conference again to March 2026 for the purposes of the parties engaging in settlement discussions. Notwithstanding the foregoing, Energy Transfer and Rover intend to vigorously defend against this claim.

#### ***Rover – FERC – Tuscarawas***

In mid-2017, FERC Enforcement Staff began a non-public investigation regarding allegations that diesel fuel may have been included in the drilling mud at the Tuscarawas River horizontal directional drilling ("HDD") operations. Rover and the Partnership are cooperating with the investigation. In 2019, Enforcement Staff provided Rover with a notice pursuant to Section 1b.19 of the FERC regulations that Enforcement Staff intended to recommend that the FERC pursue an enforcement action against Rover and the Partnership. On December 16, 2021, FERC issued an Order to Show Cause and Notice of Proposed Penalty (Docket No. IN17-4-000), ordering Rover and Energy Transfer to show cause why they should not be found to have violated Section 7(e) of the NGA Section 157.20 of FERC's regulations, and the Rover Pipeline Certificate Order, and assessed civil penalties of \$40 million.

Rover and Energy Transfer filed their answer to this order on March 21, 2022, and Enforcement Staff filed a reply on April 20, 2022. Rover and Energy Transfer filed their surreply to this order on May 13, 2022. FERC has taken no further action on the case since that time.

The primary contractor (and one of the subcontractors) responsible for the HDD operations of the Tuscarawas River site have agreed to indemnify Rover and the Partnership for any and all losses, including any fines and penalties from government agencies, resulting from their actions in conducting such HDD operations. Given the stage of the proceedings, the Partnership is unable at this time to provide an assessment of the potential outcome or range of potential liability, if any; however, the Partnership believes the indemnity described above will be applicable to the penalty proposed by Enforcement Staff and intends to vigorously defend itself against the subject claims.

### Other FERC Proceedings

By an order issued on January 16, 2019, the FERC initiated a review of Panhandle’s then-existing rates pursuant to Section 5 of the NGA to determine whether the rates charged by Panhandle are just and reasonable and set the matter for hearing. On August 30, 2019, Panhandle filed a general rate proceeding under Section 4 of the NGA. The NGA Section 5 and Section 4 proceedings were consolidated by order of the Chief Judge on October 1, 2019. The initial decision by the administrative law judge was issued on March 26, 2021, and on December 16, 2022, the FERC issued its order on the initial decision. On January 17, 2023, Panhandle and the Michigan Public Service Commission each filed a request for rehearing of FERC’s order on the initial decision, which were denied by operation of law as of February 17, 2023. On March 23, 2023, Panhandle appealed these orders to the D.C. Circuit, and the Michigan Public Service Commission also subsequently appealed these orders. On April 25, 2023, the D.C. Circuit consolidated Panhandle’s and Michigan Public Service Commission’s appeals and stayed the consolidated appeal proceeding while the FERC further considered the requests for rehearing of its December 16, 2022 order. On September 25, 2023, the FERC issued its order addressing arguments raised on rehearing and compliance, which denied our requests for rehearing. Panhandle filed its Petition for Review with the D.C. Circuit regarding the September 25, 2023 order. On October 25, 2023, Panhandle filed a limited request for rehearing of the September 25 order addressing arguments raised on rehearing and compliance, which was subsequently denied by operation of law on November 27, 2023. On November 17, 2023, Panhandle provided refunds to shippers and on November 30, 2023, Panhandle submitted a refund report regarding the consolidated rate proceedings, which was protested by several parties. On January 5, 2024, the FERC issued a second order addressing arguments raised on rehearing in which it modified certain discussion from its September 25, 2023 order and sustained its prior conclusions. Panhandle has timely filed its Petition for Review with the D.C. Circuit regarding the January 5, 2024 order. On May 28, 2024, the FERC issued an order rejecting Panhandle’s refund report. On June 27, 2024, Panhandle filed a revised refund report in compliance with the FERC’s May 28, 2024 order rejecting Panhandle’s refund report and a request for rehearing of the FERC’s May 28, 2024 order rejecting Panhandle’s refund report, and provided revised refunds to shippers, or in the case of shippers whose revised refunds are less than the original amounts refunded, notices of upcoming debits. One party protested Panhandle’s revised refund report, and Panhandle submitted a response to the protest on July 24, 2024. By notice issued July 29, 2024, Panhandle’s rehearing request was deemed denied. In an ordered issued September 9, 2024, FERC addressed arguments raised on rehearing, modified the discussion in the May 28, 2024 order and continued to reach the same result. On September 18, 2024, Panhandle petitioned the D.C. Circuit for review of the September 9, 2024, July 29, 2024, and May 28, 2024 orders. On December 5, 2024, the FERC issued an order rejecting Panhandle’s June 27, 2024, refund report, ordering a corrected refund report and directing the issuance of additional refunds. On January 3, 2025, Panhandle submitted an adjusted refund report as well as a request for rehearing of the FERC’s December 5, 2024 order. The FERC approved the adjusted refund report by letter order dated January 23, 2025. On February 3, 2025, the FERC issued a Notice of Denial of Rehearing by Operation of Law and Providing for Further Consideration. On March 24, 2025, Panhandle petitioned the D.C. Circuit for review of the December 5, 2024 and February 3, 2025 orders. On April 4, 2025, the FERC issued an Order on Rehearing and Clarification. On May 16, 2025, Panhandle petitioned the D.C. Circuit for review of the April 4, 2025 order. On May 19, 2025, the D.C. Circuit consolidated all cases before it and placed the consolidated cases in abeyance pending further order of the D.C. Circuit. On August 12, 2025, the D.C. Circuit issued an order returning all cases to the court’s active docket and issued a briefing schedule. Panhandle filed its initial brief on November 10, 2025, and FERC’s brief is due on February 9, 2026.

### Commitments

In the normal course of business, Energy Transfer purchases, processes and sells natural gas pursuant to long-term contracts and enters into long-term transportation and storage agreements. Such contracts contain terms that are customary in the industry. Energy Transfer believes that the terms of these agreements are commercially reasonable and will not have a material adverse effect on the Partnership’s financial position or results of operations.

Our joint venture agreements require that we fund our proportionate share of capital contributions to our unconsolidated affiliates. Such contributions will depend upon the unconsolidated affiliates’ capital requirements, such as for funding capital projects or repayment of long-term obligations.

We have certain non-cancelable rights-of-way (“ROW”) commitments which require fixed payments and either expire upon our chosen abandonment or at various dates in the future. The following table reflects ROW expense included in operating expenses in the accompanying consolidated statements of operations:

|             | Years Ended December 31, |       |       |
|-------------|--------------------------|-------|-------|
|             | 2025                     | 2024  | 2023  |
| ROW expense | \$ 87                    | \$ 72 | \$ 68 |

## Litigation and Contingencies

We may, from time to time, be involved in litigation and claims arising out of our operations in the normal course of business. Due to the flammable and combustible nature of natural gas and crude oil, the potential exists for personal injury and/or property damage to occur in connection with their transportation, storage or use. In the ordinary course of business, we are sometimes threatened with or named as a defendant in various lawsuits seeking actual and punitive damages for product liability, personal injury and property damage. We maintain liability insurance with insurers in amounts and with coverage and deductibles management believes are reasonable and prudent, and which are generally accepted in the industry. However, there can be no assurance that the levels of insurance protection currently in effect will continue to be available at reasonable prices or that such levels will remain adequate to protect us from material expenses related to product liability, personal injury or property damage in the future.

We or our subsidiaries are parties to various legal proceedings, arbitrations and/or regulatory proceedings incidental to our businesses. For each of these matters, we evaluate the merits of the case, our exposure to the matter, possible legal or settlement strategies, the likelihood of an unfavorable outcome and the availability of insurance coverage. If we determine that an unfavorable outcome of a particular matter is probable and can be estimated, we accrue the contingent obligation, as well as any expected insurance recoverable amounts related to the contingency. As new information becomes available, our estimates may change. The impact of these changes may have a significant effect on our results of operations in a single period.

As of December 31, 2025 and 2024, accruals of approximately \$324 million and \$281 million, respectively, were reflected on our consolidated balance sheets related to contingent obligations that met both the probable and reasonably estimable criteria. In addition, we may recognize additional contingent losses in the future related to (i) contingent matters for which a loss is currently considered reasonably possible but not probable and/or (ii) losses in excess of amounts that have already been accrued for such contingent matters. In some of these cases, we are not able to estimate possible losses or a range of possible losses in excess of amounts accrued. For such matters where additional contingent losses can be reasonably estimated, the range of additional losses is estimated to be up to approximately \$58 million.

The outcome of these matters cannot be predicted with certainty and there can be no assurance that the outcome of a particular matter will not result in the payment of amounts that have not been accrued for the matter. Furthermore, we may revise accrual amounts or our estimates of reasonably possible losses prior to resolution of a particular contingency based on changes in facts and circumstances or changes in the expected outcome.

The following sections include descriptions of certain matters that could impact the Partnership's financial position, results of operations and/or cash flows in future periods. The following sections also include updates to certain matters that have previously been disclosed, even if those matters are not anticipated to have a potentially significant impact on future periods. In addition to the matters disclosed in the following sections, the Partnership is also involved in multiple other matters that could impact future periods, including other lawsuits and arbitration related to the Partnership's commercial agreements. With respect to such matters, contingencies that met both the probable and reasonably estimable criteria have been included in the accruals disclosed above, and the range of additional losses disclosed above also reflects any relevant amounts for such matters.

### *Dakota Access Pipeline*

On July 27, 2016, the Standing Rock Sioux Tribe ("SRST") filed a lawsuit in the U.S. District Court for the District of Columbia ("District Court") challenging permits issued by the United States Army Corps of Engineers ("USACE") that allowed Dakota Access to cross the Missouri River at Lake Oahe in North Dakota. The case was subsequently amended to challenge an easement issued by the USACE that allowed the pipeline to cross land owned by the USACE adjacent to the Missouri River. Dakota Access and the Cheyenne River Sioux Tribe ("CRST") intervened. Separate lawsuits filed by the Oglala Sioux Tribe ("OST") and the Yankton Sioux Tribe ("YST") were consolidated with this action and several individual tribal members intervened (collectively, with SRST and CRST, the "Tribes"). On March 25, 2020, the D.C. District Court remanded the case back to the USACE for preparation of an Environment Impact Statement ("EIS"). On July 6, 2020, the D.C. District Court vacated the easement and ordered the Dakota Access Pipeline to be shut down and emptied of oil by August 5, 2020. Dakota Access and the USACE appealed to the D.C. Circuit which granted an administrative stay of the District Court's July 6 order and ordered further briefing on whether to fully stay the July 6 order. On August 5, 2020, the D.C. Circuit (1) granted a stay of the portion of the D.C. District Court order that required Dakota Access to shut the pipeline down and empty it of oil, (2) denied a motion to stay the March 25 order pending a decision on the merits by the D.C. Circuit as to whether the USACE would be required to prepare an EIS and (3) denied a motion to stay the D.C. District Court's order to vacate the easement during this appeal process. The August 5 order also states that the D.C. Circuit expected the USACE to clarify its position with respect to whether the USACE intended to allow the continued

operation of the pipeline notwithstanding the vacatur of the easement and that the D.C. District Court may consider additional relief, if necessary.

On August 10, 2020, the D.C. District Court ordered the USACE to submit a status report by August 31, 2020, clarifying its position with regard to its decision-making process with respect to the continued operation of the pipeline. On August 31, 2020, the USACE submitted a status report that indicated that it considered the presence of the pipeline at the Lake Oahe crossing without an easement to constitute an encroachment on federal land, and that it was still considering whether to exercise its enforcement discretion regarding this encroachment. The Tribes subsequently filed a motion seeking an injunction to stop the operation of the pipeline and both the USACE and Dakota Access filed briefs in opposition of the motion for injunction. The motion for injunction was fully briefed as of January 8, 2021.

On January 26, 2021, the D.C. Circuit affirmed the D.C. District Court's March 25, 2020 order requiring an EIS and its July 6, 2020 order vacating the easement. In this same January 26 order, the D.C. Circuit also overturned the D.C. District Court's July 6, 2020 order that the pipeline shut down and be emptied of oil. Dakota Access filed for rehearing en banc on April 12, 2021, which the D.C. Circuit denied. On September 20, 2021, Dakota Access filed a petition with the U.S. Supreme Court to hear the case. Oppositions were filed by the Solicitor General on December 17, 2021 and the Tribes (December 16, 2021). Dakota Access filed their reply on January 4, 2022. On February 22, 2022, the U.S. Supreme Court declined to hear the case.

The D.C. District Court scheduled a status conference for February 10, 2021 to discuss the effects of the D.C. Circuit's January 26, 2021 order on the pending motion for injunctive relief, as well as the USACE's expectations as to how it will proceed regarding its enforcement discretion regarding the easement. On May 3, 2021, the USACE advised the D.C. District Court that it had not changed its position with respect to its opposition to the Tribes' motion for injunction. On May 21, 2021, the D.C. District Court denied the plaintiffs' request for an injunction. On June 22, 2021, the D.C. District Court terminated the consolidated lawsuits and dismissed all remaining outstanding counts without prejudice.

On September 8, 2023, the USACE published the Draft EIS. Comments on the Draft EIS were due on December 13, 2023. In December 2025, the USACE issued a Final EIS concluding that the USACE's preferred alternative is that the USACE reissue its easement to DAPL subject to additional easement conditions. The USACE has not yet issued a Record of Decision with DAPL's easement, but it is expected to issue in early 2026. The pipeline continues to operate. Energy Transfer cannot determine when or how future lawsuits will be resolved or the impact they may have on the Bakken Pipeline; however, Energy Transfer expects that after the law and complete record are fully considered, any such proceeding will be resolved in a manner that will allow the pipeline to continue to operate.

In addition, lawsuits and/or regulatory proceedings or actions of this or a similar nature could result in interruptions to construction or operations of current or future projects, delays in completing those projects and/or increased project costs, all of which could have an adverse effect on our business and results of operations.

#### ***Standing Rock Sioux Tribe in Federal Court in District of Columbia***

Dakota Access is the subject of litigation in the D.C. District Court. The SRST sued the USACE arguing that the USACE's alleged failure to stop Dakota Access from operating violates numerous laws, including the Mineral Leasing Act, the Government Acquisition and Streamlining Act, the National Environmental Policy Act, the Clean Water Act, the National Historic Preservation Act, the Administrative Procedure Act as well as the 1868 Fort Laramie Treaty. The SRST requests a permanent injunction or writ of mandamus that would compel the USACE to shut Dakota Access down pending the completion of the USACE's EIS and decision on whether to grant Dakota Access an easement under the Mineral Leasing Act.

On October 15, 2024, the SRST filed the above referenced complaint. A summons to the USACE was issued on October 17, 2024. Dakota Access, the state of North Dakota and numerous other states have intervened in the lawsuit in support of the USACE.

On January 17, 2025, the USACE, Dakota Access and state intervenors (including North Dakota and thirteen other states) each filed a motion to dismiss all of the claims in the new SRST litigation. Also, on January 17, 2025, the SRST filed a motion for partial summary judgment on certain of their claims. Briefing on the motions to dismiss is complete. The D.C. District Court has held briefing on the motion for partial summary judgment in abeyance pending the D.C. District Court's decision on the motions to dismiss. On March 28, 2025, the D.C. District Court granted the motions to dismiss. On May 27, 2025, the SRST appealed the dismissal to the D.C. Circuit. Briefing at the D.C. Circuit is currently underway. Dakota Access intends to vigorously defend against this claim.

### ***Williams Antitrust Litigation***

On June 28, 2024, Louisiana Energy Gateway LLC, The Williams Companies, Inc., and Williams Fields Services Group, LLC (collectively, “Williams”) filed a Petition for Damages against Energy Transfer and Gulf Run Transmission, LLC (“Gulf Run”) in the 42nd Judicial District Court, Parish of DeSoto, State of Louisiana (“District Court”), alleging that Energy Transfer and/or Gulf Run have monopolized, conspired to monopolize and/or attempted to monopolize, the relevant product and geographic market for the movement of natural gas from the Haynesville Shale in northwestern Louisiana south to natural gas facilities in the Louisiana Gulf Coast (the “Relevant Market”), engaged in acquisitions that have directly enabled and incentivized to substantially lessen competition, and engaged in unfair methods of competition and unfair trade practices.

On September 16, 2024, Energy Transfer and Gulf Run removed the case to the U.S. District Court for the Western District of Louisiana (“Federal Court”). On October 4, 2024, Williams filed a Motion to Remand with the Federal Court, seeking to remand the case back to the District Court. On October 21, 2024, Energy Transfer and Gulf Run filed a consent to remand based on a subsequent change in circumstances. After the case was remanded, on November 18, 2024, Energy Transfer and Gulf Run filed a Peremptory Exception of No Cause, asserting that Williams failed to state a cause of action. The Peremptory Exception was heard on February 10, 2025 and denied. The District Court initially set the case for trial on September 14, 2026, but indicated that trial will be continued to 2027.

### ***Mont Belvieu Incident***

On June 26, 2016, a hydrocarbon storage well located on another operator’s facility adjacent to Lone Star NGL Mont Belvieu LP’s (“Lone Star,” now known as Energy Transfer Mont Belvieu NGLs LP) facilities in Mont Belvieu, Texas experienced an over-pressurization resulting in a subsurface release. The subsurface release caused a fire at Lone Star’s South Terminal and damage to Lone Star’s storage well operations at its South and North Terminals. Normal operations resumed at the facilities in the fall of 2016, with the exception of one of Lone Star’s storage wells at the North Terminal that has not been returned to service. Lone Star has obtained payment for most of the losses it has submitted to the adjacent operator. Lone Star continues to quantify and seek reimbursement for outstanding losses.

### ***MTBE Litigation***

ETC Sunoco and Energy Transfer R&M (collectively, “Sunoco Defendants”) are defendants in lawsuits alleging methyl tertiary butyl ether (“MTBE”) contamination of groundwater. The plaintiffs, state-level governmental entities, assert product liability, nuisance, trespass, negligence, violation of environmental laws and/or deceptive business practices claims. The plaintiffs seek to recover compensatory damages, and in some cases also seek natural resource damages, injunctive relief, punitive damages and attorneys’ fees.

As of December 31, 2025, Sunoco Defendants are defendants in two cases: one case initiated by the State of Maryland and one by the Commonwealth of Pennsylvania. The actions brought also named as defendants ETO, ETP Holdco Corporation and Sunoco Partners Marketing & Terminals L.P., now known as Energy Transfer Marketing & Terminals L.P. ETP Holdco Corporation and Energy Transfer Marketing & Terminals L.P. are wholly owned subsidiaries of Energy Transfer.

It is reasonably possible that a loss may be realized in the remaining cases; however, we are unable to estimate the possible loss or range of loss in excess of amounts accrued. An adverse determination with respect to one or more of the MTBE cases could have a significant impact on results of operations during the period in which any such adverse determination occurs, but such an adverse determination likely would not have a material adverse effect on the Partnership’s consolidated financial position.

### ***Rover - State of Ohio***

On November 3, 2017, the State of Ohio and the Ohio Environmental Protection Agency (“Ohio EPA”) filed suit against Rover and other defendants seeking to recover approximately \$3 million in civil penalties allegedly owed and certain injunctive relief related to permit compliance. The defendants filed several motions to dismiss, which were granted on all counts. The Ohio EPA appealed, and on December 9, 2019, the Ohio’s Fifth District Court of Appeals entered a unanimous judgment affirming the trial court. The Ohio EPA sought review from the Ohio Supreme Court. On April 22, 2020, the Ohio Supreme Court granted the review. On March 17, 2022, the Ohio Supreme Court reversed in part and remanded to the Ohio trial court. The Ohio Supreme Court agreed with Rover that the State of Ohio had waived its rights under Section 401 of the Clean Water Act but remanded to the trial court to determine whether any of the allegations fell outside the scope of the waiver.

On remand, the Ohio EPA voluntarily dismissed four of the other five defendants and dismissed one of its counts against Rover. In its Fourth Amended Complaint, the Ohio EPA removed all paragraphs that alleged violations by the four dismissed defendants, including those where the dismissed defendants were alleged to have acted jointly with Rover or others. At a June 2, 2022 status conference, the trial judge set a schedule for Rover and the other remaining defendant to file motions to dismiss the Fourth Amended Complaint. On August 1, 2022, Rover and the other remaining defendant each filed their respective motions. Briefing on those motions was completed on November 4, 2022. By order issued on October 20, 2023, the trial judge dismissed the Ohio EPA's Fourth Amended Complaint.

On November 17, 2023, the State of Ohio appealed the trial judge's decision to Ohio's Fifth District Court of Appeals. The State filed its initial brief on January 8, 2024. Energy Transfer and Rover filed a responsive brief on February 20, 2024. The State filed a reply brief on February 26, 2024. Oral argument on the appeal was held on August 27, 2024. On October 1, 2024, Ohio's Fifth District Court of Appeals affirmed the trial judge's decision. The State of Ohio sought permission to appeal this decision from the Ohio Supreme Court. Energy Transfer and Rover have opposed such permission. On January 28, 2025, the Ohio Supreme Court declined to hear the State's appeal. On April 25, 2025, the State of Ohio filed a Petition for Writ of Certiorari with the U.S. Supreme Court. Rover filed a Brief in Opposition on June 30, 2025. The State of Ohio filed a reply brief on July 11, 2025. On October 6, 2025, the U.S. Supreme Court denied the State of Ohio's Petition for Writ of Certiorari, concluding this matter.

#### ***Unitholder Litigation Regarding Pipeline Construction***

Various purported unitholders of Energy Transfer have filed derivative actions against various past and current officers and members of Energy Transfer's Board of Directors, LE GP, LLC, and Energy Transfer, as a nominal defendant that assert claims for breach of fiduciary duties, unjust enrichment, waste of corporate assets, breach of Energy Transfer's Partnership Agreement, tortious interference, abuse of control and gross mismanagement related primarily to matters involving the construction of pipelines in Pennsylvania and Ohio. They also seek damages and changes to Energy Transfer's corporate governance structure. See *Bettiol v. LE GP*, Case No. 3:19-cv-02890-X (N.D. Tex.); *Davidson v. Kelcy L. Warren*, Cause No. DC-20-02322 (44th Judicial District of Dallas County, Texas); *Harris v. Kelcy L. Warren*, Case No. 2:20-cv-00364-GAM (E.D. Pa.); *Barry King v. LE GP*, Case No. 3:20-cv-00719-X (N.D. Tex.); *Inter-Marketing Group USA, Inc. v. LE GP, et al.*, Case No. 2022-0139-SG (Del. Ch.); *Elliot v. LE GP LLC*, Case No. 3:22-cv-01527-B (N.D. Tex.); *Chapa v. Kelcy L. Warren, et al.*, Index No. 611307/2022 (N.Y. Sup. Ct.); *Elliott v. LE GP et al*, Cause No. DC-22-14194 (Dallas County, Tex.); and *Charles King v. LE GP, LLC et al*, Cause No. DC-22-14159 (Dallas County, Texas). The Barry King action that was filed in the U.S. District Court for the Northern District of Texas (Case No. 3:20-cv-00719-X) has been consolidated with the Bettiol action. On August 9, 2022, the Elliot action that was filed in the U.S. District Court for the Northern District of Texas (Case No. 3:22-cv-01527-B) was voluntarily dismissed.

Another purported unitholder of Energy Transfer, Allegheny County Employees' Retirement System ("ACERS"), individually and on behalf of all others similarly situated, filed a suit under the federal securities laws purportedly on behalf of a class, against Energy Transfer and three of Energy Transfer's directors: Kelcy L. Warren, John W. McReynolds and Thomas E. Long. See *Allegheny County Emps.' Ret. Sys. v. Energy Transfer LP*, Case No. 2:20-00200-GAM (E.D. Pa.). On June 15, 2020, ACERS filed an amended complaint and added as additional defendants Energy Transfer directors Marshall S. McCrea and Matthew S. Ramsey, as well as Michael J. Hennigan and Joseph McGinn. The amended complaint asserts claims for violations of Sections 10(b) and 20(a) of the Exchange Act and Rule 10b-5 promulgated thereunder related primarily to matters involving the construction of pipelines in Pennsylvania. On August 14, 2020, the defendants filed a motion to dismiss ACERS' amended complaint. On April 6, 2021, the court granted in part and denied in part the defendants' motion to dismiss. The court held that ACERS could proceed with its claims regarding certain statements put at issue by the amended complaint while also dismissing claims based on other statements. The court also dismissed without prejudice the claims against defendants McReynolds, McGinn and Hennigan. On August 23, 2022, the court granted in part and denied in part ACERS' motion for class certification. The court certified a class consisting of those who purchased or otherwise acquired common units of Energy Transfer between February 25, 2017 and November 11, 2019. On January 19, 2024, the defendants filed a motion for summary judgment on all of the claims asserted in ACERS' amended complaint, and ACERS filed a motion for partial summary judgment. The court heard oral argument on the parties' motions for summary judgment on July 15, 2024. On August 8, 2024, the court ruled on the parties' cross motions for summary judgment. The court granted defendants' motion in part, entering judgment for defendants on loss causation for two categories of challenged statements, thereby significantly reducing the class period and potential damages. The court also granted plaintiffs' motion for partial summary judgment in part, entering judgment for plaintiffs on the elements of falsity and the scienter of certain individuals as to four of the challenged statements. On April 23, 2025, the parties reached an agreement in principle to settle the litigation for \$15 million. On July 10, 2025, the court preliminarily approved the settlement, and the final settlement hearing was held on October 7, 2025. On October 8, 2025, the court entered orders approving the class action judgment and the plan of allocation of the net settlement fund.

On June 3, 2022, another purported unitholder of Energy Transfer, Mike Vega, filed suit, purportedly on behalf of a class, against Energy Transfer and Messrs. Warren, Long, McCrea and Whitehurst. See *Vega v. Energy Transfer LP et al.*, Case No. 1:22-cv-4614 (S.D.N.Y.). The action asserts claims for violations of Sections 10(b) and 20(a) of the Exchange Act and Rule 10b-5 promulgated thereunder related primarily to statements made in connection with the construction of Rover. On August 10, 2022, the court appointed the New Mexico State Investment Council and Public Employees Retirement Association of New Mexico (the “New Mexico Funds”) as lead plaintiffs. New Mexico Funds filed an amended complaint on September 30, 2022 and added as additional defendants Energy Transfer directors John W. McReynolds and Matthew S. Ramsey. On November 7, 2022, the court granted the defendants’ motion to transfer and transferred this action to the U.S. District Court for the Northern District of Texas. On January 27, 2023, the defendants filed their motion to dismiss the New Mexico Funds’ amended complaint.

The defendants cannot predict the outcome of these lawsuits or any lawsuits that might be filed subsequent to the date of this filing, nor can the defendants predict the amount of time and expense that will be required to resolve these lawsuits. However, the defendants believe that the claims are without merit and intend to vigorously contest them.

### ***Cline Class Action***

On July 7, 2017, Perry Cline filed a class action complaint in the Eastern District of Oklahoma (the “Eastern District Court”) against Sunoco, Inc. (R&M), LLC (now known as Energy Transfer R&M) and Energy Transfer Marketing & Terminals L.P. (collectively, “ETMT”) that alleged ETMT failed to make timely payments of oil and gas proceeds from Oklahoma wells and to pay statutory interest for those untimely payments. On October 3, 2019, the Eastern District Court certified a class to include all persons who received untimely payments from Oklahoma wells on or after July 7, 2012, and who have not already been paid statutory interest on the untimely payments (the “Class”). Excluded from the Class are those entitled to payments of proceeds that qualify as “minimum pay,” prior period adjustments and pass through payments, as well as governmental agencies and publicly traded oil and gas companies.

After a bench trial, on August 17, 2020, Judge John Gibney (sitting from the Eastern District of Virginia) issued an opinion that awarded the Class actual damages of \$75 million for late payment interest for identified and unidentified royalty owners and interest-on-interest. This amount was later amended to \$81 million to account for interest accrued from trial (the “Order”). Judge Gibney also awarded punitive damages in the amount of \$75 million. The Class is also seeking attorneys’ fees.

On August 27, 2020, ETMT filed its Notice of Appeal with the 10th Circuit Court of Appeals (“10th Circuit”) and appealed the entirety of the Order. The matter was fully briefed, and oral argument was set for November 15, 2021. However, on November 1, 2021, the 10th Circuit dismissed the appeal due to jurisdictional concerns with finality of the Order. En banc rehearing of this decision was denied on November 29, 2021. On December 1, 2021, ETMT filed a Petition for Writ of Mandamus to the 10th Circuit to correct the jurisdictional problems and secure final judgment. On February 2, 2022, the 10th Circuit denied the Petition for Writ of Mandamus, citing that there are other avenues for ETMT to obtain adequate relief. On February 10, 2022, ETMT filed a Motion to Modify the Plan of Allocation Order and Issue a Rule 58 Judgment with the trial court, requesting the Eastern District Court to enter a final judgment in compliance with the Rules. ETMT also filed an injunction with the trial court to enjoin all efforts by plaintiffs to execute on any non-final judgment. On March 31, 2022, Judge Gibney denied the Motion to Modify the Plan of Allocation, reiterating his thoughts that the order constitutes a final judgment. Judge Gibney granted the injunction in part (placing a hold on enforcement efforts for 60 days) and denied the injunction in part. The injunction has since been lifted.

Despite the fact that ETMT has taken the position that the judgment is not final and not subject to execution, the Class engaged in asset discovery and actively tried to collect on the judgment through garnishment proceedings from ETMT’s customers. ETMT unsuccessfully tried to deposit the funds into the Eastern District Court’s Registry. Accordingly, to stop the garnishment proceedings, on December 2, 2022, ETMT wired approximately \$161 million to the Plaintiff’s approved Plan Administrator, which represented at the time the full amount of the judgment with attorneys’ fees and post-judgment interest. ETMT did so without waiving its ability to pursue its pending appeal or its right to appeal the merits of the judgment. Plaintiff has since dismissed the garnishment actions.

ETMT appealed the denial of the Motion to Modify to the 10th Circuit in an attempt to get a decision on finality. The appeal was fully briefed, and oral argument was held on March 21, 2023. On August 3, 2023, the 10th Circuit ruled in favor of ETMT and found that the Eastern District Court’s plan of allocation (which was part of the final judgment) did not satisfy all finality requirements. The 10th Circuit held that the Eastern District Court abused its discretion in denying ETMT’s Rule 60(b)(6) Motion to Modify and reversed and remanded for further proceedings. The case was sent back to the trial court so that the Eastern District Court could fix the finality requirements with the judgment. Further, ETMT sought and recovered a return of funds deposited with the Plan Administrator; Class Counsel did not oppose this motion.

At a status hearing on September 28, 2023, Class Counsel indicated that it would seek additional interest up until the date that the final judgment is entered. The Eastern District Court asked for briefing on the issue of additional interest and held a hearing on October 17, 2023 to address this issue further and enter a ruling as to whether additional interest should be added to the judgment total. During the hearing, the Eastern District Court ruled that additional interest should be awarded at the 12% statutory rate from the date of the prior improper judgment up until October 17, 2023. However, the Judge tolled the running of interest for the time period during which the Plan Administrator was in possession of ETMT's funds (between November 2, 2022 and October 10, 2023). Based on this ruling, the Class calculated that approximately \$23 million in additional interest should be added to the final judgment. On October 19, 2023, the Eastern District Court entered the new final judgment with a corrected Plan of Allocation. Both parties agree that this newly entered judgment fixes the finality concerns and will allow an appeal to the 10th Circuit on the merits. With the inclusion of additional interest, the total amount awarded to the Class is approximately \$104 million in actual damages and \$75 million in punitive damages. ETMT appealed the entirety of the judgment to the 10th Circuit. Oral argument took place on November 20, 2024. On November 17, 2025, the Tenth Circuit issued its opinion, reversing on the issue of punitive damages and affirming the remainder of the district court's findings and rulings. Specifically, the Tenth Circuit affirmed the district court's orders granting class certification and denying post-trial class decertification, along with the orders determining the actual damages awarded to the Class, including pre-judgment interest. The Tenth Circuit, however, vacated the \$75 million punitive damages award and remanded to the district court to amend the judgment consistent with this opinion. ETMT intends to appeal this decision to the United States Supreme Court. ETMT cannot predict the outcome of the case, nor can ETMT predict the amount of time and expense that will be required to resolve the appeal.

#### ***Massachusetts Attorney General v. New England Gas Company***

On July 7, 2011, the Massachusetts Attorney General (the "MA AG") filed a regulatory complaint with the Massachusetts Department of Public Utilities ("DPU") against New England Gas Company ("NEG") with respect to certain environmental cost recoveries. NEG was an operating division of Southern Union Company ("SUG"), and the NEG assets were acquired in connection with the merger transaction with Energy Transfer in March 2012. Subsequent to the merger, in 2013, SUG sold the NEG assets to Liberty Utilities ("Liberty," and together with NEG and SUG, "Respondents") and retained certain potential liabilities, including the environmental cost recoveries with respect to the pending complaint before the DPU. Specifically, the MA AG seeks a refund to NEG's ratepayers for approximately \$18 million in legal fees associated with SUG environmental response activities. The MA AG requests that the DPU initiate an investigation into NEG's collection and reconciliation of recoverable environmental costs, namely: (1) the legal fees charged by the Kasowitz, Benson, Torres & Friedman firm and passed through the recovery mechanism since 2005; (2) the legal fees charged by the Bishop, London & Dodds firm and passed through the recovery mechanisms since 2005; and (3) the legal fees passed through the recovery mechanism that the MA AG contends only qualify for a lesser (i.e., 50%) level of recovery. Respondents maintain that, by tariff, these costs are recoverable through rates charged to NEG customers pursuant to the environmental remediation adjustment clause program. After the Respondents answered the complaint and filed a motion to dismiss in 2011, the Hearing Officer deferred decision on the motion to dismiss and issued a stay of discovery pending resolution of a discovery dispute, which it later lifted on June 24, 2013, permitting the case to resume. However, the MA AG failed to take any further steps to prosecute its claims for nearly seven years. The case remained largely dormant until February 2022, when the Hearing Officer denied the motion to dismiss. After receiving input from the parties, the Hearing Officer entered a procedural schedule on March 16, 2022 (which was amended slightly on August 22, 2022). The parties engaged in discovery and the preparation of pre-filed testimony. Respondents submitted their pre-filed testimony on July 11, 2022. The MA AG served three sets of discovery requests on Respondents on September 9, September 12, and September 20, 2022, to which Respondents timely responded. On October 5, 2022, the MA AG requested that the DPU issue a ruling on whether the information that Respondents redacted in their attorneys' fees invoices is protected by the attorney-client privilege. On the same day, the MA AG also filed a Motion to Stay the Procedural Schedule pending a ruling on the privilege issue. On October 6, 2022, without even affording Respondents the opportunity to respond, the DPU granted the MA AG's request to stay the procedural schedule. Accordingly, all previous deadlines (including the MA AG's October 7, 2022 deadline to submit direct pre-filed testimony) are presently stayed. On October 18, 2023, the DPU issued an Order on Attorney General's Motion to Compel, ruling on issues originally raised in a motion to compel that the MA AG filed in 2013. The October 18, 2023 Order directed NEG to review its redactions again and, to the extent any invoices are completely redacted or heavily redacted, to provide more lightly redacted versions within 30 days. The October 18, 2023 Order also stated that the DPU will set a new procedural schedule in this matter sometime after NEG complies with the directives in the order, which Respondents have completed as of January 17, 2024. On January 6, 2026, the Hearing Officer issued a memo requesting substantial briefing on the merits of the matter. The initial brief by the MA AG is due on March 24, 2026 and the initial brief by the Respondents is due on April 7, 2026. All briefing is to be concluded by April 29, 2026.

### ***Crestwood Midstream Partners, LP – Linde Litigation***

On December 23, 2019, Linde Engineering North America Inc. (“Linde”) filed a lawsuit in the District Court of Harris County, Texas alleging that Arrow Field Services, LLC and Crestwood Midstream Partners LP, our consolidated subsidiaries (collectively, “Crestwood”), breached a contract entered into in March 2018 under which Linde was to provide engineering, procurement and construction services to Crestwood related to the completion of the construction of the Bear Den II cryogenic processing plant.

Trial was held in June 2022, and a final judgment was entered on October 24, 2022. The final judgment includes an award of damages of approximately \$21 million, a pre-judgment interest award of approximately \$18 million and attorney fees and other costs of approximately \$5 million. Crestwood has insurance coverage related to certain pre-judgment interest awards but has not recorded a receivable related to any potential insurance recovery. On January 9, 2023, Crestwood paid approximately \$21 million to the Court Registry under protest to mitigate the impact of post-judgment interest. Crestwood filed a Notice of Appeal on January 13, 2023, and filed its Appellate Brief on September 29, 2023. Linde’s response was filed on February 8, 2024. Oral argument was held on September 26, 2024.

On December 17, 2024, the First Court of Appeals in Houston issued its opinion, in which it reversed the trial court judgment in part and affirmed it in part. The appellate court reversed the awards to Linde of \$18 million in interest and \$5 million for fees and other costs. This reversal reduces the judgment amount by approximately \$22 million. The appellate court affirmed the damages award to Linde of \$21 million. The appellate court remanded the case to the trial court to recompute the prejudgment interest award. Linde filed its petition for review in the Texas Supreme Court on March 17, 2025; Crestwood filed its cross petition on April 30, 2025. In July 2025, the Texas Supreme Court requested responses to the petitions for review from both Linde and Crestwood. On September 26, 2025, the parties resolved and executed a settlement agreement, concluding this matter.

### ***Twin Oaks Pipeline Litigation***

On March 27, 2025, Daniel and Katherine La Hart filed a Class Action Complaint against SPLP, Energy Transfer, and Energy Transfer R&M in the Court of Common Pleas of Philadelphia County, captioned Daniel La Hart and Katherine La Hart v. Sunoco Pipeline L.P., Energy Transfer, and Energy Transfer R&M; Case No. 250303655. The action is related to the release of jet fuel (the “Release”) from the 14-inch Twin-Oaks to Newark Pipeline (the “Pipeline”) in Upper Makefield Township, Bucks County, Pennsylvania. Seven individual actions have also been filed in the Court of Common Pleas of Philadelphia County related to the Release. Plaintiffs in these cases assert causes of action for negligence, gross negligence, negligence per se, strict liability/abnormally dangerous/ultrahazardous activity, strict liability failure to warn, public nuisance, private nuisance, trespass, negligent infliction of emotional distress and medical monitoring. Plaintiffs seek compensatory damages, punitive damages, declaratory and injunctive relief, and medical monitoring for their alleged exposure to petroleum constituents at their properties and in groundwater. The putative class is comprised of homeowners in the surrounding area from September 1, 2023 to present.

On June 25, 2025, Defendants filed their preliminary objections to Plaintiffs’ Amended Complaints which included an objection based on improper venue, and on June 27, 2025, Defendants filed a Motion to Transfer the cases to the Court of Common Pleas of Bucks County, Pennsylvania on the grounds of forum non conveniens. On July 9, 2025, Plaintiffs filed a Motion for Preliminary Injunction in the class action, seeking inter alia, to enjoin the operation of the Pipeline; which Defendants opposed on July 21, 2025. In connection with the venue issues raised by these filings, the Court of Common Pleas ordered certain discovery, followed by amended pleadings and/or supplemental briefing. Following this discovery, Plaintiffs filed the current operative complaints on January 15, 2026, which add multiple additional defendants, including Energy Transfer Marketing & Terminals L.P. as well as other defendants who were allegedly shippers of product on the Pipeline and contractors who allegedly worked on the Pipeline. The parties have proposed a schedule which provides for additional venue-related discovery and a determination of venue.

Shortly after the original complaint was filed, SPLP, Energy Transfer, and Energy Transfer R&M removed the class action to the U.S. District Court for the Eastern District of Pennsylvania (the “E.D. Pa.”) on April 24, 2025. On June 13, 2025, the E.D. Pa. granted Plaintiffs’ motion to remand the case to the Court of Common Pleas of Philadelphia County. Defendants have appealed the remand decision.

SPLP, Energy Transfer, Energy Transfer R&M and Energy Transfer Marketing & Terminals intend to vigorously defend these claims.

### ***State of Oklahoma Attorney General – Winter Storm Uri***

On April 10, 2024, the State of Oklahoma, through Attorney General Gentner Drummond, filed a petition on behalf of Grand River Dam Authority against defendants ET Gathering & Processing LLC, successor by merger to Enable Midstream Partners, LP, Enable Oklahoma Intrastate Transmission, LLC, Enable Gas Transmission, LLC and Enable Energy Resources, LLC arising out of Winter Storm Uri in February 2021. Specifically, plaintiff alleges that defendants violated the Oklahoma Antitrust Reform Act (79 O.S. §201, *et. seq.*) by acting individually and in concert with each other to unreasonably restrain trade in the natural gas market in Oklahoma during the storm. Plaintiff also alleges causes of action for breach of contract, unjust enrichment, fraud, bad faith, conspiracy and negligence. Plaintiff's petition seeks actual damages, punitive damages, treble damages and attorneys' fees and costs. However, the actual amount sought was not specified.

On June 3, 2024, defendants filed a Motion to Dismiss and a Motion to Transfer Venue, along with a Brief in Support. In its Motion to Dismiss, defendants argued that plaintiff's petition fails to state a claim upon which relief can be granted and also that such claims should be dismissed because collateral estoppel bars plaintiff from bringing allegations inconsistent with earlier agency and judicial findings that the extreme cold weather—not defendants' conduct—caused the natural gas shortage and resulting high prices during Winter Storm Uri. Defendants also argued that plaintiff's suit should be dismissed for filing suit in the wrong forum or, alternatively, should be transferred to the correct county of venue (Oklahoma County). Plaintiff filed its response brief on July 12, 2024. A hearing on both motions was held on October 15, 2024. On January 16, 2025, the Judge denied all motions, noting (1) that venue is proper in Osage County, Oklahoma; (2) collateral estoppel does not bar recovery; (3) the plaintiffs can plead inconsistent theories of recovery; and (4) the recovery is public in nature and not foreclosed by statute of limitations. The case will now proceed into the discovery phase.

In a separate matter filed on January 9, 2025, the State of Oklahoma through Gentner Drummond, Attorney General of Oklahoma ("Plaintiff"), filed a petition against ETC Marketing Ltd. and ETC Marketing Inc. (collectively, "ETCM") and other natural gas marketers in Case No. CJ-25-06 in the District Court of Osage County, Oklahoma, arising out of Winter Storm Uri in February 2021. The Oklahoma Attorney General brought this action on behalf of its state agencies, political subdivisions and the people of the State of Oklahoma. Specifically, Plaintiff alleges that the defendants violated the Oklahoma Antitrust Reform Act (79 O.S. §201, *et. seq.*) by acting individually and in concert with each other to unreasonably restrain trade in the natural gas market in Oklahoma during the storm. Plaintiff also alleges causes of action for unjust enrichment and violation of the Oklahoma Consumer Protection Act. Plaintiff's petition seeks damages in excess of \$75,000, including actual damages, punitive damages, treble damages, and attorneys' fees and costs. However, the actual amount sought was not specified.

On March 17, 2025, all defendants (including ETCM) jointly filed a motion to dismiss and brief in support. In the joint motion to dismiss, defendants asserted that FERC's exclusive jurisdiction preempts all the Attorney General's state-law claims and, alternatively, that the petition does not state a claim under Oklahoma antitrust law. Further, the motion argues that the Oklahoma Consumer Protection Act claims are time-barred and inconsistent with the statute, and that the unjust enrichment claims are barred by Oklahoma law. Finally, the motion alleges that the Attorney General's unjust enrichment claims fail as a matter of law because defendants sold natural gas pursuant to valid contracts and the individual consumers were not direct purchasers of natural gas from defendants. On August 19, 2025, the court denied the motion without holding oral argument. The case will now proceed into the discovery phase.

Defendants cannot predict the ultimate outcome of this litigation but will vigorously defend against these claims.

### **Tax Contingencies**

#### ***Rover Ad Valorem Taxes***

Rover appealed the Ohio Department of Taxation (the "Department")'s final determination of the 2019 Ohio true value of the Rover pipeline to the Ohio Board of Tax Appeals (the "BTA") on September 11, 2020. On March 7, 2024, the BTA remanded the matter to the Department to redetermine the Ohio true value of the Rover pipeline consistent with the opinion of the appraiser the Department engaged for purposes of the BTA hearing. Rover appealed the BTA's order to the Ohio Supreme Court on April 5, 2024, and the court affirmed the BTA's order on August 13, 2025.

Rover timely petitioned the Department's preliminary assessments of its 2020, 2021, 2022, 2023, 2024, and 2025 Ohio true values, and these petitions remain pending. If it becomes probable that the Ohio Tax Commissioner's preliminary assessments for tax years 2020 through 2025 are ultimately upheld, then Rover would recognize an additional Ohio public utility personal property tax liability for tax years 2020 through 2025 up to approximately \$294 million, including interest. Rover intends to pursue all available legal remedies for the 2020 through 2025 tax years, and Rover cannot predict the outcome of these matters at this time.

On November 10, 2025, Rover filed a complaint against the Ohio Tax Commissioner in the Court of Common Pleas, Franklin County, Ohio. Rover is seeking a declaration that the Tax Commissioner's 2019 valuation approach, if applied to Rover's subsequent tax years, would violate certain protections afforded to Rover under the U.S. Constitution and the Ohio Constitution. The Tax Commissioner filed a motion to dismiss on December 8, 2025, Rover replied on January 15, 2026, and the Tax Commissioner responded to Rover's reply on January 22, 2026. This matter remains pending, and Rover cannot predict the outcome of this matter at this time.

#### ***Sunoco LP New York Motor Fuel Excise Tax Audit***

New York State issued a motor fuel excise tax assessment to Sunoco, LLC, a wholly owned subsidiary of Sunoco LP, in the amount of approximately \$20 million, exclusive of penalties and interest, for the periods of March 2017 through May 2020. Sunoco, LLC filed an appeal with the New York State Division of Tax Appeals challenging the assessment. Sunoco, LLC cannot predict the outcome of this matter at this time.

See income tax contingencies in Note 10.

#### **Environmental Matters**

Our operations are subject to extensive federal, tribal, state and local environmental and safety laws and regulations that require expenditures to ensure compliance, including related to air emissions and wastewater discharges, at operating facilities and for remediation at current and former facilities as well as waste disposal sites. Historically, our environmental compliance costs have not had a material adverse effect on our results of operations but there can be no assurance that such costs will not be material in the future or that such future compliance with existing, amended or new legal requirements will not have a material adverse effect on our business and operating results. Costs of planning, designing, constructing and operating pipelines, plants and other facilities must incorporate compliance with environmental laws and regulations and safety standards. Failure to comply with these laws and regulations may result in the assessment of administrative, civil and criminal penalties, the imposition of investigatory, remedial and corrective action obligations, natural resource damages, the issuance of injunctions in affected areas and the filing of federally authorized citizen suits. Contingent losses related to all significant known environmental matters have been accrued and/or separately disclosed. However, we may revise accrual amounts prior to resolution of a particular contingency based on changes in facts and circumstances or changes in the expected outcome.

Environmental exposures and liabilities are difficult to assess and estimate due to unknown factors such as the magnitude of possible contamination, the timing and extent of remediation, the determination of our liability in proportion to other parties, improvements in cleanup technologies and the extent to which environmental laws and regulations may change in the future. Although environmental costs may have a significant impact on our results of operations for any single period, we believe that such costs will not have a material adverse effect on our financial position.

Based on information available at this time and reviews undertaken to identify potential exposure, we believe the amount reserved for environmental matters is adequate to cover the potential exposure for cleanup costs.

#### ***Environmental Remediation***

Our subsidiaries are responsible for environmental remediation at certain sites, including the following:

- Certain of our interstate pipelines conduct soil and groundwater remediation related to contamination from past uses of PCBs. PCB assessments are ongoing and, in some cases, our subsidiaries could be contractually responsible for contamination caused by other parties.
- Certain gathering and processing systems are responsible for soil and groundwater remediation related to releases of hydrocarbons.
- Legacy sites related to Sunoco, Inc. that are subject to environmental assessments, including formerly owned terminals and other logistics assets, retail sites that the Partnership no longer operates, closed and/or sold refineries and other formerly owned sites.
- The Partnership is potentially subject to joint and several liability for the costs of remediation at sites at which it has been identified as a potentially responsible party ("PRP"). As of December 31, 2025, the Partnership had been named as a PRP at approximately 31 identified or potentially identifiable "Superfund" sites under federal and/or comparable state law. The Partnership is usually one of a number of companies identified as a PRP at a site. The Partnership has reviewed the nature and extent of its involvement at each site and other relevant circumstances and, based upon the Partnership's purported nexus to the sites, believes that its potential liability associated with such sites will not be significant.

To the extent estimable, expected remediation costs are included in the amounts recorded for environmental matters in our consolidated balance sheets. In some circumstances, future costs cannot be reasonably estimated because remediation activities are undertaken as claims are made by customers and former customers. To the extent that an environmental remediation obligation is recorded by a subsidiary that applies regulatory accounting policies, amounts that are expected to be recoverable through tariffs or rates are recorded as regulatory assets on our consolidated balance sheets.

The following table reflects the amounts of accrued liabilities recorded in our consolidated balance sheets related to environmental matters that are considered to be probable and reasonably estimable. Currently, we are not able to estimate possible losses or a range of possible losses in excess of amounts accrued. Except for matters discussed above, we do not have any material environmental matters assessed as reasonably possible that would require disclosure in our consolidated financial statements.

|                                 | December 31, |        |
|---------------------------------|--------------|--------|
|                                 | 2025         | 2024   |
| Current                         | \$ 62        | \$ 51  |
| Non-current                     | 354          | 227    |
| Total environmental liabilities | \$ 416       | \$ 278 |

We have established a wholly owned captive insurance company to bear certain risks associated with environmental obligations related to certain sites that are no longer operating. The premiums paid to the captive insurance company include estimates for environmental claims that have been incurred but not reported, based on an actuarially determined fully developed claims expense estimate. In such cases, we accrue losses attributable to unasserted claims based on the discounted estimates that are used to develop the premiums paid to the captive insurance company.

During the years ended December 31, 2025 and 2024, the Partnership recorded \$29 million and \$11 million, respectively, of expenditures related to environmental cleanup programs.

Our pipeline operations are subject to regulation by the DOT under PHMSA, pursuant to which PHMSA has established requirements relating to the design, installation, testing, construction, operation, replacement and management of pipeline facilities. Moreover, PHMSA, through the Office of Pipeline Safety, has promulgated a rule requiring pipeline operators to develop integrity management programs to comprehensively evaluate their pipelines, and take measures to protect pipeline segments located in what the rule refers to as “high consequence areas.” Activities under these integrity management programs involve the performance of internal pipeline inspections, pressure testing or other effective means to assess the integrity of these regulated pipeline segments, and the regulations require prompt action to address integrity issues raised by the assessment and analysis. Integrity testing and assessment of all of these assets will continue, and the results of such testing and assessment could cause us to incur future capital and operating expenditures for repairs or upgrades deemed necessary to ensure the continued safe and reliable operation of our pipelines; however, no estimate can be made at this time of the likely range of such expenditures.

Our operations are also subject to the requirements of OSHA, and comparable state laws that regulate the protection of the health and safety of employees. In addition, the Occupational Safety and Health Administration’s hazardous communication standard requires that information be maintained about hazardous materials used or produced in our operations and that this information be provided to employees, state and local government authorities and citizens. We believe that our past costs for OSHA required activities, including general industry standards, record keeping requirements and monitoring of occupational exposure to regulated substances have not had a material adverse effect on our results of operations; however, there is no assurance that such costs will not be material in the future.

## 12. REVENUE:

### Disaggregation of revenue

The major types of revenue within our reportable segments are as follows:

- intrastate transportation and storage;
- interstate transportation and storage;
- midstream;
- NGL and refined products transportation and services;
- crude oil transportation and services;

- investment in Sunoco LP;
  - fuel distribution;
  - pipeline systems; and
  - terminals
- investment in USAC;
  - contract operations; and
  - retail parts and services; and
- all other.

Note 16 depicts the disaggregation of revenue by segment, with revenue amounts reflected in accordance with ASC Topic 606.

#### ***Intrastate transportation and storage revenue***

Our intrastate transportation and storage segment's revenues are determined primarily by the volume of capacity our customers reserve as well as the actual volume of natural gas that flows through the transportation pipelines or that is injected or withdrawn into or out of our storage facilities. Firm transportation and storage contracts require customers to pay certain minimum fixed fees regardless of the volume of commodity they transport or store. These contracts typically include a variable incremental charge based on the actual volume of transportation commodity throughput or stored commodity injected/withdrawn. Under interruptible transportation and storage contracts, customers are not required to pay any fixed minimum amounts, but are instead billed based on actual volume of commodity they transport across our pipelines or inject/withdraw into or out of our storage facilities. Payment for services under these contracts are typically due the month after the services have been performed.

The performance obligation with respect to firm contracts is a promise to provide a single type of service (transportation or storage) daily over the life of the contract, which is fundamentally a "stand-ready" service. While there can be multiple activities required to be performed, these activities are not separable because such activities in combination are required to successfully transfer the overall service for which the customer has contracted. The fixed consideration of the transaction price is allocated ratably over the life of the contract and revenue for the fixed consideration is recognized over time, because the customer simultaneously receives and consumes the benefit of this "stand-ready" service. Incremental fees associated with actual volume for each respective period are recognized as revenue in the period the incremental volume of service is performed.

The performance obligation with respect to interruptible contracts is also a promise to provide a single type of service, but such promise is made on a case-by-case basis at the time the customer requests the service and we accept the customer's request. Revenue is recognized for interruptible contracts at the time the services are performed.

Our intrastate transportation and storage segment also generates revenues and margin from the sale of natural gas to electric utilities, independent power plants, local distribution companies, industrial end-users and other marketing companies on the HPL System. Generally, we purchase natural gas from the market, including purchases from our marketing operations, and from producers at the wellhead.

#### ***Interstate transportation and storage revenue***

Our interstate transportation and storage segment's revenues are determined primarily by the amount of capacity our customers reserve as well as the actual volume of natural gas that flows through the transportation pipelines or that is injected into or withdrawn out of our storage facilities. Our interstate transportation and storage segment's contracts can be firm or interruptible. Firm transportation and storage contracts require customers to pay certain minimum fixed fees regardless of the volume of commodity transported or stored. In exchange for such fees, we must stand ready to perform a contractually agreed-upon minimum volume of services whenever the customer requests such services. These contracts typically include a variable incremental charge based on the actual volume of transportation commodity throughput or stored commodity injected or withdrawn. Under interruptible transportation and storage contracts, customers are not required to pay any fixed minimum amounts, but are instead billed based on actual volume of commodity they transport across our pipelines or inject into or withdraw out of our storage facilities. Consequently, we are not required to stand ready to provide any contractually agreed-upon volume of service, but instead provides the services based on existing capacity at the time the customer requests the services. Payment for services under these contracts are typically due the month after the services have been performed.

The performance obligation with respect to firm contracts is a promise to provide a single type of service (transportation or storage) daily over the life of the contract, which is fundamentally a “stand-ready” service. While there can be multiple activities required to be performed, these activities are not separable because such activities in combination are required to successfully transfer the overall service for which the customer has contracted. The fixed consideration of the transaction price is allocated ratably over the life of the contract and revenue for the fixed consideration is recognized over time, because the customer simultaneously receives and consumes the benefit of this “stand-ready” service. Incremental fees associated with actual volume for each respective period are recognized as revenue in the period the incremental volume of service is performed.

The performance obligation with respect to interruptible contracts is also a promise to provide a single type of services, but such promise is made on a case-by-case basis at the time the customer requests the service and we accept the customer’s request. Revenue is recognized for interruptible contracts at the time the services are performed.

Lake Charles LNG’s revenues are primarily derived from terminalling services for shippers by receiving LNG at the facility for storage and delivering such LNG to shippers, either in liquid state or gaseous state after regasification. Lake Charles LNG derives all of its revenue from a series of long-term contracts with a wholly owned subsidiary of Royal Dutch Shell plc (“Shell”). Terminalling revenue is generated from fees paid by Shell for storage and other associated services at the terminal. Payment for services under these contracts are typically due the month after the services have been performed.

The terminalling agreements are considered to be firm agreements, because they include fixed fee components that are charged regardless of the volumes transported by Shell or services provided at the terminal.

The performance obligation with respect to firm contracts is a promise to provide a single type of service (terminalling) daily over the life of the contract, which is fundamentally a “stand-ready” service. While there can be multiple activities required to be performed, these activities are not separable because such activities in combination are required to successfully transfer the overall service for which the customer has contracted. The fixed consideration of the transaction price is allocated ratably over the life of the contract and revenue for the fixed consideration is recognized over time, because the customer simultaneously receives and consumes the benefit of this “stand-ready” service. Incremental fees associated with actual volume for each respective period are recognized as revenue in the period the incremental volume of service is performed.

#### ***Midstream revenue***

Our midstream segment’s revenues are derived primarily from margins we earn for natural gas volumes that are gathered, processed and/or transported. The various types of revenue contracts our midstream segment enters into include:

*Fixed fee gathering and processing:* Contracts under which we provide gathering and processing services in exchange for a fixed cash fee per unit of volume. Revenue for cash fees is recognized when the service is performed.

*Keepwhole:* Contracts under which we gather raw natural gas from a third-party producer, process the gas to convert it to pipeline quality natural gas, and redeliver to the producer a thermal-equivalent volume of pipeline quality natural gas. In exchange for these services, we retain the NGLs extracted from the raw natural gas received from the producer as well as cash fees paid by the producer. The value of NGLs retained as well as cash fees is recognized as revenue when the services are performed.

*Percent of Proceeds (“POP”):* Contracts under which we provide gathering and processing services in exchange for a specified percentage of the producer’s commodity (“POP percentage”) and also in some cases additional cash fees. The two types of POP revenue contracts are described below:

- *In-Kind POP:* We retain our POP percentage (non-cash consideration) and also any additional cash fees in exchange for providing the services. We recognize revenue for the non-cash consideration and cash fees at the time the services are performed.
- *Mixed POP:* We purchase NGLs from the producer and retain a portion of the residue gas as non-cash consideration for services provided. We may also receive cash fees for such services. Under Topic 606, these agreements were determined to be hybrid agreements which were partially supply agreements (for the NGLs we purchased) and customer agreements (for the services provided related to the product that was returned to the customer). Given that these are hybrid agreements, we split the cash and non-cash consideration between revenue and a reduction of costs based on the value of the service provided vs. the value of the supply received.

Payment for services under these contracts are typically due the month after the services have been performed.

The performance obligations with respect to our midstream segment's contracts are to provide gathering, transportation and processing services, each of which would be completed on or about the same time, and each of which would be recognized on the same line item on the income statement, therefore identification of separate performance obligations would not impact the timing or geography of revenue recognition.

Certain contracts of our midstream segment include throughput commitments under which customers commit to purchasing a certain minimum volume of service over a specified time period. If such volume of service is not purchased by the customer, deficiency fees are billed to the customer. In some cases, the customer is allowed to apply any deficiency fees paid to future purchases of services. In such cases, we defer revenue recognition until the customer uses the deficiency fees for services provided or becomes unable to use the fees as payment for future services due to expiration of the contractual period the fees can be applied or physical inability of the customer to utilize the fees due to capacity constraints.

Our midstream segment also generates revenues from the sale of residue gas and NGLs at the tailgate of our processing facilities primarily to affiliates and some third-party customers.

#### ***NGL and refined products transportation and services revenue***

Our NGL and refined products transportation and services segment's revenues are primarily derived from transportation, fractionation, blending and storage of NGL and refined products as well as acquisition and marketing activities. Revenues are generated utilizing a complementary network of pipelines, storage and blending facilities, and strategic offtake locations that provide access to multiple NGL markets. Transportation, fractionation and storage revenue is generated from fees charged to customers under a combination of firm and interruptible contracts. Firm contracts are in the form of take-or-pay arrangements where certain fees will be charged to customers regardless of the volume of service they request for any given period. Under interruptible contracts, customers are not required to pay any fixed minimum amounts, but are instead billed based on actual volume of service provided for any given period. Payment for services under these contracts are typically due the month after the services have been performed.

The performance obligation with respect to firm contracts is a promise to provide a single type of service (transportation, fractionation, blending, or storage) daily over the life of the contract, which is fundamentally a "stand-ready" service. While there can be multiple activities required to be performed, these activities are not separable because such activities in combination are required to successfully transfer the overall service for which the customer has contracted. The fixed consideration of the transaction price is allocated ratably over the life of the contract and revenue for the fixed consideration is recognized over time, because the customer simultaneously receives and consumes the benefit of this "stand-ready" service. Incremental fees associated with actual volume for each respective period are recognized as revenue in the period the incremental volume of service is performed.

The performance obligation with respect to interruptible contracts is also a promise to provide a single type of service, but such promise is made on a case-by-case basis at the time the customer requests the service and we accept the customer's request. Revenue is recognized for interruptible contracts at the time the services are performed.

#### ***Crude oil transportation and services revenue***

Our crude oil transportation and services segment's revenues are primarily derived from providing transportation, terminalling and acquisition and marketing services to crude oil markets throughout the Southwest, Midwest and Northeast United States. Crude oil transportation revenue is generated from tariffs paid by shippers utilizing our transportation services and is generally recognized as the related transportation services are provided. Crude oil terminalling revenue is generated from fees paid by customers for storage and other associated services at the terminal. Crude oil acquisition and marketing revenue is generated from sale of crude oil acquired from a variety of suppliers to third parties. Payment for services under these contracts are typically due the month after the services have been performed.

Certain transportation and terminalling agreements are considered to be firm agreements, because they include fixed fee components that are charged regardless of the volume of crude oil transported by the customer or services provided at the terminal. For these agreements, any fixed fees billed in excess of services provided are not recognized as revenue until the earlier of (i) the time at which the customer applies the fees against cost of service provided in a later period, or (ii) the customer becomes unable to apply the fees against cost of future service due to capacity constraints or contractual terms.

The performance obligation with respect to firm contracts is a promise to provide a single type of service (transportation or terminalling) daily over the life of the contract, which is fundamentally a "stand-ready" service. While there can be multiple activities required to be performed, these activities are not separable because such activities in combination are required to successfully transfer the overall service for which the customer has contracted. The fixed consideration of the

transaction price is allocated ratably over the life of the contract and revenue for the fixed consideration is recognized over time, because the customer simultaneously receives and consumes the benefit of this “stand-ready” service. Incremental fees associated with actual volume for each respective period are recognized as revenue in the period the incremental volume of service is performed.

The performance obligation with respect to interruptible contracts is also a promise to provide a single type of service, but such promise is made on a case-by-case basis at the time the customer requests the service and/or product and we accept the customer’s request. Revenue is recognized for interruptible contracts at the time the services are performed.

#### ***Sunoco LP’s fuel distribution revenue***

Revenues from Sunoco LP’s fuel distribution segment are derived from the sale of fuel, non-fuel and lease income. Fuel sales consist primarily of the sale of motor fuel under supply agreements with third-party customers and affiliates. Fuel supply contracts with Sunoco LP’s customers generally provide that it distributes motor fuel at a price based on a formula which includes published rates, volume-based profit margin and other terms specific to the agreement. The customer is invoiced the agreed-upon price with most payment terms ranging less than 30 days. If the consideration promised in a contract includes a variable amount, Sunoco LP estimates the variable consideration amount and factors in such estimate to determine the transaction price under the expected value method. Revenue is recognized under the motor fuel contracts at the point in time the customer takes control of the fuel. At the time control is transferred to the customer the sale is considered final, because the agreements do not grant customers the right to return motor fuel. To determine when control transfers to the customer, the shipping terms of the contract are assessed as a primary indicator of the transfer of control. For free on board (“FOB”) shipping point terms, revenue is recognized at the time of shipment. The performance obligation with respect to the sale of goods is satisfied at the time of shipment since the customer gains control at this time under the terms. Shipping and/or handling costs that occur before the customer obtains control of the goods are deemed to be fulfillment activities and are accounted for as fulfillment costs. Once the goods are shipped, Sunoco LP is precluded from redirecting the shipment to another customer and revenue is recognized. Non-fuel revenue includes merchandise revenue that comprises the in-store merchandise and food service sales at company-operated retail stores and other revenue such as credit card processing, car washes, lottery and other services. Lease revenue is derived from the leasing or subleasing of real estate used in the retail distribution of motor fuels.

#### ***Sunoco LP’s pipeline systems revenue***

Revenues from Sunoco LP’s pipeline systems segment are derived from interstate and intrastate pipeline transportation of refined products, crude oil and anhydrous ammonia and the applicable pipeline tariff on a per barrel basis for crude oil or refined products and on a per ton basis for ammonia.

#### ***Sunoco LP’s terminals revenue***

Revenues from Sunoco LP’s terminals segment include fees for tank storage agreements, under which a customer agrees to pay for a certain amount of storage in a tank over a period of time (storage terminal revenues) and throughput agreements, under which a customer pays a fee per barrel for volumes moving through Sunoco LP’s terminals (throughput terminal revenues). Sunoco LP’s terminals also provide blending, additive injections, handling and filtering services for which Sunoco LP charges additional fees. Additionally, Sunoco LP leases certain of its storage tanks in exchange for a fixed fee, subject to an annual consumer price index adjustment.

#### ***Sunoco LP’s refinery revenue***

Revenues from Sunoco LP’s refinery segment are derived from refined products, generated environmental compliance credits and excess crude oil sales are recognized when delivered and the customer obtains control of such inventory, which is typically when title passes and the customer is billed. All revenues are reported inclusive of shipping and handling costs billed and exclusive of any sales taxes billed to customers where applicable. Shipping and handling costs incurred are reported in cost of sales.

#### ***USAC’s contract operations revenue***

USAC’s revenue from contracted compression, natural gas treating and maintenance services is recognized ratably under its fixed-fee contracts over the term of the contract as services are provided to its customers. Initial contract terms typically range from six months to five years; however, USAC usually continues to provide compression services at a specific location beyond the initial contract term, either through contract renewal or on a month-to-month or longer basis. USAC primarily enters into fixed-fee contracts whereby its customers are required to pay the monthly fee even during periods of limited or disrupted throughput. Services are generally billed monthly, one month in advance of the commencement of the

service month, except for certain customers who are billed at the beginning of the service month, and payment is generally due 30 days after receipt of the invoice. Amounts invoiced in advance are recorded as deferred revenue until earned, at which time they are recognized as revenue. The amount of consideration USAC receives and revenue it recognizes is based upon the fixed fee rate stated in each service contract.

Variable consideration exists in select contracts when billing rates vary based on actual equipment availability or volume of total installed horsepower.

USAC's contracts with customers may include multiple performance obligations. For such arrangements, USAC allocates revenues to each performance obligation based on its relative standalone service fee. USAC generally determines standalone service fees based on the service fees charged to customers or using expected cost plus margin.

The majority of USAC's service performance obligations are satisfied over time as services are rendered at selected customer locations on a monthly basis and based upon specific performance criteria identified in the applicable contract. The monthly service for each location is substantially the same service month to month and is promised consecutively over the service contract term. USAC measures progress and performance of the service consistently using a straight-line, time-based method as each month passes, because its performance obligations are satisfied evenly over the contract term as the customer simultaneously receives and consumes the benefits provided by its service. If variable consideration exists, it is allocated to the distinct monthly service within the series to which such variable consideration relates. USAC has elected to apply the invoicing practical expedient to recognize revenue for such variable consideration, as the invoice corresponds directly to the value transferred to the customer based on its performance completed to date.

There are typically no material obligations for returns or refunds. USAC's standard contracts do not usually include material non-cash consideration.

#### ***USAC's retail parts and services revenue***

USAC's retail parts and services revenue is primarily earned on directly reimbursable freight and crane charges that are the financial responsibility of USAC's customers and maintenance work on units at its customers' locations that are outside the scope of its core maintenance activities. Revenue from retail parts and services is recognized at the point in time the part is transferred or service is provided and control is transferred to the customer. At such time, the customer has the ability to direct the use of the benefits of such part or service after USAC has performed its services. USAC bills upon completion of the service or transfer of the parts, and payment is generally due 30 days after receipt of the invoice. The amount of consideration USAC receives and revenue it recognizes is based on the invoice amount. There are typically no material obligations for returns, refunds, or warranties. USAC's standard contracts do not usually include material variable or non-cash consideration.

#### ***All other revenue***

Our all other segment primarily includes our compression equipment business which provides full-service compression design and manufacturing services for the oil and gas industry. It also includes the management of coal and natural resources properties and the related collection of royalties. We also earn revenues from other land management activities, such as selling standing timber, leasing coal-related infrastructure facilities and collecting oil and gas royalties. These operations also include end-user coal handling facilities.

#### **Contract Balances with Customers**

The Partnership satisfies its obligations by transferring goods or services in exchange for consideration from customers. The timing of performance may differ from the timing the associated consideration is paid to or received from the customer, thus resulting in the recognition of a contract asset or a contract liability.

The Partnership recognizes a contract asset when making upfront consideration payments to certain customers or when providing services to customers prior to the time at which the Partnership is contractually allowed to bill for such services.

The Partnership recognizes a contract liability if the customer's payment of consideration precedes the Partnership's fulfillment of the performance obligations. Certain contracts contain provisions requiring customers to pay a fixed minimum fee, but allows customers to apply such fees against services to be provided at a future point in time. These amounts are reflected as deferred revenue until the customer applies the deficiency fees to services provided or becomes unable to use the fees as payment for future services due to expiration of the contractual period the fees can be applied or physical inability of the customer to utilize the fees due to capacity constraints. Additionally, Sunoco LP maintains some franchise agreements requiring dealers to make one-time upfront payments for long-term license agreements. Sunoco LP recognizes a contract liability when the upfront payment is received and recognizes revenue over the term of the license.

The following table summarizes the consolidated activity of our contract liabilities:

|                                   | Contract Liabilities |
|-----------------------------------|----------------------|
| Balance, December 31, 2023        | \$ 749               |
| Additions                         | 1,256                |
| Revenue recognized                | (1,246)              |
| Balance, December 31, 2024        | 759                  |
| Additions                         | 478                  |
| Parkland acquisition by Sunoco LP | 84                   |
| Revenue recognized                | (576)                |
| Balance, December 31, 2025        | \$ 745               |

The balances of Sunoco LP's contract assets and contract liabilities as of December 31, 2025, 2024 and 2023 were as follows:

|   | December 31, |        |        |
|---|--------------|--------|--------|
|   | 2025         | 2024   | 2023   |
| <b>Contract Balances</b>                          |              |        |        |
| Contract assets                                   | \$ 480       | \$ 288 | \$ 256 |
| Accounts receivable from contracts with customers | 1,686        | 1,084  | 809    |
| Contract liabilities                              | 125          | 39     | —      |

#### ***Costs to Obtain or Fulfill a Contract***

Sunoco LP recognizes an asset from the costs incurred to obtain a contract (e.g. sales commissions) only if it expects to recover those costs. On the other hand, the costs to fulfill a contract are capitalized if the costs are specifically identifiable to a contract, would result in enhancing resources that will be used in satisfying performance obligations in the future and are expected to be recovered. These capitalized costs are recorded as a part of other current assets and other non-current assets and are amortized on a systematic basis consistent with the pattern of transfer of the goods or services to which such costs relate. The amount of amortization expense that Sunoco LP recognized for the years ended December 31, 2025, 2024 and 2023 was \$41 million, \$35 million and \$29 million, respectively. Sunoco LP has also made a policy election of expensing the costs to obtain a contract, as and when they are incurred, in cases where the expected amortization period is one year or less.

#### **Performance Obligations**

At contract inception, the Partnership assesses the goods and services promised in its contracts with customers and identifies a performance obligation for each promise to transfer a good or service (or bundle of goods or services) that is distinct. To identify the performance obligations, the Partnership considers all the goods or services promised in the contract, whether explicitly stated or implied based on customary business practices. For a contract that has more than one performance obligation, the Partnership allocates the total contract consideration it expects to be entitled to, to each distinct performance obligation based on a standalone-selling price basis. Revenue is recognized when (or as) the performance obligations are satisfied, that is, when the customer obtains control of the good or service. Certain of our contracts contain variable components, which, when combined with the fixed component are considered a single performance obligation. For these types of contracts, only the fixed component of the contracts are included in the following table.

Sunoco LP distributes fuel under long-term contracts to branded distributors, branded and unbranded third-party dealers, and branded and unbranded retail fuel outlets. Sunoco LP branded supply contracts with distributors generally have both time and volume commitments that establish contract duration. These contracts have an initial term of approximately ten years, with an estimated volume-weighted term remaining of approximately five years.

Sunoco LP is party to a 15-year take-or-pay fuel supply agreement in which the distributor is required to purchase a volume of fuel that provides Sunoco LP a minimum amount of gross profit annually. Sunoco LP expects to recognize this revenue in accordance with the contract as Sunoco LP transfers control of the product to the customer. However, in case of annual shortfall, Sunoco LP will recognize the amount payable by the distributor at the sooner of the time at which the distributor makes up the shortfall or becomes contractually or operationally unable to do so. The transaction price of the

contract is variable in nature, fluctuating based on market conditions. The Partnership has elected to take the practical expedient not to estimate the amount of variable consideration allocated to wholly unsatisfied performance obligations.

In some contractual arrangements, Sunoco LP grants dealers a franchise license to operate Sunoco LP's retail stores over the life of a franchise agreement. In return for the grant of the retail store license, the dealer makes a one-time nonrefundable franchise fee payment to Sunoco LP plus sales based royalties payable to Sunoco LP at a contractual rate during the period of the franchise agreement. Under the requirements of ASC Topic 606, the franchise license is deemed to be a symbolic license for which recognition of revenue over time is the most appropriate measure of progress toward complete satisfaction of the performance obligation. Revenue from this symbolic license is recognized evenly over the life of the franchise agreement.

As of December 31, 2025, the aggregate amount of transaction price allocated to unsatisfied (or partially satisfied) performance obligations was \$33.61 billion, and the Partnership expects to recognize this amount as revenue within the time bands illustrated below:

|  | Years Ending December 31, |          |          | Thereafter | Total     |
|--|---------------------------|----------|----------|------------|-----------|
|  | 2026                      | 2027     | 2028     |            |           |
| Revenue expected to be recognized on contracts with customers existing as of December 31, 2025 | \$ 7,895                  | \$ 6,379 | \$ 4,808 | \$ 14,523  | \$ 33,605 |

### Practical Expedients Utilized by the Partnership

The Partnership elected the following practical expedients in accordance with Topic 606:

- **Right to invoice:** The Partnership elected to utilize an output method to recognize revenue that is based on the amount to which the Partnership has a right to invoice a customer for services performed to date, if that amount corresponds directly with the value provided to the customer for the related performance or its obligation completed to date. As such, the Partnership recognized revenue in the amount to which it had the right to invoice customers.
- **Significant financing component:** The Partnership elected not to adjust the promised amount of consideration for the effects of significant financing component if the Partnership expects, at contract inception, that the period between the transfer of a promised good or service to a customer and when the customer pays for that good or service will be one year or less.
- **Unearned variable consideration:** The Partnership elected to only disclose the unearned fixed consideration associated with unsatisfied performance obligations related to our various customer contracts which contain both fixed and variable components.
- **Incremental costs of obtaining a contract:** The Partnership generally expenses sales commissions when incurred because the amortization period would have been less than one year. We record these costs within general and administrative expenses. The Partnership elected to expense the incremental costs of obtaining a contract when the amortization period for such contracts would have been one year or less.
- **Shipping and handling costs:** The Partnership elected to account for shipping and handling activities that occur after the customer has obtained control of a good as fulfillment activities (i.e., an expense) rather than as a promised service.
- **Measurement of transaction price:** The Partnership has elected to exclude from the measurement of transaction price all taxes assessed by a governmental authority that are both imposed on and concurrent with a specific revenue-producing transaction and collected by the Partnership from a customer (i.e., sales tax, value added tax, etc.).
- **Variable consideration of wholly unsatisfied performance obligations:** The Partnership has elected to exclude the estimate of variable consideration to the allocation of wholly unsatisfied performance obligations.

## 13. LEASE ACCOUNTING:

### Lessee Accounting

The Partnership leases terminal facilities, tank cars, office space, land and equipment under non-cancelable operating leases whose initial terms are typically five to 15 years, with some real estate leases having terms of 40 years or more, along with options that permit renewals for additional periods. At the inception of each, we determine if the arrangement is a lease or contains an embedded lease and review the facts and circumstances of the arrangement to classify lease assets as operating or finance leases under Topic 842. The Partnership has elected not to record any leases with terms of 12 months or less on our consolidated balance sheets.

At present, the majority of the Partnership's active leases are classified as operating in accordance with Topic 842. Balances related to operating leases are included in operating lease ROU assets, accrued and other current liabilities, operating lease current liabilities and non-current operating lease liabilities in our consolidated balance sheets. Finance leases represent a small portion of the active lease agreements and are included in finance lease ROU assets, current maturities of long-term debt and long-term debt, less current maturities in our consolidated balance sheets. The ROU assets represent the Partnership's right to use an underlying asset for the lease term and lease liabilities represent the obligation of the Partnership to make minimum lease payments arising from the lease for the duration of the lease term.

Most leases include one or more options to renew, with renewal terms that can extend the lease term from one to 20 years or greater. The exercise of lease renewal options is typically at the sole discretion of the Partnership and lease extensions are evaluated on a lease-by-lease basis. Leases containing early termination clauses typically require the agreement of both parties to the lease. At the inception of a lease, all renewal options reasonably certain to be exercised are considered when determining the lease term. Presently, the Partnership does not have leases that include options to purchase or automatic transfer of ownership of the leased property to the Partnership. The depreciable life of lease assets and leasehold improvements are limited by the expected lease term.

To determine the present value of future minimum lease payments, we use the implicit rate when readily determinable. Presently, because many of our leases do not provide an implicit rate, the Partnership applies its incremental borrowing rate based on the information available at the lease commencement date to determine the present value of minimum lease payments. The operating and finance lease ROU assets include any lease payments made and exclude lease incentives.

Minimum rent payments are expensed on a straight-line basis over the term of the lease. In addition, some leases require additional contingent or variable lease payments, which are based on the factors specific to the individual agreement. Variable lease payments the Partnership is typically responsible for include payment of real estate taxes, maintenance expenses and insurance.

For short-term leases (leases that have term of twelve months or less upon commencement), lease payments are recognized on a straight-line basis and no ROU assets are recorded.

The components of operating and finance lease amounts recognized in the accompanying consolidated balance sheets as of December 31, 2025 and 2024 were as follows:

|   | December 31, |        |
|---|--------------|--------|
|   | 2025         | 2024   |
| <b>Operating leases:</b>                |              |        |
| Lease right-of-use assets, net          | \$ 1,736     | \$ 753 |
| Operating lease current liabilities     | 245          | 67     |
| Accrued and other current liabilities   |              |        |
| Non-current operating lease liabilities | 1,515        | 730    |
| <b>Finance leases:</b>                  |              |        |
| Property, plant and equipment, net      | \$ 1         | \$ 1   |
| Lease right-of-use assets, net          | 104          | 56     |
| Current maturities of long-term debt    | 25           | 8      |
| Long-term debt, less current maturities | 82           | 50     |
| Other non-current liabilities           | 1            | 1      |

The components of lease expense for the years ended December 31, 2025 and 2024 were as follows:

|                               | Income Statement Location                     | Year Ended December 31, |        |
|-------------------------------|---|-------------------------|--------|
|                               |   | 2025                    | 2024   |
| Operating lease costs:        |   |                         |        |
| Operating lease cost          | Cost of goods sold                            | \$ —                    | \$ 1   |
| Operating lease cost          | Operating expenses                            | 116                     | 71     |
| Operating lease cost          | Selling, general and administrative           | 21                      | 19     |
| Total operating lease costs   |   | 137                     | 91     |
| Finance lease costs:          |   |                         |        |
| Amortization of lease assets  | Depreciation, depletion and amortization      | 5                       | 2      |
| Interest on lease liabilities | Interest expense, net of capitalized interest | 3                       | 2      |
| Total finance lease costs     |   | 8                       | 4      |
| Short-term lease cost         | Operating expenses                            | 105                     | 69     |
| Variable lease cost           | Operating expenses                            | 12                      | 19     |
| Lease costs, gross            |   | 262                     | 183    |
| Less: Sublease income         | Other revenue                                 | 35                      | 45     |
| Lease costs, net              |   | \$ 227                  | \$ 138 |

The weighted-average remaining lease terms and weighted-average discount rates as of December 31, 2025 and 2024 were as follows:

|  | December 31, |      |
|--|--------------|------|
|  | 2025         | 2024 |
| Weighted-average remaining lease term (years): |              |      |
| Operating leases                               | 20           | 18   |
| Finance leases                                 | 14           | 15   |
| Weighted-average discount rate (%):            |              |      |
| Operating leases                               | 6 %          | 6 %  |
| Finance leases                                 | 5 %          | 6 %  |

Cash flows and non-cash activity related to leases for the years ended December 31, 2025 and 2024 were as follows:

|   | Year Ended December 31, |         |
|---|-------------------------|---------|
|   | 2025                    | 2024    |
| Operating cash flows from operating leases                            | \$ (113)                | \$ (94) |
| Operating cash flows from finance leases                              | (3)                     | (2)     |
| Financing cash flows from finance leases                              | (9)                     | (6)     |
| Lease assets obtained in exchange for new finance lease liabilities   | 15                      | 1       |
| Lease assets obtained in exchange for new operating lease liabilities | 281                     | 6       |

Maturities of lease liabilities as of December 31, 2025 are as follows:

|                                    | Operating leases | Finance leases | Total    |
|------------------------------------|------------------|----------------|----------|
| 2026                               | \$ 288           | \$ 26          | \$ 314   |
| 2027                               | 236              | 19             | 255      |
| 2028                               | 210              | 18             | 228      |
| 2029                               | 183              | 14             | 197      |
| 2030                               | 165              | 9              | 174      |
| Thereafter                         | 1,661            | 53             | 1,714    |
| Total lease payments               | 2,743            | 139            | 2,882    |
| Less: present value discount       | 983              | 31             | 1,014    |
| Present value of lease liabilities | \$ 1,760         | \$ 108         | \$ 1,868 |

#### Lessor Accounting

Sunoco LP leases or subleases a portion of its real estate portfolio to third-party companies as a stable source of long-term revenue. Sunoco LP's lessor and sublease portfolio consists mainly of operating leases with convenience store operators. At this time, most lessor agreements contain five-year terms with renewal options to extend and early termination options based on established terms specific to the individual agreement. Additionally, Sunoco LP leases certain of its storage tanks in exchange for a fixed fee, subject to an annual consumer price index adjustment.

Sunoco LP's future minimum operating lease payments receivable as of December 31, 2025 are as follows:

|                               | Lease Payments |
|-------------------------------|----------------|
| 2026                          | \$ 154         |
| 2027                          | 124            |
| 2028                          | 98             |
| 2029                          | 78             |
| 2030                          | 68             |
| Thereafter                    | 369            |
| Total undiscounted cash flows | \$ 891         |

#### 14. DERIVATIVE ASSETS AND LIABILITIES:

##### Commodity Price Risk

We are exposed to market risks related to the volatility of commodity prices. To manage the impact of volatility from these prices, we utilize various exchange-traded and OTC commodity financial instrument contracts. These contracts consist primarily of futures, swaps and options and are recorded at fair value in our consolidated balance sheets.

We use futures and basis swaps, designated as fair value hedges, to hedge our natural gas inventory stored in our Bammel storage facility. At hedge inception, we lock in a margin by purchasing gas in the spot market or off-peak season and entering into a financial contract. Changes in the spreads between the forward natural gas prices and the physical inventory spot price result in unrealized gains or losses until the underlying physical gas is withdrawn and the related designated derivatives are settled. Once the gas is withdrawn and the designated derivatives are settled, the previously unrealized gains or losses associated with these positions are realized.

We use futures, swaps and options to hedge the sales price of natural gas we retain for fees in our intrastate transportation and storage segment and operational gas sales on our interstate transportation and storage segment. These contracts are not designated as hedges for accounting purposes.

We use NGL and crude derivative swap contracts to hedge forecasted sales of NGL and condensate equity volumes we retain for fees in our midstream segment whereby our subsidiaries generally gather and process natural gas on behalf of producers, sell the resulting residue gas and NGL volumes at market prices and remit to producers an agreed upon percentage of the proceeds based on an index price for the residue gas and NGL. These contracts are not designated as hedges for accounting purposes.

We utilize swaps, futures and other derivative instruments to mitigate the risk associated with market movements in the price of natural gas, refined products and NGLs to manage our storage facilities and the purchase and sale of purity NGL. These contracts are not designated as hedges for accounting purposes.

We use futures and swaps to achieve ratable pricing of crude oil purchases, to convert certain expected refined product sales to fixed or floating prices, to lock in margins for certain refined products and to lock in the price of a portion of natural gas purchases or sales. These contracts are not designated as hedges for accounting purposes.

We use financial commodity derivatives to take advantage of market opportunities in our trading activities which complement our intrastate transportation and storage segment's operations and are netted in cost of products sold in our consolidated statements of operations. We also have trading and marketing activities related to power and natural gas in our all other segment which are also netted in cost of products sold. As a result of our trading activities and the use of derivative financial instruments in our intrastate transportation and storage segment, the degree of earnings volatility that can occur may be significant, favorably or unfavorably, from period to period. We attempt to manage this volatility through the use of daily position and profit and loss reports provided to our risk oversight committee, which includes members of senior management, and the limits and authorizations set forth in our commodity risk management policy.

The following table details our outstanding commodity-related derivatives:

|   | December 31, 2025 |           | December 31, 2024 |           |

| <b>Mark-to-Market Derivatives</b>       |                   |           |                   |           |
| Natural Gas (BBtu)                      | (233,645)         | 2026-2028 | (146,700)         | 2025-2027 |
| Power (Megawatt):                       | (461,896)         | 2026-2029 | (151,697)         | 2025-2029 |
| Crude, NGL and refined products (MBbls) | (59,247)          | 2026-2029 | (39,361)          | 2025-2027 |
| Other                                   | *                 | 2026-2042 | —                 | —         |
| <b>Fair Value Hedging Derivatives</b>   |                   |           |                   |           |
| Natural Gas (BBtu)                      | (100,346)         | 2026      | (94,340)          | 2025      |

\* Forward contracts consisting of 54 million RINs maturing in 2026 and emission credits of 747,038 metric tons maturing through 2042.

#### Credit Risk and Customers

Credit risk refers to the risk that a counterparty may default on its contractual obligations resulting in a loss to the Partnership. Credit policies have been approved and implemented to govern the Partnership's portfolio of counterparties with the objective of mitigating credit losses. These policies establish guidelines, controls and limits to manage credit risk within approved tolerances by mandating an appropriate evaluation of the financial condition of existing and potential counterparties, monitoring agency credit ratings and by implementing credit practices that limit exposure according to the risk profiles of the counterparties. Furthermore, the Partnership may, at times, require collateral under certain circumstances to mitigate credit risk as necessary. The Partnership also uses industry standard commercial agreements which allow for the netting of exposures associated with transactions executed under a single commercial agreement. Additionally, we utilize master netting agreements to offset credit exposure across multiple commercial agreements with a single counterparty or affiliated group of counterparties.

Our natural gas transportation and midstream revenues are derived significantly from companies that engage in exploration and production activities. In addition to oil and gas producers, the Partnership's counterparties consist of a diverse portfolio of customers across the energy industry, including petrochemical companies, commercial and industrial end-users, municipalities, gas and electric utilities, midstream companies and independent power generators. Our overall exposure may be affected positively or negatively by macroeconomic or regulatory changes that impact our counterparties to one extent or another. Currently, management does not anticipate a material adverse effect in our financial position or results of operations as a consequence of counterparty non-performance.

The Partnership has maintenance margin deposits with certain counterparties in the OTC market, primarily with independent system operators and with clearing brokers. Payments on margin deposits are required when the value of a derivative exceeds our pre-established credit limit with the counterparty. Margin deposits are returned to us on or about the settlement date for non-exchange traded derivatives, and we exchange margin calls on a daily basis for exchange traded transactions. Since the margin calls are made daily with the exchange brokers, the fair value of the financial derivative

instruments are deemed current and netted in deposits paid to vendors within other current assets in the consolidated balance sheets.

For financial instruments, failure of a counterparty to perform on a contract could result in our inability to realize amounts that have been recorded on our consolidated balance sheets and recognized in net income or other comprehensive income.

### Derivative Summary

The following table provides a summary of our derivative assets and liabilities:

|  | Fair Value of Derivative Instruments |                      |                       |                      |

**15. RETIREMENT BENEFITS:**

**Savings and Profit Sharing Plans**

We and our subsidiaries sponsor defined contribution savings and profit sharing plans, which collectively cover virtually all eligible employees, including those of Sunoco LP and USAC. Employer matching contributions are calculated using a formula based on employee contributions. We and our subsidiaries made matching contributions of \$122 million, \$103 million and \$86 million to these 401(k) savings plans for the years ended December 31, 2025, 2024 and 2023, respectively.

## Pension and Other Postretirement Benefit Plans

Certain of the Partnership's subsidiaries sponsor pension and/or other postretirement benefit plans that provide benefits to a defined group of retirees. The following table contains information at the dates indicated about the obligations and funded status of pension and other postretirement plans on a combined basis:

|  | December 31, 2025 |                |                               | December 31, 2024 |                |                               |
|--|-------------------|----------------|-------------------------------|-------------------|----------------|-------------------------------|

**Assumptions**

The weighted-average assumptions used in determining benefit obligations at the dates indicated are shown in the following table:

|  | December 31, 2025 |                               | December 31, 2024 |                               |
|--|-------------------|-------------------------------|-------------------|-------------------------------|
|  | Pension Benefits  | Other Postretirement Benefits | Pension Benefits  | Other Postretirement Benefits |
|  | Discount rate     | 5.40 %                        | 4.89 %            | 4.80 %                        |

The weighted-average assumptions used in determining net periodic benefit cost for the periods presented are shown in the following table:

|                            | December 31, 2025 |                               | December 31, 2024 |                               |
|----------------------------|-------------------|-------------------------------|-------------------|-------------------------------|
|                            | Pension Benefits  | Other Postretirement Benefits | Pension Benefits  | Other Postretirement Benefits |
|                            | Discount rate     | 5.40 %                        | 4.89 %            | 5.40 %                        |
| Expected return on assets: |                   |                               |                   |                               |
| Tax exempt accounts        | 7.00 %            | 7.00 %                        | 7.00 %            | 7.00 %                        |
| Taxable accounts           | — %               | 4.75 %                        | 4.26 %            | 4.75 %                        |

The long-term expected rate of return on plan assets was estimated based on a variety of factors including the historical investment return achieved over a long-term period, the targeted allocation of plan assets and expectations concerning future returns in the marketplace for both equity and fixed income securities. Current market factors such as inflation and

interest rates are evaluated before long-term market assumptions are determined. Peer data and historical returns are reviewed to ensure reasonableness and appropriateness.

The assumed health care cost trend weighted-average rates used to measure the expected cost of benefits covered by the plans are shown in the following table:

|  | December 31, |        |
|--|--------------|--------|
|  | 2025         | 2024   |
| Health care cost trend rate  | 7.49 %       | 7.44 % |
| Rate to which the cost trend is assumed to decline (the ultimate trend rate) | 5.18 %       | 5.09 % |
| Year that the rate reaches the ultimate trend rate                           | 2033         | 2032   |

Changes in the health care cost trend rate assumptions are not expected to have a significant impact on postretirement benefits.

### Plan Assets

The fair value of the pension plan assets by asset category at the dates indicated is as follows:

| Asset Category:           | Fair Value Total | Fair Value Measurements at December 31, 2025 |         |         |
|---------------------------|------------------|--|---------|---------|
|                           |                  | Level 1                                      | Level 2 | Level 3 |
| Cash and cash equivalents | \$ 28            | \$ 28  | \$ —    | \$ —    |

| Asset Category:             | Fair Value Total | Fair Value Measurements at December 31, 2024 |              |             |
|-----------------------------|------------------|--|--------------|-------------|
|                             |                  | Level 1                                      | Level 2      | Level 3     |
| Cash and cash equivalents   | \$ 81            | \$ 81  | \$ —         | \$ —        |
| Mutual funds <sup>(1)</sup> | 65               | 21   | 44           | —           |
| Fixed income securities     | 36               | 36   | —            | —           |
| Total                       | <u>\$ 182</u>    | <u>\$ 138</u>                                | <u>\$ 44</u> | <u>\$ —</u> |

<sup>(1)</sup> Comprised of approximately 100% equities as of December 31, 2024.

The fair value of other postretirement plan assets by asset category at the dates indicated is as follows:

| Asset category:             | Fair Value Total | Fair Value Measurements at December 31, 2025 |               |             |
|-----------------------------|------------------|--|---------------|-------------|
|                             |                  | Level 1                                      | Level 2       | Level 3     |
| Cash and cash equivalents   | \$ 4             | \$ 4   | \$ —          | \$ —        |

<sup>(1)</sup> Primarily composed of market index funds as of December 31, 2024.

The Level 1 plan assets are valued based on active market quotes. The Level 2 plan assets are valued based on the net asset value per share (or its equivalent) of the investments, which was not determinable through publicly published sources but was calculated consistent with authoritative accounting guidelines.

### Contributions

We expect to contribute \$2 million to pension plans and \$1 million to other postretirement plans in 2026. The cost of the plans are funded in accordance with federal regulations, not to exceed the amounts deductible for income tax purposes.

### Benefit Payments

The Partnership's estimate of expected benefit payments, which reflect expected future service, as appropriate, in each of the next five years and in the aggregate for the five years thereafter are shown in the following table:

|             | Pension Benefits - Funded Plans | Pension Benefits - Unfunded Plans | Other Postretirement Benefits (Gross, Before Medicare Part D) |
|-------------|---------------------------------|-----------------------------------|---|
| 2026        | \$ —                            | \$ 2                              | \$ 13   |
| 2027        | —                               | 2                                 | 13  |
| 2028        | —                               | 2                                 | 12  |
| 2029        | —                               | 2                                 | 11  |
| 2030        | —                               | 1                                 | 11  |
| 2031 – 2035 | —                               | 4                                 | 45  |

The Medicare Prescription Drug Act provides for a prescription drug benefit under Medicare ("Medicare Part D") as well as a federal subsidy to sponsors of retiree health care benefit plans that provide a prescription drug benefit that is at least actuarially equivalent to Medicare Part D.

The Partnership does not expect to receive any Medicare Part D subsidies in any future periods.

## 16. REPORTABLE SEGMENTS:

Our reportable segments currently reflect the following segments, which conduct their business primarily in the United States:

- intrastate transportation and storage;
- interstate transportation and storage;
- midstream;
- NGL and refined products transportation and services;
- crude oil transportation and services;
- investment in Sunoco LP;
- investment in USAC; and
- all other.

Consolidated revenues and expenses reflect the elimination of all material intercompany transactions.

Revenues from our intrastate transportation and storage segment are primarily reflected in natural gas sales and gathering, transportation and other fees. Revenues from our interstate transportation and storage segment are primarily reflected in gathering, transportation and other fees. Revenues from our midstream segment are primarily reflected in natural gas sales, NGL sales and gathering, transportation and other fees. Revenues from our NGL and refined products transportation and services segment are primarily reflected in NGL sales and gathering, transportation and other fees. Revenues from our crude oil transportation and services segment are reflected in crude sales and gathering, transportation and other fees. Revenues from our investment in Sunoco LP segment are primarily reflected in refined product sales. Revenues from our investment in USAC segment are primarily reflected in gathering, transportation and other fees. Revenues from our all other segment are primarily reflected in natural gas sales.

We report Segment Adjusted EBITDA (defined below) as the measure of segment performance reviewed by our chief operating decision maker ("CODM"). The role of the CODM is held by the Partnership's co-chief executive officers ("co-

CEOs”). Both of the co-CEOs fulfill specific functions that impact the allocation of resources and assessment of performance among our reportable segments, including the approval of budgets and the evaluation of growth projects and acquisitions. The Partnership’s co-CEOs receive and review the same information with respect to the Partnership’s segment operating results.

The co-CEOs use Segment Adjusted EBITDA to allocate resources (including employees, property, and financial or capital resources) for each segment predominantly in the annual budget and forecasting process. The co-CEOs also use Segment Adjusted EBITDA to assess the performance for each segment and in the compensation of certain employees. The co-CEOs consider forecast-to-actual variances on a monthly basis when making decisions about allocating capital and personnel to the segments. Assets by segment are not a measure used to assess our performance by the co-CEOs and thus are not reported in our disclosures.

We define Segment Adjusted EBITDA as total Partnership earnings before interest, taxes, depreciation, depletion, amortization and other non-cash items, such as non-cash compensation expense, gains and losses on disposals of assets, the allowance for equity funds used during construction, unrealized gains and losses on commodity risk management activities, inventory valuation adjustments, non-cash impairment charges, losses on extinguishments of debt, certain foreign currency transaction gains and losses and other non-operating income or expense items, as well as certain non-recurring gains and losses. Inventory valuation adjustments that are excluded from the calculation of Adjusted EBITDA represent only the changes in lower of cost or market reserves on inventory that is carried at LIFO. These amounts are unrealized valuation adjustments applied to Sunoco LP’s fuel volumes remaining in inventory at the end of the period. Segment Adjusted EBITDA and consolidated Adjusted EBITDA reflect amounts for unconsolidated affiliates based on the same recognition and measurement methods used to record equity in earnings of unconsolidated affiliates. Adjusted EBITDA related to unconsolidated affiliates excludes the same items with respect to the unconsolidated affiliate as those excluded from the calculation of Segment Adjusted EBITDA and consolidated Adjusted EBITDA, such as interest, taxes, depreciation, depletion, amortization and other non-cash items. Although these amounts are excluded from Adjusted EBITDA related to unconsolidated affiliates, such exclusion should not be understood to imply that we have control over the operations and resulting revenues and expenses of such affiliates. We do not control our unconsolidated affiliates; therefore, we do not control the earnings or cash flows of such affiliates. The use of Segment Adjusted EBITDA or Adjusted EBITDA related to unconsolidated affiliates as an analytical tool should be limited accordingly.

The following tables present financial information by segment:

|   | Years Ended December 31, |                  |                  |

**CERTIFICATION OF CO-CHIEF EXECUTIVE OFFICER  
PURSUANT TO  
SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002**

I, Marshall S. McCrea, III, certify that:

1. I have reviewed this annual report on Form 10-K of Energy Transfer LP;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. I am responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under my supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to me by others within those entities, particularly during the period in which this report is being prepared;
  - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under my supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report my conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. I have disclosed, based on my most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize, and report financial information; and
  - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
